Music

Statement of Justin Miller, President, National Association of Broadcasters, Following His Meeting (Chicago, Friday 18) with James C. Petrillo, President American Federation of Musicians

"My visit with Mr. Petrillo was exploratory. It was not a meeting for negotiation.

"I wanted to meet Mr. Petrillo and his Executive Committee and sit down at a table with them to seek common ground. I want to learn firsthand their problems and their viewpoints. And I want them to learn firsthand, the problems and viewpoints of the various segments of American Broadcasting: non-network stations, network affiliated stations and networks.

"There is no reason to think that fair minded men, ready and willing to find an equitable basis for mutually satisfactory relations cannot ultimately resolve the problem on the dotted line rather than on the picket line. I feel certain that the millions of American radio listeners will join us in this common purpose to settle our problems around the conference table.

"I believe progress has been made. Over the week-end I will digest and evaluate the results forthcoming from today's meeting and will make a report to the Special Industry Committee which meets in Washington next week. And, throughout the series of scheduled NAB district meetings I shall continue to ascertain the needs and desires of the broadcasters as I have in the three district meetings just concluded on the Pacific coast."

NEW LEA BILL

Representative Lea (D., Cal.), introduced in the House on Jan. 14 the following bill (H. R. 5117) superseding a previous bill (H. R. 4737) introduced by him several weeks ago. (See NAB Reports, vol. 13, p. 545.)

The new bill which was referred to the Committee on Interstate and Foreign Commerce of which Lea is Chairman, follows in full:

A BILL

To amend title V of the Communications Act of 1934 so as to prohibit certain coercive practices affecting radio broadcasting.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title V of the Communications Act of 1934, as amended, is amended by inserting after section 505 thereof the following new section:

"Coercive Practices Affecting Broadcasting

"Sec. 506. (a) It shall be unlawful, by the use or express or implied threat of the use of force, violence, intimidation, or duress, or by the use or express or implied threat of the use of other means, to coerce, compel or constrain or attempt to coerce, compel or constrain a licensee—

"(1) to employ or agree to employ, in connection with the conduct of the broadcasting business of such licensee, any person or persons in excess of the number of employees wanted by such licensee; or

"(2) to pay or give or agree to pay or give any money or other thing of value in lieu of giving, or on account of failure to give, employment to any person or persons, in connection with the conduct of the broadcasting business of such licensee, in excess of the number of employees wanted by such licensee; or

"(3) to pay or agree to pay more than once for services performed in connection with the conduct of the broadcasting business of such licensee; or

"(4) to pay or give or agree to pay or give any money or other thing of value for services, in connection with the conduct of the broadcasting business of such licensee, which are not to be performed; or

"(5) to refrain, or agree to refrain, from broadcasting or from permitting the broadcasting of a noncommercial educational or cultural program in connection with which the participants receive no money or other thing of value for their services, other than their actual expenses, and such licensee neither pays nor gives any money or other thing of value for the privilege of broadcasting such program nor receives any money or other thing of value on account of the broadcasting of such program; or

"(6) to refrain, or agree to refrain, from broadcasting or permitting the broadcasting of any radio communication originating outside the United States.

(b) It shall be unlawful, by the use or express or implied threat of the use of force, violence, intimidation or duress, or by the use or express or implied threat of the use of other means, to coerce, compel or constrain or attempt to coerce, compel or constrain a licensee or any other person—

"(1) to pay or agree to pay tribute for the privilege of, or on account of, producing, preparing, manufacturing, selling, buying, renting, operating, using, or maintaining recordings, transcriptions, or mechanical, chemical, or electrical reproductions, or any other articles, equipment, machines, or materials, used or intended to be used in broadcasting or in the production, preparation, performance, or presentation of a program or programs for broadcasting; or

"(2) to accede to or impose any restriction upon such production, preparation, manufacture, sale, purchase, rental, operation, use, or maintenance, if such restriction is for the purpose of preventing or limiting the use of such articles, equipment, machines, or materials in broadcasting; or

"(3) to pay or agree to pay tribute on account of the broadcasting, by means of recordings or transcriptions, of a program previously broadcast, payment having been made, or agreed to be made, for the services actually rendered in the performance of such program.

(Continued on next page)
“(c) The provisions of subsection (a) or (b) of this section shall not be held to make unlawful the enforcement or attempted enforcement, by means lawfully employed, of any contract, right or legal obligation.

“(d) Whoever willfully violates any provision of subsection (a) or (b) of this section shall be guilty of a felony and, upon conviction thereof, shall be punished by imprisonment for not more than two years or by a fine of not more than $5,000, or both.

“(e) As used in this section the term 'licensee' includes the owner or owners, and the person or persons having control or management, of the radio station in respect of which a station license was granted.”

**Promotion**

**VICTORY LOAN SUPPORT TOPS 14 MILLION**

The broadcast industry hit the bull's eye again during the Victory Loan just as it did during the seven preceding War Loans. Stations, networks and their advertisers worked as a team to produce these magnificent and gratifying results.

Here are the facts, short and sweet, as compiled by NAB Research Department from reports from stations and networks:

**TOTAL VALUE OF VICTORY LOAN BROADCASTING** $14,124,853

**TOTAL VALUE OF VICTORY LOAN STATION ORIGINATIONS** $9,033,731

**TOTAL VALUE OF VICTORY LOAN NETWORK ORIGINATIONS** $5,091,122

**Total Value of Broadcasting for All 8 War Loans**

**Other good facts to remember and use in the right places** are the dollar value figures of broadcasting of War Loan Number 1-7, inclusive, and the grand total of all War Loans:

<table>

**Total All Loans** $95,283,595

* Estimate agreed upon by N.A.B. and Treasury.
system less encumbered by artificial restraints—a system
developing more freely under the laws of economics and
the statutes applicable generally to private enterprise.
The space so far provided by the Federal Communications
Commission for FM development has fulfilled this promise
for the greater area of the United States.

It would appear from the National Association of Broadcast-
ers' knowledge of the subject that in at least a limited
number of localities there are, or soon will be, more legally,
technically and financially qualified applicants for FM
licenses than there are channels available. This is a sub-
ject wherein the Commission may take judicial notice of
the number of FM station licenses and construction per-
mits which it has already granted as well as the number
of applications for construction permits now on file.

The National Association of Broadcasters is interested
in minimizing the possibility of artificial restraints which
may limit the opportunities for service to the public which
broadcasters desire to render. Since the number of avail-
able frequencies determines the number of broadcasters
who will be permitted to undertake FM service these fre-
quencies should be augmented, if possible, to insure ade-
quate service. Thus broadcasters who desire to serve the
people in their respective communities with the static free
service of FM broadcasting will be afforded a full oppor-
tunity in this field.

In the light of the increasing demand for permission
to construct FM stations, we respectfully urge the Federal
Communications Commission to make every possible effort
to secure and allocate at least 40 additional channels for
FM broadcasting, somewhere in the 42 to 88 megacycles
portion of the spectrum.

12 MORE FM GRANTS

The Commission on Wednesday (16) granted 12 addi-
tional FM stations making a total of 278 conditional
grants made to date.

At the same time 19 applications for metropolitan sta-
tions in the Chicago area were designated for hearing.

Following is a list of the grants:

OTHERS TO BE HELD IN APRIL-MAY

Cincinnati, Ohio
Virginia Beach, Va.
FCC

CLEAR CHANNEL HEARINGS

Hearings on clear channels opened before the Commission Monday (14). A preliminary report was submitted by Committee-4, composed of industry members, and informally established by the Commission several months ago for the purpose of working with the Department of Agriculture and the Census Bureau on two surveys which were conducted to determine whether clear channels were providing adequate programs and coverage for rural listeners.

"Attitudes of Rural People toward Radio Service," a survey made by the Bureau of Economics of the Department of Agriculture, was placed on record, and Agriculture officials who were active in making the survey testified on survey techniques which were used.

Dr. Angus Campbell, assistant chief of the Agriculture division which conducted the survey, was questioned at length by Louis G. Caldwell, Counsel for Clear Channel Broadcast Service.

Various organizations and representatives of regional stations were heard. This testimony continued into Wednesday (16) when only one session was held.

On Thursday (17) representatives of the FCC Engineering Department presented reports of three technical committees on questions relating to interference, satisfactory signals and distances encompassed for various signal strengths. Mr. Caldwell introduced in behalf of the Clear Channel group a comprehensive series of exhibits, further testimony on which is to be taken.

FCC RULES AND REGULATIONS AMENDED

The Commission has amended its Rules and Regulations by repealing sections 1.381 and 1.382 and substituting therefor new Rules and Regulations, sections 1.381 through 1.388. These rules become effective immediately except section 1.388 which had been promulgated as a proposed rule in accordance with the Commission's decision in the AVCO case.

In substance, the rules are a codification of the Commission's existing practice with respect to action on applications under Title III of the Communications Act. The rules set forth in detail when applications will be granted without a hearing and when they will be designated for hearing. Provision is made for the participation of interested persons in these hearings either by virtue of being named as parties to the proceedings by the Commission on its own motion or by filing a petition to intervene. Procedure is also specified for the filing of petitions for reconsideration in cases where applications are granted without hearing and petitions for rehearing where applications are granted or denied after hearing. The rules specifically provide when petitions to intervene or petitions for reconsideration or rehearing will be granted and under what circumstances they will be denied.

The new rules—except for section 1.388—are being adopted in final form and not as proposed rules. The reason for this is that the rules do not propose any departure from present Commission practice except insofar as a departure is required by recent Court decision. They are simply a codification of the practice which the Commission has been following for some years. However, the Commission will from time to time be pleased to receive comments or suggestions from any person concerning changes or amendments of these Rules and Regulations.

(Continued on next page)
The Commission also amended section 1.102 by adding the following footnote:

For specific rules regarding petitions to intervene in connection with applications under Title III, see section 1.385.

A similar footnote was also added in connection with section 1.271. The footnote reads:

For specific rules regarding petitions for rehearing in connection with applications under Title III, see section 1.387.

Sections 1.381 and 1.382 of the Commission’s Rules and Regulations are repealed and the following is substituted therefor:

**Action on Applications Under Title III**

§ 1.381 Grants without a hearing.—Where an application for radio facilities is proper upon its face, and where it appears from an examination of the application and supporting data that (1) the applicant is legally, technically and financially qualified; (2) a grant of the application would not involve modification, revocation, or non-renewal of any existing license or outstanding construction permit; (3) a grant of the application would not cause electrical interference to an existing station or station for which a construction permit is outstanding within its normally protected contour as prescribed by the applicable Rules and Regulations; (4) a grant of the application would not preclude the grant of any mutually exclusive application; and (5) a grant of the application would be in the public interest, the Commission will grant the application without a hearing.

§ 1.382 Partial grants.—Where the Commission without a hearing grants any application in part, or with any privileges, terms, or conditions other than those requested, the action of the Commission shall be considered as a grant of such application unless the applicant shall, within 20 days from the date on which public announcement of such grant is made, or from its effective date if a later date is specified, file with the Commission a written request for a hearing with respect to the part, or with respect to the privileges, terms, or conditions, not granted. Upon receipt of such request, the Commission will vacate its original action upon the application and set the application for hearing in the same manner as other applications are set for hearing.

§ 1.383 Designation for hearing.—Applications will be designated for hearing in the following cases:

(a) Where it does not appear from an examination of the application that the applicant is legally, technically or financially qualified; or

(b) Where a grant of the application would require the modification, revocation, or non-renewal of license of an existing station or of any outstanding construction permit; or

(c) Where a grant of the application would cause electrical interference to an existing station or station for which a construction permit is outstanding within its normally protected contour as prescribed by the applicable Rules and Regulations; or

(d) Where it does not appear from an examination of the application that a grant of the application will be in the public interest.

(e) Where a grant of the application would preclude the grant of an application or applications mutually exclusive with it. However, the Commission may, if public interest will be served thereby, make a conditional grant of one of the applications and designate all of the mutually exclusive applications for hearing. Such conditional grant will be made upon the express condition that such grant is subject to being withdrawn if at the hearing it is shown that public interest will be better served by a grant of one of the other applications. Such conditional grants will be issued only where it appears:

(i) That some or all of the applications were not filed in good faith but were filed for the purpose of delaying or hindering the grant of another application;

(ii) That public interest requires the prompt establishment of radio service in a particular community or area;

(iii) That a grant of one or more applications would be in the public interest and that a delay in making a grant to any applicant until after the conclusion of a hearing on all applications might jeopardize the rights of the United States under the provisions of international agreement to the use of the frequency in question; or

(iv) That a grant of one application would be in the public interest and that it appears from an examination of the remaining applications that they cannot be granted because they are in violation of provisions of the Communications Act, or of other statutes, or of the Commission’s rules and regulations.

§ 1.384 Procedure when case is designated for hearing.

(a) When an application has been designated for hearing, the Secretary of the Commission will mail a written notice to the applicant setting forth the action of the Commission designating the application for hearing, together with such statement of the Commission’s reasons therefore as shall be appropriate to the nature of the application. In order to avail himself of the opportunity to be heard, the applicant, in person or by his attorney, shall, within 15 days of the mailing of the notice of designation for hearing by the Commission, file with the Commission a written appearance stating that he will appear and present evidence on the issues specified in the statement of reasons furnished by the Commission on such date as may be fixed for the hearing. In cases involving applications for facilities other than AM broadcast, FM radio, television, the applicant shall submit with his appearance an additional copy of his application and supporting documents.

(b) The Commission will on its own motion name as parties to the hearing:

(i) Any existing licensee or holder of an outstanding construction permit who, if the application were granted, would suffer electrical interference within his normally protected contour as prescribed by the Commission’s Rules and Regulations.

(ii) Any existing licensee or holder of an outstanding construction permit whose license or construction permit would have to be modified or revoked, or whose application for renewal of license would have to be denied, if the application in question were granted.

(iii) Any person who, prior to the time the application in question was designated for hearing, had filed with the Commission a mutually exclusive application. Persons filing mutually exclusive applications for the application in question shall be named as parties only if the Commission in its discretion deems such action advisable.

§ 1.385 Petitions to intervene.—(a) Where the Commission has failed on its own motion to name as parties to a hearing any person specified in Section 1.384 (b), such person will be permitted to participate in the proceeding by filing a petition to intervene showing that he comes within the provisions of Section 1.384 (b). Where the petition to intervene is based upon a claim that a grant of the application would cause interference to an existing station or a station for which a construction permit is outstanding within its normally protected contour as prescribed by the applicable Rules and Regulations, the petition must be accompanied by an affidavit of a qualified radio engineer which shall show sufficiently to the Commission’s Standards of Good Engineering Practice or to actual measurements made in accordance with the methods prescribed by the Commission’s Standards of Good Engineering Practice that electrical interference will be caused to the existing station or station for which a construction permit is outstanding within the normally protected contour of the station.

(b) Any other person desiring to participate in the hearing may file a petition to intervene. The petition must set forth the interest of the petitioner in the proceedings and must show how such person’s participation would be in the public interest.

(Continued on next page)
will assist the Commission in the determination of the issues in question. The Commission in its discretion may grant or deny such petition or may permit intervention by such persons limited to particular issues or to a particular stage of the proceeding.

(e) The granting of any petition to intervene shall not have the effect of changing or enlarging the issues specified in the Commission’s notice of hearing unless the Commission shall on motion amend the same.

(d) Petitions to intervene under this section must be filed within the prescribed 15 days after the issues in the hearing have first been published in the Federal Register. Any person desiring to file a petition to intervene after the expiration of such 15 days must set forth the reason why it was not possible to file the petition within the prescribed 15 days. If delay is shown for delay in filing, the petition will not be granted.

§1.386 Motions to enlarge or change the issues.—Motions to enlarge or change the issues may be filed by any party to a hearing. Such motions must be filed with the Commission not later than 15 days after the issues in the hearing have first been published in the Federal Register. Any person desiring to file a motion to enlarge or change the issues after the expiration of such 15 days must set forth the reason why it was not possible to file the petition within the prescribed 15 days after public notice is given for delay in filing, the motion will not be granted.

§1.387 Petitions for reconsideration or for rehearing.—(a) Where an application has been granted without a hearing, any person aggrieved or whose interests would be adversely affected thereby may file a petition for reconsideration of such application, such petition must be filed with the Commission within 20 days after public notice is given of the Commission’s action in granting the application. Such petition will be granted if the petitioner shows that:

(i) Petitioner is an existing licensee or permittee; or

(ii) That petitioner is an existing licensee or permittee and a grant of the application would require the modification, revocation, or non-renewal of his license or construction permit; or

(iii) At the time the application was granted, petitioner had a mutually exclusive application pending before the Commission; or

(iv) A grant of the application is not in the public interest.

(b) Where an application has been granted or denied after hearing, petitions for rehearing may be filed within 20 days after public notice is given of the Commission’s action in granting or denying the application. Petitions for rehearing by persons not parties to the Commission’s hearing will not be granted unless good cause is shown as to why it was not possible for such person to participate earlier in the Commission’s proceeding.

(c) Where a petition for reconsideration or for rehearing is based upon a claim of electrical interference within the normally protected contour of an existing station or a station for which a construction permit is outstanding, such petition must be accompanied by an affidavit of a qualified radio engineer which shall evidence to the Commission’s Standards of Good Engineering Practice or to actual measurements made in accordance with the methods prescribed by the Commission’s Standards of Good Engineering Practice that electromagnetic interference will be caused to the station within its normally protected contour. If the claim of interference is not based upon actual measurements made in accordance with the Standards of Good Engineering Practice, it may be determined as to whether and to what extent the proposed assignee or transferee would be protected by the proposed sale and stating that others may file competing applications for the same facilities upon the same terms and conditions.

(d) Each petition for reconsideration or rehearing shall be subscribed as provided in Section 1.122 and served upon the parties participating in the hearing in the manner provided in Section 1.141. In the case of a petition for reconsideration of a decision, order, or requirement made without a hearing, the party filing the petition shall serve the same in the manner provided in Section 1.141 upon the party or parties to whom such decision, order, or requirement was made.

(e) Any opposition to a petition for reconsideration or rehearing may be filed within 10 days after the filing of such petition.

(f) Petitions for reconsideration or rehearing filed under this section may request (1) reconsideration, either in cases decided after hearing or in cases of applications granted without hearing; (2) reargument; (3) reopening of the proceedings; (4) amendment of any finding; or (5) such other relief as may be appropriate. Such petition shall state specifically the form of relief sought and, subject to this requirement, may contain alternative requests in what respect the decision, order, or requirement or any matter determined therein is claimed to be unjust, unwarranted, or erroneous, and with respect to any finding of fact specify the pages of record relied on. Where the petition is based upon a claim of newly discovered evidence, it must be accompanied by a verified statement of the facts relied upon, together with the facts relied on to show that the petitioner, with due diligence, could not have known or discovered such facts at the time of the hearing.

[Proposed Rule] §1.388 Special rules relating to action on applications for assignment and transfer of control. —

(a) Applications for consent to the assignment of a construction permit or license for an AM, FM, television, or other broadcast station or for the transfer of control of a corporation holding such a construction permit or license shall be filed with the Commission on Form F. C. C. No. 314 (Assignment of License) or F. C. C. No. 315 (Transfer of Control). Each application shall be accompanied by a copy of a proposed notice in form prescribed by the Commission which notice the licensee or permittee shall cause to be published at least twice a week for 3 weeks immediately following the filing of such application in a daily newspaper of general circulation published in the community in which the station is located. The notice shall state the terms and conditions of the proposed assignment or transfer, the name of the proposed assignee or transferee, and, further, that any other person desiring to purchase the facilities upon the same terms and conditions may file an application to this effect with the Federal Communications Commission within 60 days from the date of the first publication of the notice, which date shall be expressly set forth therein. Upon receipt of such application, the Commission itself will issue a similar public notice stating conditions of the proposed sale and stating that others may file competing applications for the same facilities upon the same terms and conditions.

(b) No action on any such application will be taken by the Commission for a period of 60 days from the date of filing, during which time any person desiring to purchase the facilities upon the same terms and conditions may file a competing application. In the case of such competing application, it shall be necessary for the applicant to execute only so much of the application form as relates to the proposed assignment or transfer—F. C. C. Form No. 314, Part II, and Form No. 315, Part III.

(c) If no competing application is filed during this 60-day period, the Commission will consider the original application upon its merits and will grant it if it appears from an examination of the application and supporting data that public interest will be served thereby; otherwise it will be designated for hearing. If, during such 60-day period, any other application is filed, all such applications will then be considered simultaneously upon their merits, and if, upon such consideration, it appears that the proposed assignee or transferee selected by the licensee is the best qualified and that the transfer would otherwise be in the public interest, the Commission will grant the original application without a hearing. If the Commission is unable to make such a determination upon consideration of the several applications, the original application and all competing applications will be designated (Continued on next page)
that the transfer is otherwise in the public interest, an
mission is of the opinion that the proposed assignee or
the Commission's consent to an assignment of the license
order will be entered granting the original application.
for hearing, to be heard in a consolidated proceeding, to
apply to an assignment or transfer from an executor or
duly appointed successor. This section, however, shall
there is an assignment from a decedent to his executor or
mit, involving no change in beneficial ownership; (2) where
competing applicant upon the same terms and conditions
transfer of control of the licensee or permittee, to. such
new terms and conditions the Commission shall
as stated in the original application or upon such other
terms and conditions as the parties may agree upon and
which new terms and conditions the Commission shall
find to be in the public interest.

(e) The provisions of this section shall not apply to
the following cases: (1) Where there is a reorganization
of a corporation which holds a license or construction per-
mit, involving no change in beneficial ownership; (2) where
there is an assignment from a decedent to his executor or
administrator or from the executor or administrator to his
duly appointed successor, in this section, however, shall
apply to an assignment or transfer from an executor or
administrator to heirs, trustees, or third persons; (3)
where there is an assignment from an individual or indivi-
duals to a corporation owned and controlled by such
individual or individuals without any change in their
respective interests or from a corporation to the indi-
vidual stockholders controlling such corporation when
there is no change in their respective interests; or (4)
any other assignment or transfer that does not involve any
change in the actual or beneficial ownership of the licensee.

RELAXATION OF RESTRICTIONS ON THE USE OF 550
AND 560 KILOCYCLES BY STANDARD
BROADCAST STATIONS

Effective immediately, the Commission advises that cer-
tain restrictions imposed on the use of 550 and 560 kilo-
cycles by standard broadcast stations, particularly in
coastal areas, have been removed.
Under previous policy adopted in cooperation with the
United States Navy Department the use of 550 kilocycles
has in general been restricted to powers of 1 kilowatt or
less. In some instances the establishment of new stations
on 550 kilocycles has been prevented because of the possi-
bleity of interference to Naval Communication. This
policy has been in force because of the Navy Department's
objections to interference that was, or would be, caused to
certain of their communication facilities operating on
frequencies adjacent to 550 kilocycles.
The Navy now advises the Commission that certain
readjustments of their communication activities made pos-
sible by the surrender of Japan make it unnecessary to
restrict the use of 550 kilocycles.
Under present Commission rules, broadcast stations may
operate on 550 kilocycles with power up to and including
a maximum of 5 kilowatts.
In connection with the use of frequencies below 550
kilocycles by standard broadcast stations, the Commission
wishes to point out that the possibility of assigning 540
kilocycles to the standard broadcast band is a recommenda-
tion which is to be submitted for consideration at the
next International Telecommunications Conference, and
that at the present time Commission rules do not provide
for the use of 540 kilocycles by standard broadcast stations.

BUCKLEY RETURNS TO FCC

Jack E. Buckley, formerly Lieutenant Colonel, U. S.
Army, has returned from military service and has re-
sumed his duties as Accountant in Charge of the New
York Accounting Office of the Commission. Prior to
to entering the service of the FCC in February, 1935, Mr.
Buckley was engaged in public accounting work and as
assistant controller of the Borden's Farm Products Com-
pany, Inc. In May, 1936, he was assigned to the position
of accountant in charge of the newly organized New
York Accounting Office of the Commission and served in
that capacity until he entered military service in Sep-
tember, 1942. Mr. Buckley also served in World War I.
William Berch Pitts of the New York Accounting Office
has been assigned to special duties in connection with the
Commission's study of the rate structure of The Western
Union Telegraph Company. Mr. Pitts has been a member
of the New York Accounting staff since January, 1942,
and he served as Accountant in Charge during Mr.
Buckley's leave for military service. He is a former
Senior Cost Accountant of the Department of Public
Utilities of the State of Arkansas and a Certified Public
Accountant from that state.

FLORIDA NEWS CLINIC HELD

Frank King, president, WMBR, and former NAB direc-
tor, announces that his station will begin the broadcast of
local news in the very near future. He said that he was
in accord with the general program of activity fostered by
the NAB Radio News Committee during the last year and
a half that "broadcast stations do have an obligation to
broadcast local as well as other news." "Local news is
feeling the pulse of the public. Local news in radio is a
must and it is personal contact that gets you the news.
We are in a position and have the obligation to give it
when it is hot. News is the biggest daytime serial in the
world—it's up to us to handle it like professionals."

That's what Fred Mizer, manager, WQAM, Miami, Flor-
ida, told broadcasters at the NAB-Florida Association of
Broadcasters Radio News Clinic, held at the Sheraton
Plaza Hotel, Daytona Beach, Saturday (12). His belief
was shared by the others, including the visiting broad-
caster from Macon, Frank Hubbs, news editor, WMAZ.
In addition to Hubbs there are four more on the Macon
news staff. The station gives complete local news coverage.

James M. Le Gate, president, Florida Association of
Broadcasters, and general manager, WIOD, Miami, pre-
sided at the Clinic, with discussion led by E. R. Vadebon-
coeur, vice president, WSYR, Syracuse, N. Y., chairman
of the NAB Radio News Committee. Commentary was fur-
ished by Arthur Stringer, secretary, NAB Radio News
Committee. Clinic host and hostess at a five o'clock recep-
tion were Commander and Mrs. W. Wright Esch, WMFJ,
Daytona Beach.

At the day's end, President Le Gate and News Editor
Fred Clampitt, WIOD, listed the areas of total agreement
of those attending as follows:

1—The importance of giving listeners the news and mak-
ing it crystal clear is recognized and the obligation to
do the job affirmed.
2—Presenting local news fulfills a need. This service must
be performed with professional skill.
3—A competent, reliable, experienced news director is es-
Sential. He must be responsible for the operation of

(Continued on next page)
the news department and the man should confine his entire working day to this job to the exclusion of other duties.

- Efforts toward the training of more good radio newsmen should be continued.
- The Florida stations are not getting proper service from news services.
- In conclusion, Mr. Le Gate said that the Florida Association of Broadcasters must be more united than ever before in order properly to solve the many problems immediately ahead.

**Local News Shows Build Audience**

“At WIOD,” said Mr. Le Gate, “we are making a sincere effort, with the blessing of our owner, to operate on our own (as separate from affiliated newspaper). Then the station gets the prestige it deserves. Stations must do everything they can in their local community to insist they are entitled to the same recognition as newspapers.”

Mr. Le Gate illustrated with facts and figures how local news shows increase station tune-in, not only for the news broadcast, but the program following.

“Basis of success,” he explained, “is finding the proper man. We found him in Tom Smith, in Florida since 1923, former editor and managing editor. But three years ago we did not have a good local news man. Smith has done a fine job, securing a big audience for his own program which also increased the audience for the network program which followed.”

Mr. Vadeboncoeur remarked that a station cannot be a news factor without doing something itself. Local news, for most stations, he predicted, is going to be a 50-50 news factor without doing something itself. Local news, which also increased the audience for the network program which followed.”

**Orchids to Mrs. Walker**

Mrs. Frankie Walker, assistant manager and news director, WFOY, St. Augustine, was acclaimed by the broadcasters for the outstanding success she has had in building local news shows. There are now three 1/2-hour and one 10-minute local news shows six times weekly—All sponsored.

Attending the Florida Radio News Clinic were:
- Daytona Beach—Comdr. W. Wright Esch, owner-manager, WMFJ; Mrs. Billee Esch, business manager, WMFJ; Ray Clancy, commercial manager, WMFJ.
- Miami—W. R. Wills, news manager, WBGS; Fred Clam-pitt, news editor, WIOD; James M. Le Gate, manager, WIOD; Tom Q. Smith, commentator, WIOD; Fred Mizer, manager, WQAM.
- Ocala—Tom Gilchrist, manager, WTMC.
- Orlando—Carter Schofield, news editor, WDBO; Victor Buisset, manager, WLOF.
- St. Augustine—John Cummins, manager, WFOY; Mrs. Frankie Walker, assistant manager, WFOY; Lewis Doolittle, announcer, WFOY; Paul Harrison, announcer, WFOY; Mrs. Bernice McCarter, news reporter, WFOY; Miss Celeste Poli, news reporter, WFOY.
- Sarasota—Eric A. Pinvest, news editor, WSPB.
- Tampa—Tom M. Matthews, news editor, WFLA.
- Mesers. Stringer and Vadeboncoeur, and Frank Hubbs, news editor, WMAZ, Macon, Georgia.

**Engineering**

**GENERAL GROVES TO BE SPEAKER AT IRE BANQUET**

Maj. Gen. Leslie R. Groves, director of the Manhattan District—code name for the Atomic Bomb Project—has accepted the invitation to be principal speaker at the joint meeting of the Institute of Radio Engineers and the American Institute of Electrical Engineers, scheduled to be held in the Engineering Society’s Auditorium in New York, Wednesday evening, January 23, 1946, according to Dr. Austin Bailey in charge of the arrangements.

The title of General Groves’ address is “Some Electrical, Engineering and General Aspects of the Atomic Bomb Project.”

Because of the prominence of the speaker and of the intense interest in, and importance of, the subject, special arrangements have been made to take care of overflow crowds.

At this joint meeting also, it was announced by Dr. Scott Turner, chairman of the Hoover Medal Board of Awards, that the Hoover Medal, established 1930 as an award by engineers to a fellow engineer “for distinguished public service,” will be presented by the A.I.E.E., the recipient to be announced later. This will be the seventh Hoover Medal awarded since 1930.

These joint meetings between the I.R.E. and the A.I.E.E. have been held since 1943 during the period in which the I.R.E. holds its annual Winter Technical Meeting and the A.I.E.E. holds its Winter Convention.

The Institute of Radio Engineers will be host at the joint meeting this year.

**RECORD ARRAY OF TECHNICAL PAPERS ANNOUNCED FOR 1946 IRE WINTER TECHNICAL MEETING**

From an array of technical papers of unprecedented number and quality, 87 outstanding contributions covering 16 general categories of subjects have been scheduled for delivery before the Institute of Radio Engineers’ 1946 Winter Technical Meeting, to be held from January 23-26 at the Hotel Astor, New York, it was announced by Dr. A. E. Harrison, chairman in charge of Papers.

This is the largest number of papers ever scheduled before an I.R.E. meeting and they were chosen from the largest number of submissions in the history of the Institute. The level of excellence and importance of subject matter was so great, Dr. Harrison declared, that even by having three sessions on different subjects running concurrently—more than has ever been scheduled before—it was not possible to include all the outstanding papers submitted. More than twice the number of papers were submitted than could be presented.

Since this was the first and most opportune occasion for the Armed Services and Government Agencies to submit papers on vital war developments, a large number were selected from the Army and Navy and these Agencies for presentation. The categories of subjects and the number of papers to be given in each are as follows: Military Applications of Electronics, four papers to be presented Thursday morning, January 24; Frequency Modulation and Standard Broadcasting, four papers to be presented Thursday morning; New Circuit Developments, four papers to be presented Thursday morning; Television, nine papers to be presented Thursday afternoon; Radio Navigation Aids, seven papers to be presented Thursday afternoon; Vacuum Tubes, six papers to be presented Thursday afternoon; Microwave Vacuum Tubes, five papers to be presented Friday morning, January 25; Antennas, five papers to be presented Friday morning; Radar, seven papers to be presented Friday afternoon; Microwave Techniques, seven papers to be presented Friday afternoon; Crystal Rectifiers, four papers to be presented Friday afternoon; Communications Systems and Relay Links, five papers to be presented Saturday morning, January 26; Communications Systems and Relay Links, five papers to be presented Saturday morning; Radio Propagation, five papers to be presented Saturday morning; Broadcast Re-

(Continued on next page)
IRE PROGRAM HIGHLIGHTS

Papers of interest to broadcasters, to be given at Winter Technical Meeting of the Institute of Radio Engineers, January 23-26, 1946, at Hotel Astor, New York, N. Y.

Thursday, January 24, 1946

Group B—Rose Room
Frequency Modulation and Standard Broadcasting
Chairman, Stuart L. Bailey
11:00 A. M.—“Field Intensities Beyond Line of Sight at 45.5 and 91 Megacycles,” by C. W. Carnahan, N. W. Aram, and E. F. Classen, Zenith Radio Corporation, Chicago, Ill.
12:00 Noon—“Antenna for Frequency-Modulation Station WGHP,” by Andrew Alford, Consulting Engineer, New York, N. Y., formerly, Radio Research Laboratory, Harvard University, Cambridge, Mass.

Thursday, January 24, 1946—2:00 p. m.-5:00 p. m.

Group A—Grand Ballroom
Television
Chairman, I. J. Kaar
2:00 P. M.—“Television in the Ultra-High Frequencies,” by Peter C. Goldmark, Columbia Broadcasting System, New York, N. Y.
2:15 P. M.—“Television-Studio Equipment,” by James J. Reeves, Columbia Broadcasting System, New York, N. Y.
2:30 P. M.—“Sight and Sound on One Carrier,” by Kurt Schlesinger, Columbia Broadcasting System, New York, N. Y.
3:00 P. M.—“Ultra-High-Frequency Television Receivers,” by Harold T. Lyman, Columbia Broadcasting System, New York, N. Y.
3:30 P. M.—“Electrooptical Characteristics of Television Systems,” by O. H. Shade, RCA Victor Division, Harrison, N. J.
3:50 P. M.—“A Kinescope for Home Projection-Type Television Receivers,” by L. E. Swedlund, RCA Victor Division, Harrison, N. J.
4:10 P. M.—“Improved Cathode-Ray Tubes with Metal-Backed Luminescent Screens,” by D. W. Epstein and L. Pensak, RCA Laboratories, Princeton, N. J.
4:30 P. M.—“The Image Orthicon, a Sensitive Television Pickup Tube,” by Albert Rose, P. K. Weimer, and H. B. Law, RCA Laboratories, Princeton, N. J.
4:50 P. M.—Discussion of Preceding Papers.

Saturday, January 26, 1946—9:30 a. m.-12:00 Noon

Group C—Coral Room
Radio Propagation
Chairman, R. F. Guy
10:00 A. M.—“The Role of Atmospheric Ducts in the Propagation of Short Radio Waves,” by J. E. Freehafer, Radiolocation Laboratory, Massachusetts Institute of Technology, Cambridge, Mass.
11:00 A. M.—“Measurement of the Angle of Arrival of Microwaves,” by W. M. Sharpless, Bell Telephone Laboratories, Inc., New York, N. Y.

Saturday, January 26, 1946—2:00 p. m.-4:00 p. m.

Group A—Grand Ballroom
Broadcast Receivers
Chairman, H. A. Wheeler
2:00 P. M.—“Theory of Impulse Noise in Ideal Frequency-Modulation Receivers,” by David B. Smith, Philco Corporation, Philadelphia, Pa.
3:15 P. M.—“Two New Miniature Tubes for Frequency-Modulation Conversion,” by R. M. Cohen, R. C. Fortin, and C. M. Morris, RCA Victor Division, Harrison, N. J.
3:40 P. M.—“Magnetic Receiver as an Adjunct to the Home Receiver,” by Hans Jaffe, Brush Development Company, Cleveland, Ohio.

Miscellany

GAMBLE LAUDS WAR LOAN SUPPORT

Speaking in glowing terms of the support radio has given to the promotion of the War Loans, Ted R. Gamble, formerly in charge of Treasury War Finance Division, delivered an address before the Poor Richard Club in Philadelphia Thursday (17) on the occasion of the presentation of the club’s “Gold Medal of Achievement for 1945.”

Parts of the address of particular interest to broadcasters are reprinted herewith:

“History will tell about a nation united in war for the principles of peace and plenty... how our labor and industry produced more and better and quicker than ever before... Our Government spent $318.5 billion between May 1, 1941, and December 31, 1945. In meeting these expenditures, the Treasury increased the public debt by $223 billion, and I can reveal now, for the first time, that of this $223 billion some $53 billion was raised through the purchases by individuals alone of over 1,000,000,000 War and Victory Bonds.

“"The radio medium, through the Victory Loan, was used to the extent of $219 million!

“Newspapers in that period represented $110 million of the total!”

(Continued on next page)
“Periodicals added another $39 million!
“Outdoors added another $52 million.

All measurable advertising used in behalf of the war financing program had a value of $400 million. That is what I meant when I used the word ‘valuable’ . . . .

“Some contributions were unique. For example, Doug Coulter and Clarence Menser, Phil Carlin and Charles Barry, know that the 873 stations which carried the Treasury Salutes represented THE LARGEST CHAIN IN THE WHOLE HISTORY OF RADIO!

“The money advertising helped raise for War’s Hell will be used as savings for peacetime homes. The money which went for ships will be repaid by the education of the children of our nation. The DEFENSE of America in time of stress by his distinctive and complete success” in discharging his censorship duties. His choice of voluntary censorship rather than the compulsory brand, the citation read, showed his faith in the integrity of the personnel and organizations disseminating news to the public and initiated an experiment in war-time censorship “unique in its inception and execution, previously untried in any country.”

TRUMAN DECORATES PRICE

Byron Price was decorated by President Truman Tuesday (15) with the Medal of Merit for “exceptionally meritorious conduct” in directing the office of censorship during the war. The President pinned the medal on Price’s coat at a White House ceremony.

The President read a citation in bestowing the medal which said that Price had “demonstrated the strength of this country in its unity in time of stress” by his “distinctive and complete success” in discharging his censorship duties.

His choice of voluntary censorship rather than the compulsory brand, the citation read, showed his faith in the integrity of the personnel and organizations disseminating news to the public and initiated an experiment in war-time censorship “unique in its inception and execution, previously untried in any country.”

UP AND AP WANT TO DISCONTINUE NEWS FOR OVERSEAS BROADCASTS

Hugh Baillie, president of the United Press Associations, has issued a statement to the effect that William Benton, Assistant Secretary of State, has been advised that the United Press desired to discontinue furnishing news to the U.S. Government for overseas broadcasts and other uses.

Last Monday it was announced that the Board of Directors of the Associated Press had decided it was inadvisable to grant a State Department request to extend the date for terminating AP news service to the government.

“We have advised Mr. Benton, the Assistant Secretary of State, that it is the intention of the United Press to discontinue this service,” Mr. Baillie said. “Mr. Benton stated that discontinuance of government news distribution activities was imperative in the national interest and that the services of the American press associations were imperative in the national interest and that the services of the American press associations were essential thereto. To this we disagreed. However, Mr. Benton asked that discontinuance of our service be stayed until he had further opportunity to lay his case before us. To this we have agreed.”

The AP has similarly indicated a desire to discontinue their service in the interests of overseas broadcasts.

William Benton, Assistant Secretary of State, has issued the following statement:

“I consider wholly unwarranted the fears expressed by the Board of Directors of the Associated Press that Government cannot engage in newscasting without creating the fear of propaganda which necessarily would reflect upon the objectivity of the news services from which such newscasts are prepared.”

“The Associated Press, the United Press and the International News Service have been furnishing news to the United States Government for its short-wave broadcasts overseas to the peoples of other countries. I regret that the Directors of the Associated Press have decided to discontinue their share of this service. They were asked to continue this service until such time as the Congress decided what should be the policy of this government with regard to the permanent short-wave broadcasting program, with the object that it should be in private hands or under government control. It is clear that such broadcasting must be continuous . . . .

“It is the fixed policy of the State Department to advance the cause of press freedom everywhere. Nothing in the international information program of the government, past or planned, contravenes this basic principle. I am proud of the objectivity maintained by our international broadcasts. One of the purposes of short-wave newscasting is to get reliable and objective American news into vast areas of the world where no other news from America can penetrate. I can only conclude that the directors of the Associated Press were not fully informed about the program.”

THREE HUNDRED ATTEND FCBA NINTH ANNUAL BANQUET

Approximately three hundred members and guests, said to be the largest in association history, attended the Ninth Annual Banquet of the Federal Communications Bar Association January 11 at the Statler Hotel in Washington.

Honoring the members of the Federal Communications Commission, the honorary chairman, Major General Frank E. Stoner, Assistant Chief Signal Officer, United States Army, detailed the record of outstanding service created during the war by the Signal Corps in cooperation with civilian technicians and the broadcasting industry. General Stoner, with the aid of a special army installation, established teletype communication direct from the speaker’s table with Signal Corps headquarters around the world, including Manila, Tokyo, London and Berlin. Greetings were exchanged and many personal messages were sent by banquet guests to friends at the distant points. The entire proceedings were thrown on a screen which reproduced the teletype messages as they came over the machine.

Philip G. Loucks, elected President of FCBA at the afternoon business meeting which preceded the banquet, was installed in office by the retiring President, Eliot C. Lovett. Elected also were Carl I. Wheat, 1st V-P; Reed T. Rollo, 2nd V-P; William A. Porter, Secretary; Arthur H. Schroeder, Treasurer; Ralph A. Van Orsdol and Eliot C. Lovett, Executive Committee.

From 7 to 9 p.m. an FM demonstration was heard through developmental FM Station W3XL, 98.9 megacycles, Washington, D.C., courtesy of Everett L. Dillard, licensee. Thirty minutes of vocal and instrumental entertainment at the banquet was under the direction of Dwight E. Rorer, who participated also with Gene Archer, Charles F. Jeter and Sam P. Holland.

Willard D. Egolf, NAB Special Counsel, was banquet chairman, with a committee consisting of Dwight E. Rorer, E. D. Johnson, John C. Spearman and Frank U. Fletcher.

ADRIAN MURPHY NAMED VICE PRESIDENT AND GENERAL EXECUTIVE OF CBS

The appointment of Adrian Murphy as vice president and general executive of the Columbia Broadcasting System was announced Monday (14) by Frank Stanton, CBS president.

Mr. Murphy returns to the Columbia organization after more than three and a half years of wartime service in the Army of the United States. He has just been released from active duty as a Lieutenant Colonel.

Mr. Murphy was executive director of television for
had been waiting for it!"

...later the U.S. Weather Bureau in Richmond called up the majority want and to provide it."

...continued, "who do not regard music as meeting cultural requirements unless it was composed by a blind German or a mad Russian.

..."The purpose of music is to provide an emotional outlet and some relaxation. If the people prefer music by Bing Crosby, it is our duty to provide it.

..."The job of the commercial stations is to find out what the majority want and to provide it."

WE DON'T BELIEVE IT!

Ann Raidabaugh, WRVA Publicity Director, tells us (excitedly) that:

..."Several weeks ago the weather report was omitted from one of WRVA's early morning newscasts. A few seconds later the U.S. Weather Bureau in Richmond called up much perturbed about the omission. Of all things! They had been waiting for it!"

WOAI TECHNICAL DIRECTOR RETURNS

After three years' service with the Office of War Information, Charles Jeffers has returned to his post as Technical Director of WOAI, San Antonio.

While with the OWI, Jeffers served as Chief of the Engineering Division, Communications Facilities Overseas Branch.

ADD TO DURR'S ADDRESS

The following addition to Commissioner Durr's address, which was published in last week's REPORTS (p. 25), was not received from the Commission in time for insertion in that issue:

..."Only night before last, several million Americans were given a lesson in American history as an interlude between selections of recent song hits. The story was that of George Washington crossing the Delaware. It was told much as it was given in our childhood history books but a moral had been added.

Washington's troops were cold and ragged and hungry and ill-equipped. There were no equivalents of the landing barges of today, but only a collection of small, leaky skiffs. Large ice floes added to the difficulty and danger of his project. Everything was against success but Wash-ington pressed ahead and through indomitable will and sheer character won a battle which was the turning point of a war and which paved the way for the establishment of a new nation founded upon the freedom and dignity of the individual.

..."As in the case of a man, we were told, so in the case of a tobacco. It's character that counts—the pure, rich, mellow flavor, the smoothness, and the free drawing qualities.

..."Isn't it fair to ask that our heroes be allowed to remain on their pedestals unless and until it has been clearly proven that they are not worthy of being heroes? Has salesmanship become of such vital importance that they must be dragged down and put to work as a tobacco peddler? If we believe that God created man in His own image, then isn't there something approximating sacrilege in cheapening the demonstrated potentialities of human greatness by evaluating them on the level with commercial wares?

..."It was the sponsor of this same program who, in the midst of our trial following the attack on Pearl Harbor bore its part of the sacrifice with proud sorrow when Lucky Strike Green went to war.

..."Four industry groups provide about 75 per cent of all national network revenue. Tobacco is one of them. Through the concentrated power of their dollars, large advertisers and their agencies have been more and more taking away from the broadcasters and networks their responsibility for program production. Isn't it inevitable that so long as they are in control, the dominating motive in program production will be not artistic merit or social value but effectiveness in selling commercial goods?

..."In only one year, according to the trade journals, one advertiser spent approximately $22,000,000 in advertising over the air its soap and related products. That was enough to operate one of our most important and useful educational broadcast stations, Station WOI, of Iowa State University, for 700 years at the rate of its present budget. Doesn't this indicate that our sense of values concerning radio has become rather badly warped?"

AUSTRALIA'S RADIO NETWORK

The Australian Information Service states that Australia will have the largest nationally-owned radio network in the world when 17 new broadcasting stations, which the government is now building, are completed at the end of this year. When completed, they will bring the total of radio stations owned by the Commonwealth government through the postmaster-general's department to 53, including one of the most powerful shortwave transmitters in the world.

LETTER TO EDITOR LAUDS RADIO

The following letter to the editor is reprinted from the January 4 issue of the Toronto Globe & Mail:

..."When World War I ended, the news of the armistice was carried by every conceivable means here on the prairies. Telegraph, telephone and the press were all looked upon as 'angels of mercy' in bringing us the good news.

..."I can remember horseback riders galloping to tell the news to a neighbor who may not have heard. Team and wagons rumbled on into the night to tell a distant neighbor. Creaky old buggies and democrats quickened their pace to be the first to tell. The once-a-week mail coming in by team, 20 miles, was greeted by homesteaders and all the folks waiting for the distribution of their papers to read the details. Far into the night, by the light of kerosene lamps on the kitchen tables, every scrap of war news was read and reread.

..."How different is the picture today! Through the progress of the radio industry, we're all right in the 'front

(Continued on next page)
NEARLY 1,500,000 GREETING CARDS SENT TO WBEN

Buffalo, N. Y.—The 117th mailbag of used Christmas greeting cards reached WBEN Jan. 15 in response to nine brief announcements by Clint Buehlman requesting listeners to send in the cards for use by children in rural schools. That’s about four tons of cards—nearly 1,500,000.

It all started with a letter from the New York headquarters of the Save the Children Federation, asking WBEN’s help in the federation plan to obtain a million cards from all over the country. The “second-hand” cards are used by underprivileged children, many of whom rarely see such cards, for bookmarks, scrapbooks and aids in art instruction.

Buehlman made the brief mentions on his programs of Jan. 3 through Jan. 8. Cards immediately began pouring in from New York State, Pennsylvania and Ontario. Many cards, in envelopes bearing postmarks of the ’30s, indicated a search of attics or a parting with keepsakes. A few listeners spent more than $1 to send their cards by first class mail.

After the first deluge of cards, all contributors who phoned for additional information were advised to send the cards direct to the federation’s New York office. It was learned that several schools and organizations did this, thereby lightening WBEN’s huge mail load.

WALKER REAPPOINTMENT TO FCC FORECAST

According to a press association release, associates of Paul A. Walker of Oklahoma, one of the original members of the Federal Communications Commission, forecast today his reappointment when his present term expires next June 30.

The release says “the subject has not yet been taken up with President Truman because ‘it is too early,’ a colleague said. But Senator Thomas (D-Okla.) has written Robert E. Hannegan urging Walker’s reappointment to another seven year term.

“One associate member of the Commission said there was little doubt, in his opinion, but that Walker would be reappointed. Similar statements were made by Oklahomans in responsible positions in Washington.

“Senator Thomas said Hannegan has not answered his letter and that ‘I do not know what will be done about it—I haven’t heard anything’.

NEW—Southern Idaho Broadcasting and Television Co., Twin Falls, Idaho—Granted construction permit for a new station (B5-P-4348) to operate on 1490 kc, 250 watts, unlimited time, transmitter site to be determined; conditions.
KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted construction permit (B4-P-3529) to change frequency from 1480 to 810 kc, and increase power from 5 KW to 50 KW day, 10 KW night, DA night, unlimited time; conditions.
KOAM—The Pittsburgh Broadcasting Co., Pittsburgh, Kans.—Granted construction permit (B4-P-3528) to change frequency from 810 to 860 kc, increase power from 1 to 5 KW, and time of operation from daytime to unlimited; conditions.
KGN—Plains Radio Broadcasting Co., Amarillo, Texas—Granted construction permit (B3-P-3723), to change frequency from 1410 to 110 kc, increase power from 1 KW night, 5 KW-LS, to 10 KW, DA unlimited time; conditions.
KONO—Eugene J. Roth, t/r as Mission Broadcasting Co., Peoria, Ill.—Granted construction permit (B4-P-3198) to change frequency from 1140 to 860 kc, and increase power from 250 watts to 1 KW night, 5 KW day, DA night, unlimited time, in accordance with Commission’s policy (Minco. 87966), announced January 5, 1946.

DESIGNATED FOR HEARING
Texoma Broadcasting Co., Wichita Falls, Texas, and Darrold Alexander Cannon, t/r as Wichtex Broadcasting Co., Wichita Falls, Texas, and John C. McCormack, et al, d/b as Okla. Televison & Broadcasting Co., Tulsa, Okla.—Ordered that these applications be designated for hearing in a consolidated proceeding. Texoma Broadcasting Co. is applying for frequency 970 kc, 1 KW, daytime; Wichtex Broadcasting Co. for 990 kc., 1 KW, daytime, and Okla. Televison and Broadcasting Co. for 900 kc., 1 KW, DA, unlimited time. (B3-P-3823; B3-P-3854; B3-P-1518; B3-P-1563)
NEW—Fayette Associates, Inc., Montgomery, W. Va., and Joe L. Smith, Jr., Charleston, W. Va.—Upon consideration of petitions of applicants for leave to amend the Fayette Associates application, the Commission granted in part the petition to amend application of Fayette Associates, Inc., to change requested frequency from 1400 to 1350 kc.; accepted said amendment and granted construction permit (B2-P-3876) for a new station to operate on 1350 kc., 250 watts, unlimited time, and ordered that the application of Joe L. Smith, Jr., for a new station at Charleston to operate on 1400 kc., 250 watts, unlimited time, be consolidated with applications of other Charleston applicants—James H. McKeel, Capitol Broadcasting Corp. and Chemical City Broadcasting Co., scheduled to be heard in a consolidated proceeding beginning January 29.
WFMJ—WFMJ Broadcasting Co., Youngstown, Ohio—Upon consideration of a petition to intervene and enlarge the issues in the hearing upon application of WHJS, Daily Telegraph Printing Co. (Docket 6961), and WRNN, Neid and Stevens (Docket 6960), the Commission designated the application of WFMJ (B2-P-4311) for 1390 kc, 5 KW power, for consolidated hearing with the WHJS and WRNN applications to be heard beginning January 21.

DOCKET CASE DECISIONS
The Federal Communications Commission announces its Proposed Findings of Fact and Conclusions (B-227) looking toward a grant of the application of Air-Waves, Inc., for a new station at Baton Rouge, Louisiana, to operate on 1400 kilocycles with power of 250 watts, and a denial of the (Continued on next page)
application of Louisiana Communications, Inc., seeking the same facilities. (Dockets 6155 and 6157)

MISCELLANEOUS

In the Matter of Promulgation of Rules and Regulations concerning the procedure to be followed by the Commission in passing upon assignments of license or transfer of control of corporate licenses—Upon consideration of a request filed by the National Association of Broadcasters for a 30-day extension of time within which to file briefs in proceedings in (Docket 7671) the Commission ordered that the request be granted and the time was extended to February 16, 1946.

Richard T. Sampson, Banning, Calif.—Granted petition to dismiss without prejudice application for a new station (B5-P-1000), and the Commission on its own motion ordered the application of Broadcasting Corp. of America, Ind., Calif., be removed from the hearing docket.

Booth Radio Stations, Inc., Lansing, Mich.—Granted petition for leave to amend its application for a new station, and the amendment presently on file with the Commission was accepted.

WFBR—Baltimore Radio Show, Baltimore, Md.—Withdrawn at request of applicant, petition to intervene in the hearing on application of Walter A. Graham for a new station in Tifton, Ga.

Valleymount Broadcasting Assn., Inc., McAllen, Texas—Denied without prejudice petition requesting that the consolidated hearing upon its application and that of Howard W. Davis, et al., be removed from Dallas where it is now scheduled for Feb. 6-9, to McAllen, Texas.

Bleecker P. Seaman and Carr P. Collins, Jr., d/b as Seaman Bleecker P. Seaman and C. P. Collins, Jr., d/b a Seaman and Collins, El Paso, Texas—Granted petition insofar as it requests leave to amend and remove application from hearing docket; and the amendment now on file with the Commission covering the matters was accepted and the application was removed from the hearing docket.

KFDA—Amarillo Broadcasting Corp., Amarillo, Texas—Granted authority to determine operating power by direct measurement.

WGOV—E. D. Rivers, Valdosta, Ga.—Granted authority to determine operating power by direct measurement.

WRAC—Robert W. Rounsaville, Cleveland, Tenn.—Granted authority to determine operating power by direct measurement of antenna power. The licensee has granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules and Regulations: conditions.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Granted petition to amend its application (B5-P-3915), and the amendment was accepted.

Kankakee Daily Journal Co., Kankakee, Ill.—Granted motion for leave to amend its application for a new station, and the application covering same was accepted.

William L. Klein, Oak Park, Ill.—Granted motion to amend order to take depositions in re application for new station to add names but still limit witnesses to 25.

Valdosta Broadcasting Co., Valdosta, Ga.—Granted motion for leave to amend its application and the amendment filed was accepted.

Tri-County Broadcasting Corp., Orangeburg, S. C.—Granted motion to dismiss without prejudice its application for a new station. (B5-P-3590)

James H. McKee, Charleston, W. Va.—Ordered that hearing on application for a new station (B3-P-3758) be held on January 20th at the offices of the Commission in Washington, D. C. McKee has filed the petition waiving right to cross-examine witnesses who testified at consolidated hearing on Jan. 7-8.

Capital Broadcasting Corp., Little Rock, Ark.—Granted petition to dismiss without prejudice application for new station. (B5-P-3729)

KVOM, Inc., Marshall, Texas—Upon consideration of petitions of KVOM Inc. and Marshall Broadcasting Co., the Commission ordered that the consolidated hearing on these applications heretofore designated at Dallas for Jan. 28-29, be postponed until Feb. 13-14, and transferred from Dallas to Marshall, Texas, to be heard at a place and time to be subsequently determined by the Commission; and further ordered that consolidated hearing on applications of Permian Basin Broadcasting Co., Southwestern Broadcasting Co., and Odessa Broadcasting Co., heretofore scheduled to be heard on Jan. 21-24 be postponed until Feb. 11-12, to be heard in Marshall at a time and place to be determined by the Commission.

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio—Granted petition for leave to intervene in the hearing on applications of Greater Pomeria Broadcasters, Inc. (Dockets 6155 and 6157) for new station at Pomeria.

The Kentucky Broadcasting Co., Lexington, Ky.—Granted petition to sever its application from the hearing docket in the proceedings involving applications of Scripps-Howard Radio, Inc., and Cleveland Broadcasting Co., Inc., both for Cleveland, scheduled for hearing on January 14.

KFRE—J. E. Rodman, Fresno, Calif.—Ordered that application for construction permit to increase power from 250 watts to 1 KW and change frequency from 1340 to 1060 kc, be designated for hearing in a consolidated proceeding with the application of KARM, The George Harm Station, a Corp., Fresno, Calif. (B5-P-3573)

KARM—The George Harm Station, a Corp., Fresno, Calif.—Ordered that the Commission grant to KARM to change frequency from 1430 to 1060 and make changes in the DA system, be designated for hearing in a consolidated proceeding with application of KFRE listed above. (B5-P-3573)

KFVS—Southern Broadcasting Co., Inc., Centralia, Ill.—and Oscar C. Hirsch, tr/as Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Ordered that application for construction permits to operate in their respective cities on the frequency 960 kc., 1 KW, unlimited time, be scheduled for a consolidated hearing in the DA system, be designated for hearing in a consolidated proceeding. (B1-P-1181) and (B1-P-1280)

WHEC—WHEC, Inc., Rochester, N. Y.—Denied petition to sever its application from a consolidated hearing with the applications of Albany Broadcasting Co. and Fort Orange Broadcasting Co., Inc., and grant its application without a hearing.

Mack Radio Sales Co., Camden, N. J.—Ordered that petition of Mack Radio Sales Co., intervenor in the proceeding in re applications of WTNJ, et al., requesting that the Commission enter its order reopening the record in the matter of the application of City of Camden for renewal of license, setting the application for further hearing, and authorizing Mack Radio Sales Co. to adduce testimony concerning changes in conditions since Nov. 19, 1941, be held in abeyance pending submission by Mack Radio Sales Co., within 30 days after Jan. 16 of (1) a detailed tender of proof of events occurring after the close of hearings in this cause on Nov. 19, 1941, to be introduced in support of the allegations in the petition; and (2) a showing of the respects in which such evidence, if introduced at the reopened hearing, would be material and not merely cumulative, and would, if proved, substantially alter the Proposed Decision in this cause.

Palm Beach Broadcasting Corp., Palm Beach, Fla.—Granted authority to take depositions on January 29th, in re application for a new station.

City of Sebring, Fla., Sebring, Fla.—Granted petition for leave to take depositions on Feb. 2 in re application for new station.

News Journal Corp., Daytona Beach, Fla.—Granted petition requesting the designation of its application for a new station at Daytona Beach, 1340 kc., 250 watts, unlimited time, be held as a consolidated hearing with two other applications for the same frequency at Daytona Beach, to be held on February 16.

Upon consideration of a request from the National Foundation for Infantile Paralysis, Inc., the Commission has granted a waiver of the requirements of Section 3.406 of its Rules and Regulations, requiring identification announcements applicable to all stations carrying the broadcast commemorating the late President Roosevelt's birthday, to be broadcast from 11:15 p. m. to 12 midnight, on January 30, 1946.

TELEVISION APPLICATIONS GRANTED

WCBW—Columbia Broadcasting System, Inc., New York City—Granted construction permit (B1-PCT-311, for authority to increase power by installing new tubes in the final amplifiers of both transmitters; effective radiated power (KW) 1.72 visual; 1.67 aural; effective antenna height above ground 937 visual, 965 aural.

MISCELLANEOUS APPLICATIONS

NEW—Radioophone Broadcasting Station WOP1, Inc., Area of Bristol, Tenn., and Bristol, Va.—Construction permit for a new relay broadcast station to be operated on 30.82, 33.74, 35.82 and 37.98 mc., power of 2 watts and A3 emission.

NEW—Allamance Broadcasting Co., Inc., Area of Burlington, N. C.—Construction permit for a new relay broadcast station to be operated on 30.82, 33.74, 35.82 and 37.98 mc., power of 2 watts and A3 emission.

W2XJC—Atlantic Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (B1-PEX-55 as modified, which authorized a new developmental broadcast station) for approval of transmitter site. (Request of attorney.)

WABF—Metropolitan Television, Inc., New York, N. Y.—Construction permit to change type of transmitter and make changes in antenna system and specify frequency of Channel #3 (98.5 mc.).

W4XC—Joda Patterson, Ramon G. Patterson and Louise Patterson Pursley d/b as WAPO Broadcasting Service, Chattanooga, Tenn.—Construction permit to change transmitter location and antenna system.

WSXV—Miami Valley Broadcasting Corp., Area of Dayton, Ohio—License to cover construction permit (B2-PEX-62 which authorized a new developmental broadcast station.

W3VG—Jere N. Moore, Milledgeville, Ga.—Modification of construction permit (B3-P-3833) for approval of transmitter location, and antenna, changes in transmitting equipment and change studio location.

WSXG—Rus Zuleliar, Jr., Charleston, W. Va.,—License to cover C.P. (B2-PVB-106, as mod.) which authorized a new experimental television broadcast station.

B5-PVB-161—Amended 11-23-45—The Times-Mirror Co., Pasadena, Calif.—Construction permit for a new experimental television broadcast station to be operated on Channel #3 (69-84 mc.). (Continued on next page)
ents named in the complaint are Alex Schumann, Lawrence
ican Brush Co., Inc. (5412)
West 28th Street. Minneapolis, engaged in assembling, sell¬
Manufacturing Co., Inc., and Whiting-Adams Co., Inc.;
R. Schumann and Leroy E. Foulkrod, officers of Star Brush
American Brush Co., Inc., Roxbury, Mass. Other respond¬
its subsidiary, Whiting-Adams Co., Inc., both of Boston, and
complaint against Star Brush Manufacturing Co., Inc., and
Frank L. Kozal, an official of Star Brush Manufacturing Co.,
Zenith Radio Corporation. (5413)
The respondents formerly engaged in the sale of luggage
CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATION

During the past week the Commission has announced the
following stipulation:

Sig Kosterlitz, Hans Kosterlitz and Herbert A. Kosterlitz,
trading as Regina Knit Sportswear Co., 310 W. Adams Street,
Chicago, selling and distributing knit sportswear consisting
primarily of women's sweaters, have stipulated to cease
and desist from use of the words “mohair” or “anguora mo¬
hair” as designations for garments containing fibers other
than mohair, and from the use of other words or terms of
like meaning that tend to convey the impression that such
garments are made of mohair; and from advertising, brand¬
ning, labeling, invoicing or selling products composed in whole
or in part of rayon without clearly disclosing, by use of the
word “rayon,” the fact that such products are composed of
or contain rayon; and, when a product is composed in part
of rayon and in part of fibers and materials other than
rayon, from failing to disclose in immediate conjunction with
the word “rayon,” and in equally conspicuous type, each
constituent fiber of the product in the order of its pre-
dominance by weight, beginning with the largest single con-
stituent. (4132)

FTC CASES CLOSED

The Federal Trade Commission has ordered that the case
growing out of the complaint issued against Josten Manu-
facturing Co., Owatonna, Minn., and its directors be closed
without prejudice to the right of the Commission to reopen
the case and resume trial thereof in accordance with its
regular procedure.
The complaint charged the respondents with misrepresen-
tation in connection with the issuance of catalogs and
price lists of jewelry and trophies.
This matter coming on for consideration by the Commis-
sion upon request of the respondents, and it appearing to
the Commission that the respondents have expressed their
intentions, in writing, to be bound by the Trade Practice
Conference Rules promulgated for the Catalog Jewelry and
Giftwear Industry on December 23, 1945, and that they have
furnished satisfactory evidence of such intention, the Commis-
sion ordered the case closed without prejudice as above
stated.
The Commission has also dismissed without prejudice the
case growing out of its complaint against Max Rubinowitz,
alias M. J. Roberts, and Irving Alinkofsky, alias Irving Aline,
trading as Orco Case Co., formerly at 15 East 40th Street,
New York.
The respondents formerly engaged in the sale of luggage
giftware and were charged in the complaint with mis-
representing the prices of their products. The case was
closed because the business conducted by the respondents
has been discontinued and there is no indication that it will
be resumed.

JANUARY 21, 1946 — 51
Music

You are asked to complete and send in to NAB immediately the questionnaire concerning the employment of musicians and the amount of money spent for this purpose. This information is vital.

Developments This Week

Following his meeting with James C. Petrillo, President, American Federation of Musicians, last week, Justin Miller, President of the NAB, met Monday with the special Industry-wide Committee which has been studying relationships of the radio industry and the AFM.

Judge Miller reported fully to the committee concerning his meeting with Mr. Petrillo and the AFM Board in Chicago on Friday, Jan. 18. Judge Miller's report was regarded by the members of the committee as being encouraging and as providing a basis for future negotiations with the AFM, leading to a peaceful adjustment of the differences which have existed between them.

The Industry-wide Committee authorized the appointment of a smaller negotiating committee to meet with a negotiating committee which will represent the AFM. The composition of this negotiating committee and its membership were discussed and President Miller was authorized to name it. This he will do in the very near future.

Those present at the meeting were: Frank White, Frank Mullen, Wayne Coy, T. A. M. Craven, Robert Swezey, G. Richard Shafto, Theodore Streibert, John Elmer, Clair McCollough, E. E. Hill, Keith Kiggins, Joseph McDonald, Judge Justin Miller, A. D. Willard, Jr., C. E. Arney, Jr.

LEA BILL OUT OF COMMITTEE

The House Interstate and Foreign Commerce Committee Wednesday (23) approved, 14 to 5, the Lea Bill H. R. 5117 (see NAB Reports, p. 35).

The bill, introduced by Committee Chairman Lea (D., Calif.), is aimed "to prohibit certain coercive practices affecting radio broadcasting."

The bill grew out of demands made upon broadcasters by Petrillo. Lea said he considered the demands "not within the legitimate rights of any organization" and added that "a self-respecting government cannot afford to permit" them.

The legislation would prohibit use of the threats or force to "coerce, compel or constrain" a radio station "to pay or agree to pay" tribute for the privilege of producing or using records, transcriptions or mechanical, chemical or electrical reproductions. A maximum penalty of a year's imprisonment and a $1,000 fine is provided for violations. The bill originally provided for heavier penalties.

It would prohibit use of force or threats to require a broadcaster to employ any person in excess of the number of employees the station wants.

Stations also could not be compelled to refrain from broadcast of non-commercial educational or cultural programs in which the participants receive no money except expenses.

SENATOR BYRD WOULD MAKE UNIONS ACCOUNTABLE

Asserting that labor unions are now "big business," Senator Byrd Wednesday (23) introduced legislation that would require them to register with the Securities and Exchange Commission.

They would have to file a complete list of officers, salaries, dues, members, contracts, funds and similar data, under Byrd's proposal. He also would require all labor organizations to obtain articles of incorporation.

Engineering

ARMY MAKES RADAR CONTACT WITH THE MOON

The War Department announced Thursday night (Jan. 24) that the Army Signal Corps had made radar contact with the moon in an experiment which promises "valuable peacetime as well as wartime application."

The experiments were conducted by Lt. Col. John H. Dewitt, Jr., former chief engineer for WSM, Nashville, Tenn.

The full text of the War Department release follows:

The War Department announced today that Army Signal Corps scientists at the Evans Signal Laboratory, Belmar, N. J., made radar contact with the moon on January 10, using specially designed equipment which shot pulses on very high frequency energy out into space and detected their echoes seconds later.

Maj. Gen. Harry C. Ingles, chief signal officer of the Army, explained that the announcement had been withheld until the Signal Corps was certain beyond doubt that the experiment was successful and that the results achieved were painstakingly verified. Several subsequent efforts had also been successful, he said.

General Ingles revealed that the Signal Corps has been studying the problem of reaching other celestial bodies with radar for several years, in connection with wartime applications of radar. The experiments were directed by Lieut. Col. John H. Dewitt, Jr., former chief director of the Evans Signal Laboratory.

(Continued on next page)
the earth is calculated by astronomers to be about 238,857
moon very accurately with the aid of radar. Other au¬
ments in radar technique would be necessary before this

ly, however, believed that considerable improvements in radar technique would be necessary before this could be done.
the earth's atmosphere, nor had they ever succeeded in generating sufficient energy in the very high frequency band of radio to attain this range of nearly half a million miles.
The Signal Corps experiments have valuable peacetime as well as wartime applications, although it is impossible at this stage to predict with certainty what these will be. One obvious possibility is the radio control of long-range jet—or rocket-propelled missiles, circling the earth above the stratosphere. The German V-2 missiles already have been known to rise to a height of 60 miles.
this is the first time scientists have known with certainty that a very high frequency radio wave sent out from the earth can penetrate the electrically charged ionosphere which encircles the earth and stratosphere. The several layers of the ionosphere start about 36 miles above the surface of the earth and extend to approximately 250 miles.

Travel at Speed of Light

The chief signal officer explained that radar pulses, like radio waves, travel at the speed of light—186,000 miles per second—and that a transit time of about 2½ seconds was required for the pulses to surge from the earth to the moon and for the echoes to travel back.
The mean (average) distance between the moon and the earth is calculated by astronomers to be about 238,857 miles, but this figure varies as the moon revolves and moves in an orbit around the earth, and both move around the sun.
General Ingles recalled that Sir Edward Appleton, prominent British physicist, recently predicted that sci-
scientists ultimately might be able to map the surface of the moon very accurately with the aid of radar. Other authorities, however, believed that considerable improvements in radar technique would be necessary before this could be done.

Complicated Problem

The problem of detecting radar echoes from the moon was complicated by the fact that scientists had never before been certain they could project radio waves beyond the earth's atmosphere, nor had they ever succeeded in generating sufficient energy in the very high frequency band of radio to attain this range of nearly half a million miles.
The Signal Corps experiments have valuable peacetime as well as wartime applications, although it is impossible at this stage to predict with certainty what these will be. One obvious possibility is the radio control of long-range jet—or rocket-propelled missiles, circling the earth above the stratosphere. The German V-2 missiles already have been known to rise to a height of 60 miles.
the earth's atmosphere, nor had they ever succeeded in generating sufficient energy in the very high frequency band of radio to attain this range of nearly half a million miles.
The Signal Corps experiments have valuable peacetime as well as wartime applications, although it is impossible at this stage to predict with certainty what these will be. One obvious possibility is the radio control of long-range jet—or rocket-propelled missiles, circling the earth above the stratosphere. The German V-2 missiles already have been known to rise to a height of 60 miles.

Check on Astronomers

The new technique will also be valuable for studying the effects of the ionosphere upon radio waves. Scientists have learned that low and medium frequency waves are reflected by the ionosphere, and these reflec-
ly, however, believed that considerable improvements in radar technique would be necessary before this could be done.

OPA PRICING CLOSES BATTERY PLANTS

Companies that manufacture batteries for battery-operated home radio sets are experiencing OPA troubles. Immediate result for one producer has been the closing of four plants.
核准 advisory meeting has been set for next Tuesday (29), the manufacturers are said to anticipate no action which would permit production at a profit.

"The facts are simple," one executive told NAB. "Employee straight-time wages have risen more than 35 per cent since 1940-41, and cost of materials has increased, but the price of the product remains the same as in October, 1941.
October, 1941.

WALTER C. EVANS AND OTHERS HONORED BY I.R.E.

Walter C. Evans, Vice-President of Westinghouse Electric Company and in charge of Radio, was awarded a fellowship by the I.R.E. at its winter meeting held at the Hotel Astor, January 24. In addition Ralph Vinton Lyon Hartley, Belle Telephone Laboratory Engineer, and Dr. Peter C. Goldmark, Engineer of the Columbia Broadcasting System, also were honored.
The fellowship was awarded Mr. Evans "in recognition of his past contribution to radio and his present active participation in the affairs of the Institute.
Mr. Hartley's citation reads: ... for his early work on oscillating circuits employing triode tubes and likewise for his early recognition and clear exposition of the funda-

(Continued on next page)
mental relationship between the total amount of information which may be transmitted over a transmission system of limited band with the time required."

Dr. Goldmark’s citation reads “... his contributions to the development of television systems, particularly in the field of color.”

Programming

NAB COOPERATING WITH OWMR IN CLEARANCES FOR GOVERNMENT PROGRAMS

President Truman recently appointed a *Media Programming Division* under the jurisdiction of the Office of War Mobilization and Reconversion to take over many of the functions formerly carried on by the Domestic Radio Branch of the OWI.

Under this plan, the OWM and R Media Programming Division screens requests from within government for radio time and assigns a priority to each request in accordance with the importance of the subjects.

After this has been done, the NAB will publish this list in the *Reports* at least one week before the allocations are requested. This information will be useful in tie-ups in commercial copy and on sponsored programs also.

While commitments for allocations of time, of course, may be given only by the station licensee, Ed Kirby, NAB Public Relations Counsellor, points out the opportunity here provided for rendering service in the public interest and in maintaining in peacetime the outstanding record achieved by radio and advertisers in wartime.

Below are published the priorities for the month of February as determined by OWM and R:

<table>
<thead>
<tr>
<th>Priority</th>

</tr>
</tbody>
</table>

**Housing Shortage**

One of the most pressing current problems, says OWMR, is the acute housing shortage. The seriousness of this problem merits nationwide attention. Therefore, the Media Programming Division of OWMR has assigned it a top priority. OWMR will soon forward to stations copies of suggested spot announcements dealing with the housing shortage. If the announcements are not used verbatim, OWMR is keenly desirous that the Basic Facts presented in the fact sheets which accompany the spots be followed closely. Undoubtedly the builders, bankers, labor unions and veterans of your community are vitally interested parties.

**Anti-Inflation Campaign**

The spot announcements from the Office of Price Administration on anti-inflation have been received by most stations. This program also carries top priority.

**Income Tax Time Reminders**

Also forthcoming are announcements from the Bureau of Internal Revenue, reminders of the March 15 deadline for filing Federal Income Tax reports. This campaign should receive attention during the weeks of February 25th and March 4th, according to OWMR.

**Hospitals Need Help**

Broadcasters will note that the “Help for Hospitals” campaign is on the priority list. The nationwide need for hospital personnel is acute. Any local help would materially aid this situation. Requests for help probably will be forthcoming from local hospitals. Community health is vital and the subject makes excellent programming material.

**NAVY MAN SUGGESTS CONTINUANCE SIGN-OFF NATIONAL ANTHEM**

**Gentlemen:**

I wonder if the NAB would not want to consider recommending to its member stations the continued use of the National Anthem in connection with sign offs. I do not think this should be considered a wartime measure and discontinued now that hostilities have ceased. Rather, I think it is a matter of national pride—one step up from overworked “patriotism.”

To my mind, WSB, Atlanta, has an excellent sign off—a melody appropriate to the local (“Dixie” in their case) with a civic “pep talk,” not hurried and not overdone, followed by the National Anthem.

I certainly do not think the Anthem connotes to any

/Signed/ JOHN E. YOUNG,
Lt. (jg), U.S.N.R.

News

Radio had an important spot at the conventions of two national journalism-educational associations meeting at the Neil House in Columbus, Ohio, Jan. 24-26.

The Council on Radio Journalism, made up of teachers of radio in schools of journalism and of industry members, met Thursday (24), in connection with the twenty-fifth convention of the American Association of Schools and Departments of Journalism.

One of the round tables of the twenty-ninth convention of the American Association of Teachers of Journalism met Saturday (26), to discuss "Instruction in Radio." Paul Wagner, Ohio University, Athens, Ohio, chairman of the roundtable, led the discussion.

WPAY PINCH HITS FOR PAPERS

Portsmouth, O.—WPAY is once again on regular production schedule following a seven weeks' interruption caused by a printers' strike at the Portsmouth Times. Staff members of WPAY completely revised their broadcast-day to make available additional news broadcasts sponsored by the Times. The entire radio facilities of WPAY were expanded to include all news of both local and national interest in the Portsmouth area. The Times sponsored six daily newscasts, Monday through Saturday, which included a society program and the comics. WPAY, "Your Good Neighbor," scheduled these features in addition to the news programs regularly aired over this station.

International

T. A. M. CRAVEN TO REPRESENT NAB AT NORTH AMERICAN REGIONAL CONFERENCE

The NAB Board of Directors has appointed T. A. M. Craven, Vice-President of the Cowles Broadcasting Company, as its representative at the forthcoming North American Regional Broadcast Engineering Conference, which meets February 4, to consider problems related to standard band broadcasting in the North American Region, particularly as they are affected by the North American Regional Broadcast engineering which expires March 29, 1946.

According to a State Department release, the countries which are parties to the agreement are as follows: "Canada, Bahamas, Cuba, Dominican Republic, Haiti, Mexico, Newfoundland, and the United States. The British Government has indicated its intention of sending observers in behalf of the other British possessions in the North American Region and it is possible that observers may be present from the Central American Republics and Panama."

The State Department release continues: "Representatives of the United States broadcast industry are invited to participate as observers throughout the conference. It is expected that industry representatives will also be present from other countries. In order to aid in the arrangements for the meetings and the disposition of matters to be called up, interested persons are requested to notify the Assistant Secretary of the Conference, Miss Frances W. Simpson, Telecommunications Division, Department of State, 1818 H Street N. W., Washington, D. C., not later than February 2, 1946. In this connection, it is desirable that persons who plan to attend identify themselves by office or position and if attendance is in a representative capacity, the identity of the persons or organization in whose behalf they will attend.

The agenda of the conference will consist of proposals on behalf of each of the countries which are parties to the NARBA Agreement and various subjects of a technical character designed to improve service in each country as well as to minimize interference between countries.

Following the opening plenary session, meetings will be held in the offices of the Federal Communications Commission, Pennsylvania Avenue and 12th Street, N. W., Washington, D. C.

The Delegation of the United States will consist of the following: Commissioner Ewell K. Jett of the Federal Communications Commission, Chairman; Mr. Harvey B. Otterman of the State Department, Vice Chairman; Mr. George Adair, Chief Engineer, and Mr. Rosel Hyde, General Counsel of the Federal Communications Commission; and Mr. Donald R. MacQuivey of the Telecommunications Division of the State Department. This delegation will be assisted by members of the staff of the Federal Communications Commission and of the State Department.

The Secretary of the conference will be Mr. K. Neil MacNaughten of the Federal Communications Commission and the Assistant Secretary will be Miss Frances W. Simpson of the Department of State."

Broadcast Advertising

ICE INDUSTRIES DEALER TIE-UP

The ice industry's 1946 advertising campaign is designed to do a "hot" selling job for this summer. Radio's share of the budget will depend principally on the local station's sales department. The national campaign is being placed with nine magazines, including Life, Saturday Evening Post, etc.

Your local ice dealer has already received the ice industry's brochure of their 1946 advertising plans. The dealer is being informed regularly on methods of exploitation which include radio, newspaper, bill boards, ear cards, etc. These mediums will benefit from the campaign purely from a local level.

The Nation's Ice Manufacturers are intent on impressing the public and the grocery stores, especially the fresh vegetable and food markets.

TRANSCRIBED PROGRAMS AVAILABLE

Transcribed programs, "This Is The Ice Age," may be secured through J. Allen Brown, Assistant Director, Broadcast Advertising, NAB. This series was made available to stations last year. There are six 15-minute programs. While the transcribed programs are not sufficient for a good local campaign alone, they may be instrumental in securing a sizable radio campaign. Broadcast Advertising will secure ice advertising copy for those stations requesting it. The campaign, according to Mr. Brown, will include ice refrigerators. Some of the larger markets have agencies to represent the local ice dealers.

(Continued on next page)
PER-INQUIRY AND FREE TIME

Member stations report additional P I deals. Redfield-Johnstone, Inc., of New York, is trying to get stations to handle the sale of a book, “The Veterans Best Opportunities.”

National Nurseries of Biloxi, Mississippi, are attempting to buy time on the same basis.

NAB has written both concerns advising them of the industry’s attitude toward such practices and inviting them to use radio at card rates. A copy of a resolution related to sound advertising principles, unanimously adopted at the 1942 NAB convention was sent to each of the firms.

Sound advertising is the most effective and almost the only economical way to introduce a new product, improvement in old products, and new uses for existing articles.

WOULD MAKE RADIO ADVERTISING OF ALCOHOLIC BEVERAGES ILLEGAL

Friday afternoon, January 25, Representative Rankin of Mississippi introduced a bill (H. R. 5238) which would outlaw radio advertising of alcoholic beverages.

Details were not available as NAB Reports went to press.

TOTAL FM GRANTS, 290

The Commission has granted 11 additional FM stations, bringing the total additional FM grants to 290 made to date. Following is a list of the grants:

JUDGE MILLER APPOINTED TO AMERICAN BAR ASSOCIATION

Justin Miller, president of the NAB, has accepted appointment as Chairman of a committee of the American Bar Association to work nationally on a program of cooperation of laymen and the courts. The appointment was made by Bolitha J. Laws, Chief Justice, District Court of the United States for the District of Columbia.

The Chief Justice is Chairman of the Section of Juridical Administration which has assigned to it the work of setting up programs for improving the administration of justice throughout the various courts of the nation, both state and federal.

(Continued on next page)
COURT REVERSES FCC WOKO DECISION

Reversing the Commission in its revocation of the license of WOKO, Albany, the United States Court of Appeals, District of Columbia, has rendered the following decision:

WOKO, INCORPORATED, APPELLANT

v.

FEDERAL COMMUNICATIONS COMMISSION, APPELLEE

Appeal from the Federal Communications Commission.

Argued October 18, 1945
Decided January 21, 1946

Mr. William J. Dempsey, with whom Mr. William C. Koplovitz was on the brief, for appellant.

Mr. Harry M. Plotkin, Assistant General Counsel, with whom Messrs. Rosel H. Hyde, Benedict P. Cottone, Assistant General Counsel, and Philip Bergerson, Counsel, all of the Federal Communications Commission, were on the brief, for appellee.

Before Groner, C. J., and Wilbur K. Miller and Prettyman, J.J.

WILBUR K. MILLER, J.: On September 28, 1942, the appellant, WOKO, Inc., applied to the Federal Communications Commission for a renewal of the radio station license then held by it for the operation of its broadcasting station, located at Albany, New York. Under permits periodically procured this radio station has been operated in Albany for some fifteen years last past. After extended hearings concerning the application of September 28, 1942, the Commission denied the application, and the station began to operate at Albany early in 1931. Pickard performed his promise to cooperate it. The corporation was organized on December 9, 1930, and, shortly thereafter, the license was assigned to Smith and Curtis. In 1931, the stockholders were aliens. Smith agreed to protect Pickard against the possibility that Smith might be disqualified from holding the ownership of the station. On June 26, 1943, the appellant petitioned the Commission to amend and enlarge the issues by including the proposed issue of renewal of the license.

There followed then a period of rather intensive investigation. Thereupon, the Commission designated the matter for hearing and issued a notice to the persons and the company concerned.

The hearing began to operate at Albany early in 1931. Pickard performed his promise to cooperate it. The corporation was organized on December 9, 1930, and, shortly thereafter, the license was assigned to Smith and Curtis. In 1931, the stockholders were aliens. Smith agreed to protect Pickard against the possibility that Smith might be disqualified from holding the ownership of the station. On June 26, 1943, the appellant petitioned the Commission to amend and enlarge the issues by including the proposed issue of renewal of the license.

The mediator advised that CBS would not be interested in the station at Poughkeepsie, but suggested that if it were removed to Albany CBS would be interested in having WOKO as an affiliate.

Smith went to Albany and conferred with The Press Company, the publisher of the Albany Evening News and the Knickerbocker Press, with the purpose of interesting that company in the enterprise and obtaining financial assistance from it, as Curtis had tired of his losses at Pickard and the two holding companies, the record owners of eighty shares each of two hundred forty shares of stock in question, endorsed and surrendered the certificates and a new certificate for two hundred forty shares was issued on July 2, 1934, in the name of R. K. Phelps. The stock has remained in his name on the corporate records since that time and has been so represented to the Commission.

When the Commission received on October 1, 1942, the appellant's application for a renewal of its license, dated September 28, 1942, it designated the matter for hearing and specified the following issues:

"(1) To determine whether or not the applicant is qualified to continue the operation of Station WOKO.

(2) To determine whether or not the applicant is qualified to continue the operation of Station WOKO.

(3) To determine whether or not the applicant is qualified to continue the operation of Station WOKO.

(4) To determine whether or not the applicant is qualified to continue the operation of Station WOKO.

There followed then a period of rather intensive investigation by the Commission, which included visits to Albany and Kansas City by a member of the Commission's legal staff. On June 26, 1943, the appellant petitioned the Commission to amend and enlarge the issues by including the following:

"1. To determine the nature, character and extent of the program service rendered by Station WOKO in the past, as well as that which is proposed to be rendered in the future.

2. To determine the nature, character, and extent of

(Continued on next page)
the activities and/or policies of the licensee, its officers, directors, stockholders, agents, and/or employees, with respect to the operation of the station, the public service rendered thereby, and the response of the public to such activities and/or service in the past and the proposals for future policies, activities and operation.”

The Commission declined to amend and enlarge the hearing in light of the evidence it had heard. The original finding was that “broad enough to permit, within reasonable bounds, the introduction of the evidence suggested by the proposed issues of the petitioner.”

Hearings were held in July, August and September, 1943, at which evidence of many witnesses was received and numerous exhibits were filed as parts of the record. It developed that Smith and Curtis each held twenty-five and one-half per cent of the capital stock of the appellant, that Phelps had exercised his option in 1932 to purchase twenty-five per cent of the stock for $25,000, and that the remaining twenty-four per cent had stood in the name of R. K. Phelps on the corporation register since July 2, 1934. Phelps testified that he knew nothing of the transfer of the stock to him, that he was not and had never been the actual owner of it and that he had been imposed upon by Pickard in that respect. It appeared that dividend checks regularly had been issued by the corporation to Phelps and had been addressed to her husband and did not bring them to his attention.

It appears clearly from the evidence that the Pickards received the dividends on the two hundred forty shares of stock of the corporation in question. It is assumed, throughout the entire period in question, that Mrs. Phelpd, sister to Mrs. Pickard, testified that the transfer of the stock to him, that he was not and had never been the actual owner of it and that he had been imposed upon by Pickard in that respect. It appeared that dividend checks regularly had been issued by the corporation to Phelps and had been addressed to her husband and did not bring them to his attention.

It appears clearly from the evidence that the Pickards received the dividends on the two hundred forty shares of stock of the corporation in question. It is assumed, throughout the entire period in question, that Mrs. Pickard endorsed Phelps’ dividend checks regularly had been issued by the corporation to Phelps and had been addressed to her husband and did not bring them to his attention.

It appears clearly from the evidence that the Pickards received the dividends on the two hundred forty shares of stock of the corporation in question. It is assumed, throughout the entire period in question, that Mrs. Pickard endorsed Phelps’ dividend checks regularly had been issued by the corporation to Phelps and had been addressed to her husband and did not bring them to his attention.
simply directs the Commission to grant or renew a license if it shall find that public interest, convenience, or necessity would be served thereby, or that it is impossible, to formulate a precise and comprehensive definition of the term "public interest, convenience, or necessity," and it has been said often and properly by the courts that the facts of each case must be examined and must govern its determination. Where there is a conflict in the evidence, a decision of the Commission refusing to renew a license should not be allowed to stand if it appears that the Commission's prior and necessarily basic determination that public interest, convenience, or necessity would be served thereby, was not properly reached; that is, that proper standards were not applied in reaching the conclusion that a renewal would not serve the public interest, convenience, or necessity, and that the conclusion reached was arbitrary or the result of caprice.

It is obvious that, in dealing with an application for the renewal of a license, the quality of the applicant's programs and the adequacy of the applicant's mechanical and scientific broadcasting facilities are principal among the elements to be considered. Concerning these particulars, although the Commission made no finding with respect to them, substantial and undisputed evidence in the record shows that the applicant is with the quality of the music and messages which it emits.

It should be remembered that the applicant sought the enlargement of the issues specified by the Commission to include the fundamental issue of the quality of its program service and the mechanical and scientific broadcasting facilities and their operation. The Commission declined to make the suggested enlargement because it said that the issues originally announced by it were sufficiently broad to permit the introduction of evidence concerning the specific and principal concern which the general public has in Station WOKO, and that it has not been guilty of delinquency in service which would support the conclusion that it should be denied a renewal of its license for that reason. Probably the principal concern which the general public has in Station WOKO is with the quality of the music and messages which it emits.

The record reveals, not only that the Commission made no finding with respect to the quality of the applicant's service in the past and its equipment for good service in the future, but also that it failed to mention in its findings anything of the value of the property which its decision would render almost valueless. It failed to notice the innocence of Curtis and The Press Company concerning Smith's concealment of Pickard's stock ownership. These things we regard as being material. There is evidence in the record that in 1943 an offer of $75,000 was made for the Press Company which will be largely lost to them should the Commission's decision stand.

Under the authority of the Communications Act (Section 312, Title 47, U. S. C.) a station license may be revoked by the Commission for false statements, either in the application for a station license or therefor in the statement of fact which may be required by section 308, or because the statements of fact revealed conditions which would have justified the refusal of a license in the first instance. It may be said, therefore, that the Commission may refuse to renew a license for any similar reason. It seems to us, however, that it is impossible to dissociate the provisions of Section 312 from those of Sections 307 and 309.

The latter two sections contain the broad standard that the public interest, convenience, and necessity would be served by a revocation. Any other construction of Section 312 would seem to give the Commission arbitrary power to revoke a license for the most inconsequential misstatement by the licensee.

For all the foregoing reasons we conclude that the Commission does not have the power, implied from the provisions of Section 312 or otherwise, to refuse to issue a renewal license because of misstatements of the licensee, unless those misstatements are of such moment as to outweigh all competing considerations, and logically and rationally to give rise to the conclusion that the public interest, convenience, and necessity would be served by a revocation. Any other construction of Section 312 would seem to give the Commission arbitrary power to revoke a license for the most inconsequential misstatement by the licensee.

That no such order of revocation shall take effect until fifteen days' notice in writing thereof, stating the cause for the proposed revocation, has been given to the licensee. Such licensee may make written application to the Commission at any time within said fifteen days for a hearing upon such order, and upon the filing of such written application said order of revocation shall stand suspended until the conclusion of the hearing. Any such order as the Commission may prescribe. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of revocation.

(U. S. C., Title 47, § 312(b)). Any station license may be revoked for false statements either in the application or in the statement of fact which may be required by section 308 of this title, or because of conditions revealed by such statements of fact as may be required from time to time which would warrant the Commission in refusing to grant a license on an original application, or for failure to operate substantially as set forth in the license, or for violation of or failure to observe any of the restrictions and conditions of this chapter or of any regulation of the Commission authorized by this chapter or by a treaty ratified by the United States:

Provided, however, That no such order of revocation shall take effect until fifteen days' notice in writing thereof, stating the cause for the proposed revocation, has been given to the licensee. Such licensee may make written application to the Commission at any time within said fifteen days for a hearing upon such order, and upon the filing of such written application said order of revocation shall stand suspended until the conclusion of the hearing. Any such order as the Commission may prescribe. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of revocation.

(U. S. C., Title 47, § 308(a)). If upon examination of any application for a station license or for the renewal or modification of a station license, the Commission shall determine that public interest, convenience, or necessity would be served by the granting thereof, it shall issue the issuance, renewal, or modification thereof in accordance with said finding. In the event the Commission upon examination of any such application shall determine that public interest, convenience, or necessity would not be served, or that such application shall not be found to be duly made, it shall notify the applicant thereof, shall fix and give notice of a time and place for hearing thereon, and shall afford the applicant such opportunity to be heard under such rules and regulations as it may prescribe.

(Continued on next page)
trative agent of the Congress must be used so as to con-
tribute to that service, or it will be correctly characterized as arbitrary, if hurt results to anyone.

Its decision in the present case constitutes a departure from the course which the Commission has taken in dealing with misstatements in applications in other cases. It has not heretofore considered itself bound to refuse to issue a license or a renewal because of misstatements in applications; on the contrary, it has followed the practice of weighing all the elements of each situation presented to it in deciding whether the public interest would or would not be served, were a license or a renewal granted.9 The doctrine of *stare decisis* does not apply to decisions of administrative tribunals such as the Commission. But radical departures from administrative interpretation consistently followed cannot be made except for most cogent reasons. Indeed it has been said that the adoption by an administrative agency of different standards for similar situations amounts to acting arbitrarily.10

The Navarro case (8 F. C. C. 198) is an illustration of the manner in which the Commission heretofore has interpreted the statute as to its duty in dealing with misstatements made by applicants for licenses. The Commission revoked the license of Navarro but, after a hearing had subsequently to the order of revocation, set aside that order. The finding was that the applicant had misrepresented its purpose as to the financing, construction, control, and operation of the station, in obtaining the original construction permit and station license. The Commission also found that the members of the original partnership which obtained the construction permit and initial license, had transferred their rights to Ulmer and Terry without the consent of the Commission and in violation of the Act. But, because Ulmer and Terry relinquished their rights to others who proceeded to operate the station in the interest of the public and in full compliance with official regulations, the Commission concluded that "there is nothing in this record to indicate that the respondents, if permitted by this Commission, will not continue to operate in the public interest as they have done since November 1937." The opinion of the Commission then adds the following statement:

"In determining whether to revoke the license of a radio-broadcast station for false representations to the Commission and other violations of the Communications Act, the Commission is faced with competing considerations. The Commission’s primary duty is to the listening public and, in dealing with a licensee, the Commission must be guided by this primary duty. On the other hand, if the Commission is to carry out its function of granting and denying applications for licenses, it must obtain true and accurate information from those seeking to operate radio stations and must take disciplinary action against those who make false representations to the Commission. But discipline should not be inexorably applied when station licensees demonstrate to the Commission that those respondents have now done, that they are ready to act in good faith.

"To revoke their license at this time would deprive the community of the service of this station when there is no reason to believe that the respondents will not continue to operate in the public interest."

In the case at bar, in a petition for rehearing, the applicant proposed a complete corporate reorganization of WOKO, Inc. The suggested plan included the resignation of all officers and directors who had served as such there-tofore; the Phelps stock and other shares aggregating fifty-one percent were to be held by a new corporation controlled by prominent Albany citizens, and such shares as Smith and Curtis would have left were to be placed in a voting trust under the terms of which those individuals would have no voice in a stockholders' meeting. This plan, as indicated, would have fit into the reasoning of the Commission in the Navarro case, when it is remembered that the mechanical, scientific and program excellence of the station is not challenged. But the Commission denied the petition for rehearing and so refused to consider the plan proposed, would have been consonant with the expressed purposes of the Communications Act, when it is remembered that the mechanical, scientific and program excellence of the station is not challenged. But the Commission denied the petition for rehearsing and so refused to consider the plan proposed, would have been consonant with the expressed purposes of the Communications Act. The Act does not confer upon the Commission any punitive jurisdiction, and a license or

(Continued on next page)
its renewal may not be withheld in order to punish an applicant for violating the Act or a rule or regulation of the Commission. Such violations are to be punished only by the imposition after conviction, of the heavy fines imposed by Sections 501 and 502 of the Act. Nor does the Commission claim the right to punish, but on the contrary disavows any punitive intent here.

So it is manifest that the Commission’s decision must depend for validity on the rationality of the step, directly and without any other consideration, from the Commission’s well-grounded finding that the real beneficial owner of twenty-four per cent of the stock had been concealed from it. to the conclusion that the appellant “cannot not be entrusted with the responsibilities of a licensee,” and the consequent additional conclusion that the renewal license would not serve the public interest, convenience, or necessity.

We are unable to agree that the step can logically be taken. Other elements must necessarily be weighed. Certainly the conclusion cannot be upheld as a penalty, for the reason stated heretofore; but the conclusion that the denial of the renewal license was penal in nature and so intended by the Commission cannot be escaped, for the appellant is the same corporation now which for the reason stated heretofore; but the conclusion that future disavows any punitive intent here.

Other comparable cases. But that the making of the Commission’s drastic order, terminating the life of the station, is reasonably clear.

The Administrative Law Section of the D. C. Bar Association announces that speakers at its regular meeting, to be held at the U. S. Chamber of Commerce Bldg., 1615 H St., N. W., Washington, 8:00 p. m. Feb. 5, will be the Hon. Sam Hobbs, Congressman from Ala., and Hon. Gerard S. Real, member of NLRB.

All attorneys practicing before the FCC who wish to attend will be welcomed.

District Meetings

17TH DISTRICT MEETING

The following account of the District 17 meeting in Seattle, Jan. 14-15, was received too late for inclusion in last week’s REPORTS:

Highlighted by a keynote address by President Justin Miller, broadcasters of the 17th NAB District, comprising stations of Oregon, Washington and Alaska, held a most successful meeting at the Olympic Hotel in Seattle.

Applications for membership were received from KIRO Seattle, KKKO Everett, and KVI Tacoma.

Entertainment for the main banquet on Monday night was provided by talent from all Seattle stations, under the guidance of the Arrangement Committee chairman, Bob Priebe, of KRSC. Each of the 117 registrants attested to the constructiveness of the sessions and heartily applauded District Director Harry Spence of KXRO, Aberdeen, and the entire arrangements committee, for a good job, well done.

At the closing session Tuesday, Tom Olsen of KGY, Olympia, was elected head of the Washington State Broadcasters and Glenn McCormick of KSLM, Salem, was named to lead the Oregon unit.

Following is a list of those in attendance:

A. Adler, KMED, Medford, Ore.; C. E. Arney, Jr., Natl. Ass’n, broadcasters; D. A. Baker, KBRO, Everett; Ray Baker, KOMO, Seattle; Frank P. Barnes, Gen. Electric, San Francisco; Leonard Beardsley, KXA, Seattle; Ted Bell, KRSC, Seattle; Stan Bennett, KOMO, Seattle; Paul F. Benton, KMO-KIT, Tacoma; John Blake, KWSC, Pullman; Louis Bodewalt, KXIN, Portland; Francis Brodt, KOMO, Seattle; Harry Buckenham, KXIN, Portland; C. O. Chatterton, KWLC, Longview; Fred Chitty, KVAN, Vancouver; Joe Chytli, KELA, Centralia; Jack Clarke, KIT, Yakima; Frank Conrad, ABC, Los Angeles; Ted Cooke, KOM, Portland; Robert T. Davis, KALE, Portland; Margaret Dieringer, KXK, Seattle; John DuBuquet, KXK, Seattle; Hugh Feltis, BMB; Birt F. Fisher, KJR, Seattle; H. M. Gander, KORE, Eugene, Ore.; O. W. Fisher, KOMO, Seattle; Romig C. Fuller, KRSC, Seattle; Arthur Gerbel, Jr., KJR, Seattle; Fred G. Godward, KXRO, Aberdeen; Richard E. Green, KOMO, Seattle; Spence Green, KJR, Seattle; Homer Griffith, Homer Griffith Co., Hollywood, Cal.; Saul Haas, KIRO, Seattle; Gus Hagenah, Standard Radio, Chicago; Ralph Hanson, KUIN, Grants Pass, Ore.; Ben Harkins, KOMP, Port Angeles; Bob Harris, KRSC, Seattle; Mrs. J. B. Hatfield, KEVR, Seattle; Joe Hilderson, KIRO, Seattle; J. A. Hogg, General Electric, Seattle; Bill Hubbaeh, KOMO, Seattle; Mr. E. T. Irwin, KVI, Tacoma; Mrs. E. T. Irwin, KVI, Tacoma; Lee Jacobs, KBLM, KXW, Pullman; Mrs. Lee Jacobs, KVL, Baker, Ore.; Mrs. Lee Jacobs, KLEI, Baker, Ore.; John Jessup, KJR, Seattle; Glenn Jones, KWSC, Pullman; Mark Knight, AP, Seattle; Howard

Lance, WSAI, Cineinatti, Ohio; C. S. Lock, KWSC, Pullman; Frank H. Loggan, KBNB, Bend, Ore.; Peter Lyman, MacWilkin, Cole & Weber, Seattle; Rod McDonald, KXA, Seattle; R. G. McBrone, KFIO, Spokane; Glenn McCormick, KSIM, Salem, Ore.; R. D. McCormack, KOMO, Seattle; Allen Miller, KOAC, Corvallis, Ore.; Paul Moore, KJX, Seattle; Jerry Morris, KOL, Seattle; Bob Morrison, NBC Record, San Francisco; C. W. Myers, KOIN, Portland; Carl A. Nielsen, NBC Spot Sales, San Francisco; Arden X. Pangborn, KGW, Portland, Ore.; Marshall Pongra, KNRR, Roseburg, Ore.; Jennings Pierce, NBC, Hollywood, Calif.; Homer Pope, KJX, Seattle; Robt. E. Priee, KRSC, Seattle; H. J. Ray, KIRO, Seattle; O. A. Runcheney, KOL, Seattle; Vern Sawyer, KMO, Tacoma; Jerry Seehan, KMO, Tacoma; Hal Shade, KOOS, Coos Bay, Ore.; A. Sheehan, KJX, Seattle; Frank Sheehan, Jr., KJX, Seattle; Bartley Sims, KEVR, Seattle, KTYW, Yakima; Kelly Smith, CBS, New York; T. J. Smith, KWSC, Pullman; Ace Spear, KJX, Seattle; Harry R. Spence, KXRO, Aberdeen; Burt Squire, SBSAC, New York; Dan Starr, KOMO, Seattle; Loren Stone, KIRO, Seattle; Lloyd C. Sundstrom, KOP, Port Angeles; Bob Sutton, KPQ, Wenatchee; Mrs. Sutton; A. G. Taft, KOL, Seattle; W. R. (Bill) Taft, KRKO, Everett; Mrs. W. R. (Thelma) Taft, KRKO, Everett; Dixie Lou Thomson, Strong & Prossor, Seattle; L. W. Trommits, KORE, Eugene, Ore.; Bill Tucker, KIRO, Seattle; Florence Wallace, KXA, Seattle; James W. Wallace, KPQ, Wenatchee, KXOS, Bellingham; Bill Warren, KOMO, Seattle; C. N. Webster, KNP, Port Angeles; Mrs. C. N. Webster, KNP, Port Angeles; Glenn Wheeler, KWIL, Albany, Ore.; Ken Yeend, KIRO, Seattle; Hal Byer, KWIL, Albany, Ore.; F. D. Carroll, Tac. Tel. & Tel., Seattle; Sharon Kane, KOL, Seattle; King Mitchell, KTB, Tacoma; Tom Gaen, KGY, Olympia; Burke Ormsby, KTB, Tacoma; Tubby Quilliam, KTB, Tacoma; Nick Bourne, UP, Portland, Ore.; Jack Frost, RCA, Los Angeles, Calif.; Donald Graham, KOMO, Seattle; R. R. Howard, Uni. Research Lab., San Francisco; John Reating, John Keating, Portland; J. McLaughlin, John Keating, Seattle; R. J. Newman, RCA, San Francisco.

Prepared by Accounting, Statistical and Tariff Department, January 22, 1946.
The Federal Communications Commission on Jan. 23 adopted Order No. 75-D, modifying the extensive requirements of Order No. 75, originally adopted June 18, 1940, as part of the Commission's national emergency program. Order 75 required holders of and applicants for radio operator licenses, both commercial and amateur, to submit responses to questionnaires together with fingerprints and documentary evidence of citizenship. Order 75-D eliminates the requirements of Order 75 except with regard to the submission of fingerprints on F.C.C. Form No. 735-A. Effective Jan. 23, 1946, an applicant for an operator license, commercial or amateur, is not required as a general rule to submit documentary evidence of citizenship. He must, however, continue to certify in his application that he is a citizen of the United States and must also furnish fingerprints. In particular cases, the Commission may make specific requests for documentary evidence of citizenship and for information concerning qualifications to hold operator licenses.

**Miscellany**

**CORRECTION**

The Wichita Falls, Tex., *Daily Times* has requested a correction in the announcement made concerning their conditional permit for an FM Metropolitan station (Reports). The Times Publishing Co. is not interested in standard station WACO, as was erroneously stated in a Commission release.

**Federal Communications Commission Docket**

**HEARINGS**

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, January 28. They are subject to change.

**Monday, January 28**

Consolidated Hearing

NEW—Old Dominion Broadcasting Corp., Lynchburg, Va.—C.P. 1390 kc., 1 KW, unlimited DA-night and day.

NEW— Piedmont Broadcasting Corp., Danville, Va.—C.P. 1390 kc., 1 KW, unlimited DA-night and day.

To Be Held Before Commissioner Durr, Council Chambers of the City of San Buenaventura, Ventura, California

NEW—Coast Ventura Co., Ventura, Calif.—C.P. 1450 kc., 250 watts, unlimited.

NEW—Ventura Broadcasters, Inc., Ventura, Calif.—C.P. 1450 kc., 250 watts, unlimited.

**Tuesday, January 29**

Consolidated Hearing Before Commissioner Denny

NEW—James H. McKeel, Charleston, W. Va.—C.P. 1240 kc., 250 watts, unlimited.

NEW—Capitol Broadcasting Corp., Charleston, W. Va.—C.P. 1210 kc., 250 watts, unlimited.

NEW—Gus Zaharis and Penelope Zaharis, d/b as Chemical City Broadcasting Co., Charleston, W. Va.—C.P. 1210 kc., 250 watts, unlimited.

NEW—Joe L. Smith, Jr., Charleston, W. Va.—C.P. 1400 kc., 250 watts, unlimited.

**Wednesday, January 30**

WSAV—WSAV, Inc., Savannah, Ga.—C.P. 630 kc., 5 KW, unlimited DA-night.

**Friday, February 1**

Consolidated Hearing to Be Held Before Commissioner Walker in the Federal Court Room, Federal Building, Dallas, Texas

NEW—Richard George Hughes, Borger, Texas—C.P. 1490 kc., 250 watts, unlimited.

**Federal Communications Commission Action**

**APPLICATIONS GRANTED**

WTBO—Cumberland Broadcasting Co., Cumberland, Md.—Granted construction permit to install a new antenna and ground system.

KABC—The Alamo Broadcasting Co., Inc., San Antonio, Texas—Granted modification of construction permit (B3-P-359) which authorized change in frequency, etc., for extension of completion date to 4-9-46.

WKVM—American Colonial Broadcasting Corp., West of Arecibo, P. R.—Granted license to cover construction permit which authorized a new station to operate on 1390 kc., 250 watts, unlimited time. Also granted authority to determine operating power by direct measurement of antenna power.

WMSA—The Brockway Co., South of Massena, N. Y.—Granted license to cover construction permit which authorized a new station to operate on 1340 kc., 250 watts, unlimited time. Also granted authority to determine operating power by direct measurement of antenna power. The licensee is granted a waiver of Secs. 3.55 (b) and 3.60 of the Commission's rules; conditions.

Salt Lake City Broadcasting Co., Salt Lake City, Utah—Granted license to cover construction permit which authorized a new station to operate on 910 kc., 1 KW, unlimited time, DA. Also authority to determine operating power by direct measurement of antenna power. The licensee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules; conditions.

KMO—Carl E. Haymond, Tacoma, Wash.—Granted license to cover construction permit which authorized changes in auxiliary transmitting equipment.

KBST—The Big Spring Herald Broadcasting Co., Big Spring, Texas—Granted modification of construction permit which authorized increase in power, etc., for installation of new transmitter and extension of commencement and completion dates from 11-4-45 and 5-4-46, respectively, to 30 days after grant and 90 days thereafter, respectively.

(Continued on next page)

Roy Hofheinz and W. N. Hooper, a partnership, d/b as La. Broadcasting Co., d/b as Bay City Broadcasting Co., McAllen, Texas.

Arkansas Valley Broadcast Co., Fort Smith, Ark.—Ordered that application (B3-P-4200), for a new station, be designated for hearing in a consolidated proceeding with applications of The Times Picayune Pub. Co., Frank R. Gibson, and Bay City Broadcasting Co.

(Continued on next page)
Times Publishing Co.—Granted motion to dismiss without prejudice application for a new station. (B2-P-3573; Docket 6900)

Wendell Mayes, et al., d/b as Odessa Broadcasting Co., Odessa, Texas—Granted order granting petition requesting leave to amend its application (Docket 6943); accepted the amendment and ordered that the application, as amended, be removed from the hearing docket. (133-P-1290; Docket 7073)

Sunland Broadcasting Co., El Paso, Texas—Granted order granting petition to dismiss without prejudice its application for a new station. (133-P-1429; Docket 7073)

El Paso Broadcasting Co., El Paso, Texas—Granted order granting petition to dismiss without prejudice its application for a new station. (133-P-1429; Docket 6857)

WRAX—John H. Steeger, Jr., Wilkes-Barre, Pa.—Ordered that temporary extension of license for station WRAX be further extended from Feb. 1 to April 1, 1946, pending determination upon application for license. (Docket 6723)

WOKO—WOKO, Inc., Albany, N. Y.—Ordered, upon the Commission's own motion, that the special temporary authorization for the continued operation of station WOKO be extended to March 30, 1946.

Truett Kimzey, Greenville, Texas—Granted request to use call letters KGVL for new station granted on Nov. 30, 1945.

WWDC—Capital Broadcasting Co., Washington, D. C.—Granted an extension of the authority for waiver of Secs. 2.53 and 13.61 of the Commission's Rules so as to permit operation of the synchronous amplifier of Station WWDC by remote control from main transmitter location, for the period ending in no event later than April 1, 1946, upon the same terms and conditions as the existing authorization for such operation.

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—Granted motion requesting dismissal of application for C. P., and application (B2-P-1141) was dismissed without prejudice.

Central Broadcasting Corp., Corpus Christi, Texas—Granted motion for dismissal without prejudice of application for construction permit, and the application (133-P-707) was so dismissed.

Marcus Loew Booking Agency, Washington, D. C.—Granted motion to dismiss without prejudice application (B1-P-104) for a new television station.

Trinidad Broadcasting Co., Trinidad, Colo.—Granted construction permit for a new station to operate on 1280 kc. 1 KW day, 500 watts night, unlimited time.

H. L. Corley, Jr., as Corley Radio and Sound Service, Trinidad, Colo.—Granted construction permit for a new station to operate on 1210 kc., 250 watts, unlimited time. (B3-P-3992)

WICA—State of C. A. Rowley, Decedent, (Transferor), Robert B. Rowley and Donald C. Rowley, Trustees under the will of C. A. Rowley, Decedant, (Transferee). WICA, Inc. (Licensee). Ohio—Granted consent to transfer of control of WICA, Inc., licensee of station WICA, from estate of C. A. Rowley, deceased, to Robert B. and Donald C. Rowley, as executors under the will of C. A. Rowley, deceased. Reserved for decision at a later date the question whether the transfer should be approved to Robert B. and Donald C. Rowley in their capacity as trustees.

WEBB—WEBB, Inc., Buffalo, N. Y.—Ordered that application (B1-P-326) for a construction permit to change frequency from 1340 to 970 kc. be designated for hearing in a consolidated proceeding with applications of WICA, Inc. (B2-P-3081) requesting frequency 970 kc. with 1 KW power, unlimited time, and WWWS, Inc. (B3-P-3055) requesting frequency 970 kc. with 5 KW power, unlimited time.

WICA—WICA, Inc., Ashtabula, Ohio: WWWS—WWWS, Inc., Pittsburgh, Pa.—Adopted an order designating for further hearing in consolidation with application of WEBR for 970 kc., the applications of WICA (Docket 6120) and WWWS (Docket 6121), requesting the 970 frequency.

Joe L. Smith, Charlottesville, Va.—Denied petition to consolidate applications of James H. McKee (Docket 6836), Capitol Broadcasting Corp. (Docket 6857), and Kent City Broadcasting Co. (Docket 6838), applicants for new station at Charlottesville, Va., as to the pending hearing for the new station and their amendment designated for hearing, with applications of WGYK, Kannawha Valley Broadcasting Co. (Docket 6558), and WCHS, Charleston Broadcasting Co. (Docket 6611) for renewal of licenses, with petitioner's application (Docket 6757), for a new station, hereinafter designated for consolidated hearing with applications of James H. McKee, et al., listed above.

ACTION ON MOTIONS

The following action was taken by Commissioner Will today:

James F. Hopkins, Inc., Ann Arbor, Mich.—Granted motion to amend application for new station (Docket 6230), and the amendment was accepted.

Hazelwood, Inc., Des Moines, Iowa—Granted motion to dismiss without prejudice application for new station (Docket 6574).

WMII, Broadcasting Co., Milwaukee, Wis.—Granted petition insofar as it requests leave to amend and remove from the hearing date the amendment already designated for the application (B4-P-3600) was removed from the hearing docket.

Harold Thomas, Waterbury, Conn.—Granted petition to dismiss without prejudice for application for a new station. (Docket 6859)

WLOF—Hazelwood, Inc., Orlando, Fla.—Granted motion for leave to amend its application (B3-P-3973), and the amendment was accepted.

Queen City Broadcasting, Inc., Cincinnati, Ohio—Granted motion and amended motion to take depositions in re its application (B2-P-1103).

WGMT—Perrin Thomas Watson, Wilson, N. C.—Granted petition to take deposition in the hearing now scheduled for Feb. 25-28 and March 8 at Washington, limiting the number of witnesses to 25 and to be taken at conclusion of depositions in Goldsboro.

WHKC—United Broadcasting Co., Columbus, Ohio—Granted petition to intervene in the hearing now scheduled for Feb. 18 on applications of WCGO, WLAP, and Queen City Broadcasting, Inc.

Queen City Broadcasting, Inc., Cincinnati, Ohio—Granted petition for leave to amend its application (B2-P-4103), and the amendment was accepted.

Virginia-Carolina Broadcasting Corp., Danville, Va.—Granted motion to take depositions in the consolidated hearing now scheduled for Feb. 21-27, upon movant's application for CP (B2-P-1113), et al.

William L. Klein, Oak Park, Ill.—Granted petition for leave to amend application (B4-P-4075), and the amendment was accepted.

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—Granted petition for waiver of Sec. 1.382(b) of the Commission's Rules, and accepted petitioner's late appearance in re (Docket 6357).

Community Broadcasting Co., Oak Park, Ill.—Granted motion for leave to take depositions in re hearing now scheduled for Feb. 7-9 upon movant's application for CP (Docket 7155).

James S. Rivers, Jr., d/b as Southeast Broadcasting System, East Point, Ga.—Granted motion to dismiss without prejudice application for CP (Docket 7688).

Charlotte Broadcasting Co., Charlotte, N. C.—Granted motion for leave to amend its application (B5-P-3847), and the amendment was accepted.

KGBS—Harbenito Broadcasting Co., Harlingen, Texas—Construction permit to install new vertical antenna, (with FM antenna mounted on top).

WMRF—Lewistown Broadcasting Co., Lewistown, Pa.—Construction permit to change transmitter location, install new vertical antenna and ground system. (Contingent on grant of application for new FM station.)

MISCELLANEOUS APPLICATIONS

KWLC—Luther College, Decorah, Iowa—Modification of license to change hours of operation from daytime to specified hours. (Contingent on grant of application for new station at Decorah, Iowa, filed by Telegraph-Herald.)

KLIZ—E. Thomas O’Brien, Mildred O’Brien Chalberg, John Chalberg, John Chalberg, Mabel O’Brien Smith & William Graham, d/b as Brainerd Broadcasting Co., Brainerd, Minn.—Modification of construction permit B4-P-3991 which authorized a new station for approval of transmitter location at SE corner Oak St. & Beech St., Brainerd, Minnesota, and approval of antenna.

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

McKesson & Robbins, Incorporated, Bridgeport, Conn., trading as Golden Brown Chemical Co., is charged in a complaint with falsely representing to its prospective agents that by purchasing specified quantities of certain toilet articles they will receive other items of merchandise "free." (5415)

Package Advertising Co.—A complaint has been issued charging Henry J. Taylor, trading as Package Advertising Co., 220 Park Avenue, New York, with unlawful use of patents and so-called license agreements as a means of fixing and maintaining uniform zone prices for printed waxed paper bands used by the baking industry as a part of the wrappers for bread and cake. (5416)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Dearborn Supply Co.—After reopening its proceeding against Dearborn Supply Company, Chicago, and taking additional testimony in the matter, the Commission has issued a second supplemental order directing the company to cease and desist from disseminating advertisements which fail to disclose the harmful potentialities of its cosmetic preparation Mercolized Wax Cream, formerly designated Mercolized Wax. (3593)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Astor Pictures Corp., 120 West 46th Street, New York, stipulated that it will cease and desist from certain unfair and deceptive practices in connection with its business of reusing motion picture films. The stipulation was also signed by three individuals connected with the corporation, Robert M. Savini, Jacques Kopstein and Fred Bellin. (4138)

Henry Centrovitz, 101 Essex Street, New York, manufacturer of umbrellas, stipulated that he will cease and desist from advertising, branding, labeling, invoicing or selling products composed in whole or in part of rayon without clearly disclosing such fact by use of the word "rayon," and, when a product is composed in part of rayon, and in part of other material, freely disclosing in immediate connection with the word "rayon," and in equally conspicuous type, each constituent fiber of the product in the order of its predominance by weight beginning with the largest single constituent. (4136)

Marion H. Davis et al.—Two stipulations have been entered into which the respective respondents agree to cease and desist from certain misrepresentations in connection with the sale of an insecticide spraying device designated "The Killer" or "Electro Sprayer.")

One stipulation (4139) was entered into by Marion H. Davis and Kenneth Hendryx, trading as Marion H. Davis & Co., 1212 Mary Street, Jacksonville, Fla., and the other (4140) by Electro Spray Corp., 3129 East Seventh Street, Oakland, Calif.

Dermatological Products Corp., trading as Glenn Products Co., 110 Observer Highway, Hoboken, N. J., and Samuel Thomas, Maurice C. Thomas and Philip C. Thomas, associated with the corporation, entered into an amended stipulation in which they agree to discontinue using, in connection with the sale of Dr. Thomas’ Ointment, the words "leg sores" or "old leg sores," or other terms of similar implication, as descriptive of the conditions for which their product is offered as a treatment or cure or as a palliative. (4074)

Fox Fur Co., Inc., 427 Seventh Street, N. W., Washington, D. C., entered into a stipulation to cease and desist from using the terms “Natural Civit Cat,” "Civit Cat" or "Civit," or other words of like meaning, to designate furs or fur garments made of the peltries of the little spotted skunk, or of any peltries other than civet; and from the use of the words "Blended Marmink" or "Marmink," or any other fictitious animal designation or coined fur-counting term as descriptive of or in connection with its fur products. (4135)

John G. Gasteiger, et al.—A stipulation to cease and desist from certain misrepresentations in connection with the sale of Klearecare, a preparation advertised as aiding in the curing of concrete, has been entered into by John G. Gasteiger, 41-04 35th Street, Flushing, N. Y.; National Automotive Fibres, Inc, 19925 Hoover Avenue, Detroit, and National Concrete Curing Materials Co., Inc, Newark, N. J. (4135)

Globe Laboratories, Fort Worth, Texas, stipulated that in connection with the sale of its preparation designated “A-C-Tol,” advertised as an effective poultry stimulant and vermifuge, it will cease and desist from certain statements. (4135)

Jack Leese, 551 Fifth Avenue, New York, trading as Jack and as Jennings Company, engaged in the sale of perfumes, stipulated that he will discontinue the use of the words "French Imported Essence" as descriptive of perfumes not composed wholly of essence imported from France. (4139)

Eleanor Schultz and George Baden, trading as E. G. Sales & Manufacturing Co., 355 East 49th Street, New York, entered into a stipulation to discontinue the following practices in connection with the sale of a device designated “E. G. Supercharger,” designed for use with the ignition systems of internal combustion engines. (4135)

Vacu-Matic Carburetor Co., Wauwatosa, Wis., engaged in the sale of an automobile polish designated “Master Glaze,” has entered into a stipulation to discontinue using the words “free,” “gift,” “present” or any other term of similar meaning to describe or refer to merchandise which is not a gift, and the prospective recipient is required as a consideration to purchase some other article or articles or render some service in order to obtain the same. (4134)
LEA BILL GOES TO HOUSE FLOOR

The amended Lea Bill (H. R. 5117) which was recently reported out of the House Interstate and Foreign Commerce Committee (see NAB REPORTS, p. 53) has had its way cleared for House consideration by the Rules Committee which gave the bill right of way to the floor after hearing the Interstate and Foreign Commerce Committee's report. No date has been set for House consideration.

The report on the bill is herewith reprinted in full:

REPORT

[To accompany H. R. 5117]

The Committee on Interstate and Foreign Commerce, to whom was referred the bill (H. R. 5117) to amend title V of the Communications Act of 1934 so as to prohibit certain coercive practices affecting radio broadcasting, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Page 4, in lines 15 to 18, inclusive, strike out—
shall be guilty of a felony and, upon conviction thereof, shall be punished by imprisonment for not more than two years or by a fine of not more than $5,000—

and insert in lieu thereof—

shall, upon conviction thereof, be punished by imprisonment for not more than one year or by a fine of not more than $1,000.

General Statement

For some years the radio broadcasters of the Nation have been harassed by ever-increasing extortionate and racketeering demands to which they have been forced to yield by coercive methods. The tributes thus exacted are now measured by millions of dollars.

These exactions have not been in compensation for services performed for the broadcasters or in settlement of any obligations due from them. They have not been made for the enforcement of any rights due those who demanded them.

The object of this proposed legislation is to put an end to these exactions for the protection of the broadcasting industry and for the integrity of the Nation.

Evils at Which Directed

Broadcasting has become one of the great industries of our time. It is now one of the chief means of communication of our Nation. It is one of our greatest implements for free speech. It promptly carries news to the remotest sections of the country. It is a forum for the discussion of our political, economic, and social problems. It is a source of information, education, entertainment, music, culture, and a vehicle for the messages of all religions, utilized by practically every home in the Nation.

In recent years the broadcasting industry has been subjected to extortionate demands enforced by coercive methods which increasingly threaten to restrict and handicap it in performing its rightful functions to the Nation.

Those making these demands, empowered by organized groups, not only have exacted tributes from the broadcasters but have assumed and exerted the power to say what shall and shall not be communicated over the radio. True, they have limited their dominations and demands to purposes which serve their particular groups, but nevertheless they have set a pattern for a like power of private control exerted for mercenary purposes over other phases of the broadcasting industry of the Nation. The same power exercised for other purposes, if permitted, might make the right of free speech only a name and establish censorship of broadcasting for private gain.

Those who make these demands subordinate the rights of the people of the Nation to an untrammeled broadcasting service to their own mercenary purposes. They in effect say to the broadcasters, and say to the makers of recordings, "You must pay this tribute or we will not permit you to give this service to the Nation." An effective power behind the threat is the boycott and strike.

American Federation of Musicians

The make-up and operation of the American Federation of Musicians scarcely justifies its classification as a labor union. Applicants for membership are received without conforming to any qualification of a musician. Only about one-third of them make their living primarily by musical service. The voting privileges of members are so allocated as to permit a minority domination through grossly unequal allotment of voting power.

In most cases demands of the character dealt with by this proposed legislation have been made on behalf of the American Federation of Musicians by James C. Petrillo, its president.

The bylaws of the American Federation of Musicians empower its president to promulgate and issue executive orders—

which shall be conclusive and binding upon all members and/or locals; any such order may by its terms (a) enforce the constitution, bylaws, standing resolutions or other laws, resolutions or rules of the federation; or (b) may annul and set aside same or any portion thereof, except such which treat with the finances of the organization, and substitute therefor other and different provisions of his own making.

The federation thus composed is so organized that its membership has little control over its management or policy.

Coercive Practices

The local broadcasters of the Nation are greatly dependent on the networks for rounding out their programs. This situation has augmented the coercive power of the Federation of Musicians in forcing compliance with its demands. Through coercive efforts, including boycotts and strikes and threats of boycotts and strikes against broadcasters, the networks and those who furnish materials for broad-

(Continued on next page)
casters, the industry has been forced to comply rather than suffer the penalizations that would follow a refusal to submit to these extortionate demands.

Among other things, the following demands upon the broadcasting industry have been made in recent years: That broadcasters employ persons in excess of the number wanted; that in lieu of failure to employ such persons the broadcaster should pay to the federation sums of money equivalent to or greater than funds required for the employment of members of the federation; that payments for services already performed and fully paid for should be repeated; that payments should be made for services not performed; that broadcasters should refrain from broadcasting noncompensated, noncommercial educational or cultural programs; that broadcasters should refrain from broadcasting musical programs of foreign origin; that tributes should be paid for using recordings, transcriptions, and other materials used for broadcasting; that restrictions should be placed on the manufacture and use of recordings or transcriptions for the purpose of restricting or preventing the use of such materials for broadcasting; that tributes should be paid for recordings previously paid for; that dual orchestras should be employed for a single broadcast over two or more outlets; that over 400 small broadcast stations in the country having no live orchestras would be compelled to employ such orchestras; that the use of voluntary noncompensated orchestras be barred from broadcasts unless an orchestra of the Federation of Musicians were also employed or that the union was paid an equivalent or greater amount than the regular charge for a federation orchestra.

Some of these demands began several years ago but in recent years they have become more frequent and for enlarged purposes and amounts. These boycotts and strikes and threats and threats have coerced compliance with a number of these demands, with pending demands now being greater than ever before. The amount of money extorted from the broadcasting industry by these methods, without moral right, has reached millions of dollars in amount and if demands now pending were granted it would, by these racketeering and extortion methods, require the broadcasting industry to pay tribute probably much in excess of $20,000,000 a year for peace against these boycotts, strikes, and threats.

The broadcasting industry has been surrendering to these demands for tribute to avoid the greater losses that would result from failure to comply.

Moral Quality of Practices Justifies Penalization

Under the terms of this bill certain specified types of coercive practices and demands are made unlawful. These prohibited practices are made misdemeanors and punishable as such.

The practices thus made unlawful are those directly affecting the broadcasting industry. By specific provisions of the bill it is not to be held to make unlawful the enforcement or attempted enforcement, by means lawfully employed, of any contract right or legal obligation.

The perpetration of the offenses penalized by this bill involve moral turpitude akin to that of larceny, embezzlement, the acquisition of another's property by false pretenses, racketeering, and extortion. They are not within the legitimate activities of any organized association of individuals for the cooperative purpose of their accomplishment.

The right to strike for a lawful purpose cannot be twisted into a right to combine together to commit crimes.

The moral quality of the offenses defined in the bill fully justifies their penalization.

These extortionate exactions from the broadcasting industry have been and are being accomplished by means of threats, intimidation, and coercive power of boycotts and strikes and threats of boycotts and strikes.

The practices proposed to be prohibited by this legislation are to prevent only the unlawful acts as defined in this bill, which is a privilege or right exercised for lawful purposes. The law does not contemplate that strikes shall be used as a cloak for the commission of crimes. The provisions of this bill define these unlawful practices and penalize their perpetration.

The restrictions imposed are not a limitation upon the legitimate activities of any association or combination of individuals. There is no more sanctity in crime committed by a combination of individuals than by an individual perpetrator.

Power and Duty of Congress

Congress clearly has the power and the duty of protecting the public against such exactions.

The greatest exponent of Anglo-Saxon law declared that a law is a rule of conduct prescribed by the supreme power in the state commanding what is right and prohibiting what is wrong. The first fundamental under this approach is as to whether or not the act to be prohibited is wrong. In view of the record that has been made by the answer to that question cannot be one of doubt. Conceding these practices are of such moral quality as to deserve condemnation as unlawful, the right and duty of Congress to suppress them are equally clear.

This bill provides no unjust limitation on the right to strike. The law recognizes the right to strike for lawful purposes and in a lawful manner. The right to strike should be exercised as other rights of the citizen. We have the right of free speech but that is not a justification for slander. We have the right to bear arms but that is not a justification of murder. Any persons may properly organize for lawful purposes but criminal purposes are beyond their legitimate function.

A Disservice to Labor

The offenses committed in the name of the American Federation of Musicians are a great disservice to legitimate labor organizations as well as to the public.

The situation presented by this legislation should call for the support of all branches of organized labor to give the American Federation of Musicians an opportunity to show that it does not engage in the outrageous practices committed in the name of Labor. Legitimate labor organizations cannot afford to give their condonation to such practices or approve of them by assuming their defense.

It is incredible to believe that in the long run such practices as those hereby inhibited can redound to the credit or advantage of any organization which yields itself to these sordid methods.

A Typical Approach

A characteristic assumption of those who make these demands is carried in a wire from Mr. Petrillo to the networks in October 1945, as follows:

This is to advise you that after the meeting between your company and the American Federation of Musicians held in my office the matter was further discussed and we came to the final conclusion that beginning Monday, October 29, 1945, whenever musicians play for FM broadcasting and AM broadcasting simultaneously the same number of men must be employed for FM broadcasting as are employed for AM broadcasting, which means a double crew must be employed. Kindly govern yourself accordingly.

The absurdity of such a demand is apparent. Two orchestras required for simultaneous broadcast would be an
anomaly. It is reported that 1 of the networks has a staff orchestra of 95 pieces and compliance with this order would require the employment of 190 musicians to needlessly duplicate and embarrass the work of one orchestra.

A circumstance that gave impetus to this legislation was an edict directed at a music school in Michigan, which prohibited a broadcast by a school orchestra unless a tribute of three times the usual price of an orchestra of the federation was paid for that privilege. The Vandenberg bill which passed the Senate and the Dondore bill introduced in the House were outgrowths of that circumstance.

Conclusion

The coercive character of the methods followed in the name of the American Federation of Musicians is attested by the indisputable fact of the millions of dollars mulcted from the broadcasting industry in recent years. Time after time broadcasters have paid tribute, and otherwise acceded, to these extortionate demands rather than suffer the greater hardships and losses that refusal to comply would involve. These tributes and other exactions were not payments for services or to satisfy an obligation owed to those who demanded them. They were the price paid for the peace of being relieved from the penalties of refusal. As a reward the broadcasting industry has been confronted with more and greater demands of equal viciousness.

It is the responsibility of the Congress to take effective action to stem the rising tide of unconscionable demands upon the broadcasting industry, against which, in the present state of the law, that industry is powerless to defend itself. To the end of meeting that responsibility, prompt enactment into law of the bill here reported is strongly recommended.

Explanation of the Provisions of the Bill by Subsections

The bill proposes to add to title V of the Communications Act of 1934 a new section 506, containing subsections (a) to (e), inclusive.

Subsection (a)

This subsection makes it unlawful to coerce, compel, or constrain (or to attempt to coerce, compel, or constrain) any radio-station licensee to do any one or more of the things specified in paragraphs (1) to (6), inclusive, of the subsection, whether such actual or attempted coercion, compulsion, or constraint is exerted by the use, or threat of the use, of force, violence, intimidation, or duress.

It has been necessary to use the broad language "or by the use or express or implied threat of the use of other means" in order to make the legislation effective. It was necessary to use language broad enough to embrace actual or threatened boycotts and actual or threatened strikes, because these, as well as action or threatened action of like character, could well be among the means by which the coercion, compulsion, or constraint prohibited by the bill may be accomplished or attempted to be accomplished. If the language were not this broad the legislation would fail to accomplish its purpose.

This subsection does not prohibit the right to strike or to withhold services, or force individuals to work against their will or desire. It will place no limitation whatever on the use of strikes for the accomplishment of legitimate objectives, such as wage increases or better working conditions. The subsection does not prohibit strikes as such. What it does do is to prohibit the accomplishment, by actual or attempted coercion, compulsion, or constraint, of certain unconscionable and wrongful objectives, regardless of the means used. A strike or threat of a strike is one method by which it is possible to exert or attempt to exert such coercion, compulsion or constraint, and, if it is the method used, the wrongful character of the offense is the same as though other means had been used.

The acts or things specified in paragraphs (1) to (6), inclusive, which it is made unlawful to coerce, compel or constrain, or attempt to coerce, compel or constrain, a licensee to do, are as follows:

(1) To employ or agree to employ, in connection with the conduct of the broadcasting business of such licensee, any person or persons in excess of the number of employees wanted by such licensee; or

(2) To pay or give or agree to pay or give any money or other thing of value in lieu of giving, or on account of failure to give, employment to any person or persons in connection with the conduct of the broadcasting business of such licensee, in excess of the number of employees wanted by such licensee; or

(3) To pay or agree to pay more than once for services performed in connection with the conduct of the broadcasting business of such licensee; or

(4) To pay or give or agree to pay or give any money or other thing of value for services, in connection with the conduct of the broadcasting business of such licensee, which are not to be performed; or

(5) To refrain, or agree to refrain, from broadcasting or from permitting the broadcasting of a noncommercial educational or cultural program in connection with which the participants receive no money or other thing of value for their services, other than their actual expenses, and such licensee neither pays nor gives any money or other thing of value for the privilege of broadcasting such program nor receives any money or other thing of value on account of the broadcasting of such program; or

(6) To refrain, or agree to refrain, from broadcasting or permitting the broadcasting of any radio communication originating outside the United States.

Subsection (b)

This subsection makes it unlawful to coerce, compel, or constrain (or to attempt to coerce, compel, or constrain) (Continued on next page)

any radio-station licensee, or any other person, to do any one or more of the things specified in paragraphs (1) to (3), inclusive, of the subsection, whether such actual or attempted coercion, compulsion, or constraint is exerted by the use, or threat of the use, of force, violence, intimidation, or duress, or whether it is exerted by the use, or threat of the use, of any other means (whether or not of the character as force, violence, intimidation, or duress).

It will be noted that subsection (a) discussed above, applies only in the case of actual or attempted coercion, compulsion, or constraint upon a licensee. Because of the nature of the acts or things referred to in paragraphs (1) to (3), inclusive, of this subsection, however, it has been necessary to make this subsection applicable to actual or attempted coercion, compulsion, or constraint upon a licensee or upon any other person, but the acts or things set forth in paragraphs (1) to (3), inclusive, all have a direct relationship to radio broadcasting.

What has been said above in the discussion of subsection (a) with regard to the language "or by the use or express or implied threat of the use of other means" is equally applicable in the case of this subsection.

The things specified in paragraphs (1) to (3), inclusive, of this subsection, which it is made unlawful to coerce, compel, or constrain, or attempt to coerce, compel, or constrain, a licensee or any other person to do, are as follows:

(1) To pay or agree to pay tribute for the privilege of, or on account of, producing, preparing, manufacturing, selling, buying, renting, operating, using, or containing recordings, transcriptions, or mechanical, chemical, or electrical reproductions, or any other articles, equipment, machines, or materials, used or intended to be used in broadcasting or in the production, preparation, performance, or presentation of a program or programs for broadcasting;

(2) To accede to or impose any restriction upon such production, preparation, manufacture, sale, purchase, rental, operation, use, or maintenance, if such restriction is for the purpose of preventing or limiting the use of such articles, equipment, machines, or materials in broadcasting; or

(3) To pay or agree to pay tribute on account of the broadcasting, by means of recordings or transcriptions, of a program previously broadcast, payment having been made, or agreed to be made, for the services actually rendered in the performance of such program.

Subsection (c)

This subsection, as proposed to be amended by the committee, provides that whoever willfully violates any provision of subsection (a) or (b) shall be punished by imprisonment for not more than 1 year or by a fine of not more than $1,000, or both, thus making the offense a misdemeanor. In the bill as introduced the offense would have been a misdemeanor and punishment would have been by imprisonment for not more than 2 years or by a fine of not more than $5,000, or both.

Subsection (d)

This subsection contains provisions to insure that the term "licensee," as used in the proposed new section 506, includes the owner or owner and the person in control or management, of the radio station in respect of which a station license has been granted.

Changes in Existing Law

In compliance with paragraph 2a of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as introduced, are shown as follows (new matter is printed in italics, existing law in which no change is proposed is shown in roman):

Title V of Communications Act of 1934, as Amended

Title V—Penal Provisions—Forfeitures

General Penalty

SECTION 501. Any person who willfully and knowingly does or causes or suffers to be done any act, matter, or thing, in this Act prohibited or declared to be unlawful, or who willfully and knowingly omits or fails to do any act, matter, or thing in this Act required to be done, or who willfully and knowingly endorses or fails to endorse, or certifies or fails, shall, upon conviction thereof, be punished for such offense, for which no penalty (other than a forfeiture) is provided herein, by a fine of not more than $10,000 or by imprisonment for a term of not more than two years, or both.

Violations of Rules, Regulations, and so Forth

SEC. 502. Any person who willfully and knowingly violates any rule, regulation, restriction, or condition made or imposed by any international radio or wire communications treaty or convention, or regulations annexed thereto, to which the United States is or may hereafter become a party, or any general penalty provided by law, shall be punished, upon conviction thereof, by a fine of not more than $500 for each and every day during which such offense occurs.

Forfeiture in Cases of Rebates and Offsets

SEC. 503. Any person who shall deliver messages for interstate or foreign transmission to any carrier, or for whom as sender or receiver, any such carrier shall transmit any interstate or foreign wire or radio communication, who shall knowingly by employee, agent, officer, or otherwise, directly or indirectly, by or through any means or device whatsoever, receive or accept from such common carrier any sum of money or any other valuable consideration as a rebate or offset against the regular charges for transmission of such messages as fixed by the schedules of charges provided for in this Act, shall in addition to any other penalty provided by this Act forfeit to the United States a sum of money three times the amount of money so received or accepted and three times the value of any other consideration so received or accepted, to be ascertained by the trial court; and in the trial of said action all such rebates or other considerations so received or accepted for a period of six years prior to the commencement of the action, may be included therein, and the amount recovered shall be three times the total amount of money or three times the total value of such consideration, so received or accepted, or both, as the case may be.

Provisions Relating to Forfeitures

SEC. 504. (a) The forfeiture provided for in this Act shall be payable into the Treasury of the United States, and shall be recoverable in a civil suit in the name of the United States brought in the district where the person or carrier has its principal operating office or in any district through which the line or system of the carrier runs; Provided, That in the case of forfeiture by a ship, said forfeiture may also be recoverable by way of libel in any district in which such ship shall arrive or depart. Such forfeiture shall be in addition to any other general or specific penalties herein provided. It shall be the duty of the various district attorneys, under the direction of the Attorney General of the United States, to prosecute for the recovery of forfeitures under this Act. The costs and expenses of such prosecutions shall be paid from the appropriation for the expenses of the courts of the United States.

(b) The forfeitures imposed by title III, part II of this Act shall be subject to remission or mitigation by the Commission, upon application therefor, under such regulations and methods of ascertaining the facts as may seem to it advisable, and, if suit has been instituted, the Attorney General, upon request of the Commission, shall direct the discontinuance of any prosecution to re-
cover such forfeitures: Provided, however, That no forfeiture shall be remitted or mitigated after determination by a court of competent jurisdiction.

Venue of Offenses

SEC. 505. The trial of any offense under this Act shall be in the district in which it is committed; or if the offense is committed upon the high seas, or out of the jurisdiction of any particular State or district, the trial shall be in the district in which the offenses or parts thereof, may be found, or into which he shall be first brought. Whenever the offense is begun in one jurisdiction and completed in another it may be dealt with, inquired of, tried, determined, and punished in either jurisdiction in the same manner as if the offense had been actually and wholly committed therein.

Coercive Practices Affecting Broadcasting

SEC. 506. (a) It shall be unlawful, by the use or express or implied threat of the use of force, violence, intimidation, or duress, or by the use or express or implied threat of the use of other means, to coerce, compel, or constrain or attempt to coerce, compel, or constrain a licensee—

(1) to employ or agree to employ, in connection with the conduct of the broadcasting business of such licensee, any person or persons in excess of the number of employees wanted by such licensee or

(2) to pay or give or agree to pay or give any money or other thing of value in lieu of giving, or on account of failure to give, employment to any person or persons, in connection with the conduct of the broadcasting business of such licensee, in excess of the number of employees wanted by such licensee; or

(3) to pay or agree to pay more than once for services performed in connection with the conduct of the broadcasting business of such licensee; or

(4) to pay or give or agree to pay or give any money or other thing of value for services, in connection with the conduct of the broadcasting business of such licensee, which are not to be performed; or

(5) to refrain, or agree to refrain, from broadcasting or from permitting the broadcasting of a noncommercial educational or cultural program in connection with which the participants receive no money or other thing of value for their services, other than their actual expenses, and such licensee neither pays nor gives any money or other thing of value for the privilege of broadcasting such program nor receives any money or other thing of value on account of the broadcasting of such program; or

(b) It shall be unlawful, by the use or express or implied threat of the use of force, violence, intimidation or duress, or by the use or express or implied threat of the use of other means, to coerce, compel or constrain or attempt to coerce, compel or constrain a licensee—

(1) to pay or agree to pay tribute for the privilege of, or on account of, producing, preparing, manufacturing, selling, buying, renting, operating, using, or maintaining recordings, transcriptions, or mechanical, chemical, or electrical reproductions, or any other articles, equipment, machines, or materials, used or intended to be used in broadcasting or in the production, preparation, performance, or presentation of a program or programs for broadcasting; or

(2) to accede to or impose any restriction upon such production, preparation, performance, sale, purchase, rental, operation, use, or maintenance, if such restriction is for the purpose of preventing or limiting the use of such articles, equipment, machines, or materials in broadcasting; or

(3) to pay or agree to pay tribute on account of the broadcasting, by means of recordings or transcriptions, of a program previously broadcast, payment having been made, or agreed to be made, for the services actually rendered in the performance of such program.

(c) The provisions of subsection (a) or (b) of this section shall not be held to make unlawful the enforcement or attempted enforcement, by means lawfully employed, of any contract right or legal obligation.

(d) Whoever willfully violates any provision of subsection (a) or (b) of this section shall be guilty of a felony and, upon conviction thereof, shall be punished by imprisonment for not more than two years or by a fine of not more than $5,000, or both.

(e) As used in this section the term "licensee" includes the owner or owners, and the person or persons having control or management, of the radio station in respect of which a station license was granted.

Engineering

RADAR MOON CONTACT MAY IMPROVE BROADCASTING

Signal Corps scientists believe that the first practical result of the Army's radar contact with the moon likely will be improvement in broadcasting, according to a story by a UP writer in the Washington Post, Jan. 27.

The article follows:

"The first practical result of the Army's radar contact with the moon is likely to be improvement of radio communications, Signal Corps scientists said last night.

"When the radar impulses reflected from the moon were recorded at the Army's New Jersey experiment station on January 10, it proved what scientists have long suspected—that ultra-short radio waves will penetrate the ionosphere, the multilayered, electrically charged upper atmosphere.

"With this fact established, scientists will be able to use radar to chart much more precisely the effects of the ionosphere on radio waves of varying lengths.

"When the ionosphere is fully charted, great improvements in many forms of radio communications will be possible, particularly in elimination of the so-called 'skip zone.' This is an area in which the radio signals of a particular transmitter are not heard, either because they strike the ionosphere at a too-oblique angle and penetrate it or because they are reflected at an angle that sends them past the skip zone.

"With a full knowledge of the characteristics of the ionosphere, scientists say they should be able to adjust radio waves to avoid the skip zone entirely.

"The ionosphere is composed of at least four layers of atmosphere carrying electrical charges of varying strength. The lower layer begins about 18 miles above the earth. The next is about 75 miles from the earth's surface, and the topmost two, 110 and 250 miles respectively.

"Waves of different lengths are reflected from different layers, until finally the high frequency, ultra-short waves penetrate the final layer and are not reflected. These are the waves bounced off the moon and recorded by Army radar.

"The skip zone is one of the knottiest problems of present-day radio communication. Even commercial broadcasting stations may find their programs clearly audible 500 miles from the transmitter but impossible to receive 400 miles away because of the skip zone."

ARMY UNFOLDS FURTHER RADIO-RADAR RESULTS

The Army has developed a radio-controlled rocket which has reached vertically 50 miles from the earth. Lt. Gen. Leven H. Campbell, retiring Chief of Ordnance, reported this Wednesday (29). The War Department announced at the same time that the Army Signal Corps, following up its feat of flashing radar beams to the moon, has em-

(Continued on next page)
barked upon a long-range research program to develop further information and techniques for radar study of the moon.

Announcement also has been made of the reception of electro-magnetic wave emanations from the sun. They are to be explored for further technical information.

ENGINEERS AVAILABLE

During the war, NAB cooperated with OWI in the recruitment of radio engineers for overseas service. Recently, we have been asked to reverse this procedure and assist several former OWI engineers in the securing of private employment. We are advised that the four engineers whose names and experience are outlined below are seeking positions at the present time. Broadcasters may communicate directly with the men in whom they may be interested at their home addresses.

NAB has made no investigation of the qualifications or previous experience of these engineers. However, we are informed that, insofar as their OWI experience is concerned, the essential facts are supported by official records.

Hugh A. Bondy, 158 Hope Street, Ridgewood, New Jersey—
Age 38
Holds first-class radiotelephone license. Engineering school graduate. OWI—September 1942 to August 1945. Assistant chief engineer on installation of second Algiers 50 kilowatt transmitter. In charge of installation of third 50 kilowatt Algiers transmitter. Planned 100 kilowatt marine installation. Chief engineer Rome short wave plant during entire OWI reconstruction and operation. Repaired 11 damaged OWI broadcast transmitters (1 to 5 kilowatts AM, 500 watts FM). WNEW—5 years. Engineer, supervisor, assistant to chief engineer of 10 kilowatt station operating 24 hours daily. 1930-1937, engineer engaged in radio and audio equipment design and manufacturers.

Gabriel Franco, 1315 Avenue Y, Brooklyn 29, N. Y.—
Age 41
Position with broadcasting studio or transmitter is desired by a first-class radiotelephone and second-class radiotelegraph licensee. Formerly with Mackay Radio and Telegraph Company where a broad knowledge in electronics was added to his background. Presently with OWI since October 1943, as Senior Radiophoto Operator and Technician. Constructed numerous and various electronic equipment for the successful broadcasting of radiophoto.

Benjamin Tessler, 3001 W. 29th Street, Brooklyn, N. Y.—
Age 31
Recently returned from extensive outpost assignment licensed engineer desires position. Five years of experience consists of broadcasting, test engineering in the plant, installation in the field and field representation for the manufacturer. Familiar with high and low power transmitters; medium, S.W. and U.H.F. Some experience in studio and control room construction.

Fred H. Turner, 1604 Metropolitan Avenue, Bronx 62, N. Y.—Age 36
Graduate of Mechanics Institute, Manhattan College—Radio Engineering 2 years. OWI since May 1944, radio engineer, studio operation, master control, recording, playback, field operations and maintenance. Engineer English and/or foreign language broadcasts on long, medium and short wave transmitters (50kw). Complete knowledge studio and recording operations, equipment, 1942-1944 War Department, radio engineer, research and development at the National Bureau of Standards on radar units and proximity fuse. Established operating and test procedures. 1928-1942, Consolidated Edison Co., N. Y.—engineering inspection, replacing and repair of metering devices and transformer equipment. Design, test, and calibrate meter recording devices under rigid PSC standards. Record and correlate data on tests made at laboratory. Compile all reports.

FEBRUARY 4, 1946 — 76

Accounting

REVERCOMB RETURNS TO NAB

Everett E. Revercomb, who left NAB in June, 1943, to enter the service, has returned to resume his duties as auditor. He was recently released from the Navy with the rank of Lt., j. g., having entered as an Ensign. During his period of service he was attached to the Office of Naval Communications.

Revercomb is well known to broadcasters, having served previously for 8 years as NAB Auditor from 1935 to 1943.

Programming

ASSOCIATION OF WOMEN DIRECTORS TO HOLD ANNUAL MEETING IN NEW YORK MAR. 15-16-17

The AWD will hold its annual three-day meeting at the Hotel Roosevelt, New York, March 15, 16, and 17.

Highlighted by a fashion show at the Waldorf-Astoria Hotel and a conducted tour through the Good Housekeeping Institute, the important three-day meeting is expected to attract a record attendance of women directors from radio stations and networks throughout the country.

Outstanding women leaders including Dorothy Thompson, Elsa Maxwell, Lisa Serhio, Mary Margaret McBride, and Kate Smith will take part in a panel discussion on the topic "Does Radio Sell Ideas?"

Full details are being published in the AWD Beam which is off the press next week. Meanwhile, women directors are urged to see their station managers now. Notify AWD Headquarters, c/o NAB, 535 5th Avenue, New York City, of your intention to come. This is most important so that reservations may be made. Hotel reservations will be allotted on a first come first served basis.

AGRICULTURE SECRETARY PRAISES RADIO FARM SERVICE

Secretary of Agriculture Clinton P. Anderson, featured speaker at the inaugural of the new WJZ Farm News program, told listeners that since the establishment of radio in the United States, the American farmer has been given valuable information by various radio stations.

"Never has it been more important for the American farmer to be well informed on the issues of the day; on the domestic and international factors influencing agriculture; or on the techniques of efficient farm production.

"In 1946 farmers in the United States must provide the food and fiber to feed and clothe our own population of 140 million people, and in addition the nation looks to its farmers to provide our share of the things needed by our allies and the war-torn countries which have been liberated from the enemy.

"The farmer will need to use all the tools available to him in 1946, he needs information from various branches of the government, the Land Grant Colleges and state experiment stations, and the county extension services, to help him in his task. All this information is available, but it takes careful analysis and a broad knowledge of the factors involved to present the information in such a way

(Continued on next page)
that it will be practical and understandable. To render such a service to farm people is at once a challenge and an opportunity.

"Just as the Department of Agriculture is interested in nationwide dissemination of some of its information, so there is also the need for interpreting this information for smaller areas of the country. It is in rendering this type of service on a regional basis that an individual radio station, working closely with the state Land Grant Colleges, can offer a unique and helpful service.

"As Secretary of Agriculture, I welcome the earnest and thoughtful endeavor of radio stations in their efforts to serve the best interests of the American farmer."

### Broadcast Advertising

The function of the Department of Broadcast Advertising is to help sell more radio time—locally, regionally, nationally. Recognizing that the whole structure of the American system of radio is dependent upon the steady flow of revenue from the sale of commercial time, this department, guided by our Sales Managers Executive Committee, guided also by the chairman of the Sales Managers Division of each of NAB's Seventeen Districts, devotes its efforts toward boosting that revenue; any other aims and objectives are secondary to that all-important one.

### NEW SALES HELP

Broadcasters attending the NAB district meetings are showing keen interest in a "Radio Advertising Check List." Frank E. Pellegrin, Director of Broadcast Advertising, is showing and explaining the new sales department aid during his Sales Managers and Small Market Stations sessions at the meetings. The new piece is still in rough draft and will not be made available until a sizeable number of broadcasters and interested committees have had a chance to approve it. However, stations from the coast area have already written to NAB headquarters requesting copies. Since only a limited printing was made on the rough form, stations cannot be served with the necessary supply as yet. Slight changes undoubtedly will be made in keeping with suggestions of broadcasters. When finally approved, it will fill a need of long standing. The check list is intended for every firm the station agent to approach, analyze, sell and hold a radio client. The check list is intended for every firm the salesmen call on. It was devised by Mr. Pellegrin. Stations writing to NAB are requesting that they be placed on the mailing list for approved copies when they are available.

### PROMOTION

The Promotion Division, under the supervision of Hugh M. Higgins, is preparing success stories on the use of Broadcast advertising. Tangible evidence of radio's effectiveness in the promotion of every type and kind of merchandise by all business firms and organizations. Many stations are submitting stories of successful campaigns in their areas. The entire industry is invited to swell this flow of valuable information. Stations desiring proof on "Radio gets Results" should write to Mr. Higgins. These may be used to influence new accounts and promote new lines of merchandise.

### ICE CO-OP PLAN CATCHES ON

A flood of replies resulted from the news released last week that NAB is securing ice advertising copy and transcriptions through the National Association of Ice Industries. While the ice association is placing its national campaign in printed media, it is possible through these efforts that individual stations may be successful in landing advertising contracts from the local ice dealers. Copy and transcriptions are expected to be made available within the next two weeks.

### JOSKE REPORT BEING PREPARED

Lee Hart, Assistant Director of Broadcast Advertising in charge of Retail Radio Advertising, is now busily engaged in preparing data for the report on the Joske Clinical Test of Retail Broadcast Advertising. Due to the considerable volume of material and the wide interest in the test, phases of the work will be made available before the complete results of the study are compiled.

### SMALL MARKETS

Small Market Stations are having lively discussions at NAB district meetings. These broadcasters are determined to eliminate the present reference of "small" to this group of stations. Herewith is a letter dated Jan. 28th written by John Alexander, general manager, KODY, North Platte, Neb., to J. Allen Brown at NAB headquarters in Washington. A copy was forwarded by Mr. Alexander to Marshall Pengra, Chairman of the group's executive committee, at KRNR, Roseburg, Ore. Its contents should be of interest to all NAB members:

"The Tenth District Meeting of the NAB, which was held in Omaha last Friday and Saturday, was very successful, and I think the Small Market Stations session also went off quite well.

"It was brought up again at this meeting that the Small Market Stations' name should be changed and I, personally, am heartily in accord with this suggestion. I feel that such a name for the largest group of stations in America is negative selling of the worst kind and I sincerely trust that NAB and the Executive Committee of Small Market Stations will do everything in their power to change the name as soon as possible. To date I have heard no better suggestion than 'Community Stations.'

"I am interested in the above and if I can be of any assistance in accomplishing this task, please let me know."

### RANKIN WOULD OUTLAW ALCOHOLIC BEVERAGE ADVERTISING

Rep. Rankin (Miss.) has introduced a Bill (HR-5238) in the House which would outlaw broadcast advertising of alcoholic beverages (REPORTS, p. 57).

Text of the Bill, which was referred to the Committee on Interstate and Foreign Commerce, follows in full:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Communications Act of 1934, as amended, is amended by inserting after section 316 thereof a new section as follows:

"'Advertising of Alcoholic Beverages'

"Sec. 316A. No person shall broadcast by means of any radio station for which a license is required by any law of the United States, and no person operating any such station shall knowingly permit the broadcasting of any advertisement of any alcoholic beverage. Any person violating any provision of this section shall, upon conviction thereof, be fined not more than $1,000 or imprisoned not more than one year, or both, for each day during which such offense occurs.'"
10TH DISTRICT

Called to order by District Director John J. Gillin, Jr., WOW, the NAB 10th District meeting was held in Omaha January 25-26. An address, Looking Ahead with NAB, was delivered by President Justin Miller and discussions followed on public relations with E. K. Hartenbower, KCNO, presiding. Discussions also were held on labor relations, and the unsolved music problem. Hugh M. Feltis, BMB president, gave the progress report on that organization.

On the first day of the meeting, broadcasters joined with the combined Kiwanis clubs of Omaha at a luncheon, with President Miller as the featured speaker. A reception followed after the close of the day's session.

On the second day, a Small Market stations report was given by Frank Pellegrin, NAB director of broadcast advertising, who also led a discussion on the subject of small market stations. Mr. Pellegrin also spoke on the work of the broadcast advertising department. A Sales Managers' Clinic and Program Managers' report were followed by a discussion on the daylight savings time problem, and a report by NAB executives on agricultural broadcasting.

Mr. Gillin was drafted for another two-year term as 10th District director and was unanimously elected by acclamation.

The two-day meeting was followed by a reception given by Omaha stations KBAN, KOIL, KFAB, KOWH, and WOW at the Omaha Athletic Club.

Following are the resolutions adopted and a list of those who attended the meeting:

Whereas, variations in time in the different areas of the nation vitally affect radio broadcasting and result in serious confusion in the radio listening audience, and,

Whereas, this confusion could be eliminated by the establishment of nationwide uniformity in time observance,

Now Therefore, be it resolved by the broadcasters of the Tenth District (Iowa, Missouri and Nebraska) in session assembled this 26th day of January, 1946, to urge the National Association of Broadcasters to seek the adoption by Congress of uniform time legislation applicable to all of the states, insular possessions and territories.

Now Therefore, be it resolved by the broadcasters in session assembled this 26th day of January, 1946, that we hereby commend the Board and the Committee for its action in thus revising the Code, pledge our support to it, and urge the broadcasters to support it.

Whereas, programs are a most important element in radio broadcasting and constitute the basis upon which the operation of stations in the public interest is judged, and

Whereas, the Board of Directors has delegated to President Justin Miller authority within his discretion to establish a Program Department within NAB,

Now Therefore, be it resolved by the broadcasters of the Tenth District in session assembled this 26th day of January, 1946, that President Miller be urged to immediately proceed with the organization of such a Department.

14TH DISTRICT

Highlighted by a first day luncheon address by Governor John C. Vivian of Colorado who expressed the belief that, "Communications, particularly radio, will play a vitally important role in reconversion," the NAB 14th District meeting was held in Denver Monday and Tuesday (28-29).

District Director Hugh B. Terry, KLZ, was re-elected by acclamation. NAB activities were discussed in an address by President Justin Miller, who also spoke to broadcasters and members of the Lions club at a luncheon. Public relations matters were discussed by C. E. Arney, Jr., NAB secretary and treasurer. Progress report on BMB was given by Hugh Feltis, president of that organization, and Arney spoke on the day light savings time problem.

A special presentation featured a play-back of a 45 minute transcription of the MBS American Forum of the Air program, "How Can We Keep Radio Free," which originated in St. Paul on December 4 under the auspices of the Womens Institute of St. Paul. Participants in this Forum program (see NAB special anniversary bulletin No. 24), were A. D. Willard, Jr., NAB executive vice president, and Sydney Kaye, BMI general counsel, who opposed the viewpoints of PCC Commissioner Clifford J. Durr and Elmer A. Benson, chairman of the National Citizens Political Action Committee Executive Council, and former Governor of Minnesota.

The Denver radio stations were hosts at a reception and dance which was given at the Broadmoor country club after the conclusion of the first day's sessions.

During the second day of the meeting, discussions were held and reports were given on all phases of broadcasting, including a small market stations report by NAB's director of broadcast advertising, Frank Pellegrin; a program managers' report by Ralph Hardy, KSL; a sales managers' clinic, and an engineering session which was presided over by Robert Owen, KOA, District engineering chairman. Following are the resolutions adopted and a list of those in attendance at the meeting:

WHEREAS, the desire to improve the commercial phase of radio broadcasting is unanimous among all members of the NAB 14th district; now be it hereby resolved that the NAB Sales Managers Committee continue in its efforts to improve the quality of the commercial phase of radio broadcasting through the elimination of cow-catcher and hitch-hiker announcements.

WHEREAS, time is a dominant consideration in the operations of the broadcasting industry and materially affects the ability of the station licensees to serve the public interest, and

WHEREAS, the listening public is subjected to confusion and uncertainty by periodic time changes; now, therefore, Be It Resolved, that we urge the NAB to use its best effort to secure the cooperation of all other industries and agencies similarly affected as is radio by time changes and seek federal legislation to establish uniform time throughout the state, territories and insular possessions and also seek to bring about voluntary cooperation within the industry to establish uniform time.

WHEREAS, BMI is a continuing example of what can be accomplished by an aroused industry acting in cooperation, and, whereas we are convinced that the best interest of the Industry can best be served by an aggressive, intel-
ligent BMI and, whereas, we are conversant with the fact that BMI's strength is derived directly and solely from the support we of the Industry extend it, be it resolved that we, therefore, in District 14 pledge to BMI our active support and cooperation in all matters which will tend to add strength and effectiveness to its operations in our behalf.

WHEREAS Broadcast Measurement Bureau is now established as a living organism through the cooperation of the four A's, the ANA and the Broadcasters, be it resolved that this fine start be made permanent, and thus more valuable and that steps be taken at once looking to a 1947 survey.

WHEREAS broadcasters of the fourteenth district of the National Association of Broadcasters have completed one of the most successful district meetings in many years, be it resolved that the sincere thanks of all those attending, go to the Denver broadcasting station operators for their hospitality and thoughtful arrangements, to the Manager and staff of the Brown Palace Hotel for their cooperation in making the meeting a success, and to District Director Hugh B. Terry for his excellent conduct of the sessions.

WHEREAS, his excellency, Governor John C. Vivian of Colorado, and R. L. Rickenbaugh, gave their time and enthusiasm in addressing the 14th NAB district meeting, be it resolved that the thanks of this group be addressed to Governor Vivian and R. L. Rickenbaugh.

WHEREAS, the National Association of Broadcasters has been extremely fortunate in securing the services of one as esteemed as Justice Justin Miller, and whereas the members of the 14th NAB district have been happy to have Justice Miller in attendance at their district meeting, and, whereas Justice Miller has shown a phenomenal grasp of the many and complex problems of the Industry; be it resolved that the broadcasters of the 14th NAB district pledge their complete and wholehearted support of Justice Miller and his assistants.

REPORT ON 13TH DISTRICT MEET WILL BE GIVEN NEXT WEEK

As NAB Reports goes to press, the 13th District meeting was in progress in Dallas, Thursday and Friday (Jan. 31-Feb. 1).

A full report on this meeting will be given in next week's issue.

Legal

PETTY NOW NAB GENERAL COUNSEL

Don E. Petty assumed his duties as NAB general counsel Friday (1). Announcement of Mr. Petty’s appointment was made by President Justin Miller during the meeting of the NAB board of directors, Hollywood, January 3-4. He succeeds John Morgan Davis who last December asked that his resignation be accepted so that he might devote full time to his private law practice in Philadelphia.

Mr. Petty, who practiced law in Los Angeles from 1933 to 1943, was released from the Navy Jan. 10 with the rank of Lieutenant Commander. Serving in the Navy since 1943 when he entered as a Lieutenant (j.g.), Petty was attached to the office of the Under Secretary and later to the Assistant Secretary's office in the Bureau of Aeronautics and Office of Research and Invention as a Negotiator of Business Deals.

He is a native of southern California and was graduated from Pasadena high school in 1926. He entered the University of Southern California in the same year, and was graduated in 1932 with the degrees of A.B. and LL.B. While in attendance at the university, Petty was manager of the Division of Radio Adult Education and president of the College of Liberal Arts.

He was president of the Los Angeles Junior Chamber of Commerce in 1942 and a member of the senior Chamber of Commerce. He is well known in southern California as an able speaker. He married Iola Harriet Pardee in 1932. They have two children, Stephen Pardee 6, and Don Edward 9. Mr. Petty is a partner in the Los Angeles law firm of Scarborough and Petty.

NEW MEXICO TAX HEARINGS SET FOR FEB. 18

A hearing will be held before a three judge Federal Court in Albuquerque, N. M., on Feb. 18 to decide (1) whether the radio stations in New Mexico are doing a business in interstate commerce, (2) if the court decides they are doing such a business, whether or not the New Mexico gross sales tax law is a proper exercise of the taxing power of the state.

Previous reports on this case appear in NAB Reports (Vol. 13, pp. 520-560).

ROSENMAN JOINS GOLDMARK, COLIN, KAYE

Announcement has been made that Judge Samuel I. Rosenman, who became well-known as confidential advisor to Presidents Roosevelt and Truman, has joined the law firm which formerly operated as Goldmark, Colin and Kaye, and which now becomes Rosenman, Goldmark, Colin and Kaye. Judge Rosenman's affiliation with the firm became effective February 1.

Firm member Sydney Kaye is well-known to broadcasters as BMI General Counsel; Ralph F. Colin is network counsel and member of the CBS board.

FM

The Commission today granted eight additional FM stations bringing the total conditional FM grants to 298.

At the same time the Commission designated for hearing two applications for Buffalo, N. Y.—Buffalo Broadcasting Corp. (B1-PH-400), and Buffalo Broadcasting Corp. (B1-PH-678)—to be heard in a consolidated proceeding.

Following is a list of the grants:

FEBRUARY 4, 1946 — 80
Lee Farran, who Monday (28) assumed the position of assistant to Earl Minderman, director of information for the Commission, is a former Ohio newspaper and publicity man and was recently discharged from the Army, as Master Sergeant, having served since 1941, mostly in the South Pacific area.

He served in the public relations section of the 37th Infantry Division, the Third Army Headquarters and the South Pacific Base Command, specializing in radio. After returning from the South Pacific area, Mr. Farran served in the public relations section of the Selective Service headquarters in Mississippi.

**News**

News written for the ear is also best for eye absorption. This was the opinion advanced by news and radio men who attended the Council on Radio Journalism's series of three one-day meetings in Columbus, Jan. 24-25-26. Included in the meetings were sessions held by the American Association of Schools and Departments of Journalism, and the American Association of Teachers of Journalism.

The assertion that ear-copy also makes the best eye-copy resulted in a consensus prediction that the eventual yardstick for news writing, whether for broadcasting or printed publication, will be "forget your eye—how does your ear like it." Stated in other terms, this means that radio style offers the best pattern for news writers regardless of the media of dissemination.

Appointments to 3 year terms on the Council on Radio Journalism were: William Brooks, director of news and special events, NBC; Paul White, director of public Affairs and news broadcasts, CBS; Fred S. Seibert, director of Journalism, University of Illinois; and Kenneth Bartlett, director of the radio workshop and professor of journalism, Syracuse University.

The Council voted to put on two half-day work sessions on May 4-5 at the Institute for Education by Radio to be held in Columbus. Council members Paul White, and Mitchell Charnley of the University of Minnesota, are the respective chairmen of these sessions.

Preliminary matters attending the incorporation of the Council were disposed of during the session. This action had been approved last Sept, by the NAB Radio News Committee, and by educator members of the Council.

Council officers, who will serve without compensation, include: Mr. Seibert, Chairman; Wilbur Schramm, director, school of journalism University of Iowa, Vice Chairman; and Arthur Stringer, NAB, Sec. and Treas.

Members of the American Association of Teachers of Journalism held a round table discussion Saturday (26) on "Instruction in Radio," with Paul H. Wagner, Ohio University, Athens, as chairman. Participants were: Everett Holles, CBS, Chicago; Frank Schooley, University of Illinois; Stringer, White; and Ralph Worden, director of news, WGAR Cleveland.

Paul Thompson, University of Texas, was elected president of the American Association of Schools and Departments of Journalism.

**SIXTH ANNUAL BROADCASTING ENGINEERING CONFERENCE**

The Broadcast Engineering Conference is resuming its activities after a lapse of three war years, and the Sixth Annual Meeting will be held in Campbell Hall on the Ohio State University campus during the week of March 18-23, 1946. Since Dr. W. L. Everitt, Director of the Conference, is now Head of the Department of Electrical Engineering at the University of Illinois, the meetings henceforth will be sponsored jointly by the Electrical Engineering Departments of the Ohio State University and of the University of Illinois, with meetings alternating between Columbus and Urbana. The Conference will continue to receive the cooperation of the National Association of Broadcasters and of the Institute of Radio Engineers.

Emphasis in the 1946 program will be placed upon the impact of developments since 1942 on operating problems in broadcast engineering including F-M and television. A number of symposia have been planned to deal with the more pressing of the station problems introduced by the increasing use of F-M and of television broadcasting.

An exhibition of the products of manufacturers has been arranged and much new equipment will be on display. Wartime developments are reflected in improved techniques and the use of new materials, which will be of interest to all.

**General Information**

**Fee**—The fee for the Conference for 1946 is $15.00. (This fee will be reduced to $12.00 for those who make payment before March 4.)

**Living Accommodations**—The Fort Hayes Hotel has again offered special accommodations for the Conference. Rooms with twin beds are available at $5.75 per night, double rooms at $6.25 per night, and single rooms at $3.25 per night. Please state your preference as to accommodations on the registration card.

**Recreation**—The gymnasium and swimming pools of the University will again be available to members of the Conference.

**The Banquet**—Thursday, March 21, in the Ballroom at the Fort Hayes Hotel.

**Registration**—The plans for a Conference like this are greatly facilitated if we know how many are coming. We have made registration simple this year by using the return postal card form. Please help us by sending in the registration card as soon as possible.

If you have not received the registration card, you may register by writing to Professor E. M. Boone, Department of Electrical Engineering, Ohio State University, Columbus, Ohio. Be sure to enclose the registration fee and state the hotel accommodations desired and your dates of arrival and departure. Professor Boone may also be contacted for any additional information you may desire concerning the Broadcast Engineering Conference.

**Program**

All meetings to be held in Campbell Hall Auditorium
The Ohio State University

**Monday, March 18**

9:00 a. m. to 11:00 a. m.—Contributions of War Developments to Broadcasting—A. B. Chamberlain, Chief Engineer, Columbia Broadcasting System.

11:00 a. m. to 1:00 p. m.—Symposium on Broadcast Maintenance Problems—A. J. Ebel, Chief Engineer, University of Illinois Radio Service, Chairman.

2:30 p. m. to 4:30 p. m.—Design of Broadcast Studios with Irregular Boundary Surfaces.

(Continued on next page)
The Federal Communications Commission was the outgrowth of social, economic and psychological forces which had been at work for many years. It was the crystallization of public sentiment which had been growing since the early twenties, a feeling that telephone and telegraph as well as radio were so vital to individual and national needs that they ought to be regulated by the Government in the public interest.

Following the first World War, there was a rapid development in communications. During the last 7 months of 1922, the number of regular broadcasting stations increased from 5 to 320 and the number of receiving sets jumped from less than 200,000 to 1,500,000.

People everywhere listened in wonderment to programs coming through the ether. As early as 1919, Station WHA at the University of Wisconsin was broadcasting weather and market reports. On November 5, 1920, Station KDKA in Pittsburgh broadcast, for the first time the national election returns. Station WJZ in New York broadcast for the first time a World Series game. WLW's powerful station in Cincinnati was building a large audience by broadcasting varied programs and talent including popular orchestra and vocal music. For the first time in history, a speech made in the Halls of Congress was broadcast when President Harding read his message on December 8, 1922. On March 4, 1925, President Coolidge broadcast his inaugural address to the nation over a network of more than 30 stations and Graham McNamee thrilled millions of listeners with his dramatic account of the inaugural ceremonies.

People were not only listening to radio programs; thousands of them were transmitting over amateur stations licensed by the Department of Commerce. By December, 1922, nearly 17,000 amateur licenses had been granted. In basements, attics and other places in homes all over the land, American citizens, fascinated with the wonders of the ether, were playing and experimenting with radio. From this activity was to come some of the greatest improvements in the art. It was the hour of wonders of the ether, were playing and experimenting with radio. From this activity was to come some of the greatest improvements in the art. It was the hour of radio referred to by a current writer as a "stupendous social revolution."

The telephone industry was also making rapid progress. The Bell System and independent companies were extending their lines throughout the nation. In 1924, one Bell System official proudly referred to the fact that his company was averaging more than 40 million local and long distance calls per day and had an investment of more than 2 billion dollars in plant and equipment.

With the continued growth of cities and metropolitan areas, expanding industries, and developments in transportation, life in America was taking on a highly complex pattern. It was in this setting that the American Indians who found smoke rings and fire-arrows adequate to meet their needs for long distance communication. Radio, telephone and telegraph had facilitated this remarkable social and economic growth and had become an indispensable part of a highly developed civilization. Communication lines had become the nerve threads through which the organization of a great democratic nation of 120 million people was made to function.

More and more the average citizen realized this. He became increasingly conscious of the fact that his individual comfort and happiness as well as that of the community and nation were dependent upon the efficiency of these communications. The success of his job, family home, the welfare of his local, state and Federal government—all were tied up with communications service. In the language of the courts, these modern mercuries were "clothed with the public interest," and the citizen was giving more attention to the manner in which they were managed and operated.

He became more critical. He was particularly concerned about disruptions in radio service. The hissing and howling sounds caused by static and station interference ruined his radio reception. "Dante's Inferno can be no worse than the noises that come to us here in the peninsula of Florida," wrote one distraught listener to Secretary of Commerce Hoover.

The free and unrestrained transmissions of radio operators on ships at sea, too often interfered with the music, speeches, baseball scores, weather reports, market information services.

(Continued on next page)
motion that thousands of persons were trying to get with their radio receivers at home.

There were other radio annoyances. Offensive advertising was one. In 1922, a prominent writer in a radio magazine wrote: "Suppose a delightful soprano voice has just sung your favorite song, 'Kiss Me Again.' Then, all of a sudden, a voice says, 'Good morning! Have you used Hare's soap?""

"People will not stand having their evening entertainment spoiled into excited voices describing somebody's pet hair net, shoes, or possibly a way to get in and out of the water without getting your feet wet," fretted another writer.

There was also complaint against censorship. Political speakers, for example, didn't like the idea of having to submit transcripts to station managers, who often deleted portions of the speeches. There was also growing feeling against monopoly in the radio industry. Frequent editorials in newspapers and magazines deplored the growing concentration of control in a few large companies. There were grumblings about propagandists, religious zealots and unprincipled persons "with axes to grind," seeking to "reach radio audiences with their peculiar brands of publicity." There were protests against radio programs not in good taste, and the excessive use of phonograph recordings was vehemently condemned.

While public criticism of telephone and telegraph service was growing in the early twenties, it did not reach a high peak until later. In 1922, Clyde M. Reed, then Chairman of the Kansas Public Utilities Commission, addressed the annual convention of the National Association of Railroad and Utilities Commissioners that in personal correspondence and in personal conferences with members of state commissions he had found that there was practically "a universal belief that the rates charged the public by the Bell Companies," were greater than "sound business policy and economics would justify." Felix Franklin, then a professor of law at Harvard University, wrote in 1930 that criticism had been voiced "against the failure of utility rates to reflect decreased operating costs due to technological improvements." The decade from 1920 to 1930 was a period of tremendous growth in communications during which the public demanded that its interests be more adequately protected. General chaos in the ether, high rates for telephone and telegraph service, growing monopoly and other disturbing elements prompted citizens to write letters to newspapers, to the Secretary of Commerce, to the Interstate Commerce Commission, and to Congress demanding that laws be passed and rules made to bring about the desired changes. The public was fed up with the nightly chorus of hetero-dynes squeals caused by a multiplicity of broadcasters operating on the same channels. Congress felt impelled to act and in 1927 it passed the Radio Act setting up a Federal Radio Commission. This Commission established the regulations for broadcasting bands from 550 to 1,500 kilocycles and provided for a 10 kilocycle separation between stations. A general reallocation of frequencies brought about a more equitable distribution of radio facilities throughout the country and eliminated much of the station interference.

President Roosevelt early manifested an interest in radio regulation and in 1935 it was the purpose of determining what should be done to bring about more effective regulation of radio communication as well as other kinds of interstate and foreign communication. Out of his study came the recommendation that a Federal Communications Commission be established to take over all existing authority over interstate and foreign communications. This was not a new idea. As early as 1925, the official spokesman for the broadcasting industry had said: "Communications today, including telephone, cable and radio, have reached such tremendous proportions and are such a vital factor in our daily civilized life that they merit a separate commission to function only in control of these mediums . . . ."

This is precisely what President Roosevelt recommended to Congress almost 10 years later. Accordingly, on June 19, 1934, Congress enacted and the President approved the Communications Act, which created the Federal Communications Commission with jurisdiction to regulate interstate and foreign communication by wire and radio.

Thus it was that the basic radio law was established. It was not an over-night job. It grew out of experience, trial and error, long and careful study by many experts. It can be said that it represented in 1934 the best collective judgment of scientists, industrial, governmental and Congressional leaders and for the most part had the support of the general public.

Today, after many years of growth and development, the Federal Communications Commission has not been completely solved. Much progress, however, has been made. Regulation and technological improvements make it possible to avoid a great deal of the static so bothersome in the early twenties. The assignment of frequencies and the establishment of more equitable distribution of radio facilities throughout the country and elimination of much of the station interference have been accomplished and the quantity of radio reception generally has been improved.

In the struggle to bring order out of chaos, there has been much controversy but I believe that gains in the public interest have been made. Out of the processes of regulation and the pressures of public opinion have emerged certain standards of performance that have improved radio, telephone and telegraph service.

Today, after many years of growth and development, the Federal Communications Commission still remains a comparatively small organization, judged by the size of the regulatory tasks which Congress has imposed upon it. It is made up of 7 commissioners, one appointed each year by the President and senators. Of the regulatory tasks which Congress has imposed upon the Federal Communications Commission, have not been completely solved. Much progress, however, has been made. Regulation and technological improvements make it possible to avoid a great deal of the static so bothersome in the early twenties. The assignment of frequencies and establishment of more equitable distribution of radio facilities throughout the United States, its territories and possessions.

Under the Communications Act, the Commission has three major functions—broadcasting, common carrier, and safety and special service functions.

The magnitude of the present tasks of the Commission is suggested by the size of the industries which it regulates. Today there are more than 1,000 standard, FM and television broadcasting stations on the air as compared with only 5 in the early part of 1922, not to mention a host of others.

(Continued on next page)
Out of the War have come many important technological developments which will greatly expand communications and further add to the regular facilities of the radio industry. A discussion of the developments which are soon to come will give you a better idea of the importance of this agency and the big job which it will be called upon to do.

In the near future, we shall have a much larger number of radio stations operating in the country and the Commission will be faced with many new opportunities and problems. FM or frequency modulation, a new radio technique developed in the 1930's, is on the verge of a tremendous expansion, so great that it may soon rival or even surpass our present system of broadcasting. It has a number of advantages. It makes possible the reduction to a minimum of all static, both natural and man made, is freer from station interference, brings a faithful reproduction of the entire range of tones, and makes possible a vast increase in the number of broadcast stations. Approximately 700 applications for new broadcasting stations are on file with the Federal Communications Commission or have recently been granted. Conservative estimates indicate that the number of FM stations will approach 2,000 by the end of 1947 as compared with about 950 standard broadcast stations.

Commercial television is apparently ready to move ahead. The Commission recently set aside new bands of frequencies between 450 and 920 megacycles for experimentation and development. These bands will provide ample space for excellent pictures in black and white and in natural colors. Within the use of mobile units and relay techniques, it will be possible to transmit to homes throughout the nation pictures of important events, such as the inauguration of the President, a national political convention, or a parade on Fifth Avenue. As you probably know, the recent Army-Navy football game was televised from Philadelphia, and was carried by coaxial cable to New York and relayed by television transmitters to receivers in that area. We shall not only hear in our homes outstanding actors, musicians, scientists and statesmen, but shall see them as well.

Despite this expansion into FM and television, standard broadcasting as we know it today is proving also extremely attractive to new interests. More than 500 applications for new standard broadcast stations are on file or have been recently granted; and the Commission is also faced with hundreds of applications for increased power or improvements from existing standard broadcast stations. When these new standard broadcast stations are added to the FM and television stations which are anticipated, the over-whelming expansion of broadcast services to the public can be appreciated.

Radar, the new technique which had so much to do with winning the war, will have important peacetime applications. With radar it is possible to detect objects several hundred miles away, calculate their speed if they are moving, and note their direction. By the use of radar, an airplane pilot lost in fog can know if he is approaching hazardous obstacles such as mountains or tall buildings. A ship lost at sea can detect the approach of other ships and determine at any moment the exact distance to shore or to obstacles in its path. Eventually, trains, buses and taxicabs may be equipped with radar.

The recent improvement in transmitters, receivers and high-powered directional antennas on the higher frequencies will make possible the inauguration of nationwide radio relay systems. Many of you can remember the earliest type of antenna. It was simply a wire attached to two poles. With that crude type of aerial much of the transmitted energy was wasted. As we went out into space, we found that the energy must go in the direction of the planets. The stress of war, however, demanded improvements in antenna design, particularly in radar which would permit the concentrated flow of all the transmitted energy along a single narrow path to a given point or area. The result is that a 1,000 watt transmitter sending a signal to a certain receiver may attain as high as 100,000 watts of effective radiated power.

This means that with low power transmitters, we can send radio, telegraph, telephone, and other types of signals across the country along a direct route of relay stations, say thirty miles apart, instead of sending them over wires strung on closely spaced telephone poles. The costs of maintaining poles and wires will be largely eliminated and the rates for service should be materially reduced.

By this system it also will be possible to send FM or frequency modulation broadcasts, radio photos, television and facsimile transmissions. This has special significance for the telegraph industry. Telefax apparatus may be placed in office buildings, hotels, railroad stations, airports and other public places where facsimile messages can be dropped in slots and transmitted directly to Western Union offices where they will be relayed with the speed of light to their destination. This will obviate much of the delay and inefficiency which sometimes characterize our present system of manual operation.

The application of a new technique known as "pulse time modulation" to radio relay promises to improve telephone and telegraph service still further. Pulse time modulation makes use of an interesting fact about the human eye and ear. A motion picture is made up of a series of separate pictures, run off so fast that we see them as continuous and moving. On the same principle we hear a series of pulse like signals. Instead of sending out an unbroken stream of energy, the transmitter sends out a series of separate signals at frequent intervals. When these separate pulses are recombined in the receiver we hear them as a continuous sound. The result is that the transmitter is used for only a very small fraction of the time of the signal to send a particular signal. The time between pulses is left available for a second signal. As many as 24 telephone messages can be transmitted at the same time by one transmitter on a single band of frequencies. The economy of this new technique may be considerable since it increases the potential utilization of a radio frequency.

Another development which will provide additional facilities for long distance communication is the extension of coaxial cable systems throughout the country. The coaxial cable has demonstrated its dependability for transmitting telephone, telegraph, television or other signals. The operation of coaxial channels is similar to "carrier on wire," where radio added to wire circuits increases greatly their carrying capacity.

These new developments should mean better telephone and telegraph service at lower costs. In passing, I might mention that in 1934, the year the Federal Communications Commission was created, the long distance toll rate for a daytime station-to-station call between New York and San Francisco was $9.00. The present rate for a similar call is $2.50, or a reduction of more than 70 per cent. This is also the maximum rate for any similar call between points in the United States. Effective January 1, 1946, a daytime station-to-station call from Dallas to Washington, D. C., will cost $1.90 as contrasted with a rate of $4.25 in 1936.

By the application of new facilities and techniques which have come out of recent research, we can expect to have wider use of certain special types of communication services which we have had before but on a limited scale. A limited extent. One of these which has dramatic possibilities is the Citizen's Radio. By this plan, citizens may share fre-
quencies on a cooperative basis and talk with one another by means of a portable device equipped with both a transmitter and receiver. This device, known as a walkie-talkie during the war, has been the object of much discussion in recent months.

Thus by means of radio, citizens in the same community may move from place to place and maintain two-way conversation. A doctor making calls may keep in touch with his office or the hospital. The milkman or grocer on his delivery route can keep in communication with the manager at the dairy or store. The farmer as he works in the field can talk with his wife at the house several miles away, or can communicate with other workers in the fields and better organize and coordinate his farming.

These instruments will be compactly built so as to be carried with comparative ease and made at costs that many of our citizens can afford. The Federal Communications Commission has already assigned a band of frequencies for walkie-talkie transmission and it should not be long until many of them will be in use. The "handie-talkie" operates on the same principle as the walkie-talkie but is much smaller in design. In fact it may be placed in the overcoat pocket. This miniature marvel has been successfully used in Washington and other places and holds great promise for mobile communications.

Recent experiments have proved that radio communications from front to rear of trains, from train to train, as well as from railway station to train can be used effectively, and the safety and security implications of this are very great. With radio, train crews will have an efficient means of instantly communicating with one another. This should greatly improve service, reduce the hazards of travel and save life and property.

Now that we have these many new improvements in communications, my fervent hope is that they will speedily be made available to all our people. The recent technological progress is a tribute to the genius and enterprise of our scientists and leaders, but it will be a greater tribute to all concerned to see that the majority of the people realize the full benefit of this progress. Its real significance is that we can bring new comforts and conveniences to every citizen and by providing a greater abundance of communications facilities can further strengthen our democratic way of life.

Radio has already contributed greatly to the education of our people but there are almost limitless possibilities ahead. The Federal Communications Commission has recently allocated 20 channels for non-commercial educational FM broadcasting. By systematic planning this space in the spectrum can easily accommodate hundreds of new educational stations. A large number of public schools, colleges and universities are planning to apply for stations and the United States Office of Education advises that most states are planning statewide educational broadcasting systems.

The Commission and its staff are working day and night to process the many new applications for standard, FM, television and other types of stations. It recently announced the scheduling of hearings on 271 radio matters during January, February and March, 1946. A hearing calendar was set up and a definite date for each of these matters was set. The schedule provides for 5 sets of hearings, 3 in Washington and 2 in the field, running simultaneously throughout the first 3 months of 1946. The pressure of work becomes increasingly great but it is the desire of the Commission to process all applications as speedily as possible so that the new improvements in the radio art can be brought to the American people at the earliest possible moment.

Under the impetus of war, new technological levels have been reached. The big job before us now is to see that these highly developed communications devices contribute to the greater security and comfort of all the people and at the same time help us achieve higher levels of culture and civilization.

No agency in the Government is faced with more crucial regulatory problems, with greater challenge than the Federal Communications Commission. We earnestly solicit the interest and cooperation of the broadcasters to the end that communications may become increasingly useful to all. 

---

PRESIDENT TRUMAN GUEST AT RADIO CORRESPONDENTS ANNUAL DINNER

President Truman and virtually every top official of the government were guests of the Radio Correspondents Association at its annual dinner held Saturday (26) in Washington.

They were entertained by ten stars of radio and stage in a program arranged by the four major networks. The dinner is held each year by the Washington correspondents of the networks and independent radio stations. Richard Harkness, NBC commentator, is president of the Association.

In addition to the President, the guest list included most of the Cabinet and the Supreme Court, the heads of government agencies and Congressional leaders. The guest list totaled more than 150.

Lowell Thomas, NBC commentator, was master of ceremonies for the program and the entertainers included Igor Gorin, baritone; The Hartmans, dancers; Jimmy Edmundson, comedian; Evelyn Knight, singer; Sgt. Eugene List, pianist; Larry Savich, mimic-comedian; the Acromaniacs, acrobats; Harvey Stone, comedian; Dr. Frank Black conducting an NBC orchestra; and the U. S. Marine Band.

NAB staff members who attended were: A. D. Willard, Jr.; Ed M. Kirby; J. Allen Brown; Willard D. Egolf; Hugh M. Higgins; Milton J. Kibler; Bruce Starkey and Arthur C. Stringer.

ARNOUX ELECTED WTAR PRESIDENT

Campbell Arnoux, who has long been identified with station WTAR, Norfolk, as general manager, has been elected president of WTAR Radio Corp. He succeeds Paul S. Huber, who moves up as new chairman of the board.

Arnoux, serving also as NAB 4th District Director, came to WTAR in 1934 from KTHS, Hot Springs, Ark., which he had installed and directed. Before his KTHS affiliation, he had been at WABP as chief announcer, editor and program director. He is well known in network circles as a member of the NBC stations planning and advisory committee.

MORENCY NOW WTIC VICE PRESIDENT

Paul W. Morency, NAB 1st District Director, has been made a vice president of the Travelers Broadcasting Service Corp., owners and operators of WTIC, Hartford, according to an announcement by J. W. Randall, president of the Travelers companies.

Mr. Morency has been general manager of WTIC since 1929. He served for a time as assistant secretary and more recently as secretary of the corporation.

Mr. Morency saw service in World War I including 18 months with the field artillery in France. He was then connected with the advertising department of a Chicago newspaper and a Chicago radio station. During 1927-1928 he was manager of NAB field service and has since continued to be active in the Association, serving on the executive committee and various other committees, in addition to his membership on the Board.
NBC-UCLA RADIO INSTITUTE

The fourth annual Radio Institute, conducted by the University of California at Los Angeles in cooperation with NBC, will open its 6-weeks session June 24.

All of the eight courses offered will be taught by NBC personnel and will be held in NBC's Hollywood studios. Sunset and Vine. These courses will include: Radio News and Special Events Preparation, Radio Announcing, Radio Time Sales, Control Room Operations, Radio in Education, Radio Production Direction, Radio Writing, and History and Survey of Broadcasting.

A comparable course is also to be opened again this year at Stanford University and Northwestern University.

The institute is supervised by Sidney N. Strotz, vice-president in charge of the western division of NBC; Jennings Pierce, manager of public service and station relations of NBC's western division, and Dr. J. Harold Williams, director of the summer session at U. C. L. A.

A prerequisite for enrollment in the institute is some practical interest in radio or comparable field, and the number of students accepted for most of the courses is limited.

Tuition covering the entire course is $75, and registration will be opened at the U. C. L. A. campus June 22.

67 TURNOUT FOR WHYN RADIO COURSE

Sixty-seven persons comprised the large and greatly interested group which turned out recently for the first meeting of the course in radio technics and dramatics offered at WHYN's South Hadley Falls studios. Jay Heitin, program director, and John Vondell, music director, of the WHYN staff, teach the 16-week course being conducted under the auspices of the Massachusetts Department of Education, University Extension. People were present from Holyoke, South Hadley Falls and Center, Chicopee, Chicopee Falls, Williamsett, Fairview, Springfield Longmeadow, Northampton, Ludlow, Westfield, Sunderland, Easthampton, Feeding Hills, and Windsor Locks, Conn.

WROK TRANSCRIBES FOR STATIONS IN SWEDEN

The contributions of Swedish residents to life in an American city are being told radio listeners in Sweden via a series of programs transcribed by WROK, Rockford, for Sven-Olof Sandberg, noted Swedish composer and opera singer, who visited Rockford last fall.

As a city with a large percentage of people of Swedish descent, Rockford was selected by Sandberg as the subject of eight broadcasts currently being aired by stations throughout Sweden. Arranged by WROK and Rockford's most prominent Scandinavians, the programs feature talks and interviews concerning contributions by Swedes to civic and industrial life in the Illinois city and the perpetuation of Swedish customs in a typical American community.

Federal Communications
Commission Docket

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 4. They are subject to change.

Monday, February 4

Consolidated Hearing

NEW—Myron E. Kluge and Dean H. Wickstrom, a partnership d/b as Valley Broadcasting Co., Ponomo, Calif.—C. P. 1600 kc., 500 watts, unlimited.
NEW—Sabine Area Broadcasting Corp., Orange, Texas—C. P. 1600 kc., 250 watts, unlimited.
NEW—WOOP, Inc., Dayton, Ohio—C. P. 1600 kc., 5 KW, unlimited.
NEW—Charlotte Broadcasting Co., Charlotte, N. C.—C. P. 1600 kc., 1 KW, unlimited DA-night and day.
NEW—Burlington-Graham Broadcasting Corp., Burlington, N. C.—C. P. 1600 kc., 500 watts night, 1 KW day, unlimited.
NEW—McCleary Broadcasting Co., Modesto, Calif.—C. P. 1600 kc., 250 watts, unlimited.
NEW—United Broadcasting Co., Inc., Montgomery, Ala.—C. P. 1600 kc., 1 KW, unlimited.
NEW—Roy A. Lundquist and D. G. Wilde, co-partners, d/b as The Saginaw Valley Broadcasting Co., Mt. Vernon, Wash.—C. P. 1600 kc., 250 watts, unlimited.
NEW—The Gazette Co., Cedar Rapids, Iowa—C. P. 1600 kc., 5 KW, unlimited DA-night.
NEW—Long Island Broadcasting Corp., Woodside, L. I.—C. P. 1600 kc., 5 KW, unlimited DA-night and day.
NEW—San Joaquin Broadcasters, Inc., Modesto, Calif.—C. P. 1600 kc., 250 watts, unlimited.
NEW—Wichita Carolina Broadcasting Co., Roedsville, N. C.—C. P. 1600 kc., 500 watts night, 1 KW day, unlimited.
NEW—Diamond State Broadcast Corp., Dover, Del.—C. P. 1340 kc., 250 watts, unlimited.
NEW—In the matter of modification of broadcast license of Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Order to show cause.
NEW—Wyoming Valley Broadcasting Co., Wilkes-Barre, Pa.—Order to show cause.
NEW—Edwin Conrod and Ralph O'Connor, partners d/b as Four Lakes Broadcasters, Madison, Wis.—C. P. 1600 kc., 1 KW, unlimited.
NEW—To Be Held Before Commissioner Durr in the Coconol County Court Room, Flagstaff, Arizona.
NEW—N. Pratt Smith, Flagstaff, Ariz.—C. P. 1340 kc., 250 watts, unlimited.
NEW—James L. Stapleton, Jesse Martin Nell, Jr., and Duard Iv. Nowlin, d/b as Grand Canyon Broadcasting Co., Flagstaff, Ariz.—C. P. 1340 kc., 250 watts, unlimited.
NEW—To Be Held Before Commissioner Walker, Dallas Light and Power Company, Dallas, Texas.
NEW—Howard W. Davis, tr/d as The Walmas Co., Corpus Christi, Texas.—C. P. 1230 kc., 250 watts, unlimited.

Wednesday, February 6

To Be Held Before Commissioner Denny, Orangeburg County Court House, Orangeburg, South Carolina.

Consolidated Hearing

To Be Held Before Commissioner Walker, Mercantile Bank Building, Dallas, Texas.
NEW—Valleiy Broadcasting Assn., Inc., McAllen, Texas—C. P. 910 kc., 1 KW, unlimited DA-night and day.
(Continued on next page)
APPLICATIONS GRANTED

NEW—Associated Broadcasters, Inc., Indianapolis, Ind.—Granted construction permit for a new station to operate on 1550 kc., 250 watts, daytime. (B1-P-3506)

WCOL—Lloyd A. Pixley, et al., d/b as The Pixleys, Columbus, Ohio.—Granted construction permit to install new transmitter and vertical antenna and change transmitter location from 32 North High St. to 900 feet south of the factory building at 565 West Goodale St., Columbus. (B2-P-3972)

KRRX—News-Review Co., Roseburg, Ore.—Granted construction permit to install new vertical antenna. (B1-P-4067)

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted modification of construction permit (B3-P-1080) which authorized increase in power, etc., for change in transmitter location from on Highway #77, 7½ miles south of Oklahoma City, to one mile west of highway #77, approximately 9 miles south of Oklahoma City. (B3-MP-1833)

WOLS—The Florence Broadcasting Co., Inc., Florence, S. C.—Granted authority to determine operating power by direct measurement of antenna power. (B5-Z-1675)

Federal Communications Commission Actions

WNCN—Albemarle Broadcasting Co., Elizabeth City, N. C.—Granted construction permit to install a new transmitter. (B3-P-4252)

WKWF—John M. Spottswood, Key West, Fla.—Granted license (B3-L-1911) to cover CP (B5-P-3768) which authorized a new station to operate on 1690 kc., 560 watts, unlimited time. Also granted authority to determine operating power by direct measurement of antenna power. (B3-Z-1732) The licensee is granted a waiver of Secs. 3.51 (b) and 3.60 of the Commission's rules: conditions.

WMFR—James E. Lameth, et al., d/b as Radio Station WMFR, High Point, N. C.—Granted license (B3-L-1920) to cover CP which authorized move of transmitter and studios. (B3-L-1920)

LICENSE RENEWALS

The following relay broadcast stations were granted renewal of licenses for the regular period:

WEPN, Edwin H. Armstrong; WBWB, Banks of the Wabash, Inc.; WEHN, The Evening News Assn.; WEIH, WEIL, Indianapolis Broadcasting, Inc.; KDAS, KARM, the George Harm Station; KEJL, NBC; WEIL, WEILX, WFIL Broadcasting Co.; WCZR, Zenith Radio Corp.

Licenses for the following relay stations were extended upon a temporary basis only, pending receipt of and determination upon applications for renewal, for the period ending April 1, 1946:

Radio Station WMFR, WHPT; Ben S. McGlashan, KABQ: MJS Broadcasting Corp., KIEF; Wimona Radio Service. KBQA: WBIX, Inc., WAIJ, WAFY; WJNO, Inc., WJABE; Columbus Broadcasting Co., WBLR; Jonas Weiland, WAXL.

Licenses for the following relay stations were further extended upon a temporary basis only, pending determination upon applications for renewal of licenses, for the period ending April 1, 1946:

Ardroolack Broadcasting Co., Inc., WODJ; Airflan Radio Corp., Ltd., KEHP; American Broadcasting Corp., WEGD.

(Continued on next page)
NOTICES OF HEARING MAILED BY DOCKET SECTION

NEW—Joe L. Smith, Jr., Charleston, W. Va.—1400 kc., 250 watts, unlimited.

Correction to notice of hearing in:
NEW—Central Illinois Radio Corp., Peoria, Ill.—1290 kc., 5 kW, unlimited DA-night and day.
NEW—South Bend Tribune, South Bend, Ind.—1060 kc., 250 watts, daytime.
NEW—Myles H. Johns, Milwaukee, Wis.—1060 kc., 1 KW, daytime.

KARA—KAR-M, The George Horn Station, a corporation, Fresno, Calif.—For construction permit to change frequency from 1350 kc. to 1030 kc., make changes in DA system.

KFRE—J. E. Rodman, Fresno, Calif.—For construction permit to change power from 250 watts to 1 KW, change frequency from 1340 to 1060 kc.

NEW—Texoma Broadcasting Co., Wichita Falls, Texas—970 kc., 1 KW, daytime.

NEW—Darrold Alexander Cuman tr/as Wichtex Broadcasting Co., Wichita Falls, Texas—950 kc., 1 KW, daytime.

NEW—The Sandusky Broadcasting Co., Sandusky, Ohio—1150 kc., 250 watts, unlimited.

NEW—The Erie Broadcasting Co., Sandusky, Ohio—1450 kc., 250 watts, unlimited.

NEW—Corpus Christi Broadcasting Co., Corpus Christi, Texas—1290 kc., 250 watts, unlimited.

WFMJ—WFMJ Broadcasting Co., Youngstown, Ohio—1390 kc., 5 KW, unlimited DA-night.

WICA—WICA, Inc., Ashtabula, Ohio—970 kc., 1 KW, unlimited.

WWB—WWBS, Inc., Pittsburgh, Pa.—970 kc., 5 KW, unlimited.

NEW—News-Journal Corp., Daytona Beach, Fla.—1300 kc., 250 watts, unlimited.

NEW—Vinceon C. Cofey, Elin, Ill.—1490 kc., 250 watts, unlimited.

NEW—Community Broadcasting Co., Oak Park, Ill.—1490 kc., 250 watts, unlimited.

NEW—Green Bay Broadcasting Co., Green Bay, Wis.—1400 kc., 250 watts, unlimited.

NEW—Green Bay Newspaper Co., Green Bay, Wis.—1400 kc., 250 watts, unlimited.

NEW—Commonwealth Broadcasting Co., Danville, Ky.—1230 kc., unlimited.

NEW—Danville Broadcasting Co., Danville, Ky.—1230 kc., unlimited.

NEW—Harold T. Gray et al. d/b as Wyoming Valley Broadcasting Co., Wilkes-Barre, Pa.—1490 kc., 250 watts, unlimited.

NOTICES of hearing were mailed by the Document Section on Wednesday (30) to the following applicants for FM facilities in Chicago, Illinois:

NEW—Syndicate Theatres, Inc., Columbus, Ind.—1130 kc., unlimited.

NEW—Universal Broadcasting Co., Inc., Indianapolis, Ind.—1190 kc., 10 KW, unlimited DA-night and day.

NEW—Radio Broadcasting, Inc., Hot Springs, Ark.—740 kc., 1 KW night, 10 KW day, unlimited DA-night.

NEW—Radio-Shores Broadcasting, Ltd., Coral Gables, Fla.—1150 kc.

NEW—Southern Media Corp., Coral Gables, Fla.—1190 kc.

NEW—Miami Beach Publishing Co., Miami Beach, Fla.—1190 kc.

NEW—Frank R. Gibson, Lake Charles, La.—1580 kc., 1 KW, unlimited DA-night.

NEW—The Times Picayune Publishing Co., New Orleans, La.—1500 kc., 500 watts night, 1 KW day, unlimited.

NEW—Roy Hofheinz and W. N. Hooper, a partnership, d/b as Louisiana Broadcasting Co., New Orleans, La.—1580 kc., 5 KW, unlimited DA-night and day.

NEW—J. G. Long, James A. Clements and Travis C. Dodd, a partnership, d/b as Bay City Broadcasting Co., McAllen, Texas—1390 kc., 50 KW, unlimited.

Knight Radio Corp., Chicago, Ill.
National Broadcasting Co., Inc., Chicago, Ill.
Oak Park Realty & Amusement Co., Chicago, Ill.
Oak Park Realty & Amusement Co., Chicago, Ill.
Raytheon Manufacturing Co., Chicago, Ill.
Telair Co., Chicago, Ill.
Radio Station WAIT, Chicago, Ill.

NEW—Crawford County Broadcasting Corp., Meadville, Pa.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Consumers Company and Material Service Corporation, both of Chicago, are charged in a complaint with conspiring to restrain trade and to enhance prices in the interstate sale of crushed dolomite limestone, fluxing stone, building stone, aggregate, sand, gravel and other building materials, and fuel. (5418)

Ben Levy and Frances Levy, trading as Goldwyn Co. and as John Baker Co., 731 Plymouth Court, Chicago, are charged in a complaint with selling to wholesalers, jobbers and retailers and apartment owners of merchandise so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when the merchandise is resold to the purchasing and consuming public. (5417)

STIPULATIONS

During the past week the Commission announced no stipulations.

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Marvel Equipment Mfg. Co., Inc.—An order prohibiting certain misrepresentations in connection with the sale of railway switch heaters, for use in keeping switches free from snow and ice, has been issued against Marvel Equipment Manufacturers, Inc., 224 South Michigan Avenue, Chicago. (5372)

FEBRUARY 4, 1946 — 94
NARBA CONFERENCE IN PROGRESS

The North American Regional Broadcasting Engineering Conference opened its scheduled meeting (see NAB Reports, p. 56) in Washington on Monday (4). Sessions are continuing this week.

FCC Commissioner E. K. Jett was elected Permanent Chairman.

A welcoming address was delivered by Mr. Francis Colt deWolf, chief of the Telecommunications Division of the Department of State.

A general desire to renew the agreement was expressed by all the nations involved, with the exception of Cuba, whose delegates indicated that they wished to examine certain phases of the situation in closer detail. NAB President Justin Miller has issued invitations to all delegates and others concerned in the Conference to attend a reception at which NAB will act as host. T. A. M. Craven, Cowles Radio Station, is representing the NAB.

Further developments will be given in next week’s Reports.

HOW MANY FOR HOW MUCH?

The NAB cost comparison presentation, “How Many for How Much” is making quite an impression in advertising circles around the nation.

Hereewith are excerpts of a review by Don Pitt of the presentation appearing in Ad Age (Jan. 14 issue), the official publication of the San Francisco Advertising Club:

“Radio reared up and answered back last week, after twenty years' silence on the question of competitive costs in national advertising, when the visual presentation, “How Many for How Much” was simultaneously tossed like an atomic bomb into advertising circles here and in New York.

“Springing a New Year's surprise at last Wednesday's meeting, Frank E. Pellegrin, Director of Broadcast Advertising, National Association of Broadcasters, switched from the milder topic, 'The Contrast Between American and European Radio' to a graphic presentation of what a radio dollar buys today, and revealed at its first public showing the rebuttal by organized radio to the claims of newspaper and magazine advertising.

"'Radio has not talked much about competition in the last twenty years,' said Pellegrin, 'Choosing rather to tell its own hows and wherefores.' He said that six months ago radio was prodded into action after a Media Men's Club of New York heard presentations by newspapers and magazines and asked radio to reply. 'We didn't bring it up,' Pellegrin smiled. 'We were invited—and here it is!' “Ten years ago the national advertising box score read: Newspapers 43%, Magazines 32%, Radio 17%, and others 9%.

Score Today

“The scoreboard now places them like this: Magazines 34%, Radio 33% and Newspapers 24%, others 9%.

Newspapers Taken Apart

“Underscoring the story with graphic visual charts, he related how full major network advertising was now delivered a potential of 28,135,000 families versus newspaper's 19,901,375. Even though he conceded that newspapers could assure that their ads were noted by 3,184,000 families against the networks' 2,992,000, radio was delivering that advertising at a cost of $5.30 per thousand families to newspapers' $8.21, a saving of 45%.

“It was the sort of presentation that called all the plays and had many Ad Clubbers wide-eyed. Radio men were lamenting that the surprise staging of the story hadn't given them an opportunity to fill the hall with clients. 'We could have jammed it to the walls,' they were saying on the way out.

Round Two: Magazines

“Four major women's magazines with a combined circulation of 13,750,000 with 43% noting the ads, came up with an average advertising cost per thousand families of $7.29—against radio's $5.30. Then a broad base of four weekly magazines, Life, Saturday Evening Post, Collier's and Liberty, entered the ring with a circulation of 11,323,024, to be left-jabbed by Pellegrin with a cost-comparative of $8.75 against radio's $5.30 per thousand families.

How Many?

“He finally punched home ‘How Many for How Much?’ with the conclusion that an advertising dollar now buys 189 families via radio, 139 through women's magazines, 122 through newspapers and 114 through the four named weeklies.

Rebuttal?

“We asked Mr. Pellegrin afterwards if newspapers and magazines had had an opportunity for rebuttal, since this was the first public showing of his data, to which he replied: 'Rebuttal? This is it! WE'RE answering THEM. If you mean re-rebuttal, I expect they will have their chance.'

NAB Headquarters Besieged

J. Allen Brown, Assistant Director of Broadcast Advertising, reveals that while Mr. Pellegrin has been making the presentation on the tour of NAB district meetings, headquarters in Washington have been besieged with
requests for this particular presentation. Plans for a brochure on the comparison will be taken up when Mr. Pellegrin returns to Washington soon.

F-M Department

ALLOCATION BULLETIN 19 ON WAY

Special Allocation Hearings Bulletin No. 19 is being printed and will soon be mailed to NAB members.

Bulletin 19 contains the testimony given before the Commission in a hearing held Jan. 18-19, 1945, to determine whether frequencies in the 42 to 50 megacycle band should be set aside for FM broadcast in addition to the assignment already made to FM in the 88 to 108 megacycles band.

Since the issuance of Special Allocation Hearings Bulletin No. 18, which was mailed to NAB members on Aug. 31, 1945, with an announcement that it would conclude the series, further hearings have been held by the Commission.

So that you may have available a complete record of the testimony, with its valuable technical information, we are continuing with bulletin No. 19. Other bulletins may follow.

CONFERENCES ON ENGINEERING DETAILS OF FM APPLICATIONS

In reviewing the engineering details of FM broadcast applications, including those conditionally granted and those still pending, and in preparing for the issuance of construction permits, the Commission has found a number of instances where the proposed service area appears to be inconsistent with the plan of allocation of metropolitan and rural FM channels. In some cases, the proposed equipment appears to make inadequate use of the channels.

Since the majority of pending applications were filed prior to the present FM rules, or are otherwise incomplete concerning proposed service areas, additional data is often required by the Commission in determining the appropriate service areas to be established for the cities concerned.

In order to obtain more information on this subject and to make the best use of the FM band, the Commission will hold informal conferences with grantees and applicants. In cases where sufficient information is on file for the Commission to proceed, construction permits will be issued without the need for conferences. The Commission will request conferences where necessary as rapidly as its work load permits.

FEBRUARY 11, 1946 — 96
This is the first national meeting of AWD in four years. Rooms for the first fifty women who register have been set aside by the Roosevelt Hotel. Some of the dinners and luncheons must be limited in number so the first persons making reservations will be assigned. Act now—this is an important event for radio—an opportunity to bring prestige to your station and colorful material to your program content.

HOAX PROGRAM SCARES PARIS

Reminiscent of the famous Orson Welles 1937 Invasion from Mars program, France's official radio network went on the air Monday (4) with an atomic-bomb-scare program that reduced Paris to a state of near-terror, and which has resulted in demands for resignation of the director by an indignant French press.

The program was built around supposed A-bomb experiments in America. The professor carrying on the experiments was said to have lost control of his apparatus and the French were warned that a wave of atomic disintegration was rolling over the Atlantic toward France.

An announcement followed stating that the whole thing was a joke, and that a Jean Nocher was the perpetrator. Subsequent periodic announcements failed to dispel the fears of the populace.

Later, an irritated mob invaded the streets and the radio headquarters had to be protected by the Army.

MINE SAFETY E.T. SERIES PLANNED

A transcribed series on mine safety is planned by the Bureau of Mines since several fatal disasters in coal mining areas indicate the need for a better understanding of safety measures. Willett Kempton, director of the Radio Section of the Department of the Interior, wrote broadcasters in 50 coal mine communities last week to ascertain their preferences for the format of such a series.

"The Bureau of Mines has made safety material available to mining areas for 35 years," Mr. Kempton pointed out, "but never before has it attempted to circulate this information through a radio series. In planning such a program, this bureau of the Interior Department wants the advice of broadcasters in the communities involved; with it, we can produce a series of maximum usefulness to the stations and to all listeners concerned with coal mining."

The question of sponsorship for the new Government series will be "up to the individual stations," Kempton said. "The important thing is to reach listeners who are most directly concerned with the number of fatalities and the human and economic waste which result from mine disasters. Whether the story of mine safety is aired as a sustainer or booked commercially is of little moment to the Department of the Interior."

NAB INTERVENES IN TAX PROBLEM

Dealing with a proposal that generally would involve any station which was incorporated in 1936-1939 but which did not commence business until 1940, Don E. Petty, NAB General Counsel, has presented to the Joint Committee on Internal Revenue Taxation for Post-War Taxation at the Hearings on Section 722 of the Internal Revenue Code on Tuesday (7) the following statement:

Mr. Chairman, Gentlemen:
I am Don Petty, of Washington, D.C., General Counsel of the National Association of Broadcasters, appearing on behalf of the members of that Association.

Problem: A corporation organized during 1939 but which did not commence business until after January 1, 1940, is excluded from relief under Section 722.

(a) Section 722 (B) (4) applies only to taxpayers who "... either during or immediately prior to the base period, commenced business ..." (Underlining ours). The Bureau of Internal Revenue in its Bulletin on Section 722 at pages 44 and 45 has construed literally the statutory word "commenced" (as distinguished from "in existence" or "mere organizational activities such as incorporation or the issuance of capital stock”).

(b) In its Bulletin, at page 130, the Bureau limits Section 722(C) to "Domestic Corporations coming into existence after December 31, 1939..." (Underlining ours). Hence, a corporation in existence, i.e., organized prior to December 31, 1939, cannot qualify under this Section.

Recommendation: It is recommended that the hiatus existing in Section 722 be removed by amending said Section so that there will not be discrimination against corporations organized "during or immediately prior to the base period" i.e., prior to December 31, 1939, but which do not commence business until after January 1, 1940.

THE ESQUIRE CASE AND FREE SPEECH

Because the recent decision of the Supreme Court in connection with the Esquire Magazine case bears pertinently on the whole subject of free speech, below is reprinted in full the text of that decision for the information and guidance of the membership:

(Continued on next page)
SUPREME COURT OF THE UNITED STATES

No. 399.—October Term, 1945.

ROBERT E. HANNEGAN, as Postmaster General of the United States, Petitioner,

vs.

ESQUIRE, INC.

On Writ of Certiorari to the United States Court of Appeals for the District of Columbia.

[February 4, 1946.]

Mr. Justice DOUGLAS delivered the opinion of the Court.

Congress has made obscene material nonmailable (35 Stat. 935 [18 U. S. C. § 331]) and has applied sections for the enforcement of that policy. It has divided mailable matter into four classes, periodical publications constituting the second class.2 § 7 of the Classification Act of 1879, 20 Stat. 358, 39 U. S. C. § 221. And it has specified four conditions upon which a publication shall be admitted to the second-class. § 14 of the Classification Act of 1879, 20 Stat. 358, 48 Stat. 928, 39 U. S. C. § 226. The Fourth condition, which is the only one relevant here,’ provides:

"Except as otherwise provided by law, the conditions upon which a publication shall be admitted to the second class are as follows... Fourth. It must be originated and published for the dissemination of information of a public character, or devoted to literature, the sciences, arts, or some special industry, and having a legitimate list of subscribers. Nothing in this Act shall be construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates."

Respondent is the publisher of Esquire Magazine, a monthly periodical which was granted a second-class permit in 1933. In FEBRUARY 11, 1946-98

"The plain language of this statute does not assume that a publication must in fact be 'obscene' within the so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates."

Respondent is the publisher of Esquire Magazine, a monthly periodical which was granted a second-class permit in 1933. In the Act of March 3, 1901, 31 Stat. 1107, 39 U. S. C. § 232, a citation was issued to respondent by the then Postmaster General (for whom the present Postmaster General has now been substituted as petitioner) to show why that permit should not be suspended or revoked. A hearing was held before a board designated by the then Postmaster General.1 The board recommended that the permit not be revoked. Petitioner's predecessor took a different view. He did not find that Esquire Magazine contained obscene material and therefore, it was not entitled to its second-class permit because he found that it did not comply with the Fourth condition. The gist of his holding is contained in the following excerpt from his opinion:

"The plain language of this statute does not assume that a publication must in fact be 'obscene' within the

...Fourth. It must be originated and published for the dissemination of information of a public character, or devoted to literature, the sciences, arts, or some special industry."

"Writings and pictures may be indecent, vulgar, and risque and still not be obscene in a technical sense. Such writings and pictures may be in that obscure and treacherous borderland zone where the average person hesitates to find them technically obscene, but still may see ample proof that they are morally improper and not for the public welfare and the public good. When such writings or pictures occur in isolated instances their dangerous tendencies and malignant qualities may be considered of lesser importance.

"When, however, they become a dominant and systematic feature they must certainly cannot be said to be for the public good, and a publication which uses them in a text manner is making the 'special contribution to the public welfare' which Congress intended by the Fourth condition.

"A publication to enjoy these unique mail privileges and special preferences is bound to do more than refrain from disseminating matter which is obscene and bordering on the obscene. It is under a positive duty to contribute to the public good and the public welfare."

Respondent thereupon sued in the District Court for the District of Columbia to enjoin the revocation order. The parties stipulated at a pre-trial conference that the suit would not be defended on the ground that Esquire Magazine was obscene. The District Court denied the injunction and dismissed the complaint. 55 F. Supp. 1015. The Court of Appeals reversed. 151 F. 2d 49. The case is here on a petition for a writ of certiorari which we granted because of the importance of the problem in the administration of the postal laws.

The issues of Esquire Magazine under attack are those for January to November inclusive of 1943. The material was the following excerpt from his opinion:

"The plain language of this statute does not assume that a publication must in fact be 'obscene' within the so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates."

Respondent is the publisher of Esquire Magazine, a monthly periodical which was granted a second-class permit in 1933. In the Act of March 3, 1901, 31 Stat. 1107, 39 U. S. The issues of Esquire Magazine under attack are those for January to November inclusive of 1943. The material complained of embraces in bulk only a small percentage of the total bulk, and the challenged items are adipisicing to literature, the sciences, arts, or some special industry."

"The plain language of this statute does not assume that a publication must in fact be 'obscene' within the so construed as to admit to the second-class rate regular publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates."

The second-class privilege is a form of subsidy.2 From the beginning Congress has allowed special rates to certain classes of publications. The Act of Feb. 20, 1792, 1 Stat. 232, 238, granted newspapers a more favorable rate. These were extended to magazines and pamphlets by the Act of May 8, 1794, 1 Stat. 354, 362. Prior to the Classification Act of 1879, periodicals were put into the second-class, which by the Act of March 2, 1860, 12 Stat. 704, 2 The first three conditions are:

"First. It must regularly be issued at stated intervals, as frequently as four times a year and bear a date of publication and be numbered consecutively. Second. It must be issued from a known office of publication; Third. It must be formed of printed paper sheets, without board, cloth, leather, or other substantial binding, such as distinguish printed books for preservation from periodical publications: Provided, That publications produced by the stenographic, microphotograph, or hectograph process or in imitation of typewriting shall not be regarded as printed within the meaning of this clause."

"8 See 1 of that Act provides:

"When any publication has been accorded second-class mail privilege, the same shall not be suspended or revoked until a hearing shall have been granted to the parties interested."

1 It was not contended that Esquire Magazine does not comply with the conditions of 39 U. S. C. § 224. For other periodical publications which are included in second-class matter, see 37 Stat. 550, 39 U. S. C. § 229; 31 Stat. 650, 39 U. S. C. § 230.

2 Rates on periodicals, designed primarily for advertising purposes or for free circulation, were increased by the Act of July 12, 1876, 19 Stat. 78, 82.

(Continued on next page)
We know the reason for which papers are allowed to go at a low rate of postage, amounting almost to the franking privilege, is because they are the most efficient educators of our people. If it is the purpose of the second-class rate, as it exists in the present law, and as it is interpreted by the postmaster general, to aid in the circulation of publications designed primarily for advertising purposes, or for free circulation, or for circulation at nominal rates, "Publications of state departments of agriculture were granted the special rate until the Act of June 6, 1908, 31 Stat. 660, 39 U. S. C. § 228, as that was not done for publications of benevolent and fraternal societies, of literary, historical and scientific societies until the Act of August 24, 1912, 37 Stat. 254, 39 U. S. C. § 229...

We may assume that Congress has a broad power of classification and need not open second-class mail to publications of all types. The categories of publications entitled to that classification have indeed varied through the years. By the Court held in In re Johnson, 96 U. S. 727, that Congress could constitutionally make it a crime to send fraudulent or obscene matter through the mails. But grave constitutional questions are immediately raised once it is said that the use of the mails is a privilege which may be extended or withheld on any grounds whatsoever. See the dissent of Mr. Justice Brandeis and Mr. Justice Holmes in Milwaukee Publishing Co. v. Burleson, 251 U. S. 407, 421-423, 430-432, 437-438. Under view that the second-class rate could be granted on condition that certain provisions of the Fourth condition would have to be far more explicit for us to assume that Congress made such a radical departure from our traditions and undertook to clothe it with

3 But in what way can it be said that a requirement that a certain printed matter should be designated as "literature to serve" to mark it off from anything else that can be put into print. There is practically no form of expression of the human mind that can not be brought within the scope of "public information," "literature, the sciences, art, or some special industry," as defined by Congress. As stated by the Postal Commission of 1906, H. Doc. 608, 59th Cong., 2d Sess., p. 2137, 2138. It is difficult to imagine that the Congress, having delegated them for fear of censorship, gave the Postmaster General by the Fourth condition discretion to deny periodicals the second-class rate, if in his view they did not contribute to the public good. Congress Money in the House, pp. xxxvi-xxxvii: "We may assume that Congress has a broad power of classification and need not open second-class mail to publications of all types. The categories of publications entitled to that classification have indeed varied through the years. By the Court held in In re Johnson, 96 U. S. 727, that Congress could constitutionally make it a crime to send fraudulent or obscene matter through the mails. But grave constitutional questions are immediately raised once it is said that the use of the mails is a privilege which may be extended or withheld on any grounds whatsoever. See the dissent of Mr. Justice Brandeis and Mr. Justice Holmes in Milwaukee Publishing Co. v. Burleson, 251 U. S. 407, 421-423, 430-432, 437-438. Under view that the second-class rate could be granted on condition that certain provisions of the Fourth condition would have to be far more explicit for us to assume that Congress made such a radical departure from our traditions and undertook to clothe it with...
Postmaster General with the power to supervise the tastes of the reading public of the country.

It is plain, as we have said, that the favorable second-class rate was granted periodicals meeting the requirements of the Fourth condition, so that the public good might be served through a dissemination of the class of periodicals described. But that is a far cry from assuming that Congress had any idea that each applicant for the second-class rate must convince the Postmaster General that his publication positively contributes to the public good or public welfare. Under our system of government there is an accommodation for the widest varieties of tastes and ideas. What is good literature, what has educational value, what is refined public information, what is good art, varies with individuals as it does from one generation to another. There doubtless would be a contrariety of views concerning Cervantes’ Don Quixote, Shakespeare’s Venus & Adonis, or Zola’s Nana. But a requirement that literature or art conform to some norm prescribed by an official smacks of an ideology foreign to our system. The basic values implicit in the requirements of the Fourth condition can be served only by uncensored distribution of literature. From the multitude of competing offerings the public will pick and choose. What seems to one to be trash may have for others fleeting or even enduring values. But to withdraw the second-class rate from this publication today because its contents seemed to one official not good for the public would mean a withdrawal of the second-class rate tomorrow from another periodical whose social or economic views seemed harmful to another official.

The validity of the obscenity laws is recognition that the mails may not be used to satisfy all tastes, no matter how perverted. But Congress has left the Postmaster General with no power to prescribe standards for the literature or the art which a mailable periodical disseminates.

This is not to say that there is nothing left to the Postmaster General under the Fourth condition. It is his duty to “execute all laws relative to the Postal Service.” Rev. Stat. § 300 (5 U. S. C. § 359). For example, questions will arise as they did in Houghton v. Payne, 194 U. S. 88; Bates & Guild Co. v. Payne, 194 U. S. 106, and Smith v. Hitchcock, 226 U. S. 53, whether the publication which seeks the favorable second-class rate is a periodical as defined in the Fourth condition or a book or other type of publication. And it may appear that the information contained in a periodical may not be of a “public character.” But the power to determine whether the publication (which is mailable) contains information of a public character, literature or art does not include the further power to determine whether the contents meet some standard of the public good or welfare.

Affirmed.

Mr. Justice Jackson took no part in the consideration or decision of this case.

SUPREME COURT OF THE UNITED STATES
No. 399.—October Term, 1945.

ROBERT E. HANNEGAN, as Postmaster General of the United States, Petitioner,
vs.
ESQUIRE, INC.

On Writ of Certiorari to the United States Court of Appeals for the District of Columbia.

Mr. Justice FRANKFURTER, concurring.

The case lies within very narrow confines. The publication under scrutiny is a periodical. It is therefore entitled to the special rates accorded by Congress provided it is published “for the dissemination of information of a public character, or devoted to literature, the sciences, art . . .” If it be devoted to “literature” it becomes unnecessary to consider whether small an infusion of information of a public character entitles a periodical to the second-class mail rates when the bulk of its contents would not otherwise satisfy the Congressional conditions.

Congress has neither defined its conception of “literature,” nor “art.” Which of the works of Vachel Lindsay is “literature” within the scope of the second-class privilege. But the Postmaster General does not contend that the periodical with which we are concerned was nonmailable. He merely contends that it was not devoted to the kind of “literature” or “art” which Congress has in its mind.

It seems to me important strictly to confine discussion in this case because its radiations touch, on the one hand, the very basis of a free society, that of the right of expression, and on the other hand, the freedom of society from constitutional compulsion to subsidize enterprise, whether in the world of matter or of mind. While one may entirely agree with Mr. Justice Holmes, in Leach v. Carlile, 258 U. S. 138, 140, and Mr. Justice Brandeis to “execute all laws relative to the Postal Service,” REV. STAT. § 300, the Postmaster General exceeded his powers in denying this periodical a second-class privilege.

It seems to me important strictly to confine discussion in this case because its radiations touch, on the one hand, the very basis of a free society, that of the right of expression, and, on the other hand, the freedom of society from constitutional compulsion to subsidize enterprise, whether in the world of matter or of mind. While one may entirely agree with Mr. Justice Holmes, in Leach v. Carlile, 258 U. S. 138, 140, and Mr. Justice Brandeis to “execute all laws relative to the Postal Service,” REV. STAT. § 300, the Postmaster General exceeded his powers in denying this periodical a second-class privilege.

FEBRUARY 11, 1946—100
District Meetings

13TH DISTRICT

The 13th District Meeting was held in Dallas Jan. 31, Feb. 1, with Director Martin B. Campbell, WFAA presiding. An address by President Justin Miller was followed by discussions on all phases of industry matters.

Unanimous approval of the program outlined by President Miller for the industry was expressed by attending members, who commended the Board of Directors on his selection to head the NAB.

Members of the 13th District urged all stations within the District to become members of BMB, and further urged BMB to continue its periodic station coverage studies.

Continuance of full active support of BMI was pledged. Following are the resolutions adopted, and a list of those who attended the two-day meeting:

WHEREAS, the Board of Directors of the National Association of Broadcasters has elected the Honorable Justin Miller as President for a five-year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the 13th District by the said Justin Miller represent a constructive program to enable the industry to operate most effectively in the public interest, now

THEREFORE BE IT RESOLVED by the Broadcasters of the 13th District in session assembled this first day of February, 1946, that we heartily commend the Board of Directors for its action in selecting Justin Miller and pledge to him our wholehearted and continuing support, and cooperation.

WHEREAS BMB is in the process of making its first station coverage study and

WHEREAS there is an increased demand for a standard and authoritative study

BE IT RESOLVED that the 13th District urges all stations within the District to become members of BMB and further urges that BMB continue its periodic station coverage studies.

WHEREAS BMI was created and supported by the broadcasting industry

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency and

WHEREAS the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters

BE IT RESOLVED that the members of the 13th District extend to BMI their fullest active support and cooperation during the coming year.

WHEREAS in the past for the purpose of a better understanding of NAB-non-member stations within the 13th District have been invited to all sessions of the 13th District meetings and

WHEREAS that purpose seems to have been accomplished to the extent of almost unanimous membership

THEREFORE BE IT RESOLVED that all future business sessions of NAB District Meetings be confined to NAB members only.

WHEREAS the radio industry is confronted once again with the semi-annual chaos as a result of the adoption of daylight saving time in certain areas of the country and

WHEREAS the adoption of non-uniform time greatly inconveniences a large segment of the radio audience and causes a general dislocation of local program service

THEREFORE BE IT RESOLVED that the 13th District urges NAB and its members to lend every effort, through every proper channel, to insure the adoption of regulations to guarantee uniform time throughout the country.

WHEREAS the Research Committee of the NAB is making a study of the standards and methods of listener research

BE IT RESOLVED that the 13th District urges the Research Committee of NAB to continue its development of standards and techniques of radio audience research.

WHEREAS the TBA and the Dallas Stations and the Baker Hotel have acted as hosts for this convention and provided accommodations and entertainment under most trying conditions

BE IT RESOLVED that the members of the 13th District extends its hearty appreciation for the excellent service and entertainment.

WHEREAS under extremely crowded conditions this two-day meeting of the 13th District was planned and arranged by Director District Martin B. Campbell therefore

BE IT RESOLVED that the member stations and guests extend to Director Campbell our sincere appreciation.

Registration: Sheldon Hickox, NBC; Frank Pellegrin, NAB; Howard Barrett, KRBC; Jack Wallace, KBST; Jim Crocker, KRLD; Jim Douglass, General Electric; King H. Roberson, KTRH; Mrs. W. P. William B. Way, KVOO, was unanimously elected as 12th District Director at the District Meeting held in Tulsa Feb. 4-5.

Full discussion of all industry matters occupied most of the two-day sessions, with addresses by President Miller, A. D. Willard, Jr., NAB Executive Vice President; Frank Pellegrin, Director of Broadcast Advertising; Hugh Feltis, President of BMB, and others prominent in the field of broadcasting.

The resolutions adopted, and a list of those attending the meeting, follow:

WHEREAS the Research Committee of the NAB is making a study of the standards and methods of listener research,

BE IT RESOLVED that the Twelfth (12th) District urges the Research Committee of NAB to continue its development of standards and techniques of radio audience research, provided that qualified personnel is selected and provided that a precept of their scope of operation is outlined in detail by the National Committee of NAB.

WHEREAS the District Directors have handled the arrangements for this meeting, February 4th and 5th, 1946.

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that until the President of the United States proclaims a uniform time, or until Congress approves a law to assure that all sections of the country operate on an equitable time zone, that the networks and independent radio stations continue to maintain broadcast schedules on standard time.

WHEREAS, the adoption of non-uniform time greatly inconveniences a large segment of the radio audience and causes a general disruption of local programs, especially local public interest features, and

WHEREAS the practice of shifting programs twice yearly is detrimental to listener, client, and the radio industry,

THEREFORE, BE IT RESOLVED that until the President of the United States proclaims a uniform time, or until Congress approves a law to assure that all sections of the country operate on an equitable time zone, that the networks and independent radio stations continue to maintain broadcast schedules on standard time.

WHEREAS, the radio industry is again confronted with the semi-annual chaos as a result of the adoption of day-light saving time in certain areas of the country, and

WHEREAS the adoption of non-uniform time greatly inconveniences a large segment of the radio audience and causes a general disruption of local programs, especially local public interest features, and

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

WHEREAS, the outcome of plans and objectives of the Association as presented to the Broadcasters of the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

THEREFORE, BE IT RESOLVED that the Twelfth (12th) District by the said Justin Miller represent a constructive program to enable the industry to operate more effectively in the public interest, convenience, and necessity,

BE IT RESOLVED that the Twelfth (12th) District extends appreciation for the thoughtful manner in which the District Directors have handled the arrangements for this meeting.

WHEREAS BMI was created and is supported by the broadcasting industry, and

WHEREAS the interests of the industry can best be served by maintaining BMI at a high degree of efficiency, and

WHEREAS, the degree of this effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters,

BE IT RESOLVED that the Twelfth (12th) District extend to BMI their fullest active support and cooperation during the coming year, 1946.

WHEREAS, the Board of Directors of the National Association of Broadcasters elected the Honorable Justin Miller as President for a five year term beginning October 1, 1945, and

6TH DISTRICT

HARRISS ELECTED DIRECTOR

The 6th District meeting, scheduled for Thursday, Friday (7-8), was in progress in Memphis as NAB Headquarters went to press. A flash received at NAB Headquarters just before going to press reported that Wiley Harris, WJDX, Jackson, Mississippi, was unanimously elected 6th District Director for the term beginning after the 1946 NAB convention. A full report of the proceedings will be given next week.

MISCELLANY

BANNERMAN URGES MORE DEMOCRATIC RADIO FOR CANADA

Of interest to broadcasters is an address Broadcasting and Democracy, delivered recently before the Whitby, Ontario, Rotary Club by Glen Bannerman, well known throughout the industry for his outstanding performance as president of the Canadian Association of Broadcasters.

The text of Mr. Bannerman's address follows in full:

"Even as atomic energy can be developed to destroy humanity or to increase standards of living, the comparatively new means of communicating ideas by broadcasting can also be used for evil or good. In fact, it has already been used to promote evil by the now destroyed German Reich.

"In its technical development, broadcasting stands ready at the command of men to observe either the best or the worst interests of humanity. It is the minds and thoughts of men and women which determine the way broadcasting will serve humanity. We are each responsible in our own way for the type of service which radio broadcasting renders in Canada. If we permit it to become highly centralized under the control of a few individuals, no matter how intelligent they may be, there is always danger of abuse. There is always danger that under these conditions broadcasting might be used to serve what the controlling group may think is the best interest of the Canadian people. What one or more persons think is in the best interest of the Canadian people is not necessarily so. That is why we are not only small centralizing group of people is ever allowed for long to impose their ideas on the whole people without being subject to criticism and to change to the extent in which the citizens take an interest in the matter.

"LISTENERS SHOULD Dictate"

"I have always been of the opinion that the strength of democracy lies in the variety of communities which make up the whole country. Provided the desires and wishes of each community can make themselves felt upon the actions of regional and central authority, that authority will not get very far out of line before it is corrected. It is because of this belief that I am of the opinion that the privately owned broadcasting stations in the many communities of Canada are an important factor in our democratic way of life. This is especially true, provided these privately owned stations have the freedom to serve the interests of their communities. Their only masters as to what they broadcast should be the listeners in their respective communities.

"From this background of thinking, let us take a look at the setup of radio broadcasting in Canada. There are presently 98 broadcasting stations in operation, with an additional 8 or 10 authorized but not yet operating. Of the 98 stations, 88 are privately owned and 10 are owned by the Canadian Broadcasting Corporation. In 1936, the people of Canada, through their Members in the Parliament of Canada, authorized the setting up of the Canadian Broadcasting Corporation with complete control over all broadcasting in Canada. No person or persons can operate a broadcasting station in Canada until their application to do so has been approved, first by the Board of Governors of the Canadian Broadcasting Corporation, then by the minister responsible for the Radio Control Division of the Department of Transport, and finally by Order-in-Council of the Cabinet.

"Because the number of radio broadcasting frequencies is limited and because the frequencies are national in their use, control over the establishment of broadcasting stations is essential, irrespective of how the control is set up.

EXTENT OF GOVERNMENT CONTROL

"Other controls allocated by the Government under the Broadcast Act are specifically:

(a) To control the establishment and operation of chains or networks of stations in Canada.
(b) To prescribe the periods to be reserved periodically by any private station for the broadcasting of programmes of the Corporation.
(c) To control the character of any and all programmes broadcast by the Corporation or private stations.
(d) To determine the proportion of time which may be devoted to advertising in any programme broadcast by the stations of the Corporation or by private stations and to control the character of such advertising.
(e) To prescribe the proportion of time which may be devoted to political broadcasts by private stations and the stations of the Corporation, and to assign such time on an equitable basis to all parties and rival candidates.

"Under the authority of these clauses, the Canadian Broadcasting Corporation has reserved to itself the exclusive right to establish permanent networks in Canada. It has a care reserved to itself the sole right to receive telegraph or telephone lines from the line companies for the purpose of linking up two or more stations. Even where two privately owned stations desire to be linked together for a one-time commercial or sustaining programme, application with all details of the programme must be made to the Canadian Broadcasting Corporation for the renting of a line.

"Presently, the Canadian Broadcasting Corporation controls and operates two networks in English-speaking Canada and one network in the French language in the Province of Quebec. A majority of the privately owned stations are affiliated with one of the other of these networks.

MONOPOLY COMPLETE

"It is apparent from these facts that the Corporation has a complete monopoly of all network broadcasting. While they broadcast over these networks both sustaining and commercially sponsored programmes originating in Canada and in the United States, any programme which, for one reason or another, officials of the CBC do not approve cannot be broadcast in Canada. This means, in fact, that you and I, as free men in our Canadian democracy, do not have the right at all times to decide for ourselves whether we shall or shall not listen to a given programme. That responsibility, in the opinion of the Corporation, is made for us by officials of the Corporation. You may say, "But don’t the networks in the United States exercise the same right in deciding what programmes they will or will not carry?" That is correct, but there are five independent national networks in the United States. If, for one reason or another, one of the networks does not wish to carry a given programme, any of the other networks may decide to carry it and it will only be dropped if they find that the listeners are not interested in such a programme. In Canada, if the CBC decides against carrying a given programme, there is no way in which you or I can decide whether or not we wish to listen to it, unless the programme originates in the United States and we are near enough to the border to tune in to a U. S. station.

(Continued on next page)
Dian Broadcasting Corporation and one network operated independently but both competing for talent, programmes and audiences. This type of competition would, I believe, stimulate better service to Canadian citizens by both networks. Not all people agree with this point of view, but I am optimistic enough to believe that in time the suggestions I have made concerning the two networks will become a fact.

"It must not be thought from what I have said that I hold any views to the effect that the CBC has not made any contribution to broadcasting in Canada. In fact, they have made a real contribution because they have been placed in a position to make that contribution. Their personnel are fine and sincere people and they have worked hard in increasing the value of broadcasting as they see it for the Canadian people.

"At the same time, we should not lose sight of the great improvements and the contributions that the privately owned stations in our country have made to Canadian broadcasting. Their contributions to the public interest during the war years has established a record of which they have every right to be proud. Within the restrictions imposed upon them, they have served their communities and the public at large in a way that is worthy of high praise.

"Broadcasting is a growing and developing art as well as a business and the private stations will always be found in the forefront in improving their operations with sound ideas and plans.

Problems to Consider

"The entire broadcasting industry, including the CBC and the privately owned stations, faces many mutual problems. Take the question of programming the broadcast day, for example. They must seek to please a large number of listeners with widely varying tastes in music, news, sports, music, etc. Sometimes their efforts may fall on deaf ears.

"Unfortunately, no way has been found to provide symphony music all the time for those who like it and at the same time jazz and swing for those of different musical tastes.

"Have you ever gone into a store selling magazines? At one end you will find the Atlantic Monthly, Harper's, and similar intellectual journals to make that kind of music. Their type of music is not to everyone's taste. At the other end of the store you will find Maclean's, New World, Saturday Evening Post, etc., then the detective and adventure stories, together with magazines such as True Story. I venture to say that the people who enjoy reading Atlantic Monthly have probably never read a True Story magazine. If, indeed, they have ever heard of it. Yet on this continent there are thousands of people who read True Story to one who reads Atlantic Monthly. Yet, gentlemen, this range of magazine readership is largely indicative of the audience which the broadcasting stations in Canada must try to please with their programmes during every day, 365 days a year. It is not an easy task and is not understood by many of our people.

KOPF HEADS NBC NETWORK SALES

The promotion of Harry C. Kopf, vice-president and general manager of the NBC Central Division headquarters in Chicago, to vice-president in charge of network sales, effective April 1, was announced this week by Niles Trammell, president of NBC. Kopf, who succeeds Roy C. Witmer, named staff vice-president on special assignments, will move to New York and will be succeeded by I. E. Showerman, NBC Eastern Division sales manager. Kopf is a member of the NAB Public Relations Committee.

1004 STANDARD BROADCAST STATIONS

Since the last publication of the monthly comparative table of standard broadcast stations (October 5 Report), the changes for Sept., Oct., Nov. and Dec. have been issued by the FCC.

During Sept., one station was licensed to operate and two construction permits were issued; Oct., three were licensed and six construction permits were issued; Nov., one licensed, 19 given construction permits; and during Dec., one was licensed with 20 receiving permits for construction. A 13-month comparative table follows:

(Continued on next page)
JAMES NOW PORTER'S SPECIAL ASSISTANT

Lieutenant W. Ervin James, USNR, former assistant secretary of the Commission, who has been in service during the past two years, today entered upon his duties as special assistant to Chairman Paul A. Porter.

Lieutenant James joined the Commission staff in 1941 as assistant to Commissioner Clifford J. Durr. He became assistant secretary of the Commission in 1943. After receiving his Navy commission in 1944, Lieutenant James took his indoctrination course at Fort Schuyler, New York, and spent several months in the Naval Communications School at Harvard University. On the completion of his course at Harvard, he was attached to the battleship U. S. S. Nevada, where he was communications watch officer, legal officer, and aide to the executive officer. He saw action at Iwo Jima, Okinawa, and with the Third Fleet in the East China Sea.

Lieutenant James is a native of Montgomery, Alabama, and is a member of the bar of that state and of the District of Columbia Bar. Four of his brothers, Earl, Edward, Wilbur and Franklin, were also in the services. He is married and has one son, Walter Ervin II. The Jameses live at 1210 Martha Custis Drive, Alexandria, Virginia.

FCC GRANTS EXTENSION ON FILING OF TRANSFER PROCEDURE BRIEFS

The Commission issued the following announcement on Thursday (7):

The Commission adopted an order granting request of National Association of Broadcasters for a thirty-day extension of time within which briefs might be filed in the matter of Promulgation of Rules and Regulations concerning the procedure to be followed by the Commission in passing upon assignments of license or transfers of control of corporate licensees (Docket 7071); and ordered that the time for filing briefs be extended until March 15, 1946.

APPLICATIONS IN CONFLICT WITH RULES DISMISSED

On Feb. 1, 1946, the Commission adopted four orders dismissing without prejudice a number of applications which involved direct conflicts with Commission Rules. The orders, however, provide procedures for reinstatement of the dismissed applications at the conclusion of general legislative proceedings now pending before the Commission. In the event the Commission's Rules are subsequently modified, suitable notice will be afforded all interested persons and a period will be provided in which to file competing applications. In the interest of orderly administration it is desired to emphasize that pending applications inconsistent with the Commission's Rules do not afford parties any equities or priorities on the frequency.

The applications thus dismissed are divided into four categories: (1) Those involving unduly with Section 3.25(a) in that they request duplicate nighttime operation on channels reserved for the exclusive nighttime use of one station only; (2) Applications involving conflict with Section 3.25(d) since nighttime operation is requested on a channel available for daytime operation only, in the United States; (3) Applications involving conflict with Section 3.22 which propose operation with a power in excess of 50 kw., the maximum permitted by Commission Rules; and (4) Applications requesting the use of frequencies for standard broadcast stations which are not presently included in the frequencies allocated for that service.

All interested parties affected by these orders have been or will be afforded opportunity to present evidence for consideration in connection with the Clear Channel and General Allocation Hearings. However, parties will not be permitted to offer evidence in those hearings on the merits of particular applications.

With respect to applications proposing operation in accordance with present rules on the frequencies listed under Section 3.25(a) (i.e., those requesting limited time or daytime only assignments), the Commission has been concerned with the possibility that a grant of a large number of such applications would further complicate the problems that are involved in the Clear Channel Hearing. Further study of this matter has resulted in the conclusion that in many instances placing additional daytime only stations on the U. S. 1-A channels may be made before conclusion of the hearing. It is, however, possible to foresee that severe complications may arise by authorizing the operation of additional limited time stations, and such applications will be given careful consideration with a view to determining the possible complications, and in the event they can be foreseen, the applications may be conditionally granted for daytime operation only.

The orders, and applications affected, follow:

In re Applications of:

Iowa State College of Agriculture and Mechanical Arts (WOI), Ames, Iowa; for construction permit.

George D. Wray, Allen D. Morris, P. E. Furlow and John C. McCormack, d/b as Radio Station KTBS (KTBS), Shreveport, Louisiana; for construction permit.

American Radiotelephone Company (WHKK), Akron, Ohio; for modification of license.

KKRO, Inc. (KKRO), Aberdeen, Washington; for construction permit.

World Publishing Company (KOWH), Omaha, Nebraska; for construction permit.

Pacific Coast Broadcasting Company (KPAS), Pasadena, California; for construction permit.

The St. Louis University (WEW), St. Louis, Missouri; for construction permit.

American Radiotelephone Company (KXA), Seattle, Washington; for construction permit.

Seattle Broadcasting Company (KOL), Seattle, Washington; for construction permit.

E. L. Kick and Roger B. Payne, d/b as Farwest Broadcasting Company (New), Bellingham, Washington; for construction permit.

(Continued on next page)
Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled applications for construction permits; and

WHEREAS, a grant of such application would be inconsistent with Section 3.22(a) of the Commission's Rules which provides a maximum of 50 kw. power; and

WHEREAS, the Commission is now engaged in a general hearing entitled ‘In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band (Docket No. 6741),’ and has included among the issues therein, the following:

‘What minimum power and what maximum power should be required or authorized for operation on clear channels’;

WHEREAS, the above applicant has had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled application BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

In re Application of:

Southland Industries, Inc. (WOAI), San Antonio, Texas; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled application for construction permit; and

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled applications BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6651.

In re Application of:

Southland Industries, Inc. (WOAI), San Antonio, Texas; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled application for construction permit; and

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled applications BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

By the Commission,

T. J. Slowie, Secretary.

In re Application of:

Capital Broadcasting Company (WWDC), Washington, D. C.; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled application for construction permit; and

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled application BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

By the Commission,

T. J. Slowie, Secretary.

In re Application of:

Midland Broadcasting Company (KMBC), Kansas City, Missouri, for construction permit.

Community Broadcasting Company (WTOL), Toledo, Ohio; for construction permit.

Topeka Broadcasting Association, Inc. (WIBW), Topeka, Kansas; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled applications for construction permits; and

WHEREAS, it appears that each of these applications requests the use of the frequency 540 kilocycles; and that under the Commission’s Rules governing the allocation of frequencies, this frequency is not available for assignment to standard broadcast stations; and

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled applications BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6651.

In re Application of:

Skagit Valley Broadcasters, Inc. (New), Mount Vernon, California; for construction permit.

Broadcasting Corporation of America (KPRO), Riverside, California; for construction permit.

Milwaukee Broadcasting Company (Partnership) (WEMP), Milwaukee, Wisconsin; for construction permit.

West Central Broadcasting Company (New), Tulsa, Oklahoma; for construction permit.

Palo Alto Radio Station, Inc. (K PYA); San Francisco, California; for construction permit.

KOIN, Inc. (KOIN), Portland, Oregon; for construction permit.

KXL Broadcasters (KXL), Portland, Oregon; for modification of license.

A. Frank Katzenine (WKAT), Miami Beach, Florida; for construction permit.

Intermountain Broadcasting Corporation (KDYL), Salt Lake City, Utah; for construction permit.

Louis Wasmer (KGA), Spokane, Washington; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled applications for construction permits; and

WHEREAS, a grant of each of these applications would be inconsistent with Section 3.25(a) of the Commission's Rules and that such channels, commonly designated as I-A channels, are available for assignment to only one station, unlimited time; and

WHEREAS, a grant of each of these applications would be inconsistent with Section 3.25(a) since each channel requested is already assigned to an existing station for unlimited time operation; and

WHEREAS, the Commission is now engaged in a general hearing entitled ‘In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band (Docket No. 6741),’ and has included among the issues therein, the following:

‘Whether the number of clear channels should be increased or decreased and what frequencies in the standard broadcast band shall be designated as I-A channels and as I-B channels’;

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled applications BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

In re Application of:

American Regional Broadcasting Agreement since the channel requested is not available for assignment to unlimited time stations in the United States; and

WHEREAS, it appears that each of these applications requests the unlimited time use of a channel listed in Section 3.25(d) of the Commission’s Rules; and

WHEREAS, the Commission is now engaged in a general hearing entitled ‘In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band (Docket No. 6741),’ and has included among the issues therein, the following:

‘What minimum power and what maximum power should be required or authorized for operation on clear channels’;

WHEREAS, the above applicant has had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled application BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

By the Commission,

T. J. Slowie, Secretary.

In re Application of:

KXL Broadcasters (KXL), Portland, Oregon; for modification of license.

A. Frank Katzenine (WKAT), Miami Beach, Florida; for construction permit.

Intermountain Broadcasting Corporation (KDYL), Salt Lake City, Utah; for construction permit.

Louis Wasmer (KGA), Spokane, Washington; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled applications for construction permits; and

WHEREAS, a grant of each of these applications would be inconsistent with Section 3.25(a) of the Commission’s Rules and that such channels, commonly designated as I-A channels, are available for assignment to only one station, unlimited time; and

WHEREAS, a grant of each of these applications would be inconsistent with Section 3.25(a) since each channel requested is already assigned to an existing station for unlimited time operation; and

WHEREAS, the Commission is now engaged in a general hearing entitled ‘In the Matter of Clear Channel Broadcasting in the Standard Broadcast Band (Docket No. 6741),’ and has included among the issues therein, the following:

‘Whether the number of clear channels should be increased or decreased and what frequencies in the standard broadcast band shall be designated as I-A channels and as I-B channels’;

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled applications BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

In re Application of:

Midland Broadcasting Company (KMBC), Kansas City, Missouri; for construction permit.

The Community Broadcasting Company (WTOL), Toledo, Ohio; for construction permit.

Topeka Broadcasting Association, Inc. (WIBW), Topeka, Kansas; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled applications for construction permits; and

WHEREAS, it appears that each of these applications requests the use of the frequency 540 kilocycles; and that under the Commission’s Rules governing the allocation of frequencies, this frequency is not available for assignment to standard broadcast stations; and

WHEREAS, the matter of the allocation of the frequency 540 kc. is in issue in the Commission’s pending general proceeding entitled ‘In the Matter of Allocation of Frequencies to the various classes of Non-Governmental Services in the Radio Spectrum from 10 kc. to 90,000,000 kc.’ (Docket No. 6651);

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled applications BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6651.

In re Application of:

Southland Industries, Inc. (WOAI), San Antonio, Texas; for construction permit.

Order

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 1st day of February, 1946;

The Commission having under consideration the above-entitled application for construction permit; and

WHEREAS, the above applicants have had or will have opportunity to offer evidence in the foregoing hearing.

Now, therefore, IT IS ORDERED, that the above-entitled application BE AND THEY ARE HEREBY DISMISSED WITHOUT PREJUDICE, to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741.

By the Commission,

T. J. Slowie, Secretary.

In re Application of:

Capital Broadcasting Company (WWDC), Washington, D. C.; for construction permit.

Monday, February 11
NEW—Valdosta Broadcasting Co., Valdosta, Ga.—C. P. 950 kc., 1 KW, unlimited DA-night.
NEW—WLOF—Halvedox, Inc., Orlando, Fla.—C. P. 950 kc., 5 KW, unlimited DA-night.
NEW—E. T. Wright, Orlando, Fla.—C. P. 950 kc., 1 KW, unlimited DA-night.

(Continued on next page)
time power from 5 KW to 10 KW, on 1070 kc., 1 KW night, unlimited. (B4-P-3820)

KQV—Allegheny Broadcasting Corp., Pittsburgh, Pa.—Granted construction permit to increase power from 1 to 5 KW, change transmitter location, install new transmitter, and direct directional antenna system for day and night use. (B2-P-3992)

WOL—Cowles Broadcasting Co., Washington, D. C.—Granted construction permit to increase power from 1 to 5 KW, on 1580 kc., unlimited time: directional antenna. (B1-P-4004)

**DESIGNATED FOR HEARING**

WHBC—The Ohio Broadcasting Co., Canton, Ohio—Designated for consolidated hearing with applications of Central Broadcasting Co. (B4-P-3899; Docket 6841) and Wisc. State Broadcasting Co. (B4-P-489; Docket 6844), the application of WHBC (B2-P-3893) for construction permit to increase power from 1 to 5 KW, install a new transmitter, and make changes in equipment.

KRIC—KRIC, Inc., Beaumont, Texas—Granted petition to have its application (B3-P-4110) for a construction permit to change frequency from 1450 to 1470 kc., increase power from 250 watts to 5 KW, designated for consolidated hearing with four other Texas applications, and the Commission ordered the application of KRIC designated in a consolidated proceeding with applications of San Jacinto Broadcasting Co., Houston, KRBC, Abilene, Agr. and Mechanical College of Texas, College Station, Texas, and KPLC, Lake Charles, La., and further ordered that the Bills of Particulars issued in connection with these applications be enlarged to include the KRIC application.

WKEL—Radio Station WKEU, Griffin, Ga.—Designated application (B1-P-4234) for a new station, for hearing in a consolidated proceeding with the application of WN2W listed above.

WKEF—Radio Station WKEU, Griffin, Ga.—Designated for hearing application for amendment to construction permit, license to cover construction permit (B3-P-4093) to increase power from 10 to 50 KW on frequency 1130 kc., for hearing in a consolidated proceeding with the application of Missionary Society of St. Paul the Apostle for a construction permit for a new station to operate on 1130 kc., 10 KW, Missionary Society of St. Paul The Apostle, New York City—Designated application (B1-P-4234) for a new station, for hearing in a consolidated proceeding with the application of WN2W listed above.

WAE—Old New York Broadcasting Corp., New York City—Described applications of WAE for renewal of license (B1-R-1049) and for construction permit (B1-P-4099) to increase power from 10 to 50 KW on frequency 1130 kc., for hearing in a consolidated proceeding with the application of Missionary Society of St. Paul the Apostle for a construction permit for a new station to operate on 1130 kc., 10 KW.

WADJ—Allen T. Simmons, Village of Tallmadge, Ohio—Adopted order designating for hearing application for construction permit to change frequency from 1350 kc. to 1220 kc. and increase power from 5 KW to 50 KW, to be heard in consolidated proceeding with application of The WGAN Broadcasting Co. for construction permit to increase power of Station WGAN from 5 KW to 50 KW on frequency 1220 kc. (B2-P-4243) (Action taken 2/1/46.)

Old Colony Broadcasting Co., Inc., Brockton, Mass.—Granted petition to have its application (B1-P-4411) for a new station, designated for consolidated hearing with other applications for hearing on the Boston area, ordered the application of Old Colony Broadcasting Company requesting the frequency 1560 kc., 1 KW, daytime (B3-P-4437) and Public Service Broadcasting Corp., Knoxville, Tenn. (B3-P-4347), both requesting 550 kc., 1 KW, directional antenna, unlimited time.

**550 Kilocycles**

Designated in a consolidated proceeding with other applications requesting the 550 channel, scheduled to be heard in Washington on February 25, are the applications of Capital City Broadcasting Corp., Baton Rouge, La. (B3-P-3739), and Public Service Broadcasting Corp., Knoxville, Tenn. (B3-P-4347), both requesting 550 kc., 1 KW, directional antenna, unlimited time.

**790 Kilocycles**

Designated for consolidated hearing with the applications of Lee Scott Broadcasting Co., for a new station at Houston, Texas, to operate on 790 kc., 1 KW, daytime (B3-P-4382) and Public Service Broadcasting Corp. (KTHJIT), Houston (B3-P-4361), application to change frequency from 1230 to 790 kc., increase power from 250 watts to 5 KW, day, install new transmitter and DA, and change the transmitter location in Phoenix. (B3-P-3739)

Designated for consolidated hearing the applications of Lee Scott Broadcasting Co., for a new station at Houston, Texas, to operate on 790 kc., 1 KW, daytime (B3-P-4382) and Texas Star Broadcasting Co. (KTHJIT), Houston (B3-P-4361), application to change frequency from 1230 to 790 kc., increase power from 250 watts to 5 KW day, install new transmitter and DA for night use and change (Continued on next page)
transmitter location; Lubbock County Broadcasting Co., Lubbock, Texas, for a new station to operate on 790 kc, 1 KW, DA night use, unlimited time, (B1-P-4062); Plains Radio Broadcasting Co. (KFYO), Lubbock, Texas, for a construction permit to change frequency from 1350 to 790 kc, increase power from 250 watts to 5 KW, install a new transmitter and DA for night use, and change transmitter location at Lubbock, and Veterans' Broadcasting Co., a partnership, Houston, Texas, for a new station to use frequency 1250 kc, 250 watts unlimited time (B3-P-4392), contingent upon grant of KTHT's application to change frequency from 1230 to 790 kc.

830 Kilocycles

Designated for hearing in a consolidated proceeding the application of Southern Californ Broadcasting Co. (KWKW), San Gabriel, Calif., for construction permit to change frequency from 1430 to 830 kc, increase power from 1 to 5 KW, install new transmitter and antenna, and change transmitter location; and application of Orange County Broadcasting Co., Santa Ana, Calif., for construction permit for a new station to operate on 830 kc, 5 KW, daytime only. (B5-P-4242)

850 Kilocycles

Designated for hearing in a consolidated proceeding the application of The A. S. Abell Co., Baltimore, Md. (B1-P-4267), for a construction permit for a new station to operate on 850 kc, 1 KW, DA, unlimited time, and the application of Berks Broadcasting Co. (WEEU), Reading, Pa., for a application of The A. S. Abell Co., Baltimore, Md., for a construction permit to install a new directional antenna system retaining its present frequency of 1060 kc, and its present power of 50 KW, unlimited time. (B2-P-3855)

1060 Kilocycles

Designated for hearing the application of Westhousen Radio Stations, Inc. (KWW), Philadelphia, Pa., for a construction permit to install a new directional antenna system retaining its present frequency of 1060 kc, and its present power of 50 KW, unlimited time. (B2-P-3855)

1080 Kilocycles

Designated for hearing the application of Lake Superior Broadcasting Co. (B4-P-4278), for a new station at Duluth, Minn., to operate on 1080 kc, 10 KW, directional antenna, unlimited time.

1090 Kilocycles

Designated for consolidated hearing the application of Mid-America Broadcasting Corp. (B2-P-2760), for a new station at Louisville, Ky., to operate on 1090 kc, 1 KW, night, 5 KW-LS, DA, unlimited time, with application of Kentucky Broadcasting Corp. Inc. (WINX), Louisville (B2-P-4169), to change frequency from 1240 to 1090 kc, increase power from 250 watts to 1 KW night, 5 KW day, install new transmitter and directional antenna, and change transmitter location.

1150 Kilocycles

Designated for consolidated hearing the application of Fostoria Broadcasting Co. (B2-P-4150), Fostoria, Ohio, for a new station to use frequency 1150 kc, with 1 KW, daytime only, with application of Northwestern Ohio Broadcasting Corp. (B2-P-4417), for a new station at Lima, Ohio, on frequency 1150 kc, with 1 KW power, directional antenna, unlimited time.

1170 Kilocycles

Designated for hearing in a consolidated proceeding the applications of Finley-McKinnon Broadcasting Co. (B5-P-3705), for a new station at San Diego, Cal., with the application of Valley Broadcasting Co. (B5-P-4292), for a new station at San Jose, Cal., both requesting frequency 1170 kc, with 5 KW, DA, unlimited time.

1230 Kilocycles

Designated the application of New England Broadcasting Co. (B1-P-4196), for a new station at Worcester, Mass., requesting frequency 1230 kc, 250 watts power, unlimited time, for consolidated hearing in the same proceeding with applications for Woosneck, R. I., Norwich and Waterbury, Conn., to be heard February 25-March 1.

1320 Kilocycles

Designated for hearing in a consolidated proceeding the application of Richard T. Sampson (B5-P-4442), for a new station at Oceanside, Cal., to operate on 1320 kc, 100 watts power, unlimited time, with application of John Gordon Studebaker, et al., d/b as Studebaker Broadcasting Co. (B5-P-3910), for a new station at San Diego, to operate on 1320 kc, with 250 watts, unlimited time.

Continued on next page
install a new transmitter and DA, on its present frequency of 1329 kc., with application of WMAS, Inc. (WMAS), Springfield, Mass., for change of location from 1350 kc. to 1329 kc., increase power from 250 watts to 5 KW, install a new transmitter and a directional antenna, and change transmitter location at Springfield.

1340 Kilocycles

Designated for hearing the application of The Ashland Broadcasting Co. (WAML), (B2-P-4422), for construction permit to install a synchronous amplifier at Huntington, W. Va., operating on the frequency 1340 kc., with 250 watts power, unlimited time, synchronized with station WCMJ, Ashland, Ky.

Designated for hearing in a consolidated proceeding the application of WesTex Broadcasting Co. (B3-P-4437), San Angelo, Texas, with application of Abilene Broadcasting Co. (B3-P-4438), Abilene, Texas, both requesting new stations to operate on 1340 kc., with 250 watts power, unlimited time.

1360 Kilocycles

Designated for hearing in a consolidated proceeding the applications of Luck-McDonald Co. (B3-P-4433) and Fort Worth Broadcasting Co. (B3-P-4439), both requesting a new station at Fort Worth, Texas, to operate on 1360 kc., 1 KW power, unlimited time, directional antenna.

1420, 1430 and 1440 Kilocycles

Designated for hearing the application of North Jersey Radio, Inc. (B1-P-4306), for a new station at Newark, N. J., to operate on the frequency 1430 kc., 5 KW, directional antenna at night, unlimited time.

Designated for hearing in a consolidated proceeding the application of The Capital Broadcasting Co. (B1-P-4318), for a new station at Annapolis, Md., to operate on 1430 kc., with 100 watts night, 250 watts-LS, unlimited time, with application of The Chesapeake Radio Corp. (B1-P-4329), for a new station at Annapolis to operate on 1440 kc., 250 watts, daytime only, and the application of Baltimore Broadcasting Corp. (WCBA), Baltimore, Md. (B1-P-3695), for a consolidated permit to change frequency from 1400 to 1430 kc., increase power from 250 watts to 5 KW, and install a new transmitter and directional antenna.

1450 Kilocycles

Designated for hearing in a consolidated proceeding the application of Thomas G. Harris, individually and as Trustee for Coleman Gay, et al., (B3-P-4525), Austin, Texas, with application of Charles W. Ballhootoe (B3-P-4575), San Antonio, both requesting new stations to operate on 1450 kc., 250 watts unlimited time, in Austin and San Antonio, respectively.

Designated for hearing in a consolidated proceeding the application of Meridian Broadcasting Co., Meridian, Miss. (B3-P-4449), with application of Duke H. Thornton (B3-P-4449), Philadelphia, Miss., both applicants requesting frequency 1450 kc., 250 watts, unlimited time.

1490 Kilocycles

Designated for hearing in a consolidated proceeding with application of WDNC, to be heard in a consolidated proceeding on March 8-16 in Washington, D. C., involving applications of Rebel Broadcasting Co., et al, the application of Public Information Corp. (B3-P-4431), for a new station at Durham, N. C., to operate on 1490 kc., with 250 watts power, unlimited time, contingent upon the grant of WDNC's application to change frequency from 1490 to 620 kc.

Designated for hearing in a consolidated proceeding the application of John W. Davis (B3-P-4290), for a new station at Portland, Ore., with application of John H. Fitzgibbon, Ray Jarman and Temple V. Ehrman (B3-P-4342) for a new station at Oregon City, Ore., both applicants requesting frequency 1490 kc., 250 watts power, unlimited time.

Designated for hearing in a consolidated proceeding the application of Andalusia Broadcasting Co. (B3-P-4445), for a new station at Andalusia, Ala., with application of Troy Broadcasting Corp. (B3-P-4446), for a new station at Troy, Ala., both requesting use of frequency 1490 kc., with 250 watts power, unlimited time.

1520 Kilocycles

Designated for hearing the application of Radio Air Ways, Inc. (B3-P-3771), for a new station at Eugene, Oregon, to operate on 1520 kc., with 1 KW power, unlimited time.

1540 Kilocycles

Designated for hearing in a consolidated proceeding the application of Henry F. Fett (B2-P-1441), with application of Suburban Broadcasting (B2-P-4232), both applicants for a new station in Dearborn, Mich., to operate on frequency 1540 kc., 1 KW daytime only.

1560 Kilocycles

Designated for hearing the application of New Laurel Radio Station, Inc., (WAML), Laurel, Miss. (B3-P-4369), for a construction permit to change frequency from 1560 to 1600 kc., increase power from 250 watts to 1 KW, install a new transmitter and a new antenna and ground system, and change transmitter location at Laurel.

LICENSE RENEWALS

Granted renewal of following station licenses for the period ending August 1, 1947:

WARM, Scranton, Pa.; WJLB, Detroit, Mich.; KRLC, Lewiston, Idaho; WHLB, Virginia, Minn.; WHDF, Calumet, Mich.; KFVD, Fort Dodge, Iowa.

MISCELLANEOUS ACTIONS

WPTZ—Philo Radio & Television Corp., Philadelphia, Pa.; W3XP, W5XPF, W3XPF, W3XPH, W3XPI, W3XPK, W3XPL—Portable-Mobile, area of Central Md., N.E. Md., S.E. Pa., & D. C.; W10XP, W10XPA, W10XPC, W10XPD, W10XPE, W10XPF, W10XPQ—Portable-Mobile, area of Wash., D. C., Phila., and New York; W3XE, W3XW, Springfield Twp., Pa.; W10XAD, W10XAE, W10XAF—Portable, area of Wash., D. C., Phila., and New York; W3XAF—Arlington, Va.—Granted license to cover construction permit which authorized a new developmental broadcast station, upon an experimental basis only; conditions. Frequencies that may be assigned by Commission's Chief Engineer from time to time; power 5 KW peak; emission: A0, A1, A2, A3, A4, A5, special and special for FM.

WJWC—J. W. Woodruff, et al., d/b as Columbus Broadcasting Co., area of Columbus, Ga.—Granted license to cover construction permit, with coverage of Columbus, Ga. to Covington U. S.—Granted license to cover construction permit which authorized a new developmental broadcast station, upon an experimental basis only; conditions. Frequencies that may be assigned by Commission's Chief Engineer from time to time; power 5 KW peak; emission: A0, A1, A2, A3, A4, A5, special and special for FM.

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.; John E. Fetzer and Rhea Y. Fetzer, d/b as Fetzer Broadcasting Co., Grand Rapids, Mich.—Adopted an order denying application of Ashbacker Radio Corp. for special service authorization to operate station WKBZ on 1320 kc., for the remainder of its current license term in lieu of operation on 1490 kc., the frequency presently assigned to and used by said station, and also application for special service authorization to operate station WJEF on 1320 kc.; and further ordered that the temporary authority be and is issued to Fetzer Broadcasting Co. for operation of station WJEF, Grand Rapids, Mich., (Continued on next page)
as previously authorized, pending outcome of the consolidated hearing referred to above, provided, however, that the said temporary authority shall be subject to cancellation at any time by the Commission without notice or hearing should it appear upon the basis of the said hearing that a grant of the application of the Ashbacker Radio Corp. for a construction permit (B2-P-3500), would better serve the public interest than grant of the application of Petzer Broadcasting Co. (B2-P-3509).

WKBU—Ashbacker Radio Corp., Muskegon, Mich.—Adopted an order setting aside and vacating the grant made on June 27, 1944, for a new station (B2-P-3500) and license to cover same, as amended Feb. 5, 1945 (B2-L-1555), to operate on 1230 kc., 25 watts, unlimited time, and ordered that said application be designated for hearing in a consolidated proceeding with application of Ashbacker Broadcasting Co., Hazelwood, Inc. (WLOF), and E. D. Rivers (WGOV) scheduled for February 11, 1946. (Docket No. 7111)

John E. Fetzer and Rhea Y. Fetzer, d/b as Fetzer Broadcasting Co., Grand Rapids, Mich.—Adopted order granting petitioner’s motion for leave to amend application for construction permit so as to specify a frequency of 1230 instead of 950 kc. and make certain other changes, and ordered that the application, as amended, be retained on the hearing docket to be heard in a consolidated proceeding with applications of Valdosta Broadcasting Co., Hazelwood, Inc. (WLOF), and E. D. Rivers (WGOV) scheduled for February 11, 1946. (Docket No. 7111)

WGBK—Ashbacker Radio Corp., Muskegon, Mich.—Adopted an order setting forth the issues on which the hearing in the above application of Ashbacker Radio Corp. shall be held in consolidation with hearing upon the application of Petzer Broadcasting Co.

E. T. Wright, Orlando, Fla.—Adopted order granting motion for leave to amend application for construction permit so as to specify a frequency of 1230 instead of 950 kc. and make certain other changes, and ordered that the application, as amended, be retained on the hearing docket to be heard in a consolidated proceeding with applications of Valdosta Broadcasting Co., Hazelwood, Inc. (WLOF), and E. D. Rivers (WGOV) scheduled for February 11, 1946. (Docket No. 7111)

Marshall Broadcasting Co., Marshall, Texas, and KVOI, Inc., Marshall, Texas—Adopted order granting petition of Marshall Broadcasting Co. for leave to amend its application to show corrected and additional data and to remove from hearing docket; accepted amendment filed simultaneously with the petition; and removed application as amended from hearing docket (Docket 6706). The Commission further ordered that the petition of KVOM, Inc., to dismiss without prejudice its application for construction permit be granted. (B3-P-3517; Docket 6706)

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio—Adopted an order directing that a conditional authorization be issued to WGAR Broadcasting Co. for the operation of station WGAR on 1230 kc. with 50 KW power, unlimited time, and for the installation of a new transmitter and a new directional antenna for day and night use at the site specified in the instant application; and further ordered that such conditional authorization shall be subject to being withdrawn if at the conclusion of the consolidated hearing upon the applications of WADC and WGAR, it is shown that public interest will be better served by a grant of the Simmons application. (Action taken 2/1/46).

KHQ—Louis Wasmer (Transferor), Spokane Chronicle Co. (Transferee), Louis Wasmer, Inc. (Licensee), Spokane, Wash.—Granted consent to voluntary transfer of control of Louis Wasmer, Inc., licensee of station KHQ, from Louis Wasmer to Spokane Chronicle Co., for the consideration of $1,255,000 plus an amount equal to the net profits of the licensee from Jan. 1, 1945, to date of transfer. (B3-P-3973; Docket 6864, B3-P-3973)

WARM—Lou Poller (Transferor), Martin F. Memolo (Transferee), Union Broadcasting Co. (Licensee), Scranton, Pa.—Granted consent to voluntary transfer of control of Union Broadcasting Co., licensee of station WARM, from Lou Poller to Martin F. Memolo, for a consideration of $50,000 cash now on deposit in escrow, of which $25,000 was taken from funds on hand and balance obtained through 5% bank loan payable $2,000 monthly. (B2-TC-469)

ACTION ON MOTIONS

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Granted motion for leave to amend application (B2-P-4065) so as to change the orientation and phasing of the DA in daytime operation, and add supplemental engineering data.

San Bernardino Broadcasting Co., San Bernardino, Calif.—Granted motion to take deposition in re application (B5-P-3908), limiting to 25 the number of witnesses.

KFXM—Lee Bros. Broadcasting Co., San Bernardino, Calif.—Granted authority to take depositions in re application (B5-P-4005), limiting to 25 the number of witnesses.

United Broadcasting Co., Ogden, Utah—Granted motion for leave to amend application (B5-P-4107), so as to specify the frequency 1390 instead of 960 kc., and to make other changes concerning engineering exhibits. WQXR—Interstate Broadcasting Co., Inc., Long Island, City, N. Y.—Granted petition for leave to intervene in the consolidated proceeding scheduled for Feb. 4, in re application of WWRL, and others applying in 1600 kc.

WDNC—Durham Radio Corp., Durham, N. C.—Granted motion to take depositions in re its application. (B3-P-3107)

Mt. Vernon Radio & Tele. Co., Mt. Vernon, Ill.—Granted motion for leave to amend its application (B4-P-4265), so as to change Exhibit B relating to stock ownership, etc.

WLAP—American Broadcasting Corp., Lexington, Ky.—Granted motion for leave to take depositions in re its application (B2-P-1102)

WGOV—E. D. Rivers, Valdosta, Ga.—Granted motion for leave to amend his application (B5-P-3213) so as to specify a new DA system: power of 5 KW daytime; 1 KW night, instead of 1 KW day and night, and make other changes.

Nashville Broadcasting Co., Nashville, Tenn.—Granted request to dismiss application (B2-P-3190) without prejudice.

J. O. Emmerich, Bogalusa, La.—Granted petition to dismiss without prejudice application (B3-P-3805) for a new station.

The following action was taken by Commissioner Denny on February 1
Roger T. Peacock, Sr., trading as Daytona Beach Broadcasting Co., Daytona Beach, Fla.—Granted motion for leave to amend application (B3-P-4122) so as to add Rodger T. Peacock, Jr., to the partnership, and substitute said partnership of Rodrick T. Peacock, Sr., and Rodger T. Peacock, Jr., a partnership, trading as Daytona Beach Broadcasting Co., for Rodger T. Peacock, Sr., trading as Daytona Beach Broadcasting Co.; to add articles of partnership to the application, and to make other changes.

TELEVISION

The Commission en banc on February 1 set for hearing the following applications for television stations in metropolitan districts. In these cases, the number of applicants exceed the channels allocated under the Commission’s Report of November 21, 1945:

New York-Northeastern New Jersey

7 Channels—Metropolitan

American Broadcasting Co., Inc. (B1-PCT-79); Bamberger Broadcasting Service, Inc. (B1-PCT-15); Bremer Broadcasting Corp. (Newark) (B1-PCT-57); Del Mar Memorial Radio Fund, Inc. (B1-PCT-116); Palmer K. & Lois C. Leberman (B1-PCT-129); Marcus Loew Booking Agency (B1-PCT-165); Metropolitan Television, Inc. (B1-PCT-12); News Syndicate Co., Inc. (B1-PCT-88); Philco Radio & Television Corp. (B1-PCT-37); Raytheon Mfg. Co. (B1-PCT-157); Sherron Metallic Corp. (Huntington, N. Y.) (B1-PCT-149); Twenty-Fourth Century Fox-Film Corp. (B1-PCT-132); Westchester Broadcasting Corp. (White Plains, N. Y.) (B1-PCT-58); WLIB, Inc. (B1-PCT-114).

There are three licensed commercial television broadcast stations in New York City, namely, WNET (NBC), WCRW (CBS), and WABD (Allen B. DuMont Lab., Inc.)

Los Angeles—7 Channels—Metropolitan

American Broadcasting Co., Inc. (B1-PCT-81); Earl C. Anthony, Inc. (B5-MPCT-12); Walt Disney Productions (Burbank) (B5-PCT-156); Consolidated Broadcasting Corp., Ltd. (B5-PCT-79); Fox West Coast Theatres (B5-PCT-112); Hughes Productions, Division of Hughes Tool Co. (B5-PCT-17); Don Lee Broadcasting System (B5-MPCT-18); Metro-Goldwyn-Mayer Studios, Inc. (B5-PCT-106); National Broadcasting Co., Inc. (B5-PCT-24); Television Productions, Inc. (B5-PCT-100); The Times-Mirror Co. (B5-PCT-92); Warner Bros. Broadcasting Corp. (B5-PCT-66); Dorothy S. Thackrey (B5-PCT-165).

Philadelphia—4 Channels—Metropolitan

Bamberger Broadcasting Service, Inc. (B2-PCT-42); Wn. Penn Broadcasting Co. (B2-PCT-150); Pennsylvania Broadcasting Co. (B2-PCT-97); Philadelphia Daily News, Inc. (B2-PCT-119); The Philadelphia Inquirer, a Division of Triangle Publications, Inc. (B2-PCT-73); Seaboard Radio Broadcasting Corp. (B2-PCT-72); WCAU Broadcasting Co. (B2-PCT-13); WDAS Broadcasting Station, Inc. (B2-PCT-74); Westinghouse Radio Stations, Inc. (B2-PCT-34); WFIL Broadcasting Co. (B2-PCT-55).

There is one licensed commercial television station in Philadelphia, namely, WPTZ, Philco Radio & Television Corp.

Detroit—5 Channels—Metropolitan

The Evening News Assn. (B2-PCT-100); International Detrola Corp. (B2-PCT-44); The Jam Handy Organization, Inc. (B2-PCT-54); King Trendle Broadcasting Corp. (B2-PCT-45); United Detroit Theatres Corp. (B2-PCT-50); WJR, The Goodwill Station (B2-PCT-55).

San Francisco-Oakland—6 Channels—Metropolitan

American Broadcasting Co., Inc. (B5-PCT-158); The Associated Broadcasters, Inc. (B5-PCT-46); Don Lee Broadcasting System (B5-PCT-22); Hearst Publications, Inc. (B5-PCT-162); Hughes Productions, Division of Hughes Tool Co. (B5-PCT-18); Television Productions, Inc. (B5-PCT-151); Dorothy S. Thackrey (B5-PCT-164).

Pittsburgh—4 Channels—Metropolitan

Allegheny Broadcasting Corp. (B2-PCT-147); Allen B. DuMont Lab., Inc. (B2-PCT-139); Scripps-Howard Radio, Inc. (B2-PCT-123); WCAE, Inc. (B2-PCT-143); Westinghouse Radio Stations, Inc. (B2-PCT-55).

Cleveland—5 Channels—Metropolitan

Allen B. DuMont Lab., Inc. (B2-PCT-161); National Broadcasting Co., Inc. (B2-PCT-25); Scripps-Howard Radio, Inc. (B2-PCT-121); United Broadcasting Co. (B2-PCT-77); The WGAR Broadcasting Co. (B2-PCT-59); WJW, Inc. (B2-PCT-146).

Baltimore—3 Channels—Metropolitan

Hearst Radio, Inc. (B1-PCT-88); Maryland Broadcasting Co. (B1-PCT-109); The Tower Realty Co. (B1-PCT-39); Jos. M. Zamoiski Co. (B1-PCT-61).

Providencia—1 Channel—Metropolitan

The Outlet Co. (B1-PCT-87); The Yankee Network, Inc. (B1-PCT-101).

Harrissburg—1 Channel—Metropolitan

Lancaster—1 Channel—Community

Lancaster Television Corp. (B2-PCT-145); WGAL, Inc. (B2-PCT-138).

Federal Communications Commission Applications

APPLICATIONS ACCEPTED FOR FILING

500 Kilocycles

NEW—Capital City Broadcasting Corp., Baton Rouge, La. (P. O. 1589 North Street, Baton Rouge, La.)—Construction permit for a new standard broadcast station to be operated on 550 kc., power of 1 kW, directional antenna night and unlimited hours of operation.

600 Kilocycles

KFSD—Airfan Radio Corporation, Ltd., San Diego, Calif.—License to cover construction permit (B5-P-3577) which authorized installation of a new transmitter.

630 Kilocycles

950 Kilocycles

WLOF—Hazelwood, Inc., Orlando, Fla.—Construction permit to change frequency from 1230 to 950 kc., increase power from 250 watts to 5 kW, install new transmitter and directional antenna and change transmitter location from near Orlando, Fla., to near Orlavista, Fla. Amended to change type of transmitter and to provide the use of directional antenna for day and night operation.

1010 Kilocycles

WIN—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3026, as modified, which authorized increase in power, installation of new... (Continued on next page)
transmitter and changes in directional antenna for day and night use) for extension of completion date from 2-28-46 to 5-23-46.

1230 Kilocycles

KWTX—Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Hovey, Wilford W. Nama, Robert E. Levy, Ross M. Sams & Davis. Stribling, Waco, Texas—Modification of construction permit (B-3-P-3176, which authorized a new standard broadcast station) for approval of antenna and transmitter location, specify studio location and to correct name of Robert G. Levy to read Robert E. Levy.

NEW—Illmo Broadcasting Corp, Quincy, Ill. (P. O. 1000 Monroe St.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Construction permit to move the present licensed main transmitter from corner Post Road & Chester Avenue, White Plains, New York, to Secor Road, 2.8 miles west of White Plains, Town of Greenburgh, New York, to be used as an auxiliary, with power of 250 watts.

NEW—Tidewater Broadcasting Corp., Norfolk, Va. (P. O. Johnson Abbitt Bldg., 317 Bank St.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 100 watts and unlimited hours of operation.

1280 Kilocycles

WMRO—Martin R. O'Brien, Aurora, Ill.—Voluntary assignment of license to WMRO, Inc.

1340 Kilocycles

WMFF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Construction permit to install new transmitter.

WBRK—Monroe B. England, Pittsfield, Mass.—Voluntary assignment of license to Western Massachusetts Broadcasting Company.

1390 Kilocycles

KNOE—James A. Noe, Monroe, La.—Modification of construction permit (B-3-P-1206, which authorized change in frequency) for change in frequency from 1230 to 1390 kc., increase power from 250 watts to 5 KW and installation of new transmitter and directional antenna for night use.

1400 Kilocycles

KGVL—Truett Kinzey, Greenville, Texas—Modification of construction permit (B-3-P-3543, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

KHON—Aloha Broadcasting Co., Ltd., Honolulu, T. H.—Modification of construction permit (B-3-P-3736, which authorized a new standard broadcast station) for changes in transmitting equipment, approval of antenna and approval of transmitter and studio locations.

1410 Kilocycles

KWYO—Big Horn Broadcasting Co., Inc., Sheridan, Wyo.—Construction permit to change frequency from 1400 kc to 1410 kc., increase power from 250 watts day and night to 1 KW day and 50 watts night, install new transmitter and make changes in vertical antenna.

1490 Kilocycles

WKAY—Glasgow Broadcasting Co., Glasgow, Ky.—Modification of construction permit (B-2-P-4008, which authorized a new standard broadcast station) to make changes in transmitting equipment, for approval of antenna and transmitter and studio locations.

WMGB—S. Marvin Griffin, Bainbridge, Ga.—Modification of construction permit (B-3-P-3863, which authorized a new standard broadcast station) for changes in transmitting equipment, approval of transmitter location and change studio location and approval of antenna.

NEW—Joseph Triner, Charles M. Hickman, George Herrmann, Jr., Edward J. Fultysvek and William L. Klein, d/b as Village Broadcasting Co., Oak Park, Ill.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 1 KW and unlimited hours of operation. Amended to change name of applicant from William L. Klein to Joseph Triner, Charles M. Hickman, George Herrmann, Jr., Edward J. Fultysvek and William L. Klein, d/b as Village Broadcasting Co.

1590 Kilocycles

KVGB—KVGB, Inc., Great Bend, Kansas—Construction permit to change frequency from 1400 kc to 1590 kc., increase power from 250 watts to 1 KW and install new transmitter.

NEW—Ojai Broadcasting Co., Ventura, Calif. (P. O. 1109 Rowan Bldg., 458 S. Spring St., Los Angeles, Calif.—Construction permit for a new standard broadcast station to be operated on 1590 kc, power of 1 KW and unlimited hours of operation. (Call “KFVO” reserved.)

Applications Tendered for Filing

WEST—Associated Broadcasters, Inc., Easton, Pa.—Construction permit to change frequency from 1400 kc to 1539 kc.

NEW—E. L. Roberts, Galatian, Ill.—Modification of construction permit for a new standard broadcast station to be operated on 1350 kc., power of 1 KW, directional antenna and unlimited hours of operation.

NEW—Voice of Dixie, Inc., Birmingham, Ala.—Construction permit for a new standard broadcast station to be operated on 690 kc., power of 10 KW, directional antenna night and unlimited hours of operation.

NEW—Kentucky Lake Broadcasting System, Inc., Paris, Tenn.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

KGOO—Mandan Radio Association, Mandan, N. D.—Construction permit to increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use.

NEW—Sierra Broadcasting Service, a partnership consisting of Leonard R. Trainer and Reginald H. Shirk, Hot Springs, N. Mex.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

KNAR—Granite District Radio Broadcasting Company, Salt Lake City, Utah.—Construction permit to change frequency from 1100 to 1280 kc., increase power from 250 watts to 500 watts and make changes in transmitting equipment.

NEW—Rogue Valley Broadcasting Co., Inc., Ashland, Ore.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—J. Paul Stone and R. M. Ware, Jr., Fitzgerald, Ga.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—A. J. Fletcher, Greensboro, N. C.—Construction permit for a new standard broadcast station to be operated on 850 kc., power of 1 KW and daytime hours of operation.

NEW—George Dyson, Jr., d/b as The Alton Broadcasting Co., Alton, Ill.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power of 1 KW and daytime hours of operation.

(Continued on next page)
NEW—Northern States Broadcasting Co., Fargo, N. D.—Construction permit for new standard broadcast station to be operated on 1430 kc., power of 500 watts, directional antenna and unlimited hours of operation.

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Construction permit to change frequency from 1340 to 940 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use.

W2XDK—Sherron Metallic Corp., Brooklyn, N. Y.—Modification of construction permit (Bl-PVB-142) which authorized a new experimental television broadcast station for extension of completion date from 1-22-46 to 7-1-46.

WBGO—The Board of Education of Newark in the County of Essex, Newark, N. J.—Modification of construction permit (B1-PED-50) which authorized a new noncommercial educational broadcast station for change in antenna location, (contingent upon grant of WHK application for 610 kc.)

WHK—United Broadcasting Company, Cleveland, Ohio—Construction permit to change frequency from 1290 to 610 kc., increase power from 5 KW to 50 KW, install new transmitter, install directional antenna for day and night use and change transmitter location. (Continued on next page)
construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage of 12,419 square miles. Amended to change frequency to be determined by FCC and coverage of 4,650 square miles. Amended to change antenna system.

NEW—Monroe B. England, Pittsfield, Mass.—Voluntary assignment of conditional grant of construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined by FCC.

NEW—WINX Broadcasting Co., Washington, D. C. (P. O. Elkins & Eye Blk., N. W.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #262, 100.3 mc. and coverage of 12,419 square miles.

NEW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Construction permit for a new FM broadcast station to be operated on frequency to be determined by FCC and coverage of 4,650 square miles. Amended to change antenna system.

designated “Ever-Charge,” for use in storage batteries, has been issued against Irving A. Grubman, trading as Ever-Charge Products, 2806 West Ninth Street, Los Angeles.

(5419)

CEASE AND DESIST ORDERS

The Commission issued no cease and desist orders last week.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Henry Berg, Bessie Berg, Robert Berg and Harold Berg, members of a copartnership trading as Berg Sales Co., 119 South Wells Street, Chicago, stipulated that in connection with the sale of leather billfolds they will cease and desist from selling or otherwise disposing of their merchandise by means of a game of chance, gift enterprise or lottery scheme. (4143)

Burns Cuboid Co., Inc., 414 East Fourth Street, Santa Ana, Calif., has entered into a stipulation to discontinue misrepresenting the therapeutic properties of a device designated “Cuboids,” advertised as capable of mitigating or curing disabilities of the feet. (4142)

Homasote Co., Inc., West Trenton, N. J., stipulated that it will cease and desist from certain misrepresentations in connection with the sale of Homasote Board, designed for use in the construction of prefabricated houses. (4144)

Raymor Food Products Co., 179 North Michigan Avenue, Chicago, stipulated that they will cease and desist from misrepresenting the therapeutic properties of their Raymor drug preparations. (4141)

FTC CASE CLOSED

The Federal Trade Commission has closed without prejudice the case growing out of its complaint which charged Identification Plate and Machine Co., Inc., and its officers, John B. Pollard and Robert C. Fairberg, with misrepresentation in connection with the sale of name plates and stamping machines.

The case was closed because the charter of the corporate respondent has been dissolved and the whereabouts of the individual respondents are unknown.

When the complaint was issued the respondents had their place of business at 133 West 25th Street, New York.
PORTER SUCCEEDS BOWLES AS OPA HEAD
DENNY ACTING FCC CHAIRMAN

In a sweeping administrative shake-up, Paul Porter was taken from his post as Chairman of the FCC last night by President Truman and appointed chief of the OPA to succeed Chester Bowles, who has been named chief of the Office of Economic Stabilization.

Charles R. Denny, Jr., was made acting chairman of the FCC.

DISPUTE OVER FCC HOLDS UP APPROVAL ON APPROPRIATIONS BILL

A last minute dispute over funds for the Federal Communications Commission upset Senate plans for action Wed. (13) for the annual appropriation for this and other independent agencies. Senator McKellar said previous plans for action on the $5,000,000,000 appropriation would be delayed until the committee considered reducing the FCC funds. Chairman Paul A. Porter was called before an unusual closed session of the McKellar Funds Subcommittee.

"Senator Stewart thought we are getting too much money," Porter remarked. "I guess I'll have to come back." The subcommittee session was unusual because previously the Senate Appropriations Committee had approved House action of voting FCC $5,560,000, a reduction of $501,000 below the President's budget recommendations, without hearing the FCC representatives. The bill went to the Senate with complete report and printed hearings before the subcommittee was recalled. Senators who attended the closed subcommittee session said Chairman McKellar questioned in detail various activities of FCC, including continuation of monitoring of many radio transmissions now the hostilities have ended.

"This Agency asked for nearly a million dollars more than it got last year during the war," McKellar stated. "We're going to have to look into that before we act on the bill."

INTERNATIONAL

CUBA MAKES DEMANDS AT NARBA CONFERENCE

As NAB Reports goes to press word comes that the Cuban delegation at the Second North American Regional Broadcasting Conference have submitted a proposal which calls for a breakdown of eight clear channels and eight regionals on which they request added power.

The outcome of these demands, and further progress on the Conference, will be given in next week's Reports.

MUSIC

NAB-AFM COMMITTEES TO MEET APRIL 8

An exchange of letters between James C. Petrillo, president of the American Federation of Musicians, and President Justin Miller has resulted in a meeting being scheduled for April 8th of representatives of the two organizations. The text of Mr. Petrillo’s letter, and President Miller’s reply follows:

AMERICAN FEDERATION OF MUSICIANS
of the United States and Canada
Office of the President
570 Lexington Avenue, New York 22, N. Y.
February 6th, 1946.

Mr. Justin Miller, President
National Association of Broadcasters
1760 N Street, Northwest
Washington, D. C.

Dear Mr. Miller:

Since our meeting in Chicago I have been endeavoring to make arrangements for the International Executive Board of the American Federation of Musicians to meet with the Music Committee of the National Association of Broadcasters, and other groups wishing to transact business with our Executive Board.

Plans are now being made to hold this meeting in our headquarters at 570 Lexington Avenue, New York City, beginning April 8th, 1946. I have scheduled the Music Committee of the National Association of Broadcasters for Monday, April 8th, at 2:00 p. m., with no other appointments for the remainder of this session.

While other matters of business are scheduled for Tuesday, April 9th, making it impossible to meet with your group that day, we can, no doubt, arrange for additional time at some later period in the week, if necessary.

Our committee will consist of approximately fourteen, including all of the officers of the Federation, the Executive Board and my assistants.

Will you please confirm this appointment at your convenience?

With kindest personal regards, I am
Sincerely yours,
/s/ JAMES C. PETRILLO,
President.

LEA BILL BEFORE HOUSE FEBRUARY 22

The Lea Bill (H. R. 5117) will reach the floor of the House for consideration on next Friday (22). This announcement was made shortly after Rep. Cox (D., Ga.) from the Committee on Rules reported a resolution (H. Res. 524, [Report No. 1567]) on the bill which was referred to the House Calendar. Full text of the resolution is given below.

Committee minority views on the bill were submitted earlier by Rep. Vito Marcantonio (Am. Labor Party, N. Y.) member of the Committee on Interstate and Foreign Commerce of which Mr. Lea, author of the bill, is chairman. This minority report also is printed below. The majority report of the Committee on Interstate and Foreign Commerce was published in NAB Reports on Feb. 4 (p. 71).

Resolution (Committee on Rules)

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 5117) to amend title V of the Communications Act of 1934 so as to prohibit certain coercive practices affecting radio broadcasting, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill and continue not to exceed two hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the bill in such form with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto, final passage without intervening motion except one motion to recommit. After the passage of the bill (H. R. 5117) the Committee on Interstate and Foreign Commerce shall be discharged from the further consideration of the bill (S. 63), and it shall then be in order to move to strike out all after the enacting clause of said Senate bill and insert in lieu thereof the provisions contained in H. R. 5117.

Minority Views (Interstate and Foreign Commerce Committee)

"This bill, like so many other antilabor bills being introduced today, while purporting to be directed at certain activities and practices, in fact goes far beyond such activities and practices and penalizes the legitimate methods and objectives of labor. This minority report also is printed below. The majority report of the Committee on Interstate and Foreign Commerce was published in NAB Reports on Feb. 4 (p. 71).

NATIONAL ASSOCIATION OF BROADCASTERS

1760 N Street, Northwest
Washington, D. C.

February 14, 1946.

Mr. James C. Petrillo
President, American Federation of Musicians
570 Lexington Avenue
New York, New York

DEAR MR. PETRILLO:

Your letter of February 6th awaited me upon my return from a series of NAB District meetings. I am happy to accept your invitation and will meet with you in New York City on April 8th, at 2:30 p.m.

In addition to the members of our Special Committee, I shall bring with me one or two members of my staff. We shall also be available for an adjourned meeting with you on April 10th, if it seems desirable.

Our Committee is widely representative of the broadcasting industry, including as it does, representatives of the major networks and their affiliated stations, the casting industry, including as it does, representatives of the station owner, and therefore might lead him to make a move to strike out all after the enacting clause of said Senate bill and insert in lieu thereof the provisions contained in H. R. 5117.

Minority Views (Interstate and Foreign Commerce Committee)

"This bill, like so many other antilabor bills being introduced today, while purporting to be directed at certain activities and practices, in fact goes far beyond such activities and practices and penalizes the legitimate methods and objectives of labor. This minority report also is printed below. The majority report of the Committee on Interstate and Foreign Commerce was published in NAB Reports on Feb. 4 (p. 71).

NATIONAL ASSOCIATION OF BROADCASTERS

1760 N Street, Northwest
Washington, D. C.

February 14, 1946.

Mr. James C. Petrillo
President, American Federation of Musicians
570 Lexington Avenue
New York, New York

DEAR MR. PETRILLO:

Your letter of February 6th awaited me upon my return from a series of NAB District meetings. I am happy to accept your invitation and will meet with you in New York City on April 8th, at 2:30 p.m.

In addition to the members of our Special Committee, I shall bring with me one or two members of my staff. We shall also be available for an adjourned meeting with you on April 10th, if it seems desirable.

Our Committee is widely representative of the broadcasting industry, including as it does, representatives of the major networks and their affiliated stations, the casting industry, including as it does, representatives of the station owner, and therefore might lead him to make a different decision. So sweeping a provision is a clear indication of the desirability or wisdom of Mr. Petrillo’s contention as an anti-Petrillo bill. Whatever views one may hold as to the desirability or wisdom of Mr. Petrillo’s contention, the bill as introduced today, while purporting to be directed at certain activities and practices, in fact goes far beyond such activities and practices.

Minority Views (Interstate and Foreign Commerce Committee)

"This bill, like so many other antilabor bills being introduced today, while purporting to be directed at certain activities and practices, in fact goes far beyond such activities and practices and penalizes the legitimate methods and objectives of labor. This minority report also is printed below. The majority report of the Committee on Interstate and Foreign Commerce was published in NAB Reports on Feb. 4 (p. 71).
fringement of the constitutional rights of speech and press and a substantial impairment of the freedom of action of individuals, which we have come to cherish as bulwarks of democracy.

"Nor are the objectives prohibited by this act immoral or of such a motive as to be characterized as criminal, or to merit punishment of a $1,000 fine or imprisonment up to a year. For example, the bill would make it unlawful to seek by any means to compel the station owner to hire more employees than are 'wanted' by the station owner. Thus, if the owner insists on piling great burdens of work on one or a small number of its technical or maintenance or other category of employees, the employees involved would be prohibited from seeking to induce the owner to lighten their burden of work by increasing the size of their crew. Where it is the contention of any group of employees that health and safety conditions are such as to require additional employees, they could be forbidden to press the issue with the employer radio station. This result is an outrageous restriction on the inalienable rights of radio employees. Further, can it be said that when, in these times, men band together to protect the employment and spread of employment in their profession or trade, that such conduct is criminal? Can a request of a performer who makes a recording that he be paid by a broadcaster (who can well afford to pay) for the use of that recording be characterized as immoral? Can this Congress condemn these practices, as does the majority report, 'as akin to that of larceny, embezzlement, the acquisition of another's property by false pretenses, racketeering, and extortion'? These are clearly legitimate objectives and aspirations. It would be more fitting for Congress in this period to provide for and protect workingmen in their efforts to secure full employment, higher wages, and improved working conditions rather than to condemn as criminal, as does this bill, their efforts at self-help to achieve these objectives.

"We may differ widely as to the wisdom and desirability of these objectives. But to condemn as criminal the peace-ful organization and campaign to achieve these objectives by publicity or other means is to strike at the very heart and purpose of trade-union activity.

"To oppose this bill is not to support the activities of Mr. Petrillo. It is to recognize the rights of men under our society to organize peacefully to protect their economic interests. It is to refuse to reverse the entire legislative trend for the past 30 years, beginning with the Clayton Act, to protect the peaceful organization of labor, and the efforts of labor, by combination and organization, to promote the welfare of workingmen. (See U. S. v. Hutcheson, 312 U. S. 219; U. S. v. Am. Fed. of Musicians, 318 U. S. 741, affirming per curiam 47 F. Supp. 304.)

"We are not fulfilling our obligations as the responsible legislative body of these United States if we permit ourselves to lose sight of this basic concept. If we permit ourselves to be stamped by the outcry against one individual into overriding the basic rights of the working people of this Nation, we will have betrayed the trust and confidence which has been placed in us by the American people."

Vito Marcantonio."

NLRB RULES OUT BLANKET AFRA CONTRACTS FOR SMALL STATIONS

A clarification of the proper representation of small station employees in bargaining units was brought out in the recent decision of the National Labor Relations Board on the petition filed by the American Federation of Radio Artists in connection with its bargaining with the Badger Broadcasting Co. (WIBA), Madison, Wis.

The union sought to include in its activities all station personnel, excepting two janitors, not covered by the station's agreements with the International Brotherhood of Electrical Workers and the American Federation of Musicians. Thus, they claimed exclusive bargaining representation for all full-time and part-time announcers, salesmen and office workers, excluding only technicians, musicians and supervisors.

Arguing that salesmen and office employees have duties and interests unrelated to those of announcers, and pointing to the fact that heretofore AFRA had confined its organizational activities in the broadcasting industry to actors, singers and announcers, WIBA officials opposed the inclusion of the other employees in the same unit with announcers.

The Board ruled that "all full-time and part-time announcers and commentators . . . including those employees who, in addition to other functions, do regular or part-time work before the microphone as announcers or commentators, but excluding salesmen, office employees, and all supervisory employees . . . constitute a unit appropriate for the purposes of collective bargaining. . . ." Two exceptions were made in the exemptions in the cases of a salesman and an office employee who also prepare and present daily 15-minute programs. By mutual agreement of AFRA and WIBA officials, George R. Stephenson, a part-time commentator, who is an officer and director of the Capital Times newspaper, which owns the station, was excluded from the ruling covering part-time commentators. It was agreed that his interests are identified with management.

Continuity writers were considered as being in the general classification of office employees and exempted from the group.

Commenting on AFRA's claim that, because of the station's small size, all three groups of employees in its proposed unit do diversified and integrated work closely re-

FEBRUARY 18, 1946 — 119
The Board stated: "While the record indicates, as asserted by the Union, that the three groups . . . perform, for the most part, diversified functions which result in more closely integrated work than would probably be found in a larger radio station with more employees and a clearer segregation of work, we do not consider such integration controlling. The desire of the Union to include the salesmen and the office employees in the same unit with announcers clearly does not conform to the well-established bargaining pattern with respect to radio station employees."

The official citation of the case is: Matter of Badger Broadcasting Co. (WIBA Radio Station) and American Federation of Radio Artists, A. F. of L., and Broadcasting Co. (WIBA Radio Station) 3146, 64 N.L.R.B., No. 237.

Complete text of the ruling will be sent to you on request. Please address such requests to NAB Employee-Employer Relations Dept.

Programming

ENTIRE INDUSTRY INCLUDED IN PLANS FOR COVERAGE OF ATOM BOMB TEST

Planning for radio coverage of the atomic bomb experiments in the Pacific got under way at a conference of newsmen and Army and Navy officials Monday, Feb. 11. The industry was represented by Paul White, CBS; William Brooks, NBC; Thomas Velotta, ABC; Tom Slater, MBS; Leon Goldstein, Associated-WMCA; Ted Cott, WNEW; Fox Case, WTOP-CBS, and J. Allen Brown of NAB representing the non-network stations desiring coverage of this history-making event.

Those attending the conference were requested to form committees to choose the representatives for their respective media. Selected by the broadcasters to head their group, Fox Case of WTOP, Washington, will coordinate all requests for radio representation and present them to the Army and Navy.

Due to the extended communications lines necessary, the number of correspondents permitted to be on the scene will be limited to a total of 140 men from all the various media. It will take from 12 to 14 days by boat to transport the representatives and their equipment to the spot in the Pacific where the tests will be made.

Safety will be the paramount consideration governing the methods of coverage to be worked out. Observers probably will be stationed on land, in high-flying planes and on ships anchored at a safe distance from the scene of bombing. Security will be covered by a briefing of correspondents before the tests.

Further developments will be given in NAB REPORTS.

AD COUNCIL ALLOCATIONS—FEB. 25-MARCH 3

The Advertising Council has announced the allocations for the period Feb. 25—Mar. 3. Fact sheets have been mailed to all broadcasters.

1946 Red Cross Fund Drive (Ad Council Fact Sheet No. 14)

To the people of the United States from General Dwight D. Eisenhower, Chief of Staff, United States Army: "During my years with our troops in Great Britain, North Africa and on the European Continent, I developed a warm admiration for the friendly, understanding and highly efficient services performed by the American Red Cross. The people of these countries have asked us to bring no conclusion to the necessary function of that organization with the Army. The work must continue as long as our troops are stationed in foreign lands. Our troops overseas need the vital mission of securing the peace. The Red Cross activities in any country must be a part of the program of clubs, recreation centers and welfare must go on through the period of occupation according to changing needs. Normal amenities of life are so lacking in the occupied zones that the American soldier has in most cases, only what we send him. In this country, services have increased to our men still in hospitals. The needs of veterans and their families have broadened with the return of soldiers to civilian life. A particularly valuable service rendered by the Red Cross is the discovery of cases of unusual hardship among families of men still in uniform, and sending to the War Department reports upon which discharge may be accomplished. For this service I am particularly grateful. I express the earnest hope of the Army that the American public will continue its generous support of the Red Cross during 1946.”

The foregoing message from General Eisenhower graphically outlines the continuing responsibilities of the Red Cross to the men who made peace possible. To them must be added the victims of unforeseeable floods, fires, tornadoes and other disasters right here at home whom the Red Cross must stand ready to provide with emergency food, clothing and shelter as it has so faithfully done in the past. During the month of March the American people will be asked to contribute $100,000,000 needed by the American Red Cross to carry out this vast program of service to our occupying forces, hospitalized servicemen, veterans and civilians in need. While the sum is only half that required last year, the urgency of what no longer exists as a compelling campaign factor. This year’s campaign, therefore, is going to require the same imaginative, hard-hitting promotion that radio gave to eight successful War Loans and war-time Red Cross campaigns.

Ex eo design to contribute by the Red Cross the services performed by the American people through their own organization—the American Red Cross, which has no other means of support than the voluntary contributions of the public.

Building Our New Army (Ad Council Fact Sheet No. 2)

Congress has authorized a peace-time American Army larger and better trained than ever before in history. This Army, vitally necessary for reasons which will be presently explained, is now being recruited by voluntary enlistment. But the Army’s present recruiting drive for over one million men by July first 1946 may fail unless public attitudes can be changed and changed quickly. The Army itself is conducting a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent backdrop campaign, performed by the Army's own resources are inadequate, to build prestige for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and their friends. Very bluntly, the objective of this campaign is to change the old attitude of Americans toward their Army. By explaining the purpose and character of the new Regular Army being formed since victory in World War II, and by paying tribute to the young men now joining it to guard world peace, the program can help the Army's drive achieve the goal it seeks. Except in war time Americans have always had a poor opinion of peace time soldiers.

(Continued on next page)
Many people thought that men joined the Army because they couldn't get jobs anywhere else—because they didn't like to think for themselves—because they were incompetent. These are just a few of the old notions which circulated easily in the years before blitzkrieg. Actually, the new American Army of today is a compact, carefully chosen group of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the task before them is the maintenance of that peace for which thousands of other young Americans have already died. Point out that they are guardians of peace—Congress has authorized our new large and expertly trained Army in order to enforce the peace and fulfill our obligations as a member of the United Nations Organization. Point out that the new Regular Army soldier is a skilled technician—he works with advanced techniques and equipment in at least one of many specialized fields, and his competence equals and often exceeds the skill demanded in some of the best paid civilian trades. Illustrate the kind of work they do as guardians of peace and architect of our country's safety.

Help Keep Our Economy Stable (Ad Council Fact Sheet No. 3)

In his recent report on the first 100 days of reversion, President Truman concluded: "Inflationary pressures are still great, and danger signals point to a further building up through the winter and spring are the rise of real estate, wholesale and raw materials prices. We must continue to hold the line. We cannot permit inflation." The greatest inflationary pressures we face today are those stemming from the unprecedented demand for and the short supply of (1) housing, (2) clothing and (3) durable goods. Although rent control regulations still exist in most areas the demand for housing is so great that people are tempted to ignore rent ceilings in their eagerness to provide shelter for themselves and their families. During the next few months the clothing supply will be the tightest since before the war, a situation that is being further complicated by thousands of newly discharged veterans who are unable to find even a minimum of civilian clothing in the stores. The durable goods picture is a trifle brighter—more refrigerators, automobiles, washing machines, vacuum cleaners, radios, etc., are on the way. Here again, however, demand and purchasing power still exceed the supply and an inflationary black market is the potential result unless people curb their desires to want the first of everything that appears on the market at any price. Urge listeners to spend sensibly and to cooperate with all price and rent control regulations.

5th ANNUAL NBC-NORTHWESTERN U RADIO INSTITUTE OPENS JUNE 24

Eleven courses in advanced radio instruction will be given at the six-week session of the fifth annual NBC-Northwestern University Summer Radio Institute opening June 24, according to an announcement by Miss Judith Waller, public service director of the NBC Central Division and co-director of the institute.

In addition to the 11 courses, all of which carry full university credit, six special evening lectures will be presented by the institute this year. Only certain qualified groups of persons desiring further training in the radio industry will be accepted for enrollment this year.

Tuition fee will again be $100 for the entire course. Classes will be held at the NBC Merchandise Mart studios in Chicago, while evening lectures are to be held at the Northwestern campus at Evanston, Ill.

Inquiries and requests for application blanks should be directed to Armand Hunter, Summer Radio Institute, School of Speech, Northwestern University, Evanston, Ill.

TEACHERS AND NEWS DIRECTORS PRAISE INTERNSHIPS—FULL REPORT MAILED TO MEMBERS

Opinions of news directors and teachers on last summer's radio news internships has been documented in a brochure titled "Report on Radio News Internships," which NAB is distributing this week to all stations.

On the basis of documented statements of all concerned, the first planned cooperation between broadcasters and college teachers of journalism was an unqualified success. This cooperation took the form of radio news internships at radio stations during the summer of 1945. At these internships radio news directors were the "professors" who taught the journalism teachers.

This long range program to improve radio news was executed by the Council on Radio Journalism which was created by joint action of the National Association of Broadcasters and the American Association of Schools and Departments of Journalism. Financing of the internship program was provided by the individual station management in their desire to contribute to the public interest through industry improvement.

Applications for 1946 internships are now being solicited from faculty members of journalism schools.

High Lights from the Report

Fred M. Parris, Kansas State College: "The radio industry is entering a new era. The American public has been educated to the habit of getting news speedily and by ear. . . . To keep astride of this gain, radio newsrooms are going to demand more and even better work from its personnel.

"That's where we journalism instructors come in. That's where the internships offered by member stations of the National Association of Broadcasters will prove to be a great advantage both to the instructor and his school, and the radio industry itself." Mr. Parris interned at WFAA, Dallas, under News Editor Hugo Speck.

Willis C. Tucker, University of Kentucky: "If the average internship is like that at WGAR, Cleveland, it is much more valuable than a similar period spent at a regular job in a radio newsroom. The internship method gives a comprehensive view of radio news and its relationship to radio in general. It affords a perspective which might be long denied to a man whose energies are concentrated upon a single job in radio. . . . One who goes through such a course is inevitably discards some of his earlier opinions about radio news because he is unable to verify them. He also finds that some of his convictions have been deepened by firsthand evidence." Teacher at WGAR was News Editor Ralph Worden.

Everett W. Withers, Washington and Lee University: "A radio internship is invaluable to anyone who teaches radio journalism, and I believe the newspaper editor would benefit by serving one too. . . . I believe the radio internship plan one that promises to assist the school in graduating students who can before long do a yeoman-like job of editing, and who will also be better reporters." Mr. Withers interned at WTIC, Hartford, under News Editor Tom Eaton.

Elmer F. Beth, University of Kansas: "Radio people are planning with confidence and with determination to keep in step with the times. Schools of journalism have a new job ahead—to give young people practical training in radio. The intelligent and wholehearted cooperation of the broadcasters, made manifest in the internship program, is going to help get that new job done right." Mr. (Continued on next page)
Beth interned at KMBC, Kansas City, under News Director Erle Smith.

Archie R. Harney, University of Idaho: In his documentation Mr. Harney said of his teacher, Ted Meyers, KFI, Los Angeles: “He is a college course in himself.” This just about expresses what all of the professional teachers thought of their individual instructors.

Robert L. Mossholder, University of Omaha: “College teachers of journalism will find it difficult to do an adequate job of instructing their students in writing radio news unless they themselves have had an opportunity of securing first hand experience under the guidance of men who have demonstrated their ability as writers of radio copy. That is why I should like to see the NAB internship project made an annual summer program.” Mr. Mossholder interned at WOW, Omaha, under Director of News Soren Munkhof.

Leonard L. Jermain, University of Oregon: “I feel that we now (after internship) can offer a really substantial and worthwhile course to prepare journalism students for journalism work in the field of radio. . . . It is obvious though that the subject should not be taught without applied experience. By the same token it is obvious that the willingness and cooperation of the radio station in furthering such a project is necessary and indispensable. In this respect, then, KOIN (Portland) has done a real service, for it requires some effort on the part of busy personnel to instruct outsiders.” News Editor Lester Halpin was “professor.”

Frank E. Schooley, University of Illinois: “As one of the first interns, I voice wholehearted approval of the idea and the practice. To others teaching radio journalism, I commend the internships.” Mr. Schooley interned at WSYR, Syracuse, under Vice President and News Director E. R. Vadeboncoeur.

Olaf J. Bue, Montana State University: “. . . In these and other endless discussions there was recurrent affirmation of the conviction that news must be entrusted only to professional news personnel. On the one hand it would seem socially criminal to place the great instrument of radio in clumsy or unwitting hands. Conversely, it would seem the height of folly to entrust maintenance of valued news audiences to any but the best available talent. We concluded that the news audiences in the future are going to those stations which do the best job of gathering, selecting, writing and rewriting the news of their own respective areas. . . . And now with the super-drama of war passed, it becomes even more certain that few are going to listen to shoddy reading of copy torn indiscriminately out of a teletype . . . the end result (of radio news internships) is bound to be graduates more readily competent to prepare a good news program, more surely capable of contributing an imaginative share to the industry’s advancement.” Mr. Bue interned at KVOO, Tulsa, under News Editor Ken Miller.

NEWS DEPT. ET LECTURES HELP STUDENTS

Transcribed lectures by members of station radio news departments for the benefit of journalism students are becoming a teaching tool in schools and departments of journalism.

C. W. Myers, president, KOIN, Portland, Ore., has just authorized the preparation of such transcriptions, with the lecture series being prepared by members of KOIN news staff. KOIN’s Jim Wyatt reports that Dean George Turnbull of the University of Oregon School of Journalism, a 1945 radio news interne, at KOIN, is most enthusiastic about the arrangements. This school is located 150 miles from Portland, which eliminates the possibility of frequent lectures delivered in person.

KVOO’S ET for Montana State

The Montana State University made good use of the 45-minute transcription of a round table news clinic made in KVOO studios, Tulsa, last summer. Olaf J. Bue, Montana State University’s radio news interne at the station was moderator. The entire KVOO staff participated. Upon leading questions from the moderator newsmen were thus able to record their viewpoint for the benefit of college journalism students. Professor Bue has since reported that the innovation was remarkably successful.

ENGINEERING

BUREAU OF STANDARDS SETS MICROWAVE FREQUENCY YARDSTICK

The National Bureau of Standards has established radio frequency standards covering the microwave range up to 33,000 megacycles per second bringing a degree of order out of the mushroom-like wartime developments that are revolutionizing the whole field of radio, according to the Department of Commerce.

This frequency range is approximately 30,000 times higher than the present broadcast band.

Frequency standards have been set up covering the microwave range continuously with an accuracy of one part in ten million. This sounds like high precision but even it appears somewhat crude when compared with fixed standards made available throughout what are known as the ultra high frequency and super high frequency bands with an accuracy better than one part in a hundred million. These fixed frequencies cover the two bands at intervals of approximately one per cent. By coincidence this is the normal separation between stations operating in the conventional broadcast band.

An enormous number of new channels have been opened up by means of the microwaves. The high degree of precision in frequency standards mentioned above is necessary in order to make available the largest possible number of usable channels and reduce interference to a minimum.

The length range of microwaves has not been specifically defined. Generally speaking, microwaves extend from 10 centimeters—4 inches—down. Currently experts of the Radio Section of the Bureau of Standards are approaching the millimeter region. A millimeter is about a twenty-fifth of an inch in length.

This frequency standards project was undertaken in April 1944 at the request of the Joint Communications Board with funds supplied by the Army and Navy. Technical assistance and equipment were given by the Radiation Laboratory of the Massachusetts Institute of Technology, set up by the National Defense Research Committee, now the Office of Scientific Research and Development. The Radiation Laboratory had established a system of frequency standards. The Bureau of Standards was also assisted by a technical group appointed by the Army and Navy which rendered effective liaison service.

The work of other organizations, including the Naval Research Laboratory, Bell Telephone Laboratories, Radio Corporation of America, Sperry Gyroscope Co., General Electric Co., and Western Electric Co., was carefully reviewed and studied and a reference library of reports from these and other sources was established.

(Continued on next page)
Frequency standards promise to be of constructive benefit to the country as a whole. They not only help the Army and Navy, Federal Communications Commission, Civil Aeronautics Administration and other Government agencies but are of vital importance to the expansion of industry into the microwave part of the radio spectrum, to television, to future radar development, to research and to global aviation. In the more distant future they are expected to be important in the development of long range rockets and other long range missiles and in opening up still higher frequencies in the spectrum.

Many important industrial companies have indicated their active interest in the frequency standards program and the Radio Section of the Bureau has in its files numerous commendatory letters from industrial executives and engineers. One large producer of high precision instruments whose wartime production for the armed forces has been greatly reduced has announced plans for the manufacture of frequency meters and other microwave equipment. This will provide many jobs in a field of production new to the company.

Microwave equipment of the Allied armed forces played a vital part in the defeat of Germany and Japan. Information now being released indicates that Allied developments in this field were so far ahead of those of our enemies as to leave no room for comparison.

The microwave frequency standards are derived from the national primary standards of frequency established and maintained by the Bureau of Standards. The primary standard consists of seven isolated quartz-crystal oscillators. The output of any one of these oscillators by a process of frequency multiplication, frequency conversion and harmonic selection is made to give standard frequencies as high as desired.

The frequency of each of the seven oscillators constituting the primary standard is determined by continuous and automatic comparison with the entire group and with the official time signals. The average frequency value is based upon and agrees precisely with the average U. S. Naval Observatory time signals. The output from one or more isolated oscillators is distributed to laboratory equipment and higher or lower standard frequencies are derived as needed.

Services of the Bureau in connection with microwave frequency standards include measurements, tests and information on instruments which are in turn used as standards to test and measure considerable numbers of other instruments. These services are available without charge to the Army and Navy and other Government agencies. Frequency standards are available to the public on payment of fees fixed in accordance with the long-established policy of the Bureau of Standards.

At the request of the Joint Communications Board, the Bureau's program was extended to cover related matters and active work is being done looking to the development of accurate primary reference standards and precision measurement technique for power, voltage, impedance, attenuation and field intensity at all frequencies.

D. C. COMMISSIONERS APPROVE TELE TOWER IN WASHINGTON

At its meeting Tuesday (12) the Board of Commissioners of the District of Columbia, confirming the action of the Board of Zoning Adjustment and in line with the recommendation of the National Capital Park and Planning Commission, approved the application of Bamberger Broadcasting Services, Inc., for a height of 300 feet above ground for a proposed television tower at 40th Street and Brandywine Street, N. W., in Washington.

Under the law, the Commissioners are restricted solely to passing on the height of such towers, and have no jurisdiction over their location.

The action of the Commissioners does not mean the approval of any particular structural plan. No such plan has yet been submitted. If and when it is submitted, it would require a permit from the District Government, and would be carefully studied to insure a safe structure.

Neither does the approval mean necessarily that the installation will be built, for this depends upon the separate approval of the Federal Communications Commission. The Bamberger Broadcasting Services, Inc., and five other companies, now have such applications before FCC, which has not yet announced its decision. Concurrently, two of the companies (Bamberger and NBC) submitted their applications to the Board of Zoning Adjustment and the Board of Commissioners. The Board of Zoning Adjustment has approved both. The Commissioners have now approved Bamberger. They still have NBC under advisement.

The National Capital Park & Planning Commission, dealing with the general question of the heights of television towers, recommended at its last meeting that the Board of Commissioners approve them as high as FCC considered necessary for good service, but no higher. The Board of Commissioners felt that this was a sound policy. Accordingly they called into consultation the chief engineer of the FCC. He stated the view of FCC, that such towers should be about 500 feet above the average height of the territory they serve. The Bamberger plan just about meets this requirement, being some 480 feet above average height of the territory it would serve; although it would only be 300 feet above the ground, at the point where the company wishes to build it.

Broadcast Advertising

SMALL MARKET STATIONS

Religious Programming

In December, 1945, eleven stations in NAB District II (New York State), falling in the small market station classification, were sent questionnaires by A. E. Spokes, WJTN Jamestown, Committee Chairman, regarding their religious programming. Nine of the eleven stations contacted returned reports.

Commercial Programs

Commercial religious programs averaged two hours and fifty-one minutes weekly. One station reported no commercial religious programs, in keeping with their policy. The low station reported one hour and thirty minutes a week, while the high station revealed a total of seven hours and fifteen minutes weekly.

Sustaining Programs

The survey brought out that the average sustaining religious time was three hours and eleven minutes. The low station carried one hour and thirty minutes. The high station reported four hours and forty-five minutes weekly.

(Continued on next page)
Apportioning Time

Mr. Spokes stated that the method most used by stations for apportioning sustaining time to religious groups is through the co-operation of a Ministerial Alliance or Council of Churches.

Caliber of Commercial Programs

Commercial religious programs, generally speaking, are of a high caliber. Few exceptions were cited but the general consensus was that production and performance of commercial religious programs were satisfactory, according to the survey.

Station or Church as Program Producer?

Three stations indicated that they had a given format for their sustaining religious programs, but allowed the church groups to build and produce their own programs with some station supervision. One progressive station produces the complete sustaining period with the minister giving a short opening, a short sermon and a prayer or benediction at the end of the program.

(PAB District II small market stations are to be commended for making possible this religious survey and passing it on to the entire industry.)

PREDICTION BY THE KEYSTONE BROADCASTING SYSTEM

"The next two years will probably be the greatest in the history of radio. Gross time billing has reached its highest figure to date, exceeding four hundred million dollars for 1945. And radio has surpassed newspapers as the Number 1 medium for national advertisers."

"On the other side of this picture is the increased competition in radio for the available business. The FCC has said that within 18 months there will probably be a total of 2,000 AM and FM stations on the air—300 more than the total number of daily newspapers in the U.S. This figure may go even higher when one stops to think that one of the major transmitter manufacturers is said to be talking about a complete FM plant that will sell in the neighborhood of $2,800.

"What does all this mean to the small market station? It means that many of these new stations will go into the small markets in competition with the established stations. It means that although the picture is rosy right now, the small market stations must be more aggressive, intensify programming efforts, and expand research and promotion.

"In this competitive era just ahead of us, the national advertiser will be a more important factor in the small market picture since these advertisers are intent on building sales and distribution in the Beyond-Metropolitan markets."

The above statement was distributed by The Keystone Broadcasting System and is reprinted here as a matter of interest to the membership.

PERSONNEL TRAINING

Morgan Sexton, General Manager of Radio Station KROS, the Mutual affiliate in Clinton, Iowa, reports that he has been successful in getting the permission of the International Brotherhood of Electrical Workers, which represents their technical staff, to use two part-time boys as Engineers on Remote Control broadcasts. "We have the Speech Teachers of our three High Schools recommend boys for these positions from the Junior and Senior Classes. We audition the boys and pick those with the most mature voices and with the necessary intelligence to break in as apprentice announcers, and we give them from four to eight hours a week on the air during our afternoon or evening time.

"It gives us two announcers that can be called on in emergencies and during vacation months and has been very successful. Usually by the time these boys graduate, they are ready to accept a full time job as announcers and several of them have gone on to get second and third class tickets as operators."

SYNDICATED TRANSCRIBED SHOWS

A January issue of Variety carried a story "WEE-WATTERS WANT PLATTERS." This was a review of the frequently discussed "Why can't the producers make syndicated transcribed shows cheap enough for economical use by small stations?"

Variety reported that such shows with MUSIC are now priced at $10 to $25 a disc, which means that small stations are paying anywhere from half to twice as much as they charge for time to their sponsors.

Variety makes no distinction in a 250 watter as to size of its market.

Questions

Will small market stations pay $2.50 each for a five time a week syndicated show, provided a show becomes available at that price? Will stations pay $4.00 each for a three time a week show? (Depending of course on name stars, top production, etc.)

Will stations consider using syndicated shows that have already been used a number of times by larger stations? Have any of you had any experience with these type shows on small market stations? Your recommendations? J. Allen Brown of NAB invites comments from stations on syndicated programs. Send in a report on your experience, requirements and ideas.

ADVERTISING AS A CAREER

"It is not surprising that many ambitious veterans are thinking of advertising as a career.

"It's a glamorous field. It involves huge sums of money—more than two billion dollars a year. It shapes people's desires and their standard of living. It calls for initiative, imagination, creative thinking, and expression. It pays better than perhaps any other field, the men and women who rise to its top.

"But let's face the facts.

"The advertising field is extremely limited in number of jobs. There are probably less than 60,000 advertising jobs altogether in the whole U.S. or, 1/10 of 1% of all jobs! It is difficult to enter, and competition is extremely keen after you get in. Pay for its routine positions is little if any higher than in other fields, and more is demanded of the worker. Most of the few places now open will be filled by experienced men returning to them from the armed services. Inexperienced men and women will find it difficult to obtain jobs in advertising."—ELON G. BORTON.

If you have friends who are still determined to try it, Alfred T. Falk, Director, Bureau of Research and Education, Advertising Federation of America, gives you extremely helpful information in the booklet "Jobs in Advertising." Elon G. Borton, AFA President, recommends that veterans read it and then seek the counsel of some experienced advertising people who can discuss your situation with you. Copies of the booklet are obtainable through NAB.
BRAZIL DECORATES TOMLINSON

Brazil's highest decoration to non-Brazilians, the National Order of the Southern Cross, Cruzeiro do Sul, was conferred upon Edward Tomlinson, NBC Commentator and Inter-American advisor, at the ceremonies at the Brazilian Chancery, last Thursday. Fernando Lobo, Charge d'Affaires, made the presentation before a group of high government, diplomatic, radio and press representatives.

PANGBORN-COX PROMOTED AT KGW

Portland, Ore.—M. J. Frey, general manager of the Oregonian Publishing Company has announced the appointment of H. Quenton Cox, former assistant manager of KGW, to the post of station manager. He succeeds Arden X. Pangborn, who becomes business manager of the Morning Oregonian.

MRS. GELHORN NEW PRESIDENT ST. LOUIS COUNCIL

Dorothy Lewis, NAB Coordinator of Listener Activity, announces that Mrs. George Gelhorn is the new president of the St. Louis Radio Council.

Mrs. Gelhorn, who succeeds Mrs. Kenneth Teasdale, resides at 4366 McPherson Ave., St. Louis 8.

WILLS SPEAKS ON RADIO IN OUR DAILY LIFE

Commissioner William H. Wills of the FCC delivered the following address, Radio Broadcasting and the Daily Life of the American People, over WIOD, Miami, on Wednesday (12):

"When Station WIOD asked me to speak to you here this evening on the important part which radio broadcasting plays in the daily life of the American people, and on the future possibilities of American broadcasting, I welcomed the opportunity.

"For as a member of the Federal Communications Commission for the past six months, I have come to be increasingly impressed by the extent to which radio has ceased for so many people to be merely a luxury or a convenience, and has become instead a necessity.

"The Federal Communications Commission, as you know, licenses American broadcasting stations, and makes rules and regulations governing their technical operation.

"In connection with proposed rules and regulations, we recently requested the Department of Agriculture to make a sample study of rural people, to determine their attitudes toward radio broadcasting, and one of the questions which the Department of Agriculture asked was this:

"How much difference would it make to you if your set gave out and you were not able to listen at all for a month or more?"

"I need not tell you that the answers were overwhelmingly to the credit of radio broadcasting.

"The vast majority of listeners throughout the areas sampled stated that to be without their radios for a month or more would be an overwhelming loss. One farm wife living in an isolated rural region said: 'I simply couldn't stay home alone ... I am alone so much of the time, I look upon my radio as my companion.' Another listener reported: 'It would make an awful difference. It would be just like going back to the old-fashioned gas lamps. I am just lost when the radio is broken.' Still another farm family explained: 'We need the radio very much ... we have a mile of bad road between the house and the mailbox, and sometimes only get the mail once a week.'"

"Under such circumstances, you can readily see that the radio forms the only daily link with the outside world. Indeed, as still another listener expressed it, losing the radio would be almost as disturbing as losing a member of the family.

"Why has broadcasting, not only in the United States but in many other countries of the world, achieved so great a hold on listeners? Why do families throughout the world who cannot afford even such comforts as central heating, running water, or an occasional movie, nevertheless make sacrifices to buy and maintain their radio receivers?"

"I can give you no short answer to this question, but I would like to cover briefly some of the features which make radio so indispensable.

"First and foremost, as every radio survey shows, radio is valued because it brings listeners the news. During the war, this reliance on radio for moment-to-moment information concerning the progress of our forces in Europe and in the Far East was an unprecedented national phenomenon. Not only in homes, but in stores and office buildings, and even in taxicabs, radios were turned on for the latest developments on the battlefronts, on the high seas, and in the world capitals. In many homes during the long watches of the night, the radio was kept on till dawn, while wives or parents listened for some scrap of news about their loved ones overseas. The American people generally came to rely on radio not merely for prompt news, but for unbiased presentation.

"Since V-J Day, of course, our thirst for news has not been pitched at so feverish a level; but news broadcasts continue, I am confident, to be one of the major features for which listeners value their radio receivers. In the period of domestic and international decisions through which we are now passing, and for the indefinite future, the American people have a stake and a concern.

"As entertainment, moreover, radio can afford an immeasurably greater entertainment value than can be achieved by bringing the news to the remotest portions of the United States, serves to inform every citizen, enabling him to carry out his responsibilities as a citizen in a democracy.

"It is not difficult to see how it is that radio has become instead a necessity. Perhaps equally important with news and entertainment is a major source of listener enjoyment of radio broadcasting. The entertainment value of broadcasting is so obvious, and so universally appreciated, that I shall not dwell on it; except to point out that healthy entertainment is a necessary as well as an enjoyable feature in our national life. We tend to think of ourselves as a happy, self-confident people, whose worries are little worries, and who face the future with confidence and with eagerness. It may well be that these optimistic and expansive qualities result in no small measure from the fact that whenever we want or need a good hearty laugh or a quick soul-warming smile, we can get it by turning on a radio dial.

"As entertainment, moreover, radio can afford an important outlet for our dramatists, our actors and singers and the other artists whose appeal is to the ear. Perhaps more than any other medium, radio has provided a means of utilizing the artistic talents of the country through radio entertainment; but certainly broadcasting has already shown the extent to which its entertainment function can be a part of the artistic life of the nation.

"Perhaps equally important with news and entertainment is the function of radio as a public forum for the discussion of public issues. In my own State of Vermont, the town meetings a century ago provided the facilities by which citizens could come together to discuss not only their local problems but the problems of the state, the nation, and the world.

"As the country grew, and as the population of the United States became predominantiy urban, such means for discussion have become fewer and fewer, but they are still the backbone of our democracy. Radio does not have the intimacy of the town meeting, and it suffers from the disadvantage that inevitably a few must talk and many must only listen. Nevertheless, in the discussion of public issues, radio techniques can be and have been devised to provide for public participation, and to provide tremendous audiences for public discussion. The use of radio during political campaigns, which in essence nationwide debates, is well known; and at least some broadcast stations have found it possible similarly to let their facilities be utilized for local discussions of local problems. Certainly without radio's contribution to a wider understanding of
local, state, national, and international issues, our country would be the poorer.

"It is hardly necessary for me to catalog the many other ways in which radio broadcasting has entwined itself with our daily needs and wants. As a technique for education, it is excelled only by the actual classroom. As a way of arousing the public to the needs of such organizations as the USO, local community funds, and other worthy organizations, it has proved its unequalled value. To farmers, radio can and should bring the information which they so urgently need—weather reports, crop and market reports, and specific farm information.

"Finally, and perhaps most important, radio can be and is a force binding us together as a nation, and ironing out those regional differences which might otherwise spell disaster. When folks listen to the same songs and stories, laugh at the same jokes and cry at the same catastrophes, it is hard to believe that any force can ever arise sufficient to tear them asunder or to weaken their allegiance to the same basic principles upon which our society rests.

"And what of the future? Can we hereafter expect better, worse, or more of the same service from American broadcasting? The answer, it seems to me, lies first of all in certain technical developments which I should like briefly to discuss.

"Heretofore, substantially all American broadcasting has been conducted through fewer than 1,000 standard broadcast stations. We are today on the eve of a development which can, I hope will revolutionize the possibilities of public service in radio broadcasting. These developments are FM broadcasting, noncommercial educational FM broadcasting, television broadcasting, and facsimile broadcasting. Let me describe these four very briefly.

"First of all, FM broadcasting is a new technique which provides at least four major advantages over broadcasting as we now know it. FM affords a remarkably static-free broadcast service—a feature especially important here in the South where standard broadcasting is peculiarly subject to static interference. Again, FM greatly reduces the possibility of interference among stations. Also, well-designed FM receivers can reproduce faithfully both the highest and the lowest musical notes, so that what you hear will sound less and less like a radio, more and more like living music. Finally, and perhaps most important, FM makes it possible for the Federal Communications Commission to license at least 2,000 more FM broadcast stations—double the number of standard broadcast stations now on the air. The possibilities for greater freedom from the shackles of prewar programming through this increase in the number of stations can hardly be exaggerated.

"In its Rules and Regulations, the Commission has reserved 20 per cent of all the FM channels for the exclusive use of educational FM broadcast stations.

"These stations will be licensed exclusively to educational institutions, for the furtherance of their educational aims, and for transmitting educational and entertainment programs to the general public.

"Educational institutions were among the pioneers of American broadcasting; and we can certainly hope that with the development of educational FM stations, new trails in public service will be blazed.

"Third, we are faced with the immediate development of television which will enable you, seated in your homes, to be eye witnesses of events throughout the country, and perhaps eventually throughout the world.

"Finally, facsimile broadcasting, which makes it possible to deliver into your homes by radio a reproduction of the pictures and text of any printed page, affords still another technical possibility for the radio service of the future.

"Mere technical facilities, of course, do not by themselves assure improved public service. Radio in all its forms can be misused as well as used in the public interest. "That is why the Commission has established a Federal Communications Commission directed to safeguard the public concern with broadcasting by granting licenses only to those who will operate 'in the public interest, convenience, and necessity'; and that is why Congress has provided that title to the radio channels shall remain in the American people.

"It was a wise provision when it was first laid down in 1927; and I am confident also that for the future, as in the past, radio will hold the attention and interest of listeners everywhere, and we will continue to say—as listeners reported in the recent survey—'I couldn't live without it.'

District Meetings

6th DISTRICT

With a record breaking attendance of members participating, Wiley P. Harris, WJDX, Jackson, Miss., was elected NAB 6th District Director at the 6th District Meeting in Memphis, Feb. 7-8. He succeeds Hoyt B. Wooten, WREC, Memphis, who asked that his name be withdrawn from consideration for reelection.

The 6th District membership unanimously expressed its deep appreciation of the able manner in which Mr. Wooten served as Director during the past four strenuous wartime years, and commended him particularly upon his untiring efforts and diligent representation of the affairs of the District and the industry as a whole on the NAB Board.

Wholehearted support was pledged to President Miller in a resolution which emphasized the keen awareness he has demonstrated of the problems of the industry and of the responsibilities of his office. Confidence was expressed that NAB under Judge Miller's leadership will continue to progress as the truly representative organization of the industry and that it will constantly broaden his scope in the interest of broadcasters and the public they serve.

Discussions were held on all phases of the industry. NAB representatives reviewed the past progress of the Association and outlined the aggressive new policies and aims of the organization in behalf of its members as they face the promising horizon of postwar expansion into new fields of opportunity for contributing to the public interest.

Progress reports were given on BMI and BMI by representative of those organizations, and general approval was accorded by the members. The Board was urged to continue its support of BMI. BMI's outstanding contribution to the industry in relieving it from the encroachments of the music licensing monopoly was especially cited, and active support and cooperation was pledged for the future.

Stating a belief that a great service would be rendered to the listeners of the Nation through the adoption of uniform time throughout the land, members unanimously requested that the desirability of such uniform time be brought to the attention of the President of the U. S. by NAB President Miller, and that diligent consideration in the interest of permanent uniform time legislation be continued by NAB.

The resolutions adopted by 6th District members and a list of those registered at the meeting follow:

Whereas the success of any trade association is due, in a large measure, to the caliber of men who serve as its directors, and

Whereas the affairs of the Sixth District of the NAB have been capably and efficiently handled during the past four years, strenuous as they were during war time; therefore, the members of the Sixth District of the NAB, in convention assembled at Memphis, February 7 and 8, 1946, do hereby express to their retiring Director, Hoyt Wooten, sincere appreciation for his untiring efforts and his diligent representation of the affairs of this District on the Board of the National Association of Broadcasters.

(Continued on next page)
Whereas the members of the Sixth District of NAB have enjoyed rich hospitality during the meeting of the Sixth District, held February 7 and 8, 1946, in Memphis, Tennessee.

Whereas such hospitality has been so graciously extended by the four radio stations of Memphis, Tennessee; therefore, be it resolved that the Sixth District of NAB extend its wholehearted thanks to WREC, WMC, WMP and WHBQ for contributing so much to the success of the meeting.

Whereas the National Association of Broadcasters was fortunate enough to secure the services of the Honorable Justin Miller as President of the Association.

Whereas in a short period of time President Miller has demonstrated a keen awareness of the problems of the Radio Industry and of the responsibilities of his office, which accord as well with an active and progressive trade association; therefore, be it resolved that the radio stations comprising the Sixth District of the NAB pledge to Judge Miller their wholehearted support and cooperation to the end that the National Association of Broadcasters will continue to be the truly representative organization of the Industry and be able to broaden the scope of its representation.

Whereas there has been a need in the Radio Industry for a uniform, concise and accurate measurement of the radio audience of the American broadcasting stations, and,

Whereas the National Association of Broadcasters, together with the AAAA and the AFA, have agreed upon the Broadcast Measurement Bureau, and,

Whereas BMB has been in existence now approximately one year and intends to release its first measurements late in this year; therefore, be it resolved that the members of the Sixth District of NAB re-affirm our faith in BMB and urge all radio stations within the District to become members of BMB, and we further urge that the Board of Directors of the National Association of Broadcasters continue their support of Broadcast Measurement Bureau in its further study for an active and progressive trade association, with the provision that the first study proves itself to be a satisfactory method of audience measurement.

Whereas Broadcast Music, Inc., was created by the Broadcasters as a final effort to achieve relief from the encroachments of a long established monopoly in the field of music licensing, and,

Whereas BMI is the one sure guarantee against the reestablishment of this monopoly; be it resolved that the members of District 6 pledge their active support and cooperation to BMI.

Whereas the American people are caused great inconvenience, annoyance and confusion by the semi-annual shift of time in some sections of the country, and,

Whereas a more enjoyable service could be rendered the radio listening population by the adoption of a members time; therefore, be it resolved that Justin Miller, in his capacity as President of the NAB, bring to the attention of the President of the United States this great inconvenience and confusion, and be it further resolved that Justin Miller, at his discretion, urge the President of the United States to use his war time powers to assure uniform time, pending efforts by NAB to obtain legislation by the Congress to achieve this purpose permanently.

Registration:

Mississippi: Hugh Smith, WJXN, Jackson; Wiley P. Hard, WMDO, Jackson; J. M. Sayre,颔, WLOX, Ocean Springs; David Segal, WROX, Clarksdale; Bob McGanity, James Eatherton, WCBU, Columbus; Emmet McMurry, WJPR, Greenville; C. J. Wright, WFOR, Hattiesburg; George Blumenstock, WSBK, McComb; Ward Coleman, WDLR, Laurel; Bob McGanity, WLOX, WNBC, Vicksburg; Gene Tibenett, WMXQ, Meridian.

New York: William Schudt, CBS; Carl Havelin, MBS; Harry LeBrun, MBS; Pete Schloss, ABC; Carl Cannon, Dan Donny, NBC; Hugh Feltis, BMI; Larry Swars, Noble & Swars; Pierre Weiss, Langworth Feature Programs; Ralph Wentworth, BMI; James Kyler, SESAC.

Texas: Alex Keese, Taylor, Hove, Snowden, Amarillo; Clyde Melville, Taylor, Hove, Snowden, Dallas; Bill Witty, RCA, Dallas; George Harding, Branham, Dallas.

Georgia: Stanley Witaker, Clifford Marshall, United Press, Atlanta.

F-M Department

ALLOCATIONS BULLETIN 19 WITH THIS ISSUE NAB REPORTS

As announced in last week’s REPORTS (p. 96), Special Allocation Hearings Bulletin No. 19 accompanies this edition of NAB REPORTS to all members. This 92 page bulletin contains the testimony given before the Commission Jan. 18-19 in a hearing held to determine whether frequencies in the 42-50 megacycles band should be set aside for FM in addition to those already assigned in the 88-108 band.

A previous announcement had been made by NAB with the issuance of Bulletin 18 that no further Special Allocation Bulletins would be published. However, further hearings have been held, and it is NAB’s earnest desire that all broadcasters be kept fully abreast of the proceedings and that they have a complete transcript of the testimony for their permanent station records.

(Continued on next page)
The Commission on Wednesday (13) granted 19 FM stations, bringing the total conditional grants to 323. At the same time four applications were designated for hearing, one for Washington, D. C., two for Roanoke and one for Danville, Va.

**DESIGNATED FOR HEARING**

Theodore Granik, Adopted an order designating this application for hearing to be consolidated with applications of Marcus Washington, D. C. Loew Booking Agency et al (Dockets 7189–7201 inclusive), scheduled to be heard March 11; and further ordered that the issues in the consolidated proceedings be amended to include this application (B1–PH–515).

**Federal Communications Commission Docket**

**HEARINGS**

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 18. They are subject to change.

**Monday, February 18**

NEW—Albany Broadcasting Company, Inc., Albany, N. Y.—C. P. 1460 kc., 500 watts night, 1 KW day, unlimited.

NEW—Van Curler Broadcasting Corp., Albany, N. Y.—C. P. 1460 kc., 5 KW night, 5 KW day, unlimited DA-night.

WCPW—Scripps–Howard Radio, Inc., Cincinnati, Ohio—C. P. 630 kc., 100 watts night, 250 watts day, unlimited.

**Tuesday, February 19**

KGA—Louis Wassmer, Spokane, Wash.—Renewal of license. 1510 kc., 10 KW, unlimited DA-night.

(Continued on next page)
Wednesday, February 20

Further Hearing

NEW—City of Sebring, Florida, Sebring, Fla.—C. P. 1130 kc., 1 KW, unlimited.

NEW—A. Frank Katzenzine, Orlando, Fla.—C. P. 1120 kc., 5 KW, unlimited DA-night.

WRBL—J. W. Woodruff, J. W. Woodruff, Jr., and E. B. Card-ledge, Jr., d/b as Columbus Broadcasting Co., Columbus, Ga.—C. P. 1120 kc., 5 KW, DA-night, unlimited.

NEW—Musogec Broadcasting Co., Columbus, Ga.—C. P. 1450 kc., 250 watts, unlimited.

NEW—Chattahoochee Broadcasting Co., Columbus, Ga.—C. P. 1460 kc., 1 KW, DA-day and night, unlimited.

WEOF—Palma Beach Broadcasting Co., Palm Beach, Fla.—C. P. 1420 kc., 1 KW, unlimited.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—C. P. 1460 kc., 5 KW, unlimited DA-night.

WLAK—S. O. Ward, tr/ as Radio Station WLAK, Lakeland, Fla.—C. P. 1130 kc., 1 KW, unlimited.

NEW—Georgia-Alabama Broadcasting Corp., Columbus, Ga.—C. P. 1450 kc., 250 watts, unlimited.

Consolidated Hearing

To Be Held Before Commissioner Wills, Mayor's Office, City Hall, Daytona Beach, Florida

NEW—Roderick T. Peaceock, Sr. tr/ as Daytona Beach Broadcasting Co., Daytona Beach, Fla.—C. P. 1340 kc., 250 watts, unlimited.

NEW—Wade R. Sperry, Edgar J. Sperry and Josephine T. Sperry, co-partners, d/b as Daytona Beach Broadcasting Co., Daytona Beach, Fla.—C. P. 1340 kc., unlimited.

NEW—News-Journal Corp., Daytona Beach, Fla.—C. P. 1340 kc., 250 watts, unlimited.

Friday, February 22

WREN—The WREN Broadcasting Co., Topeka, Kans.—C. P. 1550 kc., 5 KW night, 5 KW day, 9-KFKE.

NEW—Midwest Broadcasting Co., Milwaukee, Wis.—C. P. 1250 kc., 5 KW, unlimited DA-day and night.

WGI—Farnsworth Television & Radio Corp., Fort Wayne, Ind.—C. P. 1250 kc., 1 KW, unlimited DA-day and night.

NEW—Virginia-Carolina Broadcasting Corp., Danville, Va.—C. P. 1550 kc., 1 KW night, unlimited DA-night.

NEW—Homer Rodeheaver, Winona Lake, Ind.—C. P. 1250 kc., 1 KW, unlimited DA-night and day.

Before Commissioner Wakefield, Court Room, City Hall, Main Street and East Howard Avenue, Biloxi, Miss.

NEW—WGCM Broadcasting Co., a co-partnership composed of Hugh O. Jones, Wm. E. Jones and James O. Jones, Biloxi, Miss.—C. P. 1490 kc., 250 watts, unlimited.

NEW—WLXO Broadcasting Co., Biloxi, Miss.—C. P. 1490 kc., 250 watts, unlimited.

Saturday, February 23

Before Commissioner Wills, County Commissioner's Room, Volusia County Court House, Deland, Fla.

NEW—James S. Rivers, d/b as Southeastern Broadcasting System, Sanford, Fla.—C. P. 1100 kc., 250 watts, unlimited.

NEW—Southland Broadcasting Co., Laurel, Miss.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time. (B3-P-4001)

NEW—Herbert Herff, Memphis, Tenn.— Granted construction permit for a new station to operate on 1310 kc., 250 watts, unlimited time. (B3-P-3944) Subject to approval of transmitter site and design.

NEW—Don C. Poole, et al., d/b as Billings Broadcasting Co., Billings, Mont.—Granted construction permit for a new station to operate on 1310 kc., 250 watts power, unlimited time. (B4-P-828) Subject to selection of a transmitter site and filing of modification of permit therefor.

NEW—Eastern Radio Corp., Reading, Pa.—Granted construction permit for new station to operate on 1320 kc., 250 watts, unlimited time; subject to waiver of Secs. 3.55 and 3.60 of Commission's rules, and to selection of approved transmitter site. (B2-P-5761)

WBRX—American-Republican, Inc., Worthington, Conn.—Granted construction permit to increase power from 1 to 5 KW, unlimited time, operating on 1550 kc., directional antenna. (B1-P-4532)

WKRZ—Kenneth Edward Runnelkamp, Oil City, Pa.—Granted modification of construction permit (B2-P-3725) which authorized a new station, for changes in transmitting equipment, approval of antenna, and approval of transmitter and studio locations at Veach Bldg., 232-36 Seneac St., Oil City, Pa. (B2-MP-1826) The permittee hereunder is granted a waiver of Sec. 3.60 of the Commission's rules. (B4-P-3215)

NEW State of Wisconsin—State Radio Council. Madison, Wis.—Granted construction permit for a new station to operate on 1340 kc., unlimited time, operating on 1550 kc., directional antenna. (B1-P-4532)

NEW—Don C. Poole, et al., d/b as Billings Broadcasting Co., Billings, Mont.—Granted construction permit for a new station to operate on 1310 kc., 250 watts power, unlimited time. (B3-P-3944) Subject to approval of transmitter site and design.

NEW—Eastern Radio Corp., Reading, Pa.—Granted construction permit for new station to operate on 1320 kc., 250 watts, unlimited time; subject to waiver of Secs. 3.55 and 3.60 of Commission's rules, and to selection of approved transmitter site. (B2-P-5761)

WBRX—American-Republican, Inc., Worthington, Conn.—Granted construction permit to increase power from 1 to 5 KW, unlimited time, operating on 1550 kc., directional antenna. (B1-P-4532)

NEW—State of Wisconsin—State Radio Council. Madison, Wisc.—Granted construction permits for two new non-commercial educational broadcast stations (B4-PED-50 and B4-PED-60): frequencies to be assigned by the Chief Engineer of the Commission; 3 KW and 10 KW power, special emission for FM. This is to be two units in a proposed state-wide educational FM network eventually to include seven such broadcast- ing stations. These stations are to be located at Madison and Delafield, Wisc., with main studios for both stations on the campus at the University of Wisconsin, Madison.

MISCELLANEOUS ACTIONS

Fort Orange Broadcasting Co., Inc., Albany, N. Y.; Van Curler Broadcasting Corp., Albany, N. Y.—Granted in part joint petition for continuance of consolidated hearing on petitioners' applications and that of the Albany Broadcasting Co., Inc., now scheduled for February 18, and ordered that said hearings be continued for a period of 30 days.

Harold T. Gray, et al, d/b as Wyoming Valley Broadcasting Co., Wilkes-Barre, Pa.—Granted motion for leave to amend application for construction permit (B2-P-4500), so as to specify the frequency 1450 kc. as 1490 kc. as presently requested; ordered the record re-opened in the matter of applications of Miners' Broadcasting Service, Pottsville, and WAZL, Hazle- ton, and scheduled said matters for further consolidated hearing on February 23, with movant's application, as amended.

WHEC—WHEC, Inc., Rochester, N. Y.—Denied petition to reconsider and grant without hearing application B1-P-3230; on Commission's own motion severed applications from consolidated hearing; with applications for stations in Albany: retained on docket for hearing on February 18 on issues heretofore published; Albany applicants made parties to this hearing.

 applications granted

NEW—G. W. Covington, Jr., Selma, Ala.—Granted construction permit for a new station to operate on 1310 kc., 250 watts, unlimited time. (B3-P-4001)
Virginia-Carolina Broadcasting Corp., Danville, Va.—Granted petition to sever its application (Docket 6270) for a new station to operate on 1460 kc., 50 kw., unlimited time.

WLOF—Hazelwood, Inc., Orlando, Fla.; E. T. Wright, Orlando, Fla.—Upon consideration of petitions of WLOF and E. T. Wright for reconsideration and grant of their applications, it was ordered that the application of WLOF (Docket 6864, B3-P-3973) and application of E. T. Wright (Docket 7111; B3-P-4265) be removed from the hearing docket, and the petitions for reconsideration were denied. It was further ordered that the Bills of Particulars herefore issued in these proceedings be amended to delete these two applications from the proceedings.

KSD—Pulitzer Publishing Co., St. Louis, Mo.—Denied motion to dismiss without prejudice application (B2-PH-525) for a new FM station.

Woody broadcasting Co., Inc., Ogden, Utah—Granted petition requesting that its application (B1-P-3746) so as to provide alteration of DA, using a different pattern for day and night operation, and the amendment was accepted.

Cuyahoga Broadcasting Co., Cleveland, Ohio—Designated for hearing application of Cuyahoga Broadcasting Co. (B2-P-4168) for a new station to operate on 1490 kc., 250 watts, unlimited time.

Cuyahoga Broadcasting Co., Cleveland, Ohio—Designated for hearing application of Cuyahoga Broadcasting Co. (B2-P-4168) for a new station to operate on 1490 kc., 250 watts, unlimited time.

Moline Broadcasting Co., Moline, Ill.—Adopted an order denying petition for reconsideration and grant of application (B1-P-3672) for a new station to operate on 1230 kc., 250 watts, unlimited time.

James S. Rivers, d/b as Southeastern Broadcasting System, Sanford, Fla.—Denied petition to grant without a hearing its application (B3-P-1225) for a new station to use 1490 kc., 250 watts, unlimited time.

Peterson and Company, Lexington, Ky.—Adopted an order denying petitioner's request that their application for a new station be designated for hearing in a consolidated proceeding with the application of The Kentucky Broadcasting Co.

WACO—Frontier Broadcasting Co., Inc., Waco, Texas—Petition requesting that its application for a new station be designated for hearing in a consolidated proceeding with applications of KARM, KFRE and KROY, involving frequency 1060 kc.

Tidewater Broadcasting Corp., Norfolk, Va.: Norfolk Broadcasting Co., Norfolk, Va.—Designated for hearing in a consolidated proceeding the applications of Tidewater Broadcasting Corp. (B2-P-3794) and Norfolk Broadcasting Co. (B2-P-3794), requesting a new station at Norfolk to use frequency 1230 kc., 100 watts, unlimited time, and 1220 kc., 250 watts, daytime only, respectively.

Express Publishing Co., San Antonio, Texas—Granted petition requesting that its application for a new station (B3-P-4471) to use 1450 kc., 250 watts, unlimited time, be designated for hearing in a consolidated proceeding heretofore set on applications for use of the same frequency.

Empire Newspapers-Radio, Inc., Endicott, N. Y.—Granted petition requesting that its application for a new station (B3-P-4470) to use 1450 kc., 250 watts, unlimited time, be designated for hearing in the consolidated proceedings heretofore set on applications for use of the same frequency.

United Broadcasting Co., Ogden, Utah—Granted petition requesting that its application (B5-P-4467) for a new station to operate on 1060 kc., 50 KW, unlimited time, be designated for hearing in the consolidated proceedings heretofore set on applications for use of the same frequency.

Cuyahoga Broadcasting Co., Cleveland, Ohio—Designated for hearing application of Cuyahoga Broadcasting Co. (B2-P-4168) for a new station to operate on 1490 kc., 250 watts, unlimited time.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Adopted an order granting petition of WGR requesting that its application (B3-P-424) for a construction permit to increase nighttime power from 1 to 5 kw., and to modify its directional antenna, be designated for hearing in a consolidated proceeding with other applications requesting use of 550 kc.; ordered that WGR's application be so designated, and further ordered that the Bills of Particulars herefore issued in these proceedings be amended to include WGR's application.

KCUR—Michael Elston, independent Executor of the Estate of Clarence Scharbauer, deceased, Midland, Texas—Granted petition requesting that its application (B3-P-3741) to change frequency from 1230 to 550 kc., and increase power from 250 watts to 5 KW, be designated for hearing with other applications in the 550 kc. proceedings scheduled to be heard Feb. 25-March 8 in Washington.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Designated for hearing with five other applications involving use of frequency 790 kc., the application of WEAU (B4-P-4312) to increase power to 5 kw day and night, and make changes in directional antenna for night.

KJLA—Summit Radio Corp., Akron, Ohio—Designated for hearing application for construction permit (B2-P-3834), for changes in directional antenna for night and for changes in ground system.

**ACTIONS ON MOTIONS**

WLOF—Hazelwood, Inc., Orlando, Fla.; E. T. Wright, Orlando, Fla.—Upon consideration of petitions of WLOF and E. T. Wright for reconsideration and grant of their applications, it was ordered that the application of WLOF (Docket 6864, B3-P-3973) and application of E. T. Wright (Docket 7111; B3-P-4265) be removed from the hearing docket, and the petitions for reconsideration were denied. It was further ordered that the Bills of Particulars herefore issued in these proceedings be amended to delete these two applications from the proceedings.

KSD—Pulitzer Publishing Co., St. Louis, Mo.—Denied motion to dismiss without prejudice application (B2-PH-525) for a new FM station.

Woody broadcasting Co., Inc., Dayton, Ohio—Granted petition insofar as it requests leave to amend its application (B2-P-360) so as to require licenses instead of 1600 kc., with DA day and night; removal from hearing docket and other relief. The amendment was accepted and application removed from the hearing docket.

James A. Brown, et al, a partnership, d/b as Atlantic Shores Broadcasting, Ltd., Coral Gables, Fla.—Granted petition for leave to amend its application (B3-P-3654) so as to specify the transmitter site "site to be determined" instead of the presently specified site in Coral Gables, and the amendment was accepted.

KSD—Pulitzer Publishing Co., St. Louis, Mo.—Granted motion to amend application for construction permit (B4-P-4089) so as to specify to a new transmitter site and modified antenna system, and the amendment was accepted.

Midwest Broadcasting Co., Milwaukee, Wis.—Granted motion to amend application for construction permit (B4-P-3740) so as to provide alteration of DA, using a different pattern for day and night operation, and the amendment was accepted.

San Joaquin Broadcasters, Inc., Modesto, Calif.—Granted motion to dismiss without prejudice application for a new station (B5-P-4066).

KPLA—Calcashed Broadcasting Co., Lake Charles, La.—Granted motion to take depositions in re movant's application for construction permit (B3-P-3626).

Palladium Publishing Co., Benton Harbor, Mich.—Granted motion for leave to amend its application for construction permit (B3-P-3626).

WICA—WICA, Inc., Ashtabula, Ohio—Granted petition re-WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.

WRAL—Capitol Broadcasting Co., Inc., Raleigh, X. C.—

WLAP—American Broadcasting Corp, Lexington, Ky.—

WLLH—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Ordered application for assignment of license of Station WPRP.

Sabin Area Broadcasting Corp., Orange, Texas—Granted motion to dismiss without prejudice its application for construction permit (B2-P-4011).

WCA—WCA, Inc., Ashatabula, Ohio—Granted petition requesting leave to intervene in the consolidated hearing on applications of WLAP, WCPO and Queen City Broadcasting Inc.

Constitution Publishing Co., Atlanta, Ga.—Granted petition to amend its application (B3-P-4086), so as to change pattern of directional antenna, and to specify frequency 1090 kc., instead of 1450 kc., and to add Ivan E. Newman to the Corp. as a director and stockholder, and to make other changes. The amendment was accepted and the application as amended, was removed from the hearing docket.

KXO—Valradio, Inc., El Centro, Calif.—Construction permit to increase power of Station WPRP to 5 KW (Docket No. 6081), for approval of transmitter site (Docket No. 6107), and for change in transmitter site for 250 watt operation (Docket No. 6081) were dismissed, since there was no evidence presented in support of these requests.

APPLICATIONS ACCEPTED FOR FILING

600 Kilocycles

WMT—American Broadcasting Stations, Inc., Cedar Rapids, Iowa—License to cover construction permit (B4-P-4002) which authorized installation of a new transmitter.

630 Kilocycles

NEW—Queen City Broadcasting, Inc., Cincinnati, Ohio—Construction permit for a new standard broadcast station to be operated on 630 kc., power of 5 KW, directional antenna and unlimited hours of operation. Amended: to change requested power from 5 KW day and night to 5 KW day and 7 KW night, and to make changes in directional antenna system and change transmitter location.

710 Kilocycles

WGHS—The Fort Industry Co., Miami, Fla.—Construction permit to increase power from 10 KW to 50 KW, install new transmitter and directional antenna for day and night use, and change transmitter location. Amended: to install new transmitter.

730 Kilocycles

NEW—State Broadcasting Co., Oklahoma City, Okla. (P. O. Oklahoma City, Okla.)—Construction permit for a new standard broadcast station to be operated on 730 kc., power of 1 KW and daytime hours of operation.

810 Kilocycles

NEW—Tri City Broadcasting Co., McKeesport, Pa. (P. O. 3226 Versailles Ave., McKeesport, Pa.)—Construction permit for a new standard broadcast station to be operated on 810 kc., power of 1 KW and daytime hours of operation.

1200 Kilocycles

NEW—Charles A. Sprague, Glenn R. Thayer and William W. Behrman, d/b/a WMIL Broadcasting Co., Milwaukee, Wis.—Construction permit for a new standard broadcast station to be operated on 940 kc., power of 250 watts and daytime hours of operation. Amended: to show William W. Behrman a partner instead of Eleanor M. Behrman, to change frequency from 940 to 1200 kc., and make changes in antenna system.

1230 Kilocycles

KXO—Valradio, Inc., El Centro, Calif.—Construction permit to install new transmitter, new vertical antenna and ground system and change transmitter and studio locations. (Continued on next page)
FM APPLICATIONS ACCEPTED FOR FILING

NEW—The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by FCC and coverage to be determined.

NEW—Observer Publishing Co., Washington, Pa.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency and coverage to be determined. Amended to specify frequency as Channel #219, 99.7 mc, coverage as 9,650 square miles, population as 2,259,185 and specify transmitter site and type of transmitter.

NEW—Fred B. Wilson & Channing Cope, d/b as Wilson & Cope, Atlanta, Ga. (Temp. P. O. 75 Marietta St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency and coverage to be determined. Amended to change name from Fred B. Wilson & Channing Cope to Fred B. Wilson & Channing Cope, d/b as Wilson & Cope.

WMLT—George T. Morris and J. Newton Thompson d/b as Dublin Broadcasting Co., Dublin, Ga.—Voluntary assignment of license to George T. Morris tr/a as Dublin Telecommunication Laboratories, Inc., New York, N. Y. (P. O. 67 Broad Street, New York, N. Y.)—Construction permit for a new non-commercial educational broadcast station to be operated on frequency 930 mc., power of 30 watts and unlimited hours of operation.

Federal Telecommunication Laboratories, Inc., New York, N. Y. (P. O. 67 Broad Street, New York, N. Y.)—Construction permit for a new non-commercial educational broadcast station to be operated on frequency 930 mc., power of 30 watts and unlimited hours of operation.

FEBRUARY 18, 1946—133
Livingston Broadcasters, Livingston, Mont.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, unlimited hours of operation.

KLCN—Harold L. Sudbury, Blytheville, Ark.—Construction permit to change frequency from 900 kc., to 570 kc., change hours of operation from daytime to unlimited using power of 1 KW day and 500 watts night, install directional antenna for night use and change transmitter location.

KASA—Southwest Broadcasting Co., Elk City, Okla.—Transfer of control of licensee corporation from Hoyt Houck and Walter G. Russell to Lonnie J. Preston.

NEW—Copper City Radio Co., Inc., Butte, Mont.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

NEW—Yellowstone Amusement Co., Livingston, Mont.—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

Twin City Broadcasting Co., Inc., Augusta, Maine—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

Oneida Broadcasting Co., Rhinelander, Wisc.—Construction permit for a new standard broadcast station to be operated on 1270 kc., power of 250 watts and unlimited hours of operation.

Radio Television Corp., Medford, Ore.—Construction permit for a new standard broadcast station to be operated on 1270 kc., power of 5 KW, directional antenna night and unlimited hours of operation.

No complaints, cease and desist orders, or stipulations were issued this week by the Commission.

**FTC COMPLAINTS DISMISSED**

**Paperboard Products**—The Commission has issued an order dismissing without prejudice its complaint charging National Paperboard Association, Chicago, and its officers and member manufacturers with a combination to eliminate price competition, restrict production and monopolize the manufacture and sale of paperboard and paperboard products.

The complaint also was dismissed without prejudice as to Frederick G. Becker, Inc., Chicago, and its officers, who were charged with participating in the conspiracy.

The Commission entered its order disposing of the case after it had given consideration to the respondents' petition and motion to dismiss the complaint. (5359)

**Waxed Paper Products**—The Commission has issued an order dismissing without prejudice its complaint charging American Waxed Paper Association, its officers and member manufacturers with a combination to restrain trade and fix prices in the sale of waxed paper products.

The order of dismissal was issued after the Commission had given consideration to the respondents' motion to dismiss the complaint. (5149)

**Federal Trade Commission Docket**

---

FEBRUARY 18, 1946—134
Radio and electronic equipment is expected to provide a relatively small proportion of commercially salable material, since it includes not only many special types of radio transmitters, receivers, tubes, and parts, but also radar and other related devices for which no large peacetime use has yet been developed.

"Electrical machinery and equipment comprises a larger proportion of items of standard design and general industrial applicability, such as motors, generators and transformers, for which a definite market can be found.

"The long-deferred demand for civilian type radio and electrical products, a high postwar level of general industrial activity, and the development of new applications for electronic and electrical equipment will play a part in providing a market for salable surplus radio and electrical equipment. The marketability of surplus equipment differs widely as between detailed categories."

"The Government bought approximately 19 billion dollars worth of radio and electrical equipment for war purposes, the report said. Of this, about 10.7 billion was for radio, electronic and communication equipment, and 8.3 billion for electrical machinery and equipment. Much of the latter represents installations in Government-owned industrial plants, and may not appear separately as surplus. Wartime expansion of plants in the radio and electrical equipment fields cost about $900,000,000, of which approximately $565,000,000 represented investment of Government funds. Thirteen of these plants cost the Government more than $5,000,000 each, representing a total expenditure of about $87,000,000. Five of these plants have been declared surplus, and one has already been sold to its wartime operator.

"The interim character of the report," SPA explained, "is dictated by the fact that, while certain disposal procedures are in effect, a wholly adequate plan of disposal has not yet been fully completed. It therefore appears advisable to inform the Congress of the present status of disposal procedures and measures under consideration for improving and supplementing them, leaving to a later date the description of a complete program."

Discussing disposal methods, the report said, "In the case of radio and electronic equipment, a system of central evaluation panels is used to aid in the preliminary determination of salability, whereas for electrical machinery and equipment, there are salvage and inspection committees located in the regional offices of the disposal agency. The improvement of these systems is now underway.

"Direct sales methods are used for the disposal of radio and electrical equipment, particularly where priority claimants are involved. The additional methods of disposal used for radio, electronics and communication equipment differ substantially from those used for electrical machinery and equipment.

"The basic method of disposal in the case of radio and electronic equipment involves agreements entered into by"
the disposal agency with the original manufacturer of the equipment, or with a manufacturer who is willing to handle other products besides his own. This channel is used because of the multiplicity of parts, their highly technical nature, coupled with requirements for inspection, testing, and reworking, for which the manufacturers have specialized facilities and personnel.

"The manufacturer-agents are reimbursed for all reasonable expenses and receive a commission except on sales to priority claimants. Among the drawbacks to this method have been the comparatively limited industry participation, and the high cost to the Government of inspection and handling of equipment. This suggests the employment by the disposal agency of increased direct selling or of additional sales methods such as the utilization of commercial and sales organizations under merchandising agency contracts.

"In the disposal of electrical machinery and equipment, the predominant method at the present time is that of direct sale to priority claimants and to the general public. For bulk items, the method of sale through dealers is also widely employed, either by negotiation, upon a bid basis, or upon a fixed price basis. In the latter case, where items are in long supply a discount may be offered to the dealers. It is probable that prompt and wide distribution may be facilitated by additional methods, such as sale through agents or approved brokers upon a commission basis.

"The disposal of radio and electrical equipment presents handling and merchandising problems of great complexity, and existing procedures are not wholly adequate. A later report will present a disposal program embodying contemplated improvements."

The status of government-owned radio and electrical equipment plants costing the government more than $5,000,000 each is shown by the following table:

AMATEURS CITED IN WAR OBSERVING PROJECTS

During the war, radio amateurs of the United States participated in three observing projects sponsored by the Bureau of Standards, the object of which was to obtain basic data urgently needed in making radio propagation predictions for the Allied Armed Forces. The first two projects called NBS-ARRL projects I and II, were organized under the joint auspices of the National Bureau of Standards and the American Radio Relay League, the national organization of the radio amateurs of the United States, and most of the participating observers were ARRL members. The third project, known as the WWV Observing Project, was organized independently of the NBS-ARRL projects, but was later joined by a number of NBS-ARRL Project II participants.

NBS-ARRL Project I was started on July 1, 1941, and

(Continued on next page)
investigation of all methods of relaying—whether by research and engineering program which calls for the check on the possibility of increased relay range of a station at varying altitudes. The results of this project were also used in checking predictions of world-wide radio propagation conditions.

Most of the participants in these projects had regular full-time jobs and were therefore able to make their observations only during spare time. Many went without sleep to maintain their observing schedules and used precious hours on Sundays and days off, but they did it gladly as a patriotic service without thought of pay or recognition.

Through these projects United States radio amateurs contributed data to the war effort that could have been obtained in no other way. In addition, they have increased the sum total of knowledge of radio wave propagation and communication, and this will benefit everyone in days to come.

TELEVISION RELAYED FROM BLIMP

Schenectady, N. Y.—General Electric engineers have been experimenting with television relay equipment installed in a blimp operating between Schenectady and New York to determine the practicability of the idea and to check on the possibility of increased relay range of a station at varying altitudes.

The experiments are part of a broad General Electric research and engineering program which calls for the investigation of all methods of relaying—whether by ground or air “booster” stations—to arrive at the most economical and dependable system for the widest distribution of television and FM radio programs.

Results from the blimp experiments are not conclusive as yet, having been temporarily postponed because of the strike at G.E., but expected to be continued when the strike is over.

General Electric worked with Globe Wireless, Ltd., in the relay tests, using a blimp of the Goodyear Tire and Rubber Company. This was operated between Schenectady and New York City over territory which G.E. and Globe Wireless will operate an experimental radio relay network. Early experimental work on the relay network was carried on by G.E. and the International Business Machines Corp. The latter has transferred its work in the project to Globe Wireless, Ltd., where it will be carried on under the supervision of Vice President Walter S. Lemmon.

NEW MEXICO TAX CASE HEARD IN ALBUQUERQUE

The New Mexico tax case (see NAB Reports, vol. 13, pp. 520 and 562), in which stations KSUN, Las Vegas; KGFL, Roswell; KWEW, Hobbs; KTVM, Tucumcari, are contesting the State’s attempt to impose upon stations a privilege tax, and the requirement that stations take out a license to do or continue to do business in the State, came to trial before a three-judge Federal court in Albuquerque, Monday and Tuesday (18-19).

The court took the matter under advisement, and requested the plaintiff stations to file an additional brief within ten days.

The case was argued by counsel headed by Lake Frazier for the stations, with John Morgan Davis and Milton J. Kibler of NAB, assisting in the role of friend of the court.

On the first day of the trial, Howard Frazier, NAB engineering consultant, testified and W. E. Whitmore, manager, KGFL, testified as to cards and letters received from as far away as New Zealand and the court received the testimony.

Mr. Kibler is going on to Roswell where State trials concerning the same situation will be held.

PRINTING TRADES PRESIDENT WANTS RADIO PENALIZED

Renewing a 1941 try, the International Allied Printing Trades Association is again attempting to impose upon radio a franchise tax, patterned to confine net profits of stations to a 15 per cent limit, based on actual sales.

A letter has been sent to the association membership by John B. Haggerty, president of the IAPTA, who suggests that the members, said to total 190,000 skilled craftsmen in the United States and Canada, urged their Congressional representatives to give favorable consideration to the tax.

House passage was obtained on an earlier measure designed substantially to attain this same end, but failed to pass the Senate.

In the renewed attempt, Mr. Haggerty describes radio as being in unfair competition with a large segment of the printing industry. In his letter he quotes alleged well-disposed expressions of members of both branches of Congress, “favoring the levying of a franchise tax.” In large measure, these quotations were lifted from the recent appropriations hearing, during which former FCC Chairman Paul A. Porter was cross-examined.

It was stated by Mr. Haggerty that he understood the House Ways and Means Committee will soon take under consideration the formulation of a new tax law and he points out that one means of reducing the public debt would be for the government to impose the radio franchise tax.

Suggested legislation would provide that all net profit in excess of 15 per cent on the actual investment, with a limitation of not more than $25,000 for salary, bonuses, etc., to any one executive be skimmed off through taxes.

This latest campaign to penalize radio, companion to the press in the vital function of safeguarding freedom of speech, is accompanied by an explanatory contention that radio advertising before the war had deprived multitudes of printing trades craftsmen of job opportunities.
through a shifting of national advertising from printed publications to the newer medium of radio.

The International Allied Printing Trades Association is made up of the powerful International Typographical Union, International Printing Pressmen and Assistants Union, International Brotherhood of Book Binders, International Stereotypers and Electrotypers Union, and International Photo-Engravers.

SENATE CONFIRMS PORTER AS OPA HEAD

President Truman’s selection of former FCC Chairman Paul A. Porter as the head of OPA to succeed Chester Bowles, who was at the same time named Chief of the Office of Economic Stabilization, was confirmed by the Senate Thursday (21).

FCC EXTENDS TIME ON FILING OF STATION TRANSFER BRIEFS

The Commission has issued the following order:

Docket No. 7071

In the Matter of Promulgation of Rules and Regulations concerning the procedure to be followed by the Commission in passing upon assignments of license or transfers of control of corporate licensees.

ORDER

The Commission having under consideration a request of National Association of Broadcasters, dated January 31, 1946, for a thirty-day extension of time within which briefs might be filed in the above-entitled cause, It is Ordered, This 6th day of February, 1946, that the request is granted and that the time for filing briefs is extended until March 15, 1946.

FEDERAL COMMUNICATIONS COMMISSION

T. J. Slowie, Secretary.

FCC NOTIFIES DON LEE SYSTEM NETWORK RULES APPLY

The Commission has issued a release containing the following letter dated Feb. 15, signed Secretary T. J. Slowie, by direction of the Commission, and addressed to the Don Lee Broadcasting System, Hollywood, California:

“It appears upon examination of the files of several of your affiliated stations that you have been indulging in practices which may be in violation of the provisions of the Commission’s regulation 3.104, relative to network option time, both in failing to give your affiliates the 56-days’ notice of the exercise of your option which is required by the said regulation, and in compelling your affiliates to option to you more than the permissible maximum number of hours in each segment of the broadcast day.

Accordingly, the Commission has today designated for hearing upon issues to be specified the pending applications for renewal of your licenses for the operation of station KGB at San Diego and station KDB at Santa Barbara. You are directed, also, pursuant to the provisions of sections 1.362 and 2.220 of the Commission’s rules and regulations, to file within thirty days from the date of this letter applications for renewal of your present licenses for the operation of station KFRC at San Francisco and stations KHJ and KHJ-FM at Los Angeles.”

COMMISSION APPROVES WFIL SALE—DURR DISSENTS

The sale of WFIL and WFIL-FM, Philadelphia, to Triangle Publications, Incorporated, was approved on Monday (18) by the Commission. Under the AVCO ruling, the transaction was opened to competitive bidding but no one other than the purchaser, publisher of the Philadelphia Inquirer and other publications, submitted a bid. The Commission has issued the dissenting remarks of Commissioner Durr in the following release:

“Section 310(b) of the Communications Act of 1934 expressly provides that no broadcast station license shall be transferred 'unless the Commission shall, after securing full information, decide that said transfer is in the public interest, and shall give its consent in writing.' (Italics supplied in the release.)

"In my opinion, the Commission, in approving the transfer of licenses here involved, did not have before it that full information which the Act so clearly requires. On the contrary, the limited information presented to the Commission serves, in itself, to point to the need for further inquiry.

"It is true that the action taken in this case is not inconsistent with the majority approval approving the transfer of control of the Crosley Corporation to the Aviation Corporation (FCC Docket No. 6707), but the doctrine of stare decisis does not apply to administrative agencies and the Commission cannot, by its own decision, minimize the statutory responsibility imposed upon it by Congress.

"The radio facilities involved in this proceeding are standard broadcasting station WFIL which operates on 560 kc. with 1 kw. power, unlimited time; station WFIL-FM, a frequency modulation station, and two relay stations, all in Philadelphia, Pennsylvania. The present book value of all the broadcast facilities being transferred is, according to information furnished by the Commission’s Accounting Department, $1,48,192 and the original cost, $965,000. During the year 1945, the transferor earned net profits, before federal income taxes, of $310,435 on its broadcast operations, and for 1944, such profits amounted to $308,633. Since FM stations are, at the present time, generally operating at a loss because of the limited number of FM receivers in the hands of the listening public, it is reasonable to assume that the net profits attributable to the standard broadcast operations alone were even higher than the figures given.

"The consideration being paid for the properties is $1,900,000. Upon consummation of the transaction, transferee proposes to record on its books as ‘intangible broadcast property,’ the amount of $391,308, representing the difference between the book value of the tangible properties and their replacement costs estimated at approximately $365,000. The remaining $1,500,000 of the consideration, after certain adjustments, will be recorded as ‘good will.’

"When broadcast facilities having a total book value of a little more than $148,000 sell for $1,900,000, and when a relatively small one kilowatt station earns over $300,000 net profits, before federal income taxes, in one year, two questions would seem logically to present themselves: ‘1. Is the purchaser buying only the seller’s properties and the going-concern value created by the seller’s own investment and effort, or is it buying also—and principally—a license to use one of the limited number of standard broadcast channels assigned to the Philadelphia agency and an assured right to use one of the limited FM channel assignments to the same area which might otherwise have to be sought in competition with other applicants? Radio channels are public property and it is the responsibility of the Commission to see to it that they do not become the subject of private traffic struck.

"2. What effect will the higher price being paid for the facilities have upon the operations of the transference in the public interest, convenience and necessity? It is

(Continued on next page)
reasonable to assume that anyone purchasing broadcasting facilities expects to earn at least a reasonable return upon his investment and the higher the investment, the greater will be the pressures toward excessive commercialization of broadcast time. In view of the extraordinarily high profits earned by a relatively small station, it is pertinent to inquire whether such profits have been obtained by rendering an extraordinarily good public service, or rather, at the expense of the public interest, convenience and necessity which all broadcast licensees are required to serve.

"In all applications for broadcast station licenses, the Commission requires detailed information as to the proposed program service of the applicant and specific information as to the amount of time to be devoted to commercial and sustaining programs, recorded and live programs and time to be devoted to educational, religious, civic, fraternal, and other public purposes. Yet in passing upon the transfer application in the present case, the members of the Commission had before them no information of any kind whatsoever concerning the program service now being rendered by the transferor or the proposed service of the transferee, except a statement of the transferee, paraphrased in a staff report that the "primary objective in the acquisition of the station is to do as effective a public service in the broadcast field as is now being done by the newspaper' (the Philadelphia Inquirer, which is owned by transferee along with several magazines, the New York Morning Telegram, and the Daily Racing Form).

"In view of the concern of the Commission with an applicant's proposed program service where the Commission itself is selecting the licensee, it would seem that at least equal concern should be manifested in instances where the licensee is being selected not by the Commission but by one retiring from the broadcasting business."

---

**FM Department**

**TRIAL PATTERN FOR FM ASSIGNMENTS OKAY, SAYS FCC**

On Monday (18) the Commission announced that after three months of experience in making assignments of FM channels, it appears that the tentative allocation plan being followed provides the necessary degree of flexibility and is working out satisfactorily.

In issuing the plan on December 19, 1945, the Commission pointed out that the plan was being published as a guide. "The Commission wishes to emphasize that this allocation pattern is tentative only, that the channels listed for particular cities (and their areas) will not be followed in a hard and fast manner and that departures will be made from the plan whenever it is found desirable or necessary to do so," the allocation announcement stated.

As examples of the manner in which this arrangement is enabling the Commission to assign channels according to the special needs of various areas, the Commission cited the following instances:

One of the 12 metropolitan channels tentatively allocated to Washington, D. C. area has been assigned to an applicant in Winchester, Va., leaving 11 channels in Washington for 14 applicants. A hearing is scheduled for these applications on March 11.

One of the 15 metropolitan channels tentatively allocated to the Philadelphia area has been assigned to an applicant in Atlantic City, N. J. Seven applications are pending in this Philadelphia area.

One of the five metropolitan channels tentatively allocated to the York, Pa., area has been assigned to an applicant in Hagerstown, Md. Two applications have been granted in York and one is pending.

Similar readjustments will be made from time to time as circumstances may require.

As of today, conditional grants have been assigned to 328 applicants, in addition to the 53 grants in the new band to pre-war licensees; 120 applications have been set for hearing, leaving 284 applications still to be acted on.

**330 FM GRANTS**

The FCC has granted seven additional FM stations for the State of Maryland, six in Baltimore and one in Annapolis, bringing the total FM conditional grants to 328. It also designated for hearing applications for four stations in other areas. The grants are as follows:

<table>
<thead>
<tr>
<th>City</th>
<th>Grantee</th>
<th>Interest in Standard Station</th>
<th>Type of FM Station</th>

</tbody>
</table>

**FEBRUARY 25, 1946 — 139**
The effect of these conditional grants is to announce the fact that the Commission has examined the qualifications of the respective applicants, has been satisfied with respect thereto, and has made available a channel for each grantee. The Commission will now examine each application for its engineering details, and in each individual circumstance a grantee may be requested to file within a period of 90 days of such request such additional engineering and other data as may be necessary.

Under this procedure grantees are enabled to proceed promptly with their preliminary plans for obtaining certain items of equipment, programming and other details necessary to the establishment of their proposed stations. The proposals of each grantee relating to transmitter power and antenna height are still under review, and each will be notified if any further data is necessary in this connection.

Amendment:

"In the announcement made February 4, KALE, Inc., was shown to have received a grant of a Metropolitan station. The Commission has modified this to Metropolitan, possibly rural type of station, instead.

SET FOR HEARING

The following are applicants competing for the six remaining channels for the Pittsburgh, Pa., area. (Eight channels have been made available for Pittsburgh, but two have already been assigned, one to station KDKA-FM and the other to WJXT, existing stations.) WCNE, Inc.; Scribner Howard Radio, Inc.; Allegheny Broadcasting Corp.; West Virginia Radio Corp.; Pittsburgh Radio Supply House; David Rosenblum, tr/ as Butler Broadcasting Co.; Eagle Printing Co., Inc., Butler, Pa., and Beaver County Broadcasting Corp., Beaver Falls, Pa.

(11 FM metropolitan stations now operating in the New York City area are: WFMN, WQXQ, WABF, WGYX, WFGG (WGHF), WHNC, WINX-FM, WBAM, WABC-FM, WAP-FM, and WAWW.)

Applicants for the Dayton-Springfield, Ohio, area, competing for the five channels there are:

Cohen Brothers Constructs Modern Radio Theatre Due to Success of WMBR Production, "Styles in Tempo"

"Styles in Tempo," a creation of the program department of WMBR, the CBS affiliate in Jacksonville, Fla., has met with such success in department store merchandising that Cohen Brothers, the sponsor, has constructed within the "big store" a completely equipped and beautiful radio theatre. Frank King, WMBR president and general manager, who has closely supervised the entire production, admits that Cohen’s has gone to considerable expense along with the radio station in the production of this 8-minute day-a-week broadcast from Jacksonville’s largest store. Col. R. L. Stitner, Cohen’s vice president and general merchandise manager, has cast it to that “his” “Styles in Tempo” has received the best of everything, including full page newspaper promotion pieces.

Stars of Show

Kay Stanley, “glamor gal” and fashion expert, makes a terrific impression with her sophisticated manner, tossing off an occasional bit of smooth repartee with the boys of the cast, and modeling the Cohen Brothers lovely fashions like a Powers’ model. (Mr. Powers, Kay is “under contract” to WMBR.)

The cast consists of but five persons, including Miss Stanley; an announcer and a musical trio—but so adept is every member at “doubling” that the radio audience gets the impression that the cast is at least twice its size. Alan Holmes, formerly with Blue Barron and Tommy Tucker orchestras, is director of the musical trio, playing fourteen instruments. Having served as a New York orchestra leader and artist-demonstrator of the Hammond organ, Roger Van Duzer is exceptionally qualified to “double” on the piano and Hammond organ in a manner that is indeed brilliant. Ralph Munroe, Jacksonville’s widely known accordion artist and teacher, proves delightfully versatile on the accordion and vibraphone.

"Styles in Tempo," now going into its third 13-week cycle, is believed to be the first program of its kind to succeed in the South. New audience participation idea will call for SRO signs. "Intelligent sales planning, working in close harmony with good radio programming, results in a production that has high sponsor and station identification."
prices asked for a 15-minute musical show today run more than "time" for one thing, and, secondly, we can build a show from our transcribed library which will satisfy the sponsor; and we can do it at a cost within reason, and, thirdly, with such wonderful "talk" shows available on the network on a cooperative basis at a reasonable cost, it is virtually impossible for our salesmen to go out and face a sponsor with an asking price of $10.00 for a 15-minute transcribed show on a five-day-a-week basis.

I believe that any small market station will pay $2.50 each, for a 5-time-a-week syndicated show and, at that price, will be able to sell it, providing, of course, that the show is good and is salable. I also feel that $4.00 for a 3-time-a-week show is not out of line.

As to your question (see NAB REPORTS, February 18th issue) about using shows that have been used on larger stations, the answer is unequivocally "Yes." Our audience is loyal to us and, therefore, no matter how often a show may have been played on large city stations, even in nearby areas, it is still a virgin show in our own area, so that will have no bearing on its value to us.

Our experience with syndicated transcribed shows has been that we have sold very few. At the present time, we are running Five Minute Mysteries, three days a week, Dick and Jeannie, five days a week, and we have already sold Easy Aces, starting in March.

I believe that you are doing a service, not only to the stations, but to the transcription people in making this study. You will be able to convincingly prove, after you get replies from the various stations, that transcription producers can tap a large market and thus get their marginal income that they do not now get by making these shows available at a reasonable figure.

John Brown University Radio Courses

KUOA, 5000 watt independent, Siloam Springs, Ark., operates as a part of the John Brown University vocational training plan, which includes all phases of radio station work. The University curriculum offers bachelor of arts in speech for announcers; bachelor of science with major in engineering; and is limited to students enrolled in the John Brown University. Many graduates take their places in the industry.

School work is standard college material. Every student is required to work three or four hours each day on KUOA which operates as a commercial broadcast station. Station has a staff of twenty-five students, and salaried executives. Students get more than the usual day to day work of running the station because it is non-network. The program has been in operation with KUOA for more than ten years and is limited to students enrolled in the John Brown University. Many graduates take their places in the industry.

Radio Cuts in on Newspaper Ad Budget

"Radio Wins a New Friend" in Bennett Furniture Co., Clarkdale, Miss. WROX, the ABC affiliate, is doing an excellent job. The furniture concern has cut newspaper budget to the bone and now uses 19 news periods, a 30-minute Children's Hour, and a one-and-a-half hour Barn Dance weekly. David M. Siegel, WROX station manager, and staff are increasing the Delta's appreciation of broadcast advertising with such progressive activity. (Radio Showmanship, February issue.)

Joske Clinical Test

The Joske Radio Advisory Committee met at NAB headquarters last week to draw up a format, discuss current data, and establish over-all policies to be followed. All material, before being released to the industry, must be approved by Joske's Department Store, San Antonio, Tex.

Attending the Washington session were Cecil Beaver, WOAI San Antonio, advisory committee chairman; Lewis H. Avery, head of the station representative firm bearing his name; Walter Johnson, WTIC Hartford; Frank E. Pellegri, NAB director of broadcast advertising; Robert C. Conley, Hugh M. Higgins, Miss Lee Hart and J. Allen Brown of the NAB executive staff. Next committee meeting is set for New York on March 12th.

Programming

OWMR ALLOCATIONS

The following government agencies have requested help from the Media Programming Division of the Office of War Mobilization and Reconversion for these programs:

Department of Interior—Says "Easy on Travel to Alaska"

According to Willett Kempton, Interior's radio director, Alaskan officials are worried over rose-colored publicity stories about the Territory; they are fearful of a summerland rush which would prove disastrous to the Territory, if too many would-be pioneers head for the North Country without adequate preparations to survive a life of rugged self-reliance. A recent survey shows that several hundred thousand people are planning to head to Alaska in the very near future.

Six live spots and a fact sheet on opportunities for the average man in Alaska are being sent to all stations by the Radio Section of the Department of the Interior. Pitch of the radio spots is that there are opportunities in Alaska for men with patience, background and capital, but gold nuggets cannot be picked up at random along the over-rated Alaskan Highway. Pay-off is to get all the facts before starting to seek your fortune on America's last frontier.

These might be plugged during the week of March 11 to 17, and any time thereafter.

Department of Agriculture—Asks Observance of 4-H Club Week (March 2-10)

This is the week the 1,750,000 rural boys and girls in 4-H Clubs nationwide have set to bring life in each local community to their "win-the-peace" goals.

The Department of Agriculture is sending directly to all station managers announcements explaining the meaning of the 4-H Club. Stations covering rural areas will be especially interested in featuring the spots.

U. S. Public Health Service—Asks "Help for Hospitals"

The Hospital crisis is still acute, and will continue to be so for many months. Almost 70% of all hospitals are dangerously understaffed. Badly needed are nurses, nurses' aides, non-nursing personnel, and student nurses.

U. S. Public Health Service is sending announcements directly to you. Please use them. This is Important!

Office of War Mobilization and Reconversion—National Housing Agency—Veterans' Administration—Office of Price Administration . . . to mention a few of the agencies . . . are all 100% behind "Lick the Housing Shortage!"

The housing shortage continues to be a national crisis . . . but veterans are hardest hit. Announcements have recently been mailed to you. Continue to plug "Give veterans first chance on vacations"; "Share your home with a veteran"; and "Seek expert advice before you build or buy." This program is national, immediate, and along with "Help for Hospitals", affects the lives directly or indirectly of a vast amount of our population. You have

(Continued on next page)
helped, and still can help, by frequent use of the spots already sent you.

_The Departments of Agriculture, State and Commerce Come Forward with—"Food for Peace!"_

Much of the world is so near starvation President Truman has ordered that drastic steps be taken to conserve food—particularly bread. Administrative action has been taken by the Agriculture, State and Commerce Departments. The Advertising Council and the Media Programming Division of OWMR are now making plans for a nationwide campaign. Every housewife will be asked to do three things—first to purchase no more food than she needs—second to serve no more than will be eaten—and third to store all food so none will spoil. Simultaneously campaigns will be directed to industry and to farmers.

Spot announcements are now being prepared and will soon be sent to you.

The National Association of Broadcasters' continuing cooperation is proving most helpful. Any suggestions from Station Managers to the Media Programming Division of Office of War Mobilization and Reconversion as to the type of announcements, or Fact Sheets submitted would be appreciated.

AD COUNCIL ALLOCATIONS—MARCH 4-10

Following are the public interest campaigns scheduled by The Advertising Council on the Network Allocation and National Spot Plans during the week of March 4-10, 1946.

A brief resume of each Fact Sheet is given for your information.

### 1946 Red Cross Fund Drive (Fact Sheet No. 14)

To the people of the United States from Gen. Dwight D. Eisenhower, Chief of Staff, United States Army: "The Red Cross activities in Army hospitals and the program of clubs, recreation centers and welfare must go on through the period of occupation according to changing needs. Normal amenities of life are so lacking in the occupied zones that the American soldier has, in most cases, only what we send him. I express the earnest hope of the Army that the American public will continue its generous support of the Red Cross during 1946." This message from General Eisenhower outlines the continuing responsibilities of the Red Cross to the men who made peace possible. To them must be added the victims of unforeseeable floods, fires, tornadoes and other disasters right here at home whom the Red Cross must stand ready to provide with emergency food, clothing and shelter as it has so faithfully done in the past. During the month of March the American people will be asked to contribute $100,000,000 needed by the American Red Cross to carry out this vast program of service to our occupying forces, hospitalized servicemen, veterans and civilians in need.

### Hospitals Need Help (Fact Sheet No. 9)

Today, hospitals all over America are being forced to turn away patients because of a shortage of nurses and non-nursing personnel. Two out of three hospitals have had to close beds, entire wards and operating rooms. Many nurses are greatly overworked and many have to do non-professional tasks, thereby cutting down the number of hours of nursing care per patient. The situation is worse even than during the war and if allowed to continue, it will seriously affect the physical and mental health of the nation. In order to help relieve the nursing shortage inactive graduate registered nurses should be urged to check with their nearest hospital at once, and to return to duty if and where needed; young women between the ages of 17 and 35 should be reminded that nursing is a lifetime career, and urged to apply to their local hospital for complete information concerning Student Nurses Education; inactive Red Cross Nurses' Aides should be urged to return to duty; and it should be pointed out that hospital jobs are open for such auxiliary and non-nursing personnel as laundrymen, chefs, electricians, plumbers, janitors, orderlies.

### Homes for Veterans (Fact Sheet No. 5)

America faces a critical housing shortage—and its veterans are the worst sufferers. They feel the pinch of the shortage more acutely because they interrupted their lives to go into the Armed Services. It is simply a matter of fair play to help them, in every way possible to locate homes in which they can live with their families as they return to civilian life. It is estimated that more than two million veterans' families will be looking for places to live in 1946. Until construction gets rolling, by all means the most important source of housing for veterans consists of vacancies which become available in the existing housing supply. Urge listeners to help ease the housing situation by "staying put" if they possibly can so that a maximum number of veterans can find living places in the existing housing supply, sharing their homes with veterans' families if they can possibly do so and listing vacancies and houses for sale at the veterans' housing referral center, if one exists in their community, so that veterans can get first chance at them.

### March 15th Income Tax (Fact Sheet No. 13)

Before the night of March 15th, about 50 million people are required by law to file their 1945 income tax returns. As it has demonstrated in the past, radio can be especially helpful in overcoming false impressions of many people that recent legislation or the pay-as-you-go system excuses them from filing, and can effectively assist both its listeners and the Government in establishing the simple facts of "who, what, when, and where" in connection with March 15th tax returns. Remind listeners that they must file a final tax return by March 15 if their income was $500 or more during 1945. The only exception is enlisted personnel who served in the armed forces during the year. Remind them, too, that withholding does not relieve anyone of the responsibility of filing. Tell them where they can get forms if they have not already received them and where to file. Urge them to file their returns early—especially those who may require assistance in filling out their returns. Urge them to do it today.

---

**Miscellany**

**KOIN MAN IN DEMAND AS SPEAKER**

Portland, Ore.—A speaking itinerary of Red Cross talks which culminates before a combined meeting of the Chamber of Commerce and civic clubs in Salem, Ore., March 4, is making a prominent platform figure out of Marc Bowman, promotion director of KOIN, Portland.

During the war Bowman served overseas for two years with the public relations department of the American Red Cross. Since his return last August, he has been kept busy addressing audiences throughout the Northwest. In addition to the Salem engagement, he has dates before county Red Cross chapters and service groups in Baker, Ontario, and The Dalles, Ore.

DOROTHY LEWIS APPOINTED TO WOMEN'S COUNCIL

The National Council of Women has announced the appointment of Dorothy Lewis, NAB Coordinator of Listener Activity, to the post of Vice Convenor of Radio for the International Council of Women, and states that she has been invited to attend the first world congress of the organization in five years, to be held in Brussels in June. About 200 women from all countries have received

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, February 25. They are subject to change.

Monday, February 25

WREM—The WREM Broadcasting Co., Topeka, Kans.—C. P. 1250 kc., 5 kW, night, 5 kW day 8-KPBU.
NEW—Midwest Broadcasting Co., Milwaukee, Wis.—C. P. 1250 kc., 5 KW, unlimited DA-day and night.
WGL—Farnsworth Television & Radio Corp., Fort Wayne, Ind.—C. P. 1250 kc., 1 kW, unlimited DA-day and night.
NEW—Homer Rodeheaver, Winona Lake, Ind.—C. P. 1250 kc., 1 kW, unlimited DA-night and day.
NEW—I. K. Corkern, Bogalusa, La.—C. P. 1490 kc., 250 watts, unlimited.
NEW—John L. Plummer, tr/as, John L. Plummer Enterprises, Bogalusa, La.—C. P. 1490 kc., 250 watts, unlimited.
NEW—Joseph Triner et al., d/b as Village Broadcasting Co., Peoria, Ill.—C. P. 1350 kc., 5 KW, unlimited DA-day and night.
NEW—Central Louisiana Broadcasting Corp., Alexandria, La.—C. P. 1350 kc., 5 KW, unlimited DA-night and day.
NEW—Associated Electronic Enterprises, Woonsocket, Rhode Island, on March 1, 1946
NEW—Donald W. Reynolds, Ft. Smith, Ark.—C. P. 1230 kc., 250 watts, unlimited.

Tuesday, February 26

Further Consolidated Hearing

Before Mr. Diebler, Municipal Room, City Hall, Altoona, Pennsylvania
NEW—Altoona Broadcasting Co., Altoona, Penna.—C. P. 1230 kc., 250 watts, unlimited.
NEW—Roy F. Thompson, tr/as Thompson Broadcasting Co., Altoona, Penna.—C. P. 1340 kc., 250 watts, unlimited.

Wednesday, February 27

Consolidated Hearing

Before Commissioner Wakefield, in Room 211, U. S. Post Office Building, Alexandria, Louisiana
NEW—Central Louisiana Broadcasting Corp., Alexandria, La.—C. P. 1490 kc., 250 watts, unlimited.
NEW—Tri-State Broadcasting Corp., Evansville, Ind.—C. P. 1330 kc., 1 KW, unlimited DA-night and day.
NEW—Tri-State Broadcasting Corp., Evansville, Ind.—C. P. 1330 kc., 5 KW, unlimited DA-night and day.
NEW—Booth Radio Stations, Inc., Peoria, Ill.—C. P. 1550 kc., 1 KW, unlimited DA-night and day.
NEW—West Central Broadcasting Co., Pearsall, Ill.—C. P. 1550 kc., 1 KW, unlimited DA-night and day.

Thursday, February 28

To Be Held Before Commissioner Wakefield, in Room 211, U. S. Post Office Building, Alexandria, Louisiana
NEW—Donald W. Reynolds, Ft. Smith, Ark.—C. P. 1230 kc., 250 watts, unlimited.

(Continued on next page)
Federal Communications Commission Actions

APPLICATIONS GRANTED

WPDQ—Jacksonville Broadcasting Co., Jacksonville, Fla.—Granted construction permit (B5-P-3801) to change frequency from 1270 to 600 kc., install a new directional antenna for night use, and install new ground system; 5 KW unlimited time.

KFVD—Standard Broadcasting Co., Los Angeles, Calif.—Granted construction permit, which authorized installation of new transmitter, etc., for changes in transmitting equipment and antenna. This authority is granted subject to the express condition that no operation of the station except for testing, shall be made between 1200 and 2000 hours daily.

WARM—Union Broadcasting Co., Scranton, Pa.—Granted petition for leave to amend application so as to request frequency 500 kc. instead of 550 kc., and make certain other amendments; removed from hearing docket and re-designated same for consolidated hearing with applications of WRAW (Docket 6869), WGRM (Docket 6866), WGBR (Docket 6867), WFCQ (Docket 6868), and WVL (Docket 6870).

WMOB—S. B. Quigley, Mobile, Ala.—WKRC—Cincinnati Times-Star Co., Cincinnati, Ohio—Granted petition requesting that application of WMOB (B3-P-4484) be consolidated with the hearing on applications of the Agricultural Broadcasting Co., et al., for new FM stations in Chicago, and ordered that the order heretofore issued in the consolidated proceedings be amended to include the application of O. E. Richardson, et al., (B4-P-1956).

Central Illinois Radio Corp., Peoria, Ill.—Designated for hearing application (B1-PH-819) to be consolidated with the hearing on applications of Peoria Broadcasting Co., et al., for new FM stations in Peoria, and ordered that the order heretofore issued in the consolidated proceedings be amended to include the application of Central Illinois Radio Corp.

Bieberbach Broadcasting Corp., Waltham, Mass.—Designated for hearing application (B1-PH-818) to be consolidated with the hearing on applications of Fidelity Broadcasting Corp., et al., and Columbia Broadcasting System, for new FM stations in Boston, and ordered that the order heretofore issued in the consolidated proceedings be amended to include the application of Bieberbach Broadcasting Corp.

Skyland Broadcasting Corp., Dayton, Ohio—Designated for hearing application (B2-PH-820) to be consolidated with hearings on applications of The Crosley Corp., et al., for new FM stations in Dayton and Springfield, Ohio, and ordered that the order heretofore issued in the consolidated proceedings be amended to include the application of Skyland Broadcasting Corp.

ACTIONS ON MOTIONS

Thomas J. Watson, Endicott, N. Y.—Granted motion to dismiss without prejudice application (B1-P-13679) for a new station.

Pilco Radio & Television Corp., Philadelphia, Pa.—Granted motion for leave to amend application for new television station, so as to change the name of applicant Corporation from Pilco Radio & Television Corp., to Pilco Products, Inc., and the amendment was accepted.

WRAI—Capital Broadcasting Co., Inc., Raleigh, N. C.—Granted petition requesting leave to amend application (B3-P-4100) so as to change transmitting site, add exhibits, etc., and the amendment covering the matters was accepted.

WOPH—Radiophone Broadcasting Station WOPH, Inc. (B3-P-4000) so as to specify frequency 850 kc., instead of 750 kc., was considered as a petition to dismiss without prejudice, the petition was granted and application (B3-P-4000) was dismissed without prejudice.

Bernard Lee Blum, Waterbury, Conn.—Granted motion to dismiss without prejudice application (B1-P-4079) for a new station.

(Continued on next page)
Virginia Broadcasting Corp., Roanoke, Va.—Granted petition requesting leave to amend its application (B2-P-3934) so as to reflect a change in the amount of common stock ownership of five of the six stockholders in corporation, and the amendment was accepted.

Booth Radio Stations, Inc., Saginaw, Mich.—Granted petition for leave to amend its application (B2-P-4088), so as to specify the frequency 1240 kc., unlimited time, and the amendment was accepted.

Wipsoid—Penn Thomas Watson, Wilson, N. C.—Granted motion for leave to amend application (B3-P-3954), so as to show that certain officers and directors of applicant corporation have become stockholders in Idaho Radio Corp.; to show new site, etc., and the amendment was accepted.

KGGM—New Mexico Broadcasting Co., Albuquerque, N. M.—Granted motion for leave to amend application (B3-P-3948), so as to make a change in the planning of the daytime directional antenna system, etc., and the amendment was accepted.

KOAC—Oregon State Agr. College, Corvallis, Ore.—Dismissed petition requesting leave to intervene in the hearing on the application of Montana Broadcasting and Television Co., for a new station in Butte, Mont. (B2-P-2303), since it was shown in the record of the action of the Commission that there was a change in the engineering report to reflect the fact that operation is to be unlimited day and night; to show new site, etc., and the amendment was accepted.

WGST—Regents of the University System of Ga., for and on behalf of WLOX and WBBD Co. (Docket 6883).—Granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules and Regulations; conditions.

VMI—Jere M. Moore, Milledgeville, Ga.—Granted modification of CP which authorized a new station, approval of antenna and studio locations at adjacent to intersection of Baxter Blvd. and Forest Ave., Portland, Me. (B1-MP-1827). The permittee hereunder is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission's Rules and Regulations; conditions.

WMVG—Jere M. Moore, Milledgeville, Ga.—Granted modification of CP (B3-P-3883) for new transmitter location at north side of Fishing Creek, west of Wayne St., Milledgeville, Ga., approval of antenna, changes in transmitting equipment and change studio location from 115 East Hancock St., Milledgeville, to Main Academic Bldg. of G.M.C., intersection of Jefferson and Washington Sts., Milledgeville, (B3-MP-1830).

WRAW—Raymond A. Gaul and Harold O. Landis (Transferees) WGAL, Inc. and Keystone Broadcasting Corp. (Transferees), Datiding Broadcasting Co. (Licensee), Reading, Pa.—Granted petition for reconsideration and grant without hearing, of application (B2-TC-45), for consent to transfer control of Reading Broadcasting Co., licensee of WRAW, from Raymond Gaul and Harold O. Landis to WGAL, Inc. and Keystone Broadcasting Corp. (on condition that transfer of control dispose of their interest in station WAZL), for a consideration of $100,000, representing 212 shares or about 57% of voting stock.

WFIL—WFIIL Broadcasting Co., (Assignee), Triangle Publications, Inc. (The Phila. Inquirer Division), (Assignee), Philadelphia, Pa.—Granted (Commissioner Durr dissenting) consent to assignment of license for standard station WFIL (B2-A1-501), FM station WHEL (B1-P-4480) and AM station WHEL (B2-ALRE-39), from WFIL Broadcasting Co. to Triangle Publications, Inc. (The Phila. Inquirer Division), for the consideration of $1,000,000. (No competing application involving the facilities of this station has been filed.)

WHTB—WHTB, Inc., Memphis, Tenn.—Granted renewal of license for the period ending August 1, 1947 (Comr. Durr voting for further inquiry).

WGST—Regents of the University System of Ga., for and on behalf of Ga. School of Technology, Atlanta, Ga.—Granted further extension to March 15, 1948, of temporary license of WGST.

John L. Plummer tr/ as John L. Plummer Enterprises, Bogalusa, La.—Denied petition to consolidate application (Docket 6892) and application of I. K. Corkern (Docket 6894), both requesting a new station at Bogalusa, in hearing with applications of WLOX Broadcasting Co. (Docket 6882) and WGCM Broadcasting Co. (Docket 6881), applicants for a new station in Biloxi, Miss., without prejudice to applicants filing petitions to intervene in the respective proceeding to which they are not parties.

WOI—Iowa State College of Agr. and Mechanical Arts, Ames, Iowa—Granted appeal from decision of Motions Commissioner on January 25 denying SSA to operate from 7:15 to 9:15 CST, February 13, 15 and 18, and granted the SSA.

**FEBRUARY 25, 1946—145**
Federal Communications Commission Applications

APPLICATIONS ACCEPTED FOR FILING

590 Kilocycles

NEW—San Bernardino Broadcasting Co., Inc., San Bernardino, Calif.—Construction permit for a new standard broadcast station to be operated on 900 kc., power of 1 KW, and unlimited hours of operation. Amended: to change name of one director.

WSLS—Roanoke Broadcasting Corp., Roanoke, Va.—Construction permit to change frequency from 1500 kc. to 1300 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for day and night use and change transmitter location. Amended: to make changes in directional antenna during daytime use.

NEW—The Chesapeake Radio Corp., Annapolis, Md.—Construction permit for a new standard broadcast station to be operated on 1140 kc., power of 250 watts and daytime operation. Amended: to change frequency from 1140 to 810 kc.

890 Kilocycles

NEW—Bay Cities Radio Corp., Santa Monica, Calif.—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 1 KW and daytime hours of operation. Amended to specify transmitter and studio locations and specify antenna system.

920 Kilocycles

NEW—Ben Nedow tr/as Ector County Broadcasting Co., Odessa, Texas—Construction permit for a new standard broadcast station to be operated on 1150 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1150 kc. to 920 kc., power from 250 watts to 1 KW, hours of operation from unlimited to daytime, change type of transmitter and specify transmitter site.

940 Kilocycles

NEW—Mt. Vernon Radio and Television Co., Mt. Vernon, Ill.—Construction permit for a new standard broadcast station to be operated on 910 kc., power of 1 KW and daytime hours of operation. Amended re stock ownership and to correct name of one director.

1020 Kilocycles

NEW—Kaw Broadcasting, Inc., Topeka, Kans.—Construction permit for a new standard broadcast station to be operated on 1020 kc., power of 1 KW, and daytime hours of operation. Amended: to change frequency from 1020 to 750 kc., and make changes in antenna system.

1150 Kilocycles

WAPO—Joda Patterson, Ramon G. Patterson and Louise Patterson Pursley, d/b as WAPO Broadcasting Service, Chattanooga, Tenn.—Involuntary assignment of license to Ramon G. Patterson, Louise Patterson Pursley, Ramon G. Patterson, executor and Louise Patterson Pursley, executrix of the estate of Joda Patterson, deceased, d/b as WAPO Broadcasting Service.

WAEU—Joda Patterson, Ramon G. Patterson and Louise Patterson Pursley, d/b as WAPO Broadcasting Service, area of Chattanooga, Tenn.—Involuntary assignment of license to Ramon G. Patterson, Louise Patterson Pursley, Ramon G. Patterson, executor, and Louise Patterson Pursley, executrix of the estate of Joda Patterson, deceased, d/b as WAPO Broadcasting Service.

1230 Kilocycles

NEW—Capital Broadcasting Co., Lewistown, Mont. (P. O. 513 Main Street)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

1240 Kilocycles

NEW—Harrison Broadcasting Corp., Harrison, Ark.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation. Amended to make changes in transmitting equipment.

WBBI—Robert W. Rounsaville and George M. Clark, d/b as Elizabethton Broadcasting Co., Elizabethton, Tenn.—Modification of construction permit (123-P-3971, which authorized a new standard broadcast station) for change in type of transmitter, approval of antenna and transmitter location.

1300 Kilocycles

1340 Kilocycles

NEW—Roderick T. Peacock, Sr., tr/as Daytona Beach Broadcasting Co., Daytona Beach, Fla.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. Amended to change name of applicant from Roderick T. Peacock, Sr., tr/as Daytona Beach Broadcasting Co. to Roderick T. Peacock, Sr. and Roderick T. Peacock, Jr., a partnership, d/b as Daytona Beach Broadcasting Co. (Continued on next page)
NEW—Community Broadcasting Service, Inc., Vineland, N. J. (P. O. 916 W. State St., Trenton, N. J.)—Construction permit for a new standard broadcast station to be operated on 1360 kc., power of 1 KW and daytime hours of operation. (Call "WWBZ" reserved.)

1370 Kilocycles

NEW—Peach Bowl Broadcasters, a partnership composed of Beverly B. Ballard, Dewey Allread, Jr., and Clyde L. Goodnight, Yuba City, Calif.—Construction permit for a new standard broadcast station to be operated on 1370 kc., power of 500 watts, 1 KW local sunrise and unlimited hours of operation. Amended to change power from 500 watts, 1 KW local sunrise to 1 KW day and night, install directional antenna for day and night use and specify transmitter site.

1400 Kilocycles

NEW—Chatham Broadcasting Co., Savannah, Ga.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. Amended re stockholders.

NEW—The New Mexico Publishing Co., Santa Fe, N. M.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 1 KW, directional antenna and unlimited hours of operation. (Call "KSNM" reserved.) Amended to change frequency from 1550 to 1400 kc., decrease power from 1 KW day and night to 250 watts day and night, install new transmitter and vertical antenna and change transmitter site.

NEW—Peach Bowl Broadcasters, a partnership composed of Beverly B. Ballard, Dewey Allread, Jr., and Clyde L. Goodnight, Yuba City, Calif. (P. O. 558 A St.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. (Call "KUBA" reserved)

1450 Kilocycles

NEW—Ruth Braden Weber, Edward F. Braden, George E. Mead, John H. Braden, Lila Braden Boughton, and Kirke M. Reall, d/b as Escambia Broadcasting Co., Pensacola, Fla.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. (Call "WBSR" reserved.) Amended to change name of Ruth Braden Weber to Ruth Braden.

NEW—Wendell Mayes, C. C. Woodson and J. S. McBeath, d/b as Odessa Broadcasting Co., Odessa, Texas.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1450 kc. to 1500 kc., change power from 250 watts to 5 KW, hours of operation from unlimited time to daytime, change type of transmitter, antenna changes and specify transmitter location.

KFLW—Herald Publishing Company of Klamath Falls, Klamath Falls, Ore.—Modification of construction permit (15-F-3584, as modified, which authorized a new standard broadcast station) for extension of completion date from 3-3-46 to 5-3-46.

NEW—Chanteclere Broadcasting Co., New Brunswick, N. J. (P. O. 1 Elm Row)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 230 watts and unlimited hours of operation.

WGOS—E. D. Rivers, Valdosta, Ga.—Construction permit to change frequency from 1450 kc. to 940 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use and change transmitter location. Amended: to change requested power from 1 KW day and night to 1 KW night and 5 KW daytime and make changes in directional antenna for day and night use, and change type of transmitter.

NEW—City of Jacksonville, Jacksonville, Fla.—Construction permit for a new FM broadcast station to be operated on 98 mc., and coverage of 33,720 square miles. Amended: to change transmitter location.

1460 Kilocycles

NEW—Fort Orange Broadcasting Co., Inc., Albany, N. Y.—Construction permit for a new standard broadcast station to be operated on 1460 kc., power of 5 KW, directional antenna and unlimited hours of operation. Amended to use directional antenna night only instead of directional antenna day and night.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Construction permit to change frequency from 1450 to 1460 kc., increase power from 250 watts to 1 KW. Amended to change power from 1 KW to 5 KW, install new transmitter and directional antenna for day and night use and change transmitter location.

1490 Kilocycles

NEW—Alfred Dorman, Statesboro, Ga. (P. O. 318 Savannah Ave.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Jas. A. Brown, Ronald C. Johnson, Elbert B. Griffis, Bert Graulich, Chas. H. Johnson, Wm. A. Johnson, Jas. E. Brooker, Chas. E. Cross, Alden J. Woodworth, Frank E. Suter & Frank J. Beougher, d/b as Atlantic Shores Broadcasting, Ltd., Coral Gables, Fla.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change transmitter location.

TELEVISION APPLICATIONS ACCEPTED FOR FILING

NEW—Phileo Radio & Television Corp., Washington, D. C.—Construction permit for a new commercial television broadcast station to be operated on Channel #4, 7800-84000 kc. and ESR to be determined. Amended: to change frequency from Channel #4, 7800-84000 kc. to Channel #4, 66-72 mc., specify ESR and type of transmitter and antenna system and transmitter location as Arlington County, Va.

NEW—The Fort Industry Co., Toledo, Ohio (P. O. 506 New Center Bldg., Detroit, Mich.)—Construction permit for a new commercial television broadcast station to be operated on Channel #13, 210-216 mc., with power of 5 KW (peak) for visual and 5 KW for aural.

NEW—Wayside Broadcasting Co., Harrisonburg, Va.—Construction permit to specify frequency as 1490 kc. and unlimited hours of operation.

NEW—The Conestoga Television Ass'n, Inc., Lancaster County, Penna. (P. O. Box 66) Philip A. Richards, R.F.D. #7.—Construction permit for a new experimental television relay broadcast station to be operated on 590-610 mc., with power of 25 watts for aural and 200 watts (peak) for visual.

NEW—Continental Television Corp.—Construction permit for a new experimental television broadcast station to be operated on Channel #7, 174-180 mc., Channel #9, 186-192 mc., and Channel #11, 210-216 mc., 495-515, 630-660 and 780-830 mc., and AO, A3, A5 and special emission.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

KTLO—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Construction permit to specify frequency as Channel #201, 100.1 mc., and change type of transmitter and antenna system.

KCNL—Kane Broadcasting Co., Safford, Ariz.—License to cover construction permit (B5-PR-450) which authorized a new relay broadcast station.

WCSC—John M. Rivers, Charleston, S. C.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and change transmitter and directional antenna for night use, and change transmitter location. Amended: to make changes in directional antenna for night use.

APPLICATIONS TENDERED FOR FILING

WAAT—Bremer Broadcasting Corp., Newark, N. J.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and make changes in directional antenna for night use.

Joseph M. Viana, Woonsocket, R. I.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

The Altus Broadcasting Co., Altus, Okla.—Construction permit for a new standard broadcast station to be operated on 1320 kc., power of 250 watts and unlimited hours of operation.

Walla Walla Broadcasting Co., Walla Walla, Wash.—Construction permit for a new standard broadcast station to be operated on 1090 kc., power of 1 KW and unlimited hours of operation.

WPAT—North Jersey Broadcasting Co., Inc., Paterson, N. J.—Construction permit to increase power from 1 KW to 5 KW, change hours of operation from daytime to unlimited, install new transmitter and directional antenna for day and night use.

Harry J. W. Kiessling, Carl F. Stroehmann, Frank E. Plankenhorn and William P. Wilson, partners, d/b/a Williamsport Radio Broadcasting Associates, Williamsport, Pa.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

Hot Springs Broadcasting Co., Hot Springs, Ark.—Construction permit for a new standard broadcast station to be operated on 1090 kc., power of 50 KW, directional antenna and unlimited hours of operation. (Facilities of KTHS)

John Raymond Barlett, d/b/a “Radio South,” Quitman, Ga.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

George Arthur Smith, Jackson, Tenn.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

Caribbean Broadcasting Corp., Araribo, Puerto Rico—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

The Yankee Network, Inc., Portland, Maine—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

WAYS—Inter-City Advertising Co., Charlotte, N. C.—Construction permit to increase power from 1 KW day and night to 1 KW night and 5 KW day, and install new transmitter.

John P. Rabb, Lenoir, N. C.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

KGKL—KGKL, Inc., San Angelo, Texas—Construction permit to change frequency from 1000 kc. to 960 kc., increase power from 250 watts to 1 KW night, 5 KW daytime, install new transmitter and directional antenna for night use.

Billy Avenue Laurie, Jacksonville, Texas—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 100 watts, and unlimited hours of operation.

Frank E. Fowler, Craig Siegfried, Charles Siegfried and Cedric Siegfried, d/b/a The Blue Valley Co., Independence, Mo.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 1 KW, and daytime hours of operation.

Southwest Broadcasting Co., a partnership composed of Wm. Calvin Montgomery, Chas. A. Jones, James A. Clabes, J. W. Newbold and Richard J. Higgins, Eastland, Texas—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

WACO-KNOW—Frontier Broadcasting Co., Inc., Austin and Waco, Texas—Transfer of 30% of common stock of licensee corporation from E. S. Fentress and Charles E. Marsh to C. C. Woodson and Wendell Mayes.

Charles R. Love, Calexico, Calif.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power of 250 watts, and unlimited hours of operation.
COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Arden Jewelry Manufacturing Co., Inc., 91 Stewart Street, Providence, R. I., and its officers, Fred Abroms and Leo Weiner, are charged in a complaint issued by the Commission with failing to disclose the foreign origin of imitation pearl necklaces and other articles of jewelry they sell. (5422)

Crown Zellerbach Corp., San Francisco, and its wholly owned subsidiaries, Zellerbach Paper Co., San Francisco, and General Paper Co., Los Angeles, are charged in a complaint issued by the Commission with violating the Robinson-Patman Act by knowingly inducing and receiving price discriminations from sellers of paper and paper products. (5421)

Union Fishermen's Co-Operative Packing Co.—The Commission has issued a complaint charging Union Fishermen's Co-Operative Packing Co., Astoria, Ore., with violation of the brokerage section of the Robinson-Patman Act in connection with the interstate sale of seafood products. The respondent corporation is engaged in packing, selling and distributing canned Columbia River salmon and tuna fish and other seafood products. (5420)

FTC CASE CLOSED

The Commission has closed without prejudice the case growing out of its complaint charging L. & C. Hardtmuth, Inc., Bloomsbury, N. J., and its sales agency, Koh-I-Noor Pencil Co., Inc., New York City, with misrepresentation in connection with the sale of lead pencils.

The case was closed after the respondents had expressed their intention in writing to be bound by the Trade Practice Conference Rules promulgated by the Commission for the Wood Cased Lead Pencil Industry on June 29, 1945, and had furnished satisfactory evidence of such intention. (4875)

CEASE AND DESIST ORDERS

No cease and desist orders or stipulations were issued this week by the Commission.
MILLER CONFERS WITH TRUMAN, HOOVER, 11 OTHERS ON WORLD FOOD PROBLEM

NAB President Justin Miller on Friday (1) joined with 11 others prominent in the life of the Nation in accompanying former President Herbert Hoover to the White House in response to a request from President Truman that they meet him to confer on ways and means of alleviating the serious food shortage in Europe and Asia.

Moving with a suddenness that allowed only two days for preparation and travel on the part of the conferees, President Truman issued the invitations on Wednesday, asking that they join with him in the East Wing of the White House at 3 p.m. on Friday. His invitation to Mr. Hoover reached the former President while he was fishing off Florida. When he accepted, a Navy plane was put at his disposal for his trip to Washington.

President Truman’s telegram to Miller and the others read as follows: “I am sure you are familiar with the acute need for foodstuffs in the war-torn countries of Europe and Asia. Our national self-respect and our duties as human beings demand that we do all possible to stop the spread of famine.

“Government alone is not enough.

“We cannot meet this situation without an aggressive voluntary program on the part of private citizens to reduce food consumption in this country.

“I am asking you and a very few other public spirited citizens to meet in the East Wing of the White House at 3 o’clock, Friday afternoon, March 1, to work out means for supporting such a voluntary program. Former President Hoover has accepted my invitation and will be there. I count on your support.

“HARRY S. TRUMAN.”

Those invited by the President in addition to Mr. Hoover and NAB President Miller were:

Sheldon Clark, vice president of the Sinclair Oil Co. and honorary president of the Navy League of the United States.

Clarence Francis, chairman of the board, General Foods Corp.

Dr. George H. Gallup, director of the Gallup Poll and connected with Young & Rubicam.

Henry K. Luce of Time, Life and Fortune.

James W. Young of the J. Walter Thompson Co. and chairman of the board of directors of the Advertising Council.

Dr. William I. Meyers of Cornell University and formerly governor of the Farm Credit Administration here in Washington.

Chester W. Davis of this city, president of the St. Louis Federal Reserve Bank and in 1943 War Food Administrator.

Eugene Meyer, editor and publisher of the Washington Post, formerly Farm Loan Commissioner, governor of the Federal Reserve Board and chairman of the Reconstruction Finance Corp.

Mrs. Anna Lord Strauss, president of the League of Women Voters.

Mrs. Emile G. Dickinson, president of the Federation of Women’s Clubs.

Eric Johnston, president of the United States Chamber of Commerce and president of the Motion Picture Producers and Distributors of America, Hollywood, Calif.

LEA BILL IN RULES COMMITTEE

The Lea Bill (HR-5117) which passed the House Thursday (21) by an overwhelming majority of 222 to 43 (see NAB Reports, p. 135), is back in the Rules Committee due to a negative vote entered by Rept. Marcantonio (Am. Labor Party—N.Y.) when unanimous approval was asked on conferees selected for the Senate and House Conference Committee who were to prepare final draft of the bill for Senate action.

The Rules Committee must now prepare a ruling which will go to the House floor for debate before the bill goes on to the Conference Committee.

The Senate has already agreed upon conferees, who are as follows: Senators, Edwin C. Johnson (D. Col.); James M. Tunnell (D. Del.); Francis J. Myers (D. Pa.); Wallace H. White, Jr. (R. Maine); Warren R. Austin (R. Vt.).

NARBA CONFERENCE SIGNS INTERIM PACT

An Interim Agreement covering the standard broadcast band in the North American Region was signed Monday (25) in the final plenary session of the Second North American Regional Broadcasting Conference, following more than three weeks of deliberations.

Members of the various delegations signed the agreement at 1:45 p.m. in the following order: F. H. Soward and G. C. W. Browne for Canada; Sr. Carlos Maristany, Dr. Luis Machado and Sr. N. G. Mendoza for Cuba; Sr. Jose Ramon Rodriguez for the Dominican Republic; A. D. Hodgson for His Majesty’s Government in the United Kingdom in respect of the Bahamas Islands; H. J. Clarke for His Majesty’s Government in the United Kingdom in respect of Newfoundland; Colonel Rafael Avila Camacho (with reservations) for Mexico; E. K. Jett and Harvey Otterman for the United States.

(Continued on next page)
were with respect to the creation of a committee of engineers of Haiti to sign the document at some future date. Arthur C. Stringer, Director of Promotion; Harlan Bruce Starkey, General Counsel; Willard D. Egolf, Director of FM Dept., and Government Relations; Robert T. Bartley, Coordinator of Listener Activity; Frank E. Pellegren, Director of Broadcast Advertising; Harlan Bruce Starkey, Chief, News Bureau; Arthur C. Stringer, Director of Promotion.

Provision was made for a representative of the government of Haiti to sign the document at some future date. The reservations requested by the Mexican delegation were with respect to the creation of a committee of engineers to collaborate in checking broadcasting stations in the various countries to insure against international interference. Mexico merely desired time to check its laws before becoming a member of this committee.

The Interim Agreement, or Modus Vivendi, will be in force for a period of three years beginning March 29, 1946, unless a new NARBA is signed and ratified before its expiration. The document also provides for convening the third NARBA conference in Canada in 1947.

Under terms of the Interim Agreement, Cuba is permitted to make limited use of 10 clear channels (five belonging to the United States), and eight regionals.

The agreement provides for the establishment of a permanent NARBA Engineering Committee, composed of one expert from each of the following countries: Canada, Cuba, Mexico and the United States. The committee will act as trouble-shooters, rendering assistance in the solution of interference cases and other broadcasting engineering problems. When necessary members will inspect facilities to insure that adequate provision is made to prevent radiation toward other countries in excess of the acceptable maximum.

Commissioner E. K. Jett of the FCC, head of the United States delegation and permanent chairman of the conference, said “the spirit of compromise has prevailed throughout the conference.”

“We all agreed on one point,” Commissioner Jett declared, “that without international cooperation, broadcasting in the standard band would soon be in chaos.”

Other speakers at the final session included: Francis Colt deWolf, Telecommunications Division, State Department; Dr. Luis Machado, Cuba; Sr. Carlos Maristany, Cuba; Colonel R. A. Comacho, Mexico.

FCC TO BE REPRESENTED AT DUBLIN CONFERENCE

In view of its regulatory responsibilities in the field of international communications and in view of its responsibility to promote safety through the use of wire radio communication, the Commission will be represented in the United States Delegation to the North Atlantic Route Service Conference convening in Dublin, Ireland, on March 4, 1946. Mr. Wm. N. Krebs, Chief of the Safety and Special Services Branch of the Engineering Department of the Commission, will attend the conference as a delegate. Mr. E. L. White, Chief of the Aviation Division of that Branch, will also attend as an observer.

This conference is sponsored by the Provisional International Civil Aviation Organization for the purpose of establishing an organization to facilitate civil air operations in the North Atlantic area, and is the first of several conferences which will set up similar organizations to cover nine other regions of the world. A meeting of Caribbean area countries is tentatively scheduled the latter part of May, to be held either in the United States or Cuba.

The principal subjects to be considered at Dublin are communication and navigation radio aids, search and rescue, traffic control, meteorology, and airdromes and ground aids. It is anticipated that the conference will last approximately three weeks.

BUREAU OF STANDARDS ANNOUNCES NEW RESEARCH DEPARTMENT

In order to broaden the scope of the work of the Ordnance Development Division of the National Bureau of Standards an Electronics Section has been set up to handle projects involving electronics research and engineering not necessarily related to ordnance, according to the Department of Commerce.

The work of the new section includes electron tube research and development, application of electronic circuits, and radiation. These projects are at present supported largely by funds transferred from the Army Ordnance Department and the Navy Bureau of Ordnance. It is expected, however, that new projects will accrue to the section under the sponsorship of civilian agencies of the Government, so that it should become the Bureau's center for general development work in applied electronics.

An electronics instrumentation service is being offered by the Electronics Section. This service aims to assist the entire Bureau in the development, design or specification of measuring and control equipment employing electron tubes. It is the belief of the Bureau that this service by experienced personnel will prove of value in assuring full use of the advantages afforded by electronic instrumentation.

Robert D. Huntoon is in charge of the Electronics Section. He has served in various capacities in the Ordnance Development Division since 1941 and during 1944-1945 was attached to the War Department as Expert Consultant to the Secretary of War.

He performed his doctoral work at the University of Iowa, receiving his degree in 1938, after which he taught nuclear physics at New York University and engaged in research work on electron tubes at a large electric products manufacturing establishment.

AAF TO EXPERIMENT WITH RADAR AGAINST GERMAN V-2 BOMBS

Danger of atom bombardment of our great cities and industrial centers by long-range stratosphere rockets may be considerably lessened if Army Air Forces efforts to "track" captured German V-2's by the use of "moon radar" and other devices are successful in experiments to be held this summer.

White Sands proving ground in New Mexico will provide a desert setting for tests in which the AAF will put its "radar brains" against the V-2's. These rockets will be sent streaming 90 miles into the stratosphere by Army Ordnance; and the AAF, in cooperation with the Signal Corps, will attempt to plot their course from the moment of discharge to the moment of impact.

Every known means of radar detection, including those devices used recently in reaching the moon, will be utilized by the AAF in an effort to "keep a finger" on these 3000-miles-per-hour missiles as they arch across the sky. If this tracking is successful, according to AAF experts, it will (Continued on next page)
then be possible to devise some means of exploding the V-2's harmlessly in mid-air before they can reach their targets—probably by interception with "counter-attack" rockets. Officers and civilians from Watson laboratories, the ground radar laboratory of the Air Technical Service Command at Wright Field, and, if practicable, enlisted personnel from the European occupational air force, will man the radar equipment for the AAF. In attempting to track the rockets in flight from every possible angle, AAF technicians hope to determine which radar devices are best able to trace the aerial route of these sky-torpedoes against which no highly effective means of defense now is available.

"A means must be found," said Brigadier General William L. Richardson, Chief of the Guided Missiles Division, Air Staff—3, "to defend our country against a sudden enemy rocket attack, and this must be done as quickly as possible. We want to develop a means whereby we can intercept incoming enemy rockets in mid-air. We cannot hope to do this, however, until we discover a method of tracing their course through the sky and predetermining their arc of flight. Once we accomplish this, it will be possible to design a 'counterattack' rocket which will be controlled by radar and will be capable of intercepting the enemy rocket at a predetermined point in its course. The Air Force has been working on rocket defense ever since the first German V-2 landed accidentally in Sweden back in the Autumn of 1943. We hope to come to some definite conclusions this summer concerning radar's ability to track these rockets effectively. Whatever these conclusions may be the AAF will go on with its research until a way is found to stop the V-2's, either by interception or by some other means."

Gen. Richardson pointed out that the AAF is conducting extensive research in the developing and tactical use of offensive guiding missiles, as well as evolving a defense system against rocket attack. The First Experimental Guided Missiles Group was activated recently by the AAF. The functions of the group, which is commanded by Col. Harvey T. Alness, former commander of the Seventh Bomb Group in India, will be the development of tactics and techniques of guided missile operations, training of personnel development of organizational and equipment requirements, and demonstration of guided missiles in the AAF program.

LEGION OF MERIT AWARDED CBS CHIEF ENGINEER

For having broken a design and production deadlock when airborne radar equipment was urgently needed by the U. S. Fleet to combat Jap air action, A. B. Chamberlain, Chief Engineer of CBS, has been awarded the Legion of Merit by Navy Secretary James Forrestal.

Help Keep Our Economy Stable (Fact Sheet No. 3)

The greatest inflationary pressures we face today are those stemming from the unprecedented demand for and the short supply of (1) housing, (2) clothing and (3) durable goods. Although rent control regulations still exist in most areas the demand for housing is so great that people are tempted to ignore rent ceiling in their eagerness to provide shelter for themselves and their families. During the next few months the clothing supply will be the tightest since before the war, a situation that is being further complicated by thousands of newly discharged veterans who are unable to find even a minimum of civilian clothing in the stores. The durable goods picture is a trifle brighter—more refrigerators, automobiles, washing machines, vacuum cleaners, radios, etc., are on the way. Here again, however, demand and purchasing power still exceed the supply and an inflationary black market is the potential result unless people curb their desires to own the first of everything that appears on the market at any price. Urge listeners to spend sensibly and to cooperate with all price and rent control regulations.

Building Our New Army (Fact Sheet No. 2)

Congress has authorized a peace-time American Army larger and better trained than ever before in history. (Continued on next page)
This Army, vitally necessary for reasons which will be presently explained, is now being recruited by voluntary enlistment. But the Army's present recruiting drive for over one million men by July first 1946 may fail unless public attitudes can be changed and changed quickly. The Army itself is conducting a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent backdrop campaign, for which its own resources are inadequate, to build prestige for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and their friends. Very bluntly, the objective of this campaign is to change the old attitude of Americans toward their Army. By explaining the purpose and character of the new Regular Army, being formed since victory in World War II, and by paying tribute to the young men now joining it to guard world peace, radio can help the Army's recruiting drive achieve the goal it seeks. Point out that the new Regular Army soldier is a skilled technician—he works with advanced techniques and equipment in at least one of many specialized fields, and his competence equals and often exceeds the skill demanded in some of the best paid civilian trades. Illustrate the kind of work they do as guardians of peace and architects of our country's safety.

MORNING AND AFTERNOON LISTENING SURPASSES “V-E DAY” RECORD

The volume of afternoon radio listening has surpassed the record set during the “V-E Day” period while morning listening has climbed to the highest point since then, Cooperative Analysis of Broadcasting announced last week. CAB revealed that since mid-December there has been a greater number of sets-in-use during weekday afternoons than during the two-week period including “V-E Day.” Tabulations were based on nationwide interviewing in 81 cities over two-week periods. The CAB February 19 report showed the average percent of sets-in-use was 15.8, an increase of 0.3 from the “V-E Day” record of 15.5. The average sets-in-use for December-January was 15.6 and for January was 15.7, both ratings above the victory period.

Weekday morning listening was three points below the 18.2 record of the “V-E Day” period but was the highest figure since then. The latest CAB report showed an average percent of sets-in-use of 15.2, an increase of one full percentage point since the previous report two weeks ago.

Both morning and afternoon listening averages of the latest report were 0.4 above the figures recorded during the corresponding period last year.

WFIL COOPERATES WITH RADIO REPAIR ASSOCIATION

Philadelphia—Station WFIL and the Philadelphia Radio Service Men’s Association have drawn up a unique contract designed to use the facilities of their allied industries for their mutual benefit.

The Association is a voluntary organization of independent radio repair men from the metropolitan and suburban areas, who have joined together for a better, more efficient coverage of the city’s radio repair work. They are making a voluntary effort to meet the demand of the War Department for more radio repair work. The Association is a voluntary organization of independent radio repair men from the metropolitan and suburban areas, who have joined together for a better, more efficient coverage of the city’s radio repair work. Through their advertising on WFIL, PRSMA’s work as an association has increased tremendously in the last few months. Now, instead of calling radio repair men at random, Philadelphians call PRSMA to get prompt service from the most competent worker in their immediate vicinity.

The new agreement provides for WFIL to supply commercial spots, a new musical program on WFIL and WFIL-FM, promotion of the association via car and bus cards—and phone service on all customer inquiries about the organization which come through the station’s switchboard as a result of commercial announcements. In return PRSMA members will display in preferred window locations WFIL and WFIL-FM placards calling attention to special events, etc., include inserts supplied by WFIL in outgoing mail to customers, and distribute survey questionnaires to customers whose set they service.

**FM Department**

**15 MORE FM GRANTS—TOTAL 345**

The Commission, by a Board composed of Acting Chairman Denny and Commissioners Walker and Jett, on Wednesday (27) granted 15 additional FM stations and designated one application for hearing. This brings total conditional grants to 345.

Following are grants made:

<table>

MARCH 4, 1946 — 154
Charles R. Denny, Acting Chairman of the Commission, predicted Wednesday (27) that 100 television stations will be on the air by the end of 1947. Within three years, Mr. Denny said in an interview with an AP correspondent, 2,000 FM stations probably will be built.

"By the end of 1946," he said, "all the applications for television stations before the Commission will be cleared out. There are now 140.

"About 100 television stations probably will be broadcasting by the end of 1947. This figure likely will include seven in New York City and northeastern New Jersey, seven in Los Angeles, four in Philadelphia, four in Washington, D. C., five in Detroit, six in San Francisco-Oakland, four in Pittsburgh, five in Cleveland and three in Baltimore.

"Television networks will come just about as soon as we get the stations—but the networks will be small at first," Denny said.

"Reports to the Commission," Denny said, "indicate that one or more manufacturers will have sets on sale in sizeable volume by the middle of this year.

"The future of sound broadcasting will center on FM," he said. "I predict that FM to a large extent will replace standard broadcasting in the years to come."

FCC REQUESTS PICTURE OF '46 PRODUCTION FROM SET MANUFACTURERS

The Commission has sent out a questionnaire to radio manufacturers requesting them to send in information on present plans for the manufacture of radio receivers during 1946. It is stated in an accompanying letter that the response will be used in preparing industry-wide totals.

The questionnaire itemizes various types of receivers in the AM, FM, Television bands and also includes FM adapters suitable for attachment to AM sets to permit reception in the 80-108 mc. FM band, as well as converters which will change over FM sets built for reception in the 42-50 mc. band to permit reception in the 80-108 mc. band.

FIRST RAILROAD RADIO GRANT

Acting upon the first application for railroad radio authorization submitted pursuant to the establishment of Rules and Regulations Governing Railroad Radio Service, Part 16, the Federal Communications Commission on Wednesday (27) granted a construction permit to the Denver and Rio Grande Western Railroad Company, Denver, Colorado, for 32 new mobile units as train (end-to-end) stations in this newly established service.

Operation will be on the frequency 159.81 megacycles, with 50 watts input power to final radio stage, employing special emission for FM (telephony).

The application was made on behalf of the Denver and Rio Grande Western Railroad Company by Wilson McCarthy and Henry Swan, its trustees.

Extended experimentation has been made regarding use of railroad radio for safety purposes for several years, and many experimental authorizations have been previously issued to railroads and manufacturers, but this is the first grant since the regular railroad radio service was established by the Commission on December 31, 1945.

PER INQUIRY AND FREE TIME

Radio stations have reported that the Allan H. Miller Agency, Toledo, has attempted to place contracts for "Dental," a plastic reliner for false teeth, on a per inquiry basis.

NAB Department of Broadcast Advertising informed the agency that the radio industry is adverse to this type of advertising, and that NAB adopted a resolution at the 1942 Convention condemning such practices on the basis of being unsound broadcasting.

The Miller Agency went so far as to mail stations a reprint of a station's Sales Manager's letter that apparently encouraged per inquiry advertising in radio. Upon being informed by NAB of the letter's use, the sales executive informed NAB:

"It is needless to say that my letter to Mr. Allen Miller of the Miller Agency was not supposed to be used for promotion purposes. He assured me that it would not be. I have already attended to this matter and you may be sure that neither our station nor myself wish to promote anything along P. I. lines. We have never accepted P. I. business since I have been identified with the station and I am certainly not in favor of it."

Mr. Miller informed NAB: "Is my face red? We had an experience with a 'per inquiry' deal some considerable time ago and the rule is that we are not interested. However, this particular deal offering the product Dental for broadcast purposes to stations on a 'per inquiry' deal was arranged without my approval. Please be advised that as of this date Dental has contracted with us to buy time on a regular basis on the series of stations we have mutually agreed upon."

NATIONAL NEEDLECRAFT BUREAU

Tom Fizdale, Inc., a New York City publicity firm, representing the National Needlecraft Bureau, interested in increasing home sewing, etc., has offered an elaborate promotion called "The Sixth Annual National Home Sewing Contest." The publicity firm states that the contest is being conducted in 50 of our leading cities in the North, South, East and West.

NAB informed Tom Fizdale, Inc., that giving free time for such enterprises is not in keeping with the radio industry's policy. NAB urged that the National Needlecraft Bureau use paid advertising on radio stations.

(Continued on next page)
Win Nathanson, president of the publicity firm, replied to NAB Department of Broadcast Advertising that: “The National Sewing Contest is sponsored by the National Needlecraft Bureau, a non-profit trade association representing manufacturers of thread, fabrics, patterns and, in fact, anything that has to do with sewing and needlecraft arts. We furnish cash prizes and national awards to the stations and full assistance and information in carrying on local contests. It is of particular interest for you to know that almost in all cases local stations have sold sponsorship of the contest, usually to a department store, or some advertiser with a message directed to women. This brings revenue to the stations and, at the same time, they are rendering a real public service, as, in no way, is this contest commercial—no brand names, nothing of that sort is mentioned.”

Mr. Nathanson added: “we hope this information will explain the National Sewing Contest and that you do not consider it a ‘space grabbing’ idea.”

Real Estate Dealer—Commercial or Sustaining?

An effort to obtain free time from radio stations is being made by the National Association of Real Estate Boards of Washington, D. C., which has planned a series of four quarter-hour transcriptions. Approach to stations is usually made by the local representative of the community’s real estate board, with a request for free time. Some NAB member stations have reported that after discussion, the local real estate board has purchased the time for the transcribed series, which discusses the national housing situation and the services offered by real estate dealers.

An NAB representative contacted the office of Walton Onslow, Director of Public Relations, National Association of Real Estate Boards, Washington, D. C. The NAREB revealed that an “opinion poll” letter had gone out to local real estate boards across the nation, to ascertain if local boards were interested in the proposed series of transcriptions in their behalf on the National Housing situation, etc.

The real estate boards’ headquarters informed its members “in some cases you might obtain time on your local station free, as a public service. In other cases time will have to be bought.” The letter pointed out that the real estate boards in metropolitan cities were financially able to pay for these platters, whereas their smaller boards, not as able financially to buy time, might be able to get free time in the guise of a “public service.”

Electric Fan Section N. E. M. A.

Alexander Hazard Williams, New York City, representing the Electric Fan section of the National Electric Manufacturers Association, has offered stations a transcription containing a comedy sketch by Ernest Truax and Hope Emerson. The N. E. M. A., through its agent, sought free time on the basis that theirs is an educational campaign to give the public some idea of the varied uses of electric fans and other electric equipment.

The purpose in sending these transcriptions out was “for providing (1) Entertainment, (2) Service to the public, (3) Service to the electric equipment dealers in your city.”

The NAB has written the agent urging the use of broadcasting on a rate card basis.

The NAB believes that sound advertising is the most effective and almost the only economical way to introduce a new product, an improvement in old products, and new uses for existing articles.

Veterans of Victory

Better Business Bureau and stations have sent inquiries to NAB relative to the reliability of the National Radio Features’ series, “Veterans of Victory.”

The Veterans Administration informed the NAB that it “does not authorize or endorse any radio programs.” However, the radio division of the Veterans Administration has informed us that they are “cooperating” with this concern on their “Veterans of Victory.” William T. Comer, director, coordination and planning, Veterans Administration, makes an appearance on one of the discs. The Veterans Administration informs us that “it is a legitimate program.”

The radio division of the United States Treasury Department, according to Lieutenant David Levy, Radio Chief, has no knowledge of “Veterans of Victory” or its producer, National Radio Features. Therefore they have not worked with the producer in any way, according to Lieutenant Levy.

Wire-Recorder Broadcast Sponsored

Radio Station WGST, CBS affiliate, Atlanta, has inaugurated a new type of program, using a wire recorder to record interviews with the riders direct from street cars and busses in transit. The recordings are made several times during the day and played back over the air at 6:30 P.M. the same night so that the people interviewed can hear themselves on the air. The interviewing is done by two of WGST’s ablest announcers, Jimmy Kirby and Francis Harden, and the program is called “The Man on the Street Car.” The show is a “natural” for its sponsor, The Georgia Power Company. The sponsor and WGST are cooperating in an all-out publicity and promotion job on this program.

WGST has installed outdoor poster boards, scheduled newspaper ads and courtesy plugs, printed envelopes for the interviews calling attention to the program and expressing appreciation for the interview. Twelve street car tokens are enclosed in each envelope as a gift from the Georgia Power Company. Display cards with actual photographs of a street car broadcast are being placed in the main office and the branch offices of the Georgia Power Company in greater Atlanta.

J. Nelson Rupard, KTSW, Re Syndicated Shows

Emporia, Kansas, station management offers an expression on syndicated transcribed shows for small market stations to the effect: “We want better shows to increase the audience for our advertiser and our station. But they must be better shows to justify any increased production and program charges.”

“In our own stumbling way we’ve learned to produce some pretty listenable programs, first with records and in later years from transcription libraries. The transcription service is a necessity and the rental is a flat fee. Programs from these services are usually produced on the smaller stations by announcers who would otherwise be around only for station breaks. The cost to the station for such a program is not great.

“In a sense, the problem then becomes mathematical. If a local transcribed program earns an audience rating of 4.2, then a syndicated program that carries a talent charge of one-half the time charge must necessarily produce a rating of 6.4, a stronger sales impact, or other advantages.

“Unfortunately many syndicated programs carry a talent charge equal to or better than the time charge. And some haven’t paid out at a talent charge of one-half the time charge.

“For the most part the quality of the syndicated programs has been good; they have compared favorably with network cooperative programs which have been highly successful. But talent costs for most network cooperatives has been less than half the time charge.

“The problem seems largely a matter of basic transcription.

(Continued on next page)
tion costs complicated, perhaps, by AFRA and AFM recording regulations. The suggestion that smaller stations repeat transcribed features after they have been run on larger stations does not seem a happy solution. Without going into the ramifications of audience appeal and station prestige of such repeats, accept the plea that most small stations just wouldn’t relish the idea of eating at the second table. Better things have been tasted through network cooperative programs.

“Since the actual pressing cost does represent a considerable portion of the local charge, isn’t there another way of routing such features to the stations? Perhaps without giving preference to the larger stations (it seems movie distributors handle films in this manner) or a series exclusively for the use of smaller stations.

“We need syndicated programs to deliver a greater sales impact to more listeners for more local advertisers in a limited broadcast day. But to meet competition, the increased audience or other advantages must be proportionate to the increased cost to local advertisers.

“Until it is, small stations will go right on selling network cooperatives and locally built recorded and transcribed shows.”

HOW TO IMPROVE YOUR DEALER-HELP ADVERTISING

MAXSON I. BEVENS

Commercial Manager, KGHF

Before his advent into radio, Maxson I. Bevens, Commercial Manager of Station KGHF, Pueblo, Colorado, through his knowledge and practical application of sound advertising principles, built up a well deserved reputation as an expert in retail merchandising.

Drawing on that experience and his many years in broadcasting, he writes in this article on a subject that is of more than passing interest to radio sales and continuity departmentals.

The NAB wishes to thank Advertising & Selling for permission to reprint this article which first appeared in the February issue of that magazine.

Retailing is a complicated business, and a man can know a lot about national advertising without having much idea about the little things that increase sales in the thousands of stores of all sizes where the consumer responds more or less to the appeals of the advertiser.

Since the payoff occurs in the retail store, it seems logical that more consideration of how the merchant can be assisted to help cash in on national advertising may be of value.

I have seen a lot of radio copy, sent out to dealers for them to use at their own expense on local stations. A few manufacturers make co-operative allowances, more send out copy with no allowances, and a far greater number simply do not bother to encourage use of radio for their products. Most of the copy I have seen is of little value, and much of it is pretty terrible.

Several retail advertising managers whom I have questioned have told me that very little of the display advertising they receive from manufacturers is what they need. One thoroughly experienced advertising manager of a department store went into detail about a leading line of cosmetics and beauty treatment items. He said, in effect, “Their ads are no good for us. They aren’t selling ads and are not set up to help us. The manufacturer hogs the whole ad. After all, we are not interested in building only his business; we also want to build ours. We let the ads lie around until we discover we are about to lose our allowance; then I shove one into the paper. Even at that, I doubt if it is profitable to pay even half price for the space. Half the space, written in our own country style, would sell a lot more goods.”

Unanimity of Criticism

That attitude is not confined to one department store or to one line. Every retailer I have talked with agrees that it applies to most lines in greater or less degree.

Aside from the fact that almost any man will admit that he can do a better job than you can, there must be other reasons for the unanimity of criticism.

Advertising agencies make their money on the time and space they buy. As a merchant, I always put my best efforts on the lines that made me most money, so I assume advertising agencies do likewise. Their research is directed toward producing more effective national advertising. Their best work people on the ads that make them most money. Dealer-help advertising probably gets little research, and less attention than national advertising. It is a chore that must be done, but probably with little enthusiasm. It becomes the stepchild of the agency, and I can see no reason for blaming anyone.

Without personal knowledge of retailing, and without research to indicate otherwise, the agency probably does not realize that the technique of national advertising is not efficiently productive at the retail level.

National advertising is largely consumer acceptance advertising. The prospect may come to accept the quality of the product, but until she is induced to go to her dealer and buy, that consumer acceptance is worthless. That purchase is the equivalent of the signature on the dotted line, which every salesman recognizes as the only thing worth while. The function of retail advertising is to persuade the prospect to go to her dealer and ask for the item. It is selling advertising, action advertising, and not consumer acceptance advertising.

As long as the prospect’s acceptance of the item is passive, she may purchase if she sees the item on her dealer’s counters. But suppose your line is sold at the Grand, while the prospect has the habit of shopping at the Leader. You need more than consumer acceptance to break her habit of shopping at the Grand—to send the prospect to the Leader to try a new and unfamiliar brand. The merchant understands this, and sets up his advertising accordingly. It is a retail problem, which the manufacturer and his agency need to understand if the dealer-help advertising does the job it should do.

Every advertiser should fix this thought firmly in his mind, and never forget it: The dealer is not interested in building your business! He is interested in building HIS. Give him consumer acceptance mats or radio copy with a little space or time for him to attach his name as a kind of afterthought, and his enthusiasm will register exactly zero. Give him action copy in which your product is a reason for coming to his store, and he will use it whether you pay part of the cost or not. The primary purpose of retail advertising is to build traffic.

To elaborate a little further, suppose the dealer has two brands of face powder, side by side. Each sells a dollar, each pays 40 per cent gross profit. The dealer does not care a tinker’s dam which brand the customer buys. That’s why so many houses pay part or all of a saleswoman’s salary—to provide the incentive that otherwise does not exist for that saleswoman to favor her own line over that of a competitor.

When planning advertising, the dealer has a different problem. It is not a case of choice between brands by a customer, but competition for traffic. If your advertising will pull customers to the Leader instead of the Grand, you will get the breaks.

I mentioned earlier that most of the radio copy received by the retailer was very poor. It consists largely of general claims of excellence that could be duplicated by every competitive product, and usually is. It becomes then, a

(Continued on next page)
battle of wits, to see who can do the cleverest writing and use the most powerful adjectives.

In the case of toiletries or wearing apparel for women, the copy is quite likely to be a conglomeration of appeals to vanity, resulting in fancy writing and what might be called “glamour copy” which sounds fantastic when it comes from the lips of Johnny Jones. You see, Johnny is obviously not a woman and he doesn’t write for women. Whether or not the job can be done efficiently and adequately by the same agency that handles the account for direct placement with media is a question I would not attempt to answer. You can be sure, however, that those manufacturers who first see the potentialities of working closely with dealers, and who develop proper ways and means, will reap a rich reward.

And as I said before, it does not treat the item as a part of the territory, a reason for shopping there. It treats it as an item, separate from the store, but the copy finally admits that the items can be found at the Leader.

To illustrate some of the faults found in such dealer-help radio copy, I give you below an announcement planned for a woman announcer, which came to my desk:

“You know, make-up and cosmetics are two different things. Make-up merely changes your coloring . . . but a true cosmetic really beautifies. And just out—is a brand new shade of lipstick that has this true cosmetic knack of making almost every woman more lovely. It’s (Manufacturer) (Product Name)—a new, clear, red shade . . . lifting your beauty to new, more vivid tones. A true shade of lipstick that has this true cosmetic knack of making almost every woman more lovely. It’s (Manufacturer) (Product Name) at Blank’s cosmetic counter. Only One Dollar, plus tax (Product Name) was created for you by (Manufacturer), of New York.”

And all that about a lipstick color! So obviously exaggerated that it loses all sincerity, it simply will not bring in enough customers to justify itself. Furthermore, the dealer who purchases the time just barely gets into the announcement at the end. Of course, a case could be made for the announcement, but the copy writer will not have the opportunity. The merchant wants to dominate the advertising, and if you want him to run your copy, you will humor him. As an illustration of how it can be done, here is a sample, not as an illustration of a finished product, but to illustrate how to get the dealer to use the copy, without losing the effect of the manufacturer.

“Look to Blank to give you each new aid to greater loveliness! Now Blank presents (Manufacturer’s Name) (Product Name)—a new and vivid color for your lips, etc., etc.”

A slight concession will get you preference when copy for radio is being prepared for broadcast.

One other criticism which can be leveled against most dealer-help advertising is that it is not sufficiently flexible. I have seen some mat services that could be adapted to the needs of the store and to the style of its advertising, but they are a small minority. Most mats are spotlight patches written in Russia for publication or broadcast abroad thus will undergo the same censorship authority as material written for internal consumption in Russia. The Associated Press was informed that telegrams should be submitted as now in two copies, one for transmission and one for censorship. The foreign office will continue to be the authority to which foreign correspondents are accredited. Interviews, trips and other facilities to foreign newsmen will continue under the jurisdiction of the press department of the foreign office.

**News**

**RUSSIA TIGHTENS CENSORSHIP**

Moscow—Censorship of news dispatches and radio commentaries from Russia became effective March 1 under supervision of the Administration for Affairs of Literature and Publication, the authority which directs the Soviet radio and press and is known as “Glavlit.” Dispatches written in Russia for publication or broadcast abroad thus will undergo the same censorship authority as material written for internal consumption in Russia. The Associated Press was informed that telegrams should be submitted as now in two copies, one for transmission and one for censorship. The foreign office will continue to be the authority to which foreign correspondents are accredited. Interviews, trips and other facilities to foreign newsmen will continue under the jurisdiction of the press department of the foreign office.

**Federal Communications Commission Docket**

**HEARINGS**

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, March 4. They are subject to change.

**Monday, March 4**

NEW—Fred O. Grimwood, Bloomington, Ind.—C. P. 1490 kc., 100 watts, unlimited.

**Monday, March 4**

Consolidated Hearing

**Monday, March 4**

Consolidated Hearing

To Be Heard Before Commissioner Wills in Council Chamber, City Hall, Brockton, Massachusetts.

NEW—Bay State Beacon, Inc., Brockton, Mass.—C. P. 1140 kc., 250 watts, unlimited.

(Continued on next page)

NEW—Cur-Nan Co., Brockton, Mass.—C. P. 1450 kc., 250 watts, unlimited.

NEW—Plymouth County Broadcasting Corp., Brockton, Mass.—C. P. 1450 kc., 250 watts, unlimited.

NEW—Old Colony Broadcasting Co., Inc., Brockton, Mass.—C. P.—1450 kc., 250 watts, unlimited.

Friday, March 8
WDNC—Durham Radio Corp., Durham, N. C.—C. P. 620 kc., 1 KW night, 5 KW day, unlimited DA-day and night.

NEW—Charles H. Russell, W. B. McCurry, T. E. Wright and C. A. Lacey, a limited partnership, d/b aas Rebel Broadcasting Co., Jackson, Miss.—C. P. 620 kc., 1 KW night, 5 KW day, unlimited DA-night.

WRAI—Capitol Broadcasting Co., Inc., Raleigh, N. C.—C. P. 620 kc., 1 KW night, 5 KW day, unlimited DA-night and day.

WROL—S. E. Adcock, tr/aas Stuart Broadcasting Co., Knoxville, Tenn.—C. P. 620 kc., 5 KW, unlimited DA-night and day.

NEW—Virginia Broadcasting Corp., Roanoke, Va.—C. P. 620 kc., 1 KW, unlimited DA-night and day.

KWPT—Wichita Broadcasters, a partnership, Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, trustee. P. K. Smith, Mrs. Claude M. Simpson, Jr., Wichita Falls, Texas—C. P. 620 kc., 5 KW night, 5 KW day, unlimited DA-night.

NEW—Diamond State Broadcast Corp., Dover, Del.—C. P. 1340 kc., 250 watts, unlimited.

Friday, March 8
KVAN—Vancouver Radio Corp., Vancouver, Wash.—C. P. 930 kc., 1 KW night and day, unlimited DA-day and night.

Federal Communications Commission Actions

APPLICATIONS GRANTED

NEW—W. W. Couch, Jr., S. H. Campbell, Jr., and W. H. Lancaster, Jr., Durham, N. C.—Granted construction permit for a new station to operate on 1310 kc., 1 KW, daytime only. (B5-P-423)

NEW—Durham Broadcasting Co., Inc., Durham, N. C.—Granted construction permit for a new station to operate on 730 kc., 500 watts, daytime. (B3-P-392)

NEW—Davenport Broadcasting Co., Inc., Davenport, Iowa. Granted construction permit for a new Class II standard station to operate on 750 kc., 250 watts, daytime only. (B4-P-194)

NEW—Unity Corp., Inc., Toledo, Ohio.—Granted construction permit for a new station to operate on 1350 kc., 1 KW, daytime only. (B2-P-4117)

NEW—Hobart Stephenson, Centralia, Ill.—Granted construction permit for a new station to operate on 1210 kc., 1 KW, daytime only, employing a non-directional antenna. (B4-P-292)

NEW—The Kentucky Broadcasting Co., Lexington, Ky.—Granted application for construction permit for new station to operate on 1200 kc., 1 KW, unlimited time, directional antenna night.

NEW—Carter C. Peterson, Savannah, Ga.—Granted application for construction permit for new station to operate on 1450 kc., 250 watts, unlimited time; conditionally. (B3-P-4245)

NEW—Central Louisiana Broadcasting Corp., Alexandria, La.—Granted application for construction permit for new station to operate on 1490 kc., 250 watts, unlimited time. (B5-P-572)

NEW—Harrison Broadcasting Corp., Harrison, Ark.—Granted application for construction permit for new station to operate on 1210 kc., 250 watts, unlimited time. (13-P-4114)

NEW—Walter W. Bankhead, Jasper, Ala.—Granted application for construction permit for new station to operate on 1210 kc., 250 watts, unlimited time. (B3-P-426)

NEW—Rio Grande Broadcasting Co., Inc., Albuquerque, N. Mex.—Granted application for construction permit for new station to operate on 1360 kc., 250 watts, unlimited time. (13-P-5783)

KJUN—Jack W. Hawkings and Barney H. Hambles, Pecos, Tex.—Granted application for construction permit to increase power from 100 to 250 watts and make changes in transmitter. (13-P-6358)

KPDN—C. H. Holles, et al. d/b aas Radio Station KPDN, Pampa, Tex.—Granted application for construction permit to increase power from 100 to 250 watts and install new transmitter. (B3-P-4396)

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted application for construction permit for change in operation from 1330 kc., 1 KW, directional antenna night, unlimited time, to 1330 kc., 5 KW, directional antenna, unlimited time. (B4-P-3570)

NEW—The Times-Mirror Co., Pasadena, Calif.—Granted construction permit for a new experimental television broadcast station to be operated on frequencies to be assigned by the Commission's Chief Engineer: A3, A5 Special and Special emission for frequency modulation; power (visual) 1 KW peak (aural), 5000 watts. (15-PV1361)

NEW—United Broadcasting Co., Cleveland, Ohio.—Granted construction permit for a new development broadcast station; frequencies to be assigned by the Commission's Chief Engineer from time to time: 1 KW power. (B2-P-EX-89)

NONCOMMERCIAL EDUCATIONAL BROADCAST

The Board of Education of the City of Detroit, Detroit, Mich.—Granted construction permit for new station; subject to Commission approval of transmitter, antenna details, and frequency and modulation monitors; channel to be assigned by the Commission's Chief Engineer. (B2-PED-34)

Oklahoma Agricultural and Mechanical College, Stillwater, Okla.—Granted application for construction permit for a new noncommercial educational broadcast station; subject to approval by the Commission of transmitter details and of frequency and modulation monitors. (B3-PED-58)

DESIGNATED FOR HEARING

Designated for consolidated hearing the following applications requesting use of 530 kc., unlimited time, to be heard with their corresponding proceedings previously scheduled: The Atlantic Radio Corp., Boston, Mass. (B1-P-4372), 550 kc., 5 KW, unlimited time; WDVE Radio Station (WDVE), Waterbury, Vt. (B1-P-4482), 550 kc., 1 KW, unlimited time; Oregon State Agricultural College (KOAC), Corvallis, Ore. (15-MI-1229), 350 kc., 5 KW, unlimited time, directional antenna.

WGAC—The Twin States Broadcasting Co., Augusta, Ga.—Designated for hearing application for construction permit to change frequency from 1230 to 580 kc., to increase power from 250 watts unlimited to 1 KW night, 5 KW-LS, and change location of transmitter. (B3-P-3783)

James A. New, Lake Charles, La.—Designated for hearing application for a new station to operate on 1230 kc., 100 watts, unlimited time; site to be determined. (B3-P-3888)

(Continued on next page)
Santa Clara Broadcasting Co., San Jose, Calif.—Designated for hearing application for new station to operate on 1010 kc., 1 KW, daytime only. (B-5-P-3357)

Elmer R. Noll and Frank A. Dieringer, a partnership, d/b/a Chillicothe Broadcasting Co., Chillicothe, Ohio.—Designated for hearing in a consolidated proceeding with application of Shawnee Broadcasting Co., application of Chillicothe Broadcasting Co. (B-2-P-4570), to use 1190 kc., 100 watts, unlimited time. Shawnee Broadcasting Co. also requests 1490 kc., 250 watts, unlimited time.

Mansfield Journal Co., Mansfield, Ohio; The Lorain Journal Co., Lorain, Ohio.—Designated for consolidated hearing the applications of Mansfield Journal Co. for a new station in Mansfield, Ohio, to operate on 1310 kc., 250 watts, daytime (B-2-P-4275), and application of The Lorain Journal Co. for a new station at Lorain, to operate on 1110 kc., 250 watts, daytime. (B-2-P-1276).

Kenneth Kesterson and Charles Peix, d/b/a Radio Engineering Service, Pine Bluff, Ark.—Designated for hearing in consolidation with application of Arkansas Democrat, Little Rock, the application of the Radio Engineering Service (135-P-4408), both requesting use of 1100 kc., 250 watts, unlimited time; hearing to be held in Little Rock on March 22.

The Federal Communications Commission announces its Proposed Decision (B-228), proposing to deny the application of Harold H. Thoms for a construction permit for a new standard broadcast station at Durham, North Carolina, to operate on 1580 kc. with 1 KW power, unlimited time. (Docket No. 6638)

The frequency 1580 kc. requested by this applicant is allocated, under the North American Regional Broadcasting Agreement, to Canada as a Class I-A channel for assignment to a station in the Province of Quebec. In carrying out this country's treaty obligations to Canada, the Commission's rules provide that those clear channels, including 1580 kc., to which Canada has priority of use, may be assigned only to Class II stations in the United States "located not less than 650 miles from the nearest Canadian Border and which will not deliver over 5 microvolts per meter ground wave or 25 microvolts per meter 10 per cent time sky wave at any point on said border." Durham, N. C., is situated not more than 450 miles from the nearest point on the Canadian boundary.

LICENSE RENEWALS

Granted renewal of license of following stations for the period ending August 1, 1947:

WBFD, Wingham, Ont. (153-R-845); WDRD, Augusta, Maine (151-R-884); WBZY, Buffalo, N. Y. (151-R-829); WJFZ, Clarksville, Tenn. (153-R-1152); WCNC, Elizabeth City, N. C. (153-R-1025) *Commissioner Durr voting for inquiry.

Granted further extension of following licenses upon a temporary basis only, pending determination upon applications for renewal of such license, in no event beyond May 1, 1946:

FACSIMILE BROADCAST

Granted renewal of licenses for period ending March 1, 1947, subject to change in frequency assignment which may result from proceedings in Docket No. 6631.

WEOH—Richmond Radio Corp., area of Richmond, Va.—Grant renewal of relay station license.

KEGU—Radio Service Corp. of Utah, area of Salt Lake City—Grant renewal of relay station license.

Licenses for the following relay stations were further extended upon a temporary basis only for the period ending May 1, 1946, pending determination upon applications for renewal:

Central States Broadcasting Co., KAJB, KAQL, KAKQ, and KAQQ; City of Dallas, KWRD; Harris County Broadcast Co., KHK; Head of the Lakes Broadcasting Co., WIBG; Flint Broadcasting Co., WJYK; Intermountain Broadcasting Corp., KALO; A. Frank Katzentine, WAFK; Lamar Life Ins. Co., WAXJ; Miami Valley Broadcasting Corp., WMYB; Minnesota Broadcasting Corp., WAFY, WAFW; Nichols & Wariner, Inc., KADB, KBLE, KIFO; Martin R. O'Brien, WAOE; Radio Service Corp. of Utah, KKNE; Savannah Broadcasting Co., WAXH, WSCC; Seattle Broadcasting Co., KIEF, KIEG; Allen T. Simmons, WATS; Southeastern Broadcasting System, Inc., WCRB; Tarrant Broadcasting Co., KAAD; W. Va. Broadcasting Corp., WAAH; WBFM, Inc., WIPL, WPRM, WNEF, WOKO, Inc., WMWA; WSBM, Inc., WSCM, WSMC.

WJBT—National Broadcasting Co., Inc, New York, N. Y.—Grant renewal of commercial television broadcast station license for the period ending February 1, 1947, subject to change in frequency assignment which may result from proceedings in Docket No. 6631.

 Granted renewal of following experimental television broadcast station licenses for the period ending February 1, 1947, subject to changes in frequency assignment which may result from proceedings in Docket No. 6631:

The following stations were granted renewal of licenses for the period ending February 1, 1948:

WCRS, Greenwood, S. C.; WPFG, Atlantic City, N. J.; KXJ, Palestine, Texas; KMYC, Marysville, Calif.; KOAL, Pueblo, Utah; KJBN, La Grande, Ore.; KDXT, Deuton, Texas; WFMJ, Youngstown, Ohio.

(Continued on next page)
The following stations were granted renewals for the period ending August 1, 1947:

- KGFF—KGFF Broadcasting Co., Inc., Shawnee, Okla.—Granted renewal of license for the period ending February 1, 1948.
- WELO—Birney Jues, Jr., Tupelo, Miss.—Granted renewal of license for the period ending August 1, 1948.

**MISCELLANEOUS ACTIONS**

**KJBS—**KJBS Broadcasters, a partnership, consisting of Wm. B. Dolph, et al., San Francisco, Calif.—Granted license to cover construction permit which authorized installation of a new transmitter and increase in power to 1 KW. (B5-L-1919)

**KSAI—**KSAI, Inc., Collins, Kan.—Granted authority to determine operating power by direct measurement of antenna power. (B3-Z-1751)

**WPAV—**The Scribner Broadcasting Co., Portsmouth, Ohio—Granted construction permit to install a new transmitter. (B2-P-4398)

**WJOL—**WCLS, Inc., Joliet, Ill.—Granted modification of license to change corporate name to Joliet Broadcasting Co. This license is granted for a temporary basis only and upon the express condition that it is subject to whatever action may be taken by the Commission upon the pending application for renewal of license of WJOL. Nothing contained herein shall be construed as a finding by the Commission that the operation of the station is or will be in the public interest beyond the express terms hereof. (B4-M-1224)

**KSMA—**Hugh G. Shurtleff, et al., Santa Maria, Calif.—Granted modification of construction permit, which authorized a new station, for change in studio location to U. S. Highway 101, 1 1/2 miles north of center of Santa Maria, Calif., the location of transmitter site. (B5-MP-1854) Also waiver of Secs. 3.55(b) and 3.60 granted; conditions.

**NEW—**Loyola University, area of New Orleans, La., and vicinity—Granted construction permit for new relay station; frequencies 1622, 2058, 2150 and 2790 kc.; 15 watts. (B3-PY-308)

**W9XFT—**Farnsworth Television & Radio Corp., Fort Wayne, Ind.—Granted construction permit to reinstate construction permit for a new experimental television station (which was granted December 19, 1944 and permitted to lapse in 1945). (B4-YR-160)

Granted waiver of Rule 3.661(a) to all existing commercial television broadcast stations until July 1, 1946, which requires each television broadcast station to render not less than two hours in any given broadcast day and a minimum of 28 hours program service per week.

**WMOG—**Coastal Broadcasting Co., Brunswick, Ga.—Granted modification of license to increase operating power from 100 watts night, 250 watts day, to 250 watts unlimited time. (B5-MI-1223) Station operates on 1490 kc.

**WREN—**WREN Broadcasting Co., Lawrence, Kansas—Granted order denying petition requesting that its application for a construction permit for authority to move its Station WREN from Lawrence to Topeka and to use 5 KW with a directional antenna, unlimited time, be granted insofar as it requests authority to replace the station. (Docket 6633)

**WMLL—**Evansville on the Air, Inc., Evansville, Ind.—Granted further extension of license for FM station WMLL upon a temporary basis only, pending determination upon application for renewal of license in no event later than May 1, 1946, subject to changes in frequency assignment which may result from proceedings in Docket 6051.

**WWNC—**Asheville Citizens-Times Co., Inc., Asheville, N. C.—Adopted order granting petition for reinstatement of applications for construction permit to change operation from 570 kc. to 950 kc., unlimited time, to 570 kc., unlimited time, to 1490 kc., directional antenna night, unlimited time, and for modification thereof for approval of transmitter location and directional antenna; and granted said applications. (B3-P-2644; B3-MP-1437; Docket 6423)

**KONX—**Evening News Press, Inc., Fort Angeles, Wash.—Granted modification of license to change corporate name to Radio Pacific, Inc. Licensee hereunder is granted a waiver of Sec. 3.55(a) and 3.60 of the Commissioners Rules; conditions. (B5-MI-1227)

NEW—Peoples Broadcasting Cor., near Worthington, Ohio—Construction permit for a new standard broadcast station to be operated on 880 kc., power of 5 KW and daytime hours of operation.

WBLS—Roanoke Broadcasting Corp., Roanoke, Va.—Acquisition of control of licensee corporation by Shenandoah Life Insurance Co., Inc., by purchase of stock from Junius Parker Fishburn. (1210 kc.)

NEW—E. P. Nicholson, Jr., and John Wallbrecht, a partnership, d/b as Pinnacle Broadcasting Co., Middleboro, Ky.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

NEW—Richard E. Adams, James H. Shoemaker and Albert A. Anderson d/b as Coastal Broadcasting Co., Charleston, S. Car.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

NEW—General Newspapers, Inc., Gadsden, Ala.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

NEW—A. M. Garrison, Kenneth T. Mallory and K. N. Mosley, a partnership, d/b as Tifton Broadcasting Co., Tifton, Ga.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

NEW—Victor John Morgan and William M. Goza, Jr., d/b as Tifton Newspaper Broadcasting Co., Clearwater, Fla.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—Frederic LeMieux, III, Claude S. Menenz and Edna Capo LeMieux, d/b as Gulf State Broadcasting Co., Crowley, La.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—P. B. Huff, d/b as The Hazard Broadcasting System, Hazard, Ky.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—A. M. Garrison, Kenneth T. Mallory and K. N. Mosley, a partnership, d/b as Tifton Broadcasting Co., Tifton, Ga.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

NEW—James R. Doss, Jr., Huntsville, Ala.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Plains Empire Broadcasting Co., Amarillo, Texas—Construction permit for a new standard broadcast station to be operated on 1320 kc., power of 500 watts night and 1 KW daytime, and unlimited hours of operation using directional antenna at night.

---

**Federal Trade Commission Docket**

**COMPLAINT**

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

**Consolidated Grocers Corp.—**The Commission has issued a complaint alleging as unlawful the acquisition by Consolidated Grocers Corp., 135 South LaSalle Street, Chicago, of the capital stock of three corporations which competed with it in the wholesaling of grocery products. (5420)

**CEASE AND DESIST ORDERS**

The Commission issued the following cease and desist orders last week:

**Frenco Laboratories—**Chester D. French, trading as Frenco Laboratories, 159 Terrace Avenue, Nogales, Ariz., has been ordered by the Commission to cease and desist from disseminating false advertisements concerning the therapeutic properties of medicinal preparations he sells under the names of Pap-Tea, Py-O-Ten, and Pap-Tabs. The principal ingredient in Pap-Tea and Py-O-Ten is papain, a drug derived from the juice of the fruit of the papaya tree. Pap-Tea is the dried, cured, ground and blended leaves of the papaya tree.

**The Lane Drug Co.—**The Federal Trade Commission has ordered The Lane Drug Co., 257 Phillips Avenue, Toledo, Ohio, to discontinue disseminating advertisements which represent that the vitamin preparation they sell under the name of Calcium Pantothenate Tablets is an anti-gray hair vitamin which will restore the original natural color to gray hair. (5389)

**M. Portnow—**Felix Portnow, trading as M. Portnow, 445 Grand Street, New York, engaged in the manufacture and sale of trusses, has been ordered by the Commission to cease and desist from disseminating false advertisements concerning the effectiveness of his trusses in the treatment of ruptures or hernias. (4887)

**STIPULATIONS**

During the past week the Commission has announced no stipulations.

MARCH 4, 1946 —166
A Statement Regarding the F. C. C. Report on "Public Service Responsibility of Broadcast Licensees"

By JUSTIN MILLER, President, NAB

"The Report released by the Federal Communications Commission, under date of March 7, 1946, concerning radio programming, reflects a philosophy of government control which raises grave questions of constitutionality. The report overlooks, completely, freedom of speech in radio broadcasting, which was a primary consideration in the mind of Congress when it passed the Communications Act.

"Considered from every angle, the report reveals a lack of faith in the American system of free radio and a desire to impose artificial and arbitrary controls over what the people of this country shall hear. It indicates a reversion to that type of government control and regulation from which our forefathers struggled to escape. In this instance, just as with the issue of freedom of the press, there can be no compromise.

"Highlighting a few examples of inadequate programming, the report then proceeds to indict the entire radio broadcasting industry. Relying upon its own administrative practices, it now asserts powers far beyond those given to it by Congress and inconsistent with the constitutional limitations under which Congress acted.

"The radio broadcasters of this country fully recognize their responsibility to the American people. In a bare quarter century of existence this industry has accomplished incomparably more than has any other industrial or professional group, in a similar period of time, in development of its standards of performance. An honest, objective comparison of radio programs today with those of ten years ago will demonstrate this fact beyond question.

"The radio broadcasters recognize, frankly, that they, like all other human beings and institutions, are far from perfect. Both as individual licensees, and through their national association, they will continue in the future, as they have in the past, to improve both their programs and other phases of broadcasting.

"On the other hand, the broadcasters are fully aware that they are the champions of the people in resisting both direct and indirect encroachments of government upon the freedom of speech. Encroachments which in their inception may seem innocuous to many people—and which, perhaps, may seem justified in the light of isolated instances of bad taste or poor judgment—nevertheless strike at the very heart of our system of broadcasting and constitute bold steps toward government domination which may eventually deprive us of fundamental rights."
FCC TO IMPOSE FOUR-WAY PROGRAM CONTROL ON LICENSEES

The Federal Communications Commission, Thursday, released a 130-page mimeograph report on “Public Service Responsibility of Broadcast Licensees.” The Commission undertook what it described as steps to reduce advertising “excesses” on radio stations and further announced that in issuing and renewing the licenses of radio stations it would give particular attention to four program service factors affecting the public interest:

1. Programming of sustaining programs, including network sustaining programs.
2. The carrying of real live programs.
3. The carrying of programs devoted to the discussion of public issues.
4. Elimination of advertising excesses.

In the future application forms, the Commission will require the applicant for a new station to state how much time he proposes to devote to advertising matter in any one hour. In reporting program service by radio stations, the Commission stated: “This, by itself, will not result in the elimination of some of the particular excess. This is a matter in which self-regulation by the industry may properly be sought and, indeed, expected. As the broadcasting industry itself has insisted, the public interest clearly requires that the amount of time devoted to advertising material shall bear a reasonable relationship to the amount of time devoted to programs.”

The Commission devoted considerable space in this release undertaking to justify the Commission’s action and jurisdiction with respect to program service. (See President Miller’s statement on this page.)

The report declared that the sustaining program has five distinctive and outstanding functions:

1. To secure for the station or network a means by which, in the over-all structure of its program service, it can achieve a balanced interpretation of public needs.
2. To provide programs which by their very nature may not be sponsored with propriety.
3. To provide programs for significant minority tastes and interests.
4. To provide programs devoted to the needs and purposes of nonprofit organizations.
5. To provide a field for experiment in new types of programs, secure from the restrictions that obtain with reference to programs in which the advertiser’s interest in selling goods predominates.

The Commission’s report had this to say about the place of advertising in the American system of broadcasting:

“Value of advertising

“Advertising represents the only source of revenue for most American broadcasting stations, and is therefore an indispensable part of our system of broadcasting. In return for spending some 397 million dollars per year on American broadcasting, the advertiser can expect that his name and wares will be effectively made known to the public.

“Advertising in general, moreover, and radio advertising in particular, plays an essential role in the distribution of goods and services within our economy. During the post-war era if manufacturers are to dispose of the tremendous output of which our postwar industry will be capable, they must keep their products before the public.

“Finally, informative advertising which gives reliable factual data concerning available goods and services is itself of direct benefit to the listener in his role as consumer. Consumer knowledge of the new and improved products which contribute to a higher standard of living is one of the steps toward achieving that higher standard of living.

“However, the fact that advertisers have a legitimate interest and place in the American system of broadcasting does not mean that broadcasting should be run solely in the interest of the advertisers rather than that of the listeners. Throughout the history of broadcasting, a limitation on the amount and character of advertising has been one element of ‘public interest.’”

In its summary and conclusions for future Commission policy the report invoked the assistance to the public as well as self-regulation by the industry itself in carrying out the proposal delegating that “force outside the broadcasting industry has a role to play in improved program

Pursuant to the procedure stated in its Report on Public Service Responsibility of Broadcast Licensee, the Federal Communications Commission announced Friday that it was requesting approximately 300 radio broadcast stations now operating on temporary licenses to submit their program logs, with a percentage analysis thereof, for a composite week in 1945—namely, Monday, January 15; Tuesday, March 13; Wednesday, April 25; Thursday, June 7; Friday, August 10; Saturday, October 13; and Sunday, December 9.

Copies of the program forms, with definitions of “commercial,” “sustaining,” “network” and other types of programs, discussed at pages 133-137 of the Report, are being included in letters sent to stations now on temporary license with the request that the information called for therein be supplied by March 29, 1946, in order to expeditiously handle renewal applications.

It is believed that the new procedure outlined in the Report will enable the Commission to dispose of the backlog of pending renewal applications and to remain current thereafter. Although some of the 300 stations now operating on temporary licenses have been placed in that status because of engineering, accounting and legal problems, most of them are on temporary because it has not been possible with the press of other work for the Commission’s limited staff to process the renewal applications and to make detailed breakdowns under the old procedure. Rather than divert manpower needed for hearing work and the processing of AM and FM applications, the Commission deemed it preferable to issue temporary licenses pending the adoption of the more expeditious procedure outlined in the Report issued Thursday.

MARCH 11, 1946 — 168
service.” The report delegated that there was a place for professional radio critics as well as radio literary councils and made specific reference to the council set-up under NAB conferences in Cleveland, Ohio, and Madison, Wisconsin.

In its procedural proposals the report stated:

Procedural Proposals

In carrying out the above objectives, the Commission proposes to continue substantially unchanged its present basic licensing procedures—namely, the requiring of a written application setting forth the proposed program service of the station, the consideration of that application on its merits, and subsequently the comparison of promise and performance when an application is received for a renewal of the station license. The ends sought can best be achieved, so far as presently appears, by appropriate modification of the particular forms and procedures currently in use and by a generally more careful consideration of renewal applications.

The particular procedural changes proposed are set forth below. They will not be introduced immediately or simultaneously, but rather from time to time as circumstances warrant. Meanwhile, the Commission invites comment from licensees and from the public.

1. Uniform Definitions and Program Logs.

The Commission has always recognized certain basic categories of programs—e.g., commercial and sustaining, network, transcribed, recorded, local, live, etc. Such classifications must, under Regulation 3,404, be shown upon the face of the program log required to be kept by each standard broadcast station; and the Commission, like its predecessor, has always required data concerning such program classifications in its application forms.

Examination of logs shows, however, that there is no uniformity or agreement concerning what constitutes a “commercial” program, a “sustaining” program, a “network” program, etc. Accordingly, the Commission will adopt uniform definitions of basic program terms and classes, which are to be used in all presentations to the Commission. The proposed definitions are set forth below.

A commercial program (C) is any program the time for which is paid for by a sponsor or any program which is interrupted by a sponsor announcement (as defined below), at intervals of less than 15 minutes. A network program shall be classified as “commercial” if it is commercially sponsored on the network, even though the particular station is not paid for carrying it—unless all commercial announcements have been deleted from the program by the station.

(It will be noted that any program which is interrupted by a commercial announcement is classified as a commercial program, even though the particular station is not paid for carrying it—unless all commercial announcements have been deleted.)

A sustaining program (S) is any program which is neither paid for by a sponsor nor interrupted by a spot announcement (as defined below).

A network program (N) is any program furnished to the station by a network or another station. Transcribed delayed broadcasts of network programs are classified as “network,” not “recorded.” Programs are classified as network whether furnished by a nationwide, regional, or special network or by another station.

A recorded program (R) is any program which uses phonograph records, electrical transcriptions, or other means of mechanical reproduction in whole or in part—except where the recording is wholly incidental to the program and is limited to background sounds, sound ef-
sustaining public service announcement” (SA) or “sustaining public service announcement” (PSA).

The adoption of uniform definitions will make possible a fairer comparison of program representations and performance, and better statistical analyses.

2. Segments of the Broadcast Day.

The Commission has always recognized, as has the industry, that different segments of the broadcast day have different characteristics, and that different types of program-announcing are therefore permissible. For example, the NAB Code, until recently, and many stations permit a greater proportion of advertising during the day than at night. The Commission’s Chain Broadcasting Regulations recognize four segments: 8 a.m.-1 p.m., 1 p.m.-6 p.m., 6 p.m.-11 p.m., and all other hours. Most stations make distinctions of hours in their rate cards.

In general, sustaining and live programs have tended to be crowded out of the best listening hours from 6 to 11 p.m., and also in a degree out of the period from 8 a.m. to 6 p.m. At least some stations have improved the ratios shown in reports to the Commission, but not the service rendered the public, by crowding sustaining programs into the hours after 11 p.m. and before dawn when listeners are few and sponsors fewer still. Clearly the responsibility for public service cannot be met by broadcasting public service programs only during such hours.

A well-balanced program structure requires balance during the best listening hours.

Statistical convenience requires that categories be kept to a minimum. In general, the segments of the broadcast day established in the Chain Broadcasting Regulations appear satisfactory, except that no good purpose appears to be served in connection with program analysis by distilling separately the segments from 8 a.m. to 1 p.m. and from 1 p.m. to 6 p.m. Accordingly, for present purposes it is proposed to merge these segments, so that the broadcast day will be composed of three segments only: 8 a.m.-6 p.m., 6 p.m.-11 p.m., and all other hours.

The above schedule will be uniformly utilized in Commission application forms and annual report forms in lieu of the various types of schedules now prevailing. In using it, stations may calculate the length of programs to the nearest five minutes.

* Totals should equal full operating time during each segment.
3. Annual Reports and Statistics

For some years, the Commission has called for a statement of the number of hours devoted to various classes of programs each year, in connection with the Annual Financial Reports of broadcast stations and networks. Requiring such figures for an entire year may constitute a considerable accounting burden on the stations, and may therefore impair the quality of the reports. Accordingly, the Commission proposes hereafter to require these data in the Annual Financial Reports only for one week.

To make the proposed week as representative as possible of the year as a whole, the Commission will utilize a procedure hereofore sometimes used by stations in presentations to the Commission. At the end of each year, it will select at random a Monday in January or February, a Tuesday in March, a Wednesday in April, a Thursday in May or June, a Friday in July or August, a Saturday in September or October, and a Sunday in November or December, and will ask for detailed program analyses for these seven days. The particular days chosen will vary from year to year, and will be drawn so as to avoid holidays and other atypical occasions.

The information requested will be in terms of the definitions and time periods set forth above. Statistical summaries and trends will be published annually.

The Commission will also call upon the networks for quarterly statements of the stations carrying and failing to carry network sustaining programs during a sample week in each quarter.

4. Revision of Application Forms

Since the establishment of the Federal Radio Commission, applicants for new stations have been required to set forth their program plans, and applications have been granted in part on the basis of representations concerning program plans. Applications for renewal of license, assignment of license, transfer of control of licensee corporation, and modification of license have similarly included, in various forms, representations concerning program service rendered or to be rendered. The program service questions now asked on the Commission's application forms are not uniform, and not closely integrated with current Commission policy respecting program service. It is proposed, accordingly, to revise the program service questions on all Commission forms to bring them into line with the policies set forth in this section.

Specifically, applicants for new stations will be required to fill out, as part of Form 301 or Form 319, a showing of the program structure of the station during a week immediately preceding the filing of the application being considered, and information concerning the holding of network sustaining programs. If the Commission is able to determine from an examination of the application that a grant will serve the public interest, it will be governed by the statute.

First, it will have available all the data concerning engineering, legal, accounting and other matters, as heretofore.

Second, it will have available a responsible estimate of the time to be devoted to sustaining programs, live programs, discussion programs, and advertising matter.

Fourth, it will have available from the annual reports to the Commission data concerning the actual program structure of the station during a sample week in each quarter.

Fifth, it will have available the station's representations concerning program service under the license applied for.

If the Commission is able to determine on the basis of the data thus available that a grant will serve the public interest, it will continue as heretofore, to grant forthwith; otherwise, as heretofore, it will designate the renewal application for hearing."

The full text of this 130-page document is being reprinted for distribution to the membership next week.
LEA BILL MAY REACH CONFERENCE TUESDAY

The Lea Bill may next Tuesday reach the Senate and House Conference for which it was destined after receiving recent overwhelming passage by the House, 222 to 43—this was the opinion expressed by Speaker of the House Rayburn at the press conference on Friday (8).

The Bill was last week sidetracked (See NAB Reports p. 151) to the House Rules Committee due to a negative vote entered by Rep. Marcantino (Am. Labor Party—N. Y.) when unanimous approval was asked of House Conferences selected for the Senate and House Conference Committee, which was to prepare a final draft of the Bill for Senate action.

It is expected that the formal action on the House ruling made necessary by this deferment will be swift and the Bill then will immediately go to conference.

Broadcast Advertising

Standard Contract Committee to Meet

Members of the NAB Sales Managers Subcommittee on Standard Contract Form will meet in New York March 12 with a subcommittee of the AAAA, in an effort to iron out differences still deadlocking the two groups in their efforts to renegotiate a new standard contract form for spot broadcasting.

Previous meetings have resulted in agreement on most points, but several issues still remain. If the committees reach full agreement at this meeting, the proposed new form would then go to the boards of directors and memberships of the NAB and AAAA for ratification, a process that would require several months. Meanwhile, stations and agencies are using the standard form adopted in 1942.

Members of the NAB subcommittee are Walter Johnson, WTIC, chairman; Lewis H. Avery station representative, New York; Sam H. Bennett, KMBC, Kansas City; Ben Laird, formerly of WOSH, Oshkosh, Wis., and now a new station applicant; Howard Meighan, CBS, New York, and James McConnell, chairman of the Sales Managers Executive Committee, NBC, New York. Also attending for the NAB will be John Morgan Davis and Donald Petty, counsels, and Frank E. Pellegrin, Director of Broadcast Advertising.

Army Day

Stations are reminded that Army Day observance April 6, is a public interest promotion which offers many programs for possible local sponsorship.

Additional Joske Research Planned

Additional research is under way and more is planned during 1946 in connection with the study of radio advertising for retailers being conducted in San Antonio, Texas, by Joske's of Texas department store.

In progress is a consumer-attitude survey by Crossley, Inc., parallel to a study made of San Antonio residents before the department store undertook its extensive use of radio in 1945. Purpose of this survey is to learn what effect, if any, the year's use of radio had upon consumer attitudes and buying habits.

Also planned is a series of checks and measurements within the store, to determine relative effectiveness of radio and newspaper advertising of specific items, lines, departments and store services. For this purpose the NAB intends to engage a full-time research assistant who will remain at the store for approximately six months, to conduct and supervise the tests. Search for a qualified research assistant is now in progress. NAB members knowing of anyone thus qualified are invited to write the Department of Broadcast Advertising.

While some testing was done during 1945, research of this type was not extensive due to the unusual and erratic shortages of merchandise, which, the Joske committee felt, would serve to nullify any results shown. Therefore it was decided to postpone this phase of the study until a more nearly normal situation would prevail.

Also in progress is the year-end audit of the department store's sales for its fiscal year ending January 31, 1946, being conducted by the auditing firm of Ernst & Ernst. From this report information will be sought on comparative sales increases or decreases by departments receiving a greater or lesser share of radio advertising.

Air Force and the Retailer Film Active

The film, “Air Force and the Retailer,” analyzing the problems of retail selling and distribution, is being loaned to stations at no charge. This is part of the presentation originally sponsored by the NAB Retail Promotion Committee.

“The History and Development of Retailing” featuring Sheldon R. Coons, former Gimbel Brothers and Lord & Thomas executive, and “Why Radio Works” based on a 5-year study and special research by Dr. Paul Lazarsfeld of Columbia University’s office of Radio Research, are still available for showings.

These two reels on sound motion picture 16mm film may be secured by writing to the NAB Department of Broadcast Advertising. Projection machines will have to be rented in your own locality. The film showing takes about an hour.

Syndicated Transcriptions Interest Ralph Hanson, KUIN

Ralph Hanson, General Manager, KUIN, Grants Pass, Oregon, writes:

“We find it very difficult to sell a transcribed series when the cost per transcription is greater than station time, this in spite of the added production, etc. The $2.50 rate per program (Feb. 18th NAB Reports) would enable us to sell a greater number of these programs. We are, at the present time, carrying a transcribed series at $3.00 per program, and for outstanding shows, could handle the $4.00 rate for a three time a week program.

“You may definitely consider this station much in favor of a $2.50 or $3.00 rate, for fifteen minute shows, and have our assurance that we could sell a greater number of programs at these rates.”

Small market stations' problems related to suitable syndicated transcribed shows at reasonable prices have been presented by J. Allen Brown of NAB to transcription producers. From all indications, the Department of Broadcast Advertising will soon report the availability of syndicated shows from top producers at a new low price. All stations are invited to comment on the subject.

New Case Histories Ready

The Department of Broadcast Advertising mimeographs case histories called “Radio Gets Results,” available free to member stations on request. When writing, specify the types of business for which case histories are desired. Released this week are stories on:

(Continued on next page)
that those businesses which offer the public personal services of the human voice. And we have a strong conviction that radio alone uses spoken salesmanship and radio alone carries the impact, the inflections, warmth and convictions of the human voice. And we have a strong conviction that those businesses which offer the public personal services should be advertised in a personal way. . . . Radio is the only advertising medium which places no eye strain on the customer, and that makes it a logical advertising medium for people in our business. . . ."

If interested, write the NAB for Service Optical case history giving full details.

**Optician Uses Sound Approach**

*Good sales idea:* Service Optical, Des Moines, Ia., uses five spot announcements daily, six days a week, over KSO to sell its optical service. The sponsor states his own reasons for using radio as follows:

"Radio alone uses spoken salesmanship and radio alone carries the impact, the inflections, warmth and convictions of the human voice. And we have a strong conviction that those businesses which offer the public personal services should be advertised in a personal way. . . . Radio is the only advertising medium which places no eye strain on the customer, and that makes it a logical advertising medium for people in our business. . . ."

If interested, write the NAB for Service Optical case history giving full details.

**Programming**

**SET 4 RADIO NEWS CLINICS**

Four radio news clinics, all west of the Mississippi, will be held during the March 22-28 period.

Series begins with the Iowa clinic in Cedar Rapids, at the Roosevelt Hotel, Friday (22).

Three Texas radio news clinics will be held in Houston, March 26; Fort Worth, 27; and San Antonio, 28.

**Iowa Clinics**

Following news clinic conversations with NAB headquarters, John J. Gillin, Jr., 10th district director, and President, WOW, Omaha, consulted with J. O. Maland, president, Iowa Broadcasters Association, and general manager, WHO, Des Moines.

Beryl Lottridge, vice president, WOC, Davenport, agreed to take over the clinic chairmanship and William B. Quarnton, general manager, WMT, aided by Doug Grant, program manager, the chairmanship of local arrangements.

In addition to personal invitations to all Iowa stations, Mr. Lottridge invited Wilbur Schramm, director, School of Journalism, University of Iowa, and vice chairman of the Council on Radio Journalism, K. R. Marvin, head, Department of Technical Journalism, Iowa State College, and Richard B. Hull of Iowa State's radio station WOI. All have accepted.

**Texas Clinics**

Martin B. Campbell, managing director, WFAA, Dallas, and director of NAB District 13, appointed Jack McGrew, program director, KPRC, Houston, general chairman of the Texas clinics.

Ken McClure, WOI, is chairman of the San Antonio meeting and James Byron, WBAP, of the Fort Worth clinic.

Earlier this week Chairman McGrew reported 22 firms and two provisional acceptances with many more expected well in advance of first roll call. The following are among the stations so far registered:

**San Antonio Radio News Clinic**

| Austin          | KNOW-KTBC |
| Brownsville (provisional) | KVAL       |
| Corpus Christi (provisional) | KRIS       |
| Lubbock         | KFYO       |
| San Antonio     | KABC-KMAC-KONO-KTSA-KOAI |
| Weslaco         | KRGV       |

**Fort Worth Clinic**

| Amarillo       | KGNC       |
| Dallas         | KRLD-KSKY-WFAA-WRR |
| Fort Worth     | KFJZ-KGKO-WBAP |

**Houston Clinic**

| Beaumont       | KFDM       |
| Houston        | KXYZ-KPRC-KTHT-KTRH |

Arthur Stringer will represent the NAB Radio News Committee at all 4 clinics.

**CHELFE DECRIES EXCLUSIVITY IN ARMY-NAVY GAME BROADCAST**

An AP dispatch states that Rep. Chelf (D-Ky.) has asked West Point and Annapolis Athletic Associations to discontinue their policy of selling exclusive rights for coverage of the annual Army-Navy football game to one network.

All broadcasting companies, he wrote the Associations, should have an opportunity to carry the event play by play "inasmuch as this great game is played between two teams which the Government directly supports through the medium of appropriations of public funds."

**ARMY DAY OBSERVANCE**

**SATURDAY, APRIL 6, 1946**

1946 Army Day observance is a public interest project of serious importance. You can put your best efforts behind the 1946 Army Day, April 6, with the knowledge and certainty that your station and your industry can do the job and do it best.

**Cooperation from Army Personnel**

This Army Day will be celebrated for the first time since 1941. The President has issued the Army Day Proclamation. General Eisenhower has called on the military commanders throughout the United States to do everything in their power to make the day a memorable one. This subject is covered in his letter printed below.

**Purpose of 1946 Army Day**

This year's observance will recognize the great accomplishments of the Army through honoring veterans of World War I and World War II. In addition the Army hopes that the country will be reminded that the Army has done more than defend the country, has made vast contributions to national progress. This is important because it will be made clear to our NEW ARMY now forming that it, too, has unusual opportunities for service during the days ahead.

(Continued on next page)
What to Do Now

Since General Eisenhower's official request went to Commanding Generals of the Army Ground, Army Air and Service Forces, February 14, broadcasters in the vicinity of Army establishments may make Army contacts now.

In the event no civilian group has taken the lead in local Army Day celebration, you have the option of calling the event to the attention of proper persons or yourself taking over.

This deserves to be the most successful Army Day in the history of the nation.

EISENHOWER'S LETTER

WAR DEPARTMENT
OFFICE OF CHIEF OF STAFF
Washington 25, D. C.

SUBJECT: Observance of Army Day

TO: Commanding Generals:
Army Ground Forces
Army Air Forces
Service Forces

By Presidential proclamation, 6 April is designated each year as Army Day. For the first time since 1941, the Army will be able to give its full attention to the celebration, and it is my personal desire that commanders throughout the United States take the initiative in making the day a memorable one.

While sponsorship of civic celebrations must be in the hands of civilian leaders of each community, commanders of posts, camp stations and stations may appropriately suggest that such celebrations be arranged and offer cooperation to the extent of their resources in troops, bands, and equipment, and in arranging for speakers to address meetings. While I realize that in numerous cases there will be limitations on the extent of actual troop participation possible, I desire that every reasonable effort be made to insure effective representation of Army personnel.

The object of these ceremonies should be to recognize the great accomplishments of the Army through honoring the veterans of World War I and World War II. Through the cooperation of veterans organizations, all former members of the Army, now returned to civilian life, should be encouraged to wear the uniform and participate in parades and other ceremonies. Such arrangements should be sought as will permit the participation by as many members of the community as possible in honoring the wartime Army.

Dwight D. Eisenhower,
Chief of Staff, U. S. Army.

AD COUNCIL—OWMR ALLOCATIONS—MAR. 18-24

The following four public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of March 18-24 by the Advertising Council and the Media Programming Division of the OWMR.

A brief resume of each Fact Sheet is given below:

1946 Red Cross Fund Drive (Fact Sheet No. 14)

To the people of the United States from General Dwight D. Eisenhower, Chief of Staff, United States Army: “The Red Cross activities in Army hospitals and the program of clubs, recreation centers and welfare must go on through the period of occupation according to changing needs. Normal amenities of life are so lacking in the occupied zones that the American soldier has, in most cases, only what we send him. I express the earnest hope of the Army that the American public will continue its generous support of the Red Cross during 1946.”

This message from General Eisenhower outlines the continuing responsibilities of the Red Cross to the men who made peace possible. To them must be added the victims of unforeseeable floods, fires, tornadoes and other disasters right here at home whom the Red Cross must stand ready to provide with emergency food, clothing and shelter as it has so faithfully done in the past. During the month of March the American people will be asked to contribute $100,000,000 needed by the American Red Cross to carry out this vast program of service to our occupying forces, hospitalized servicemen, veterans and civilians in need.

Homes for Veterans (Fact Sheet No. 5)

America faces a critical housing shortage—and its veterans are the worst sufferers. They feel the pinch of the shortage more acutely because they interrupted their lives to go into the Armed Services. It is simply a matter of fair play to help them in every possible way to locate homes in which they can live with their families as they return to civilian life. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which to return. It appears that more than 2,000,000 veterans' families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans' housing situation. But until construction gets rolling, by all means the most important source of housing in the coming years will be the resources which become available in the existing housing supply. Urge listeners to help ease the housing situation by "staying put," if they possibly can, so that a maximum number of veterans can find living places in the existing housing supply, instead of having to build new homes; and urge veterans to cooperate in the cooperation of veterans' organizations, all former members of the Army, now returned to civilian life, should be encouraged to wear the uniform and participate in parades and other ceremonies. Such arrangements should be sought as will permit the participation by as many members of the community as possible in honoring the wartime Army.

Safety on the Highways (Fact Sheet No. 15)

Slaughter on our highways is skyrocketing. Right now smash-ups have reached an all-time high or more than one a minute—all day—every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was $1,450,000,000—almost 1 1/2 billion dollars. In the four months after gas rationing ended, traffic deaths jumped 57%. Unless something is done about it, accidents will multiply alarmingly in coming months. Your station can help "put the brakes" on America's rising traffic death toll. Make each listener realize he is a potential accident victim. Point out as specifically as time will allow the little, thoughtless chance he may be taking today—which may mean the difference between life and death. Make each listener decide right then and there never again to take even a "little" chance with injury or death.

Fat Salvage (Fact Sheet No. 18)

Only by continuing their magnificent job of fat salvage can housewives help return to store shelves plentiful supplies of soap and hundreds of other things they've been waiting for. Fats and oils are just as important to the production of peace-time goods as they were for munitions, and supplies of industrial fats are far short of demands and needs. Domestic production, which has never been able to compensate fully for the loss of imports from the Pacific, is down this year and it may take many months to bring imports back to peace-time levels. Meanwhile, there is a tremendous demand for fats and oils. They are urgently needed in the manufacture of soap and nearly all other consumer goods—nylons, refrigerators, automobiles, paints. American women can actually help themselves to get the peace-time products they want and need in greater abundance and sooner by keeping up their good work in salvaging fats. They are asked to Save every drop of used fat by draining pans, skimming soups, melting down trimmings of meat, collecting the salvage can—re-use those suitable for cooking, and salvage whatever is left—turn in the fat salvage container to their meat dealers promptly. They'll get four cents for every pound turned in.

(Continued on next page)
RETURN OF VETERANS RAISES LISTENING 40% IN 17-35 AGE BRACKET

Radio’s unseen audience, enlarged by millions of returned veterans, had 40.8 per cent more men listeners aged 17 through 35 during Jan. this year than it had in Jan. 1945, Cooperative Analysis of Broadcasting announces.

Changes in the composition of nationwide radio audiences are described in CAB’s latest report which gives the first 1946 breakdown of listeners. Discharged servicemen have caused most of the “reconversion” of radio audiences. It was stated last week by President Truman that more than 7,500,000 persons have been discharged from military service since hostilities ended.

In the 17 through 35-year-old age group, CAB reported that the number of men listeners increased 44.7 per cent for nighttime listening, 30.7 per cent for Monday through Friday daytime listening, and 35.8 per cent for weekend daytime listening. Considering Sunday night only, the number of men listeners was 55 per cent greater than in Jan. 1945.

Listening by men of all ages was 12.2 per cent greater this Jan. than a year ago.

The number of women and children listening to the radio remained much the same but the total listening—men, women and children—was appreciably higher this Jan. than a year ago.

Sunday night programs get the most listeners per listening home. In Jan. this year the highest number of listeners was 3.4 for the period 6:45 to 7 p.m. Sunday. A year earlier the highest number also came on Sunday night but was only 2.8.

Nighttime Monday through Friday listening ranged from 2.2 to 2.5 listeners per listening home this Jan. In most cases the number of listeners averaged an increase of one-tenth over Jan. 1945 figures—in other words, an increase of one person for every 10 homes listening.

Noontime and late afternoon weekday listening audiences were also higher than in Jan. 1945. During the first month of 1946 the average listeners per listening home was 1.7 at noon, compared with 1.6 a year earlier. Late afternoon listening ranged from 1.9 to 2.2 in Jan. this year, compared with 1.8 to 2.1 last year.

Saturday daytime listening this Jan. never dropped below 2.0 listeners per listening home while a year earlier there were five 15-minute periods when listening was 1.9 persons per listening home.

FINAL PEABODY SELECTIONS

Final selections of the winners of the George Foster Peabody Radio Awards were to be made this past week-end in New York City by the members of the national advisory board, to whom the recommendations of the University of Georgia’s faculty screening committee have been forwarded.

The University was to be represented at the meeting of the national board by Dean John E. Drewry of the Henry W. Grady School of Journalism, the unit of the University which administers the Peabody Awards.

Members of this national board are Edward Weeks, editor, Atlantic Monthly, Boston; chairman; John H. Benson, formerly president, American Association of Advertising Agencies, New York City; Dr. Ralph Casey, director, School of Journalism, University of Minnesota, Minneapolis; Jonathan Daniels, editor, Raleigh (N. C.) News and Observer; Mark Ethridge, publisher, Louisville (Ky.) Courier-Journal and Times; Earl J. Glade, mayor of Salt Lake City, Utah; Joseph Henry Jackson, literary editor, San Francisco (Cal.) Chronicle; Waldemar Kaempfert, science editor, New York Times; Dr. I. Keith Tyler, director of radio education, Ohio State University, Columbus; Mrs. Elizabeth Ames, executive secretary, “Yaddo,” Saratoga Springs, New York; and Dixon Wecter, professor of English, University of California, and associate fellow, Huntington Museum, Los Angeles.

Only ten of the 48 states are not represented in the more than 200 entries, including two from foreign countries, from which the winners will be chosen. In addition to these entries, scores of programs have been recommended for consideration by listening-post committees set up each year throughout the United States. These listening-post committees are located in 36 states.

All of these entries and listening-post recommendations have been carefully screened by a University committee appointed by President Harmon W. Caldwell, and consisting of M. Tyus Butler, assistant professor of journalism, chairman; Miss Carolyn Vance, assistant professor of radio; Ralph Roger Williams, instructor in radio; John E. Taldmadge, assistant professor of journalism; James E. Fleming, assistant professor of sociology; George F. Blair, acting head of drama; Michael Angelo McDowell, assistant professor of music; Dr. Paul Morrow, professor of education; Mrs. Glenn Sutton, associate professor of education; and Miss Emily Jones, instructor of education.

In the final selections, recognition will be given to both programs and stations. Awards are to be made in the following categories: 1. Public interest programming by a regional station, 2. Public interest programming by a local station, 3. Outstanding reporting and interpretation of the news, 4. Outstanding entertainment in drama, 5. Outstanding entertainment in music, 6. Outstanding educational program, and 7. Outstanding children’s program.

The Peabody awards are designed to recognize the most disinterested and meritorious public service rendered each year by the broadcasting industry, and to perpetuate the memory of George Foster Peabody, benefactor and life trustee of the University of Georgia, and friend of educational progress everywhere.

States represented in the current entries are Georgia, 4; Tennessee, 2; Texas, 3; North Carolina, 5; South Carolina, 3; Alabama, 1; Virginia, 2; Maryland, 1; Louisiana, 1; Florida, 1; Ohio, 8; Kentucky, 5; Pennsylvania, 11; West Virginia, 1; Indiana, 1; Michigan, 1; Oregon, 4; Washington, 3; California, 9; Arizona, 2; Utah, 4; Colorado, 1; Wisconsin, 1; Iowa, 15; Minnesota, 1; Missouri, 12; South Dakota, 1; Nebraska, 8; Oklahoma, 1; Kansas, 4; New York, 30; Connecticut, 5; Massachusetts, 9; New Hampshire, 2; Maine, 1; New Jersey, 1; Illinois, 8; and the District of Columbia, 1. Italy and Canada are each represented with 1 entry.

AMERICAN LEGION THANKS INDUSTRY

The American Legion has expressed appreciation to the radio industry for carrying its program series “This is Our Duty.” In a letter to the President of NAB this week Mr. Robert A. Drohlich, National Public Relations Division of the Legion, wrote in part:

“...We wish to express our thanks to your organization and to the radio industry for the very splendid cooperation which we are receiving and to assure you that we of the American Legion will be glad to cooperate with you in any undertaking which will assure the maintenance of a free and democratic method of broadcasting in the United States.”

The American Legion’s magazine, “The National Legionnaire,” is currently running a series of articles concerning the program. The following appeared in the February edition:

“Radio generally is accepting the air programs of The American Legion in behalf of the veterans and the nation with generosity and willing cooperation. The programs are used by radio as a public service and as assistance to (Continued on next page)
the near future under which the Department of Information will function. The Commission's purpose to make provision for a service which is best suited for that purpose. With respect to allocations for other broadcast services it has some reason to avoid allocations for FM broadcasting in addition to the band 88 to 108 megacycle band.

2. If any portion of such band is made available for FM broadcasting, whether such frequencies should be available for Non-Commercial Educational, Community, Metropolitan and Rural FM stations or only for Rural FM stations, and whether such frequencies should be available for FM stations in the entire United States or only in Area II.

3. To obtain information concerning the additional cost of FM receivers if the band 42 megacycles to 50 megacycles, or any part of it, is made available for FM broadcasting in addition to the band 88 to 108 megacycles.

In its Report, dated May 25, 1945, the Commission stated (p. 81):

"In making an allocation for FM, it is the Commission's purpose to provide FM broadcasting which will be the finest aural broadcast service which is attainable under the present state of the art. The Commission confidently expects that in the years to come this new service will develop to a point where there may be between 1,000 and 3,000 FM transmitters and between 50 million and 100 million FM receivers in the hands of the public. In planning for such a service it is obviously of the utmost importance that the allocation be made in the portion of the spectrum which is best suited for that purpose. With respect to allocations for other broadcast services it has sometimes been necessary to make compromises between various services competing for particular parts of the spectrum. However, with respect to FM the Commission is prepared to assign to it that portion of the spectrum which is shown to be best suited to its requirements. The Commission feels that it must proceed on this basis because it seems clear that this important new broadcast service will remain permanently in the portion of the spectrum to which it is assigned as a result of this hearing."

This statement still represents the Commission's basic policy with respect to FM broadcasting.

The Zenith petition, in essence, proposes that FM broadcasting shall proceed simultaneously in two bands, one from 44 to 50 megacycles, and the other from 88 to 108 megacycles. The objection to this dual-band allocation is expected to be considered in the Commission's en banc hearing scheduled for January 18 and 19, 1946. The latter hearing will afford an opportunity for those who may have objections to the dual-band allocation to present those objections to the Commission for consideration and decision.

(Continued on next page)

FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.
Docket No. 6551

In the Matter of Allocation of Frequencies to the Various Classes of Non-Governmental Services in the Radio Spectrum from 10 kilocycles to 30,000,000 kilocycles.

Report of the Commission

In its reports, dated May 25 and June 27, 1945, the Commission announced its final allocation of 90 channels in the band from 88 to 108 megacycles for FM broadcasting, and on August 24, 1945, this assignment was further expanded to provide 10 additional channels in Area I, the northeastern portion of the United States, between 106 and 108 megacycles. The history of the proceeding, the evidence upon which the allocation was based, and the Commission's reasoning, have been fully set forth in reports, dated January 15, 1945, May 25, 1945, June 27, 1945, and August 24, 1945, and need not here be reviewed.

On January 2, 1946, the Zenith Radio Corporation petitioned the Commission to make an additional allocation for FM broadcasting of 40 channels between 42 and 50 megacycles (subsequently amended to specify 30 channels between 44 and 50 mc.). The Zenith petition was joined in by the General Electric Company, and had the support of Major Edwin H. Armstrong, the inventor who pioneered in FM broadcasting. On January 3, 1946, the petition was designated for hearing and was heard on January 18 and 19, 1946, before the Commission en banc.

The notice of hearing specified the following issues:

1. Whether the band 42 megacycles to 50 megacycles, or any part of it, should be made available for FM broadcasting in addition to the assignment already made for FM in the 88 to 108 megacycle band.

2. If any portion of such band is made available for FM broadcasting, whether such frequencies should be available for Non-Commercial Educational, Community, Metropolitan and Rural FM stations or only for Rural FM stations, and whether such frequencies should be available for FM stations in the entire United States or only in Area II.

3. To obtain information concerning the additional cost of FM receivers if the band 42 megacycles to 50 megacycles, or any part of it, is made available for FM broadcasting in addition to the band 88 to 108 megacycles.

In its Report, dated May 25, 1945, the Commission stated (p. 81):

"In making an allocation for FM, it is the Commission's purpose to provide FM broadcasting which will be the finest aural broadcast service which is attainable under the present state of the art. The Commission confidently expects that in the years to come this new service will develop to a point where there may be between 1,000 and 3,000 FM transmitters and between 50 million and 100 million FM receivers in the hands of the public. In planning for such a service it is obviously of the utmost importance that the allocation be made in the portion of the spectrum which is best suited for that purpose. With respect to allocations for other broadcast services it has sometimes been necessary to make compromises between various services competing for particular parts of the spectrum. However, with respect to FM the Commission is prepared to assign to it that portion of the spectrum which is shown to be best suited to its requirements. The Commission feels that it must proceed on this basis because it seems clear that this important new broadcast service will remain permanently in the portion of the spectrum to which it is assigned as a result of this hearing."

This statement still represents the Commission's basic policy with respect to FM broadcasting.

The Zenith petition, in essence, proposes that FM broadcasting shall proceed simultaneously in two bands, one from 44 to 50 megacycles, and the other from 88 to 108 megacycles. The objections to this dual-band allocation are expected to be considered in the Commission's en banc hearing scheduled for January 18 and 19, 1946. The latter hearing will afford an opportunity for those who may have objections to the dual-band allocation to present those objections to the Commission for consideration and decision.

(Continued on next page)
tion appear decisive. It was the general consensus of those who testified at the hearing that adding a second band decreases the over-all efficiency of set performance. It is necessary to maintain some sensitivity and stability if two FM bands are incorporated in one receiver, and other complications arise such as antenna dimensions.

Furthermore, if two FM bands are approved, one or the other but not both will be licensed in many areas. However, all sets built in anticipation of a "dead" band on millions of set owners. The added cost to a purchaser of such a two-band set would be from $1.50 to $6.00 or more and on an annual basis for all users this added cost would run into millions of dollars.

Moreover, a two-band FM system will have an unpredictable effect upon the listening habits of the public in that it would require that the listener switch to select one band or the other unless this operation were done by automatic means. Habits of listening on one band to the exclusion of the other might well develop, which would complicate further the problems of assigning frequencies to FM stations.

Another factor which should merit consideration—but which is by no means conclusive—is that a few manufacturers have proceeded with plans to build two-band sets. This would give them a competitive advantage over other manufacturers who have proceeded with a view of producing one-band sets in accordance with the Commission's June 1945 allocation. The delay in producing two-band sets would range from four weeks to five months. As is pointed out later, there are no advantages to a two-band receiver which would warrant the Commission in requiring this delay.

Accordingly, the Commission concludes that FM broadcasting can proceed on a sounder basis in one band rather than in two bands.

In the course of the hearing, it was alleged that, at least in some parts of the country, the demand for FM channels exceeded the number of channels available from 88 to 108 megacycles and that, therefore, a second band should be added. On the basis of the record now before us and the needs of the public for an excessive number of bands is not able to determine that the public interest requires additional channels for FM broadcasting. The Commission has considered the requests and needs of the various services for channels in this portion of the spectrum and has concluded that the existing allocation provides a fair and equitable distribution of channels among these services.

The evidence does indicate, moreover, that in the event additional channels prove necessary, they can later be added to the present band. The feasibility of expanding an existing one-band service by addition of contiguous channels is shown by the fact that the boundaries of the standard broadcast band have been expanded from time to time without undue difficulty.

There remains only the question whether new evidence or testimony was introduced, except the testimony of Mr. Norton that the sunspot cycle now on the rise has continued to show marked similarities to the sunspot cycle which reached a maximum in 1778, and that hence we may anticipate during the coming decade F2 interference even in excess of predictions here-tofore made. Recent Bureau of National Weather Service observations indicate that in April 1946 the ionosphere will be capable of supporting F2 transmission of frequencies between 44 and 56 megacycles for 50 percent of the time during mid-day hours, in certain areas which must be considered in allocating frequencies in the United States. The disastrous effects anticipated from F2 interference have been set forth in the May 25, 1945 report at page 63.

(2) F2 Layer Interference.—With respect to F2 layer interference, no new evidence or testimony was introduced, except the testimony of Mr. Norton that the sunspot cycle now on the rise has continued to show marked similarities to the sunspot cycle which reached a maximum in 1778, and that hence we may anticipate during the coming decade F2 interference even in excess of predictions here-tofore made. Recent Bureau of National Weather Service observations indicate that in April 1946 the ionosphere will be capable of supporting F2 transmission of frequencies between 44 and 56 megacycles for 50 percent of the time during mid-day hours, in certain areas which must be considered in allocating frequencies in the United States. The disastrous effects anticipated from F2 interference have been set forth in the May 25, 1945 report at page 63.

(3) Extent of coverage.—With respect to extent of coverage, it should first be noted that all witnesses agree, and the evidence shows, that in the present state of the art service to farmers situated at a great distance from metropolitan areas must continue to come primarily from standard broadcast stations. At the best, assuming an FM station with an antenna height of 1,000 feet and with 300,000 watts effective radiated power, the most optimistic prediction of anticipated range in the lower band is 100 miles. Secondary service rendered many hundreds of miles from the transmitters of standard broadcast stations is not to be expected from FM stations either in the upper or lower band.

Measurements made by the Zenith Radio Corporation at Deerfield, Illinois, and by the Federal Communications Commission at Andalusia, Pennsylvania, on transmitters operating in the upper and lower bands were introduced in evidence. Witnesses for the Zenith Radio Corporation and others testified that the measurements supported the assertion that, in general, stations in the lower band would serve a much larger range than stations in the 88-108 megacycle band. They stated that in general the area served by an FM station in the higher band should be 60% less—50% for a comparable station on the lower band but admitted that this opinion was more or less of an estimate. The Commission is unable to accept this opinion.

In the first place, the measurements were limited to one (Continued on next page)
receiver location in the Deerfield instance and one receiver location in the Andalusia instance. Predictions for the entire service area of a station or for the country as a whole cannot properly be based upon two receiver locations.

Second, the Deerfield measurements at a fixed receiver location on the lower band were in striking contrast to the “proof of performance” measurements made pursuant to Commission Standards of Good Engineering Practice and filed by the licensee of the station in question in 1943, before this proceeding was instituted. The Deerfield measurements on the lower band were similarly in disagreement with other “proof of performance” measurements and data accumulated with respect to propagation in the lower band. Where a single series of measurements thus conflicts with the volume of data available, it obviously cannot be considered as conclusive by the Commission.

Third, the analysis made of the Deerfield measurements defined “satisfactory service” in the upper band as 10 microvolts per meter, but accepted a signal only one-half as strong as satisfactory in the lower band. While it is true that with specially designed antennas it is theoretically possible to produce as strong a signal at the receiver terminals with 5 microvolts per meter in the lower band as with 10 microvolts per meter in the upper band, for two-band operation with signals of such low intensity a separate antenna will be required for each band, with the consequent complication in antenna structure and the inconvenience of switching antennas with changes from one band to the other. It is believed that such an arrangement would be the exception rather than the rule and that the Commission Standards were not achieved in practice. This claimed advantage of the lower band further assumes the same receiver sensitivity in each band. As a witness for petitioner conceded, this is not true with respect to its own two-band receiver exhibited in the course of the hearing, which requires 20-25 microvolts in the lower band and only 10 microvolts in the upper band. It should also be pointed out that where noise or station interference exists, the low frequency antenna will pick up twice as much interference as on the higher band and consequently there is no effective gain so long as the internal receiver noise is not the limiting condition.

Fourth, the Deerfield measurements were made at a point considerably beyond the service areas of the stations measured. The standard of 10 microvolts per meter for the higher band and 5 microvolts per meter for the lower band were considerably too low to supply satisfactory service on either band. The Commission’s Standards specify a median field of at least 50 microvolts per meter, and no evidence was introduced that the lower band would show superiority on the basis of a 50 microvolt per meter median value of signal strength standard. In addition, no evidence was presented to show that at or within the recognized service contours the drop-outs would be greater on one frequency or the other, since the measurements were made at a point beyond these contours. These measurements were made during the summer and early fall, a period during which tropospheric transmission is above average; it should be borne in mind that year-round service cannot be predicted upon the basis of summer measurements where the troposphere is concerned. Accordingly, the Deerfield measurements can at best be considered as indicating that, in a region so far from the transmitter that satisfactory FM service is doubtful in either band, the service in the lower band would be substantially weaker than the service in the upper band for the period of observations.

The Andalusia measurements were similarly inconclusive due in part to the fact that they were made in one place only, in part to the fact that the Empire State Building may have interfered with the transmission paths of the signals in question, and in part to the fact that there is some doubt concerning the interpretation of the results during a period of several hours. As in the case of the Deerfield measurements, the Andalusia measurements on the lower band were in striking contrast to the “proof of performance” measurements made pursuant to Commission Standards of Good Engineering Practice and filed by the licensee of the station in question in 1943, before this proceeding was instituted. The Deerfield and the Andalusia measurements constitute a sufficient basis for service area predictions.

Summarizing, the Commission concludes that whether or not sporadic E in the lower band will be as intense as was predicted in earlier reports, there will still be a substantial problem of sporadic E interference in the lower band, and no similar problem in the upper band. The Commission further concludes that F2 interference may be a serious problem in the lower band and will not affect service in the upper band. With respect to extent of coverage, the Commission is unable to find that the lower band shows any substantial advantage over the upper band, within the expected service areas of FM broadcast stations. With respect to service to rural areas, the Commission concludes that the present state of the art and considering the present economics of broadcasting, service to farmers situated at a great distance from cities must continue to come for the greater part from standard broadcast stations.

The tests in that the median value of the 46.7 megacycle frequency was less than the median value at 85.75 megacycles, whereas at Deerfield the lower frequency provided the higher median field.

Accordingly, the Commission is unable to find that the Deerfield and the Andalusia measurements constitute a sufficient basis for service area predictions.

There is nothing whatever in the present proceeding which casts any doubt upon the ability of the FM stations in the 88-108 megacycle band to render a superior, interference-free and static-free service over ranges of 60 miles, and perhaps in excess thereof. Despite earlier warnings and predictions, the salient fact is that the band assigned to FM broadcasting by the Commission will furnish an excellent service, and the industry has proceeded with notable dispatch to design and produce FM transmitting and receiving equipment which will render excellent service to the American people in the band assigned.

**FM GRANTS REACH 352**

The Commission on March 7 granted seven additional FM stations, bringing the total conditional grants to 352. Following are the grants made:

EDUCATIONAL FM RULES

The Commission on March 7 ordered promulgation of rules and regulations for the non-commercial educational FM broadcast service for which 20 channels were allocated in the Allocation Report of June 27, 1945. These proposed rules are to be made public as a basis for consideration and discussion before final adoption. All non-commercial educational FM broadcast licensees, permittees, applicants, and others are invited to submit their comments and suggestions in writing to the Office of the Secretary within 60 days.

It is contemplated that no hearings or oral argument will be held on the proposed rules unless there is a demand from interested parties.

In the absence of protests within 60 days, the rules and regulations will be promulgated in final form.

LEGAL

PRINTERS INK OPPOSES TAX PENALTY ON RADIO

Pointing out that imposition of a tax to limit profits of radio stations recently proposed by John B. Haggerty, president of the Allied Printing Trades Association (see NAB REPORTS, p. 137), might well serve as a dangerous precedent for the introduction of suicidal attempts by magazines, newspapers, farm and business papers to foster similar legislation against each other, the following editorial appears in the March 1 issue of Printers Ink:

Once again the International Allied Printing Trades Assn. is urging Congress to enact a radio franchise tax. In 1941 John B. Haggerty, head of the I.A.P.T.A., which consists of five printing crafts unions, tried to put through similar legislation but failed.

Mr. Haggerty's current version of a tax on radio is designed to confine net profits of radio stations to a 15% limit based on actual sales, and it would limit salary, bonuses, etc., for any one executive of a station to $25,000.

All the rest of a station's income would go to the government for reduction of the public debt.

Once again Mr. Haggerty trots out as his big argument the reasoning that lay behind Congressman Patman's once grandiose scheme to tax the chain stores out of existence and thus give the independent retailer a better chance. Involved is the same reasoning that lay behind the effort 30 years or so ago to have Congress tax the retail mail-order houses out of business.

It should also be remembered that what is sauce for the goose is sauce for the gander. The proposed tax could set a precedent whereby magazines, newspapers, farm papers or business papers might attempt to foster legislation against each other for the reason that one medium is robbing another of revenue or jobs.

Radio as an industry has created many, many more jobs for American workers than have been lost to the printing trades through its success. We hope that printed media will realize that it is to their own selfish interest to oppose Mr. Haggerty's legislation; that they will naturally prefer to meet all their competition, including other classes of printed media, on a freely competitive basis in which the government does not call the tune.

FCC REJECTS WOV TRANSFER

The Federal Communications Commission announces its final Decision (B-209) denying the application for consent to the transfer of control of Wodaam Corporation, licensee of Station WOV, New York, N. Y., from Arde Bulova and Harry D. Henshel, transferors, to Murray Mester and Meyer Mester, transferees.

Full text of the decision follows:

Findings of Fact

1. This proceeding arose upon the application of Arde Bulova and Harry D. Henshel, transferors, and Murray Mester and Meyer Mester, transferees, for the Commission's consent to the transfer of control of Wodaam Corporation, licensee of Station WOV, New York, N. Y.

2. The application was filed on December 31, 1943. It was returned to the applicants with a request for further information and was refiled with the necessary supplemental data on February 8, 1944. Additional financial data was requested by the Commission which the applicants furnished on March 25, 1944.

3. On May 9, 1944, the Commission designated the application for hearing for the following reasons set forth in the Notice of Hearing:

3. To obtain full information with respect to the relationship operation of Station WOV would have with other business enterprises of the proposed transferees, including information as to the extent to which WOV would be used for furtherance of other business interests of the transferees.

4. To obtain full information with respect to the service proposed to be rendered by Station WOV under the control of proposed transferees.

5. To obtain full information as to whether or not, under the control of proposed transferees, the time of Station WOV would be sold through time brokers or through other arrangements of similar character.

6. To obtain full information as to the manner in which the operation of Station WOV would be supervised.

7. To determine whether, in view of the facts adduced under the foregoing issues, public interest would be served by granting the instant application.

2. On July 5, 1944, Richard E. O'Dea, holder of a 25 per cent stock interest in the licensee corporation, was permitted to intervene in the hearing thereafter held before Commissioner Clifford J. Durr, on July 6 and 7, 1944. The hearing record was held open at the request of the parties for the purpose of obtaining and submitting

(Continued on next page)
the November 11, 1943, agreement, the applicants filed of Wodaam Corporation on December 22, 1943, formally after stating his position at a Board of Directors meeting June 3, 1933, and August 16, 1938. Upon learning of the new instalment payment dates. No further waiver of which operates in the same primary service area as that
brothers. On July 14, 1942, the Commission designated this application for hearing, whereupon, on motion of all
agreement of the transferors and transferees to "restore" Wodaam stockholders would "not sell their stock on the same terms as those first offered" upon the same terms to the remaining stockholders of Wodaam for a period of 60 days. In view of
provision, the transferees, on March 19, 1942, obtained a waiver of preference from the transferees under the 60-day
right to purchase the stock on the same terms as those provided in the March 18, 1942, agreement. Subsequently, on March 30, 1942, the transferees filed an application with this Commission requesting the transfer of control of the licensee from the transferees to the Mester brothers. On July 14, 1942, the Commission designated this application for hearing, whereupon, on motion of all of the parties to the proceeding, the Commission on August 18, 1942, granted their request to dismiss the application without prejudice.

5. On November 23, 1943, the Commission, after having issued advance notice, adopted its Rule 3.35 prohibiting multiple ownership of stations in the same primary service area except upon a showing of public interest, convenience and necessity, which such a showing was not made by the transferees. On December 22, 1943, the licensee announced an agreement to sell, O'Dea, owner of the entire stock of Wodaam Corporation dated June 3, 1933, and between Wodaam and W.B.O. Broadcasting Corporation dated August 16, 1938. It was further revealed that the Wodaam stockholders would "not sell their stock unless offered" upon the same terms to the remaining stockholders of Wodaam for a period of 60 days. In view of this provision, the transferees, on March 19, 1942, obtained a waiver of preference from the transferees under the 60-day right to purchase the stock on the same terms as those provided in the March 18, 1942, agreement. Subsequently, on March 30, 1942, the transferees filed an application with this Commission requesting the transfer of control of the licensee from the transferees to the Mester brothers. On July 14, 1942, the Commission designated this application for hearing, whereupon, on motion of all of the parties to the proceeding, the Commission on August 18, 1942, granted their request to dismiss the application without prejudice.

6. Under the schedule submitted at the July 1944 hearing, Station WOV operates daily, except Sunday, from 6:45 a.m. to 12:00 midnight. Out of a broadcast day of 17 hours and 15 minutes, approximately 75 per cent of the WOV broadcast time on Monday through Friday is devoted entirely to commercial programs, while on Saturday 83 per cent of the programs are of this sort. In all of the "sustaining time" is preceded or interspersed with 2 or 3 commercial spot announcements each 15 minutes. In view of the spot rates charged by the station, the broadcast revenue is thus substantially from "sustaining" as well as commercial time.

7. During the first six months of 1943, the station suffered operating losses of $8,800 plus depreciation charges of $15,600, or a net loss of $24,200. The financial statement supplementing the application shows a net loss of $28,460, or 12.0 per cent of the stockholders' net worth, while the station's assets exceeded its liabilities by some $730,000. The financial statement shows a net profit of $9,600, leaving a net profit of $9,600 for that period. Although expenses as a whole increased in 1944, an increase in revenue of 45 per cent over 1943 resulted in the change to a profit status.

8. From 8:30 a.m. to 6:00 p.m. the station's programs are entirely in the Italian language. It appears that approximately 14 per cent of the population in the WOV primary service area, or 78,000 persons, is of Italian extraction while some 323,713 persons in the secondary area are Italian. In this connection, WOV has received various awards for its program service and received the Variety plaque for "fostering racial goodwill and understanding" during the year 1943.

9. The station does not dispose of broadcast time to time brokers for resale but nevertheless approximately 90 per cent of the programs are prepared by advertising agencies and derived citizen stations through the national programs of the Balbo Oil Company, owned by Murray and Meyer Mester, sponsors a 15-minute Italian musical program on WOV six days a week. Four times each weeknight, in five-minute periods, the station presents a syndicated program in English called "People Know Everything," which includes the telephone book are called and awarded money if they can answer certain questions correctly. Without deciding whether this program is a lottery, it is a program designed to attract listeners by prizes rather than by quality of content. The program, purchased from a producer in Chicago, is carried independently of WOV by numerous other stations.

10. Murray and Meyer Mester were not born in the United States but immigrated to this country as minors and derived their citizenship through the naturalization of their father. They are largely "selfeducated." Since 1933, they have been engaged as partners in the edible oil business, first doing business under the name of the Modern Packing Company and subsequently, and at the present time, under the name of the Balbo Oil Company. They are not engaged in any other business except the business of producing, processing and selling edible oils. Murray Mester's net worth is in excess of $548,000, and Meyer Mester's net worth exceeds $350,000. The assets of the Balbo Oil Company, which are equally divided between the Mester brothers and are included in their net worth, exceed its liabilities by some $730,000.

11. The Mester brothers have never had an interest of any sort in a broadcast station or in the management of a radio station. However, at the beginning of their oil business in 1933, and for several years thereafter, Meyer Mester arranged for their radio advertising on station prepared programs. Five or six years ago they retained a producer for which Italian programs are prepared. The programs are sponsored. In addition, almost all of the "sustaining programs, while on Saturday 83 per cent of the programs through Friday is devoted entirely to commercial programs, while on Saturday 83 per cent of the programs are of this sort. In all of the "sustaining time" is preceded or interspersed with 2 or 3 commercial spot announcements each 15 minutes. In view of the spot rates charged by the station, the broadcast revenue is thus substantially from "sustaining" as well as commercial time.

---

*Includes three qualifying shares held in the names of others acting as corporate representatives.

*Includes two qualifying shares held by individuals.

3 WOV does not operate on Sundays because the 1280 kc. frequency in the same area is assigned on that day to Station WHBI, Newark, New Jersey.

(Continued on next page)
eraly 15 minutes each day. At the time of the hearing, Balbo Oil was also sponsoring programs and spot announcements on the Modern Packing Company in the Italian language, on one station in the Spanish language, and on one station in Greek.

12. The Mester brothers have not made any definite plans for the operation of WOV in the event that this transfer is granted. They have tentatively proposed to have prominent men in the Italian community present talks on subjects such as Americanization and intend to encourage the forum type of discussion. They “believe in selling more time” as a means of increasing the profits of the station.

13. Murray Mester showed no knowledge whatsoever of the Communications Act of 1934, or of the Rules and Regulations of the Federal Communications Commission, and has neither examined nor been advised on the laws relating to the licensing and operation of standard broadcast stations. The Mesters have not made a effort to interest those who are now employed by the station to continue in their present employment if the transfer is granted, and, in fact, had not even met Weil, the present manager of WOV, until a week before the hearing. Other than planning to act as directors themselves, they have not considered any other persons as directors of Wodaam Corporation. Murray Mester did not understand the holding company arrangements through which they were to obtain control of part of the Wodaam stock and had never even heard of the two holding companies B.I.O.W. Broadcasting Corporation and WAAM, Inc. The Mesters had not met with, or spoken to, Richard E. O’Dea, the interventor and holder of a 25 per cent stock interest in Wodaam Corporation, the transferees to have available at the hearing information relating to difficulties in which the Balbo Oil Company had become involved with the Food and Drug Administration and other government bodies. Instead of offering these records, Murray Mester testified, on direct examination, as follows:

“Q. Now, have you ever been a party to a suit in a Federal court involving anti-trust or Federal Trade Commission proceedings?

“A. No, sir.

“Q. Have you ever been found guilty of a crime involving a moral turpitude?

“A. No, sir.”

No further exposition or explanation was offered by the transferees during direct testimony. However, on cross-examination by counsel for the intervener, Murray Mester admitted that a few months ago a shipment of “Cellini” Brand oil produced by Mester brothers and packed in cans labeled “one gallon net” was condemned by the United States Food and Drug Administration in 1933 in connection with a brand of oil they produced and labeled “Tipo Lucca” because the product was misbranded as olive oil. He also admitted, during cross-examination, that their oil company had trouble with the United States Food and Drug Administration in 1933 in connection with a brand of oil they produced and labeled “Tipo Lucca” because the product was misbranded as olive oil.

14. Before the hearing, Commission counsel requested the transferees to turn over the available hearing information relating to difficulties in which the Balbo Oil Company had become involved with the Food and Drug Administration and other government bodies. Instead of offering these records, Murray Mester testified, on direct examination, as follows:

“Q. Now, have you ever been a party to a suit in a Federal court involving anti-trust or Federal Trade Commission proceedings?

“A. No, sir.

“Q. Have you ever been found guilty of a crime involving a moral turpitude?

“A. No, sir.”

No further exposition or explanation was offered by the transferees during direct testimony. However, on cross-examination by counsel for the intervener, Murray Mester admitted that a few months ago a shipment of “Cellini” Brand oil produced by Mester brothers and packed in cans labeled “one gallon net” was condemned by the United States Food and Drug Administration in 1933 in connection with a brand of oil they produced and labeled “Tipo Lucca” because the product was misbranded as olive oil. He also admitted, during cross-examination, that their oil company had trouble with the United States Food and Drug Administration in 1933 in connection with a brand of oil they produced and labeled “Tipo Lucca” because the product was misbranded as olive oil.

4 In their application (p. 25), the transferees state that “They have a keen appreciation not only of the commercial but of the pedagogical and cultural possibilities of radio, and have always shown an interest in forums and discussions.”
to the seizure of the La Deliziosa products. He answered. "No. At no hearing of anything concerning the La Deliziosa products did I appear anywhere at any time." An official member of the Interstate Division of the Food and Drug Administration, Federal Security Agency, who has been in the Administration for 15 years, testified that an inconspicuous statement appeared at the bottom of the label: "Twenty Percent Olive Oil and Eighty Percent Salad Oil" appeared at the bottom of the label. The notice of judgment described the product as "a product which consisted chiefly of domestic cottonseed oil which was sold and advertised in a deceptive manner, conveying the impression that it consisted of imported olive oil." On December 21, 1933, no claimant having appeared for the property, judgment of condemnation and forfeiture was entered, and it was ordered that the product be destroyed. On December 20, 1934, the remaining lot was ordered delivered to charitable or relief organizations.

(Continued on next page)
and in the manner above set forth of their cooking or edible oil, that they and each of them will forthwith cease and desist from representing that 20 percent of the content thereof consists of olive oil unless or until 20 percent of the content of oil used to prepare the product takes the form of olive oil. The representation of which tends or may tend to convey the belief or impression that the olive oil content of said cooking or edible oil is greater than or in excess of actual olive oil content thereof.

19. Finally, at the time of the hearing, the Mesters were defendants in a proceeding brought against them by the Office of Price Administration, in which the Government charged that they had violated maximum price regulations in selling salad oil and had failed to keep a statement of ceiling prices available for inspection on the premises, as required pursuant to the Emergency Price Control Act of 1942.

20. According to the application the applicant to operate the station, and "the purposes for which the station is to be used," and to hold a hearing on any application, if necessary, in order to determine whether "public interest, convenience, or necessity would be served by the transfer of control of any corporation holding such license, to any person, unless the Commission shall, after securing full information, decide that said transfer is in the public interest, and shall give its consent in writing."

2. The transferees have come to this Commission seeking to assume the responsibilities and enjoy the privileges of a broadcast license but they have shown no understanding whatsoever of the provisions of the Communications Act and the rules and regulations of the Commission applicable to their operations. They showed only the vaguest acquaintance with the present operations of Station WOV and were equally vague as to their plans for its future operation in the event they should be approved as licensees. They explained their secondary business investment relying primarily on others than themselves to carry out their license obligations. They propose to increase the station's profits "by selling more time" even though the station's schedule already shows that 75% of the broadcast time on week days and 83% on Saturdays is devoted entirely to commercial programs and most of the "sustaining" programs are heavily interspersed with commercial announcements. Cf. In the Matter of R. R. Jackman, et al., 5 F. C. C. 496 (1938). From their own testimony, it must be concluded that they have no adequate conception of the public responsibilities of the station licensee which they are seeking to assume.

3. Also at the hearing the transferees revealed an extreme lack of candor in testifying under oath as to their numerous difficulties with various governmental bodies. It is quite reasonable to assume that similar conduct could be expected of them in the submission of future reports to the Commission if the proposed transfer were granted. The interest of the Commission in station operation is a continuing one, and in carrying out its licensing authority the Commission must rely primarily on statements made by station licensees. "Caution must, therefore, be exercised in granting thereof." Under Section 310(b), it is provided that the sense of public responsibility which an applicant has shown in his private business dealings must therefore be given considerable weight in determining the degree of public responsibility which he, as a broadcaster, would bring to bear in his broadcast operations.

4. In addition, the transferees, in carrying on their edible oil business, have violated and disregarded the regulatory laws of the states and the federal government. Isolated and inadvertent violations of such laws are not, of course, sufficient grounds for finding that an applicant is disqualified as a broadcast licensee. However, the violations of the applicants in the instant case have been numerous and extensive throughout their entire business career. Many of these violations were clearly not matters of inadvertence. A broadcast license carries with it grave public obligations and a sense of public responsibility is therefore an essential qualification for any licensee.

5. From a careful examination and review of all of the material facts relating to the technical and general qualifications of the transferees, we find that the applicants do not possess those qualifications essential to operate Station WOV in the public interest. It is not necessary to show that the applicants have been adjudged guilty of criminal misconduct before finding that they are not qualified to hold a station license. It is sufficient to find in the instant case that the transferees have not established adequate technical, character, and other qualifications to convince this Commission that they are capable of being entrusted with the duties and privileges inherent in a radio station license.

6. The Commission concludes that transfer of control of Wodaam Corporation to the transferees would not serve the public interest, convenience, or necessity. The application, therefore, should be denied.
WESTINGHOUSE GETS FIRST CBS COLOR TELE RIGHTS

First licenses to embody CBS ultra-high frequency color inventions in television receivers and studio apparatus have been granted to the Westinghouse Electric Corporation. Arrangements, on a patent royalty basis, are for five years and provide for an extension of the agreement.

Royalties to CBS, as stipulated, range from 25 cents to one dollar on receiving sets, depending on the retail price, and one percent of the net selling price of complete color television transmitter studio apparatus. These low royalties are the total recompense demanded by Columbia to permit addition of its color inventions in television.

FCC ANNOUNCES D. C. TELE GRANTS

The Commission, on Thursday (7), tentatively granted permits for new television stations in Washington to the Bamberger Broadcasting Service, Inc., The Evening Star Broadcasting Co., and The National Broadcasting Co., Inc. The Capital Broadcasting Company's application tentatively was denied and the Commission deferred a decision on the applications of Allen B. Dumont Laboratories, Inc.; D. M. Patrick and Karl A. Smith, on behalf of The Evening Star Broadcasting Company; John T. Cahill, Charles F. Detmar, Jr., and Gustav Margraf, on behalf of The Evening Star Broadcasting Company; William A. Roberts, on behalf of Allen B. Dumont Laboratories, Inc.; D. M. Patrick and Karl A. Smith, on behalf of The Evening Star Broadcasting Company; John T. Cahill, Charles F. Detmar, Jr., and Gustav Margraf, on behalf of The Evening Star Broadcasting Company; Louis G. Caldwell, on behalf of the Philco Products, Inc.; Henry M. Platten, on behalf of the Federal Communications Commission.

Television

If they do not, the Commission finally will grant the applications of Bamberger, The Evening Star Broadcasting Co., and NBC, and will choose between Philco and Dumont.

(Full text of the decision, which is expected to set the pattern for issuance of licenses through the Nation, follows):

Platten, on behalf of the Federal Communications Commission.

PROPOSED DECISION
Preliminary Statement

This proceeding involves the allocation of the four available commercial television channels in Washington, D. C. Six applicants have applied for these four channels. They are Bamberger Broadcasting Service, Inc., Capital Broadcasting Company, Allen B. DuMont Laboratories, Inc., The Evening Star Broadcasting Company, National Broadcasting Company, Inc., and Philco Products, Inc. Hearings were held on their applications on January 21, 22, and 23, 1946. All of the parties have waived their right to file proposed findings of fact and conclusions of law.

Application of Bamberger Broadcasting Service, Inc.
Docket No. 7014

1. Bamberger Broadcasting Service, Inc., of New York, N. Y., is a wholly-owned subsidiary of L. Bamberger & Company, a retail department store in Newark, N. J., which, in turn, is wholly-owned by R. H. Macy and Co., Inc., a retail department store in New York City. The consolidated balance sheet of R. H. Macy and its subsidiaries as of July 28, 1945, indicates its total stock and surplus to be worth $62,348,290.06. The combined balance sheet of the applicant shows a total capital and surplus on December 29, 1945, of $1,184,573.37. Bamberger Broadcasting Service owns a 50 kw. AM station, (Continued on next page)
WOR, and an FM station, WBAM, both in New York City. It is affiliated with the Mutual Broadcasting network and owns about 20% of its stock. Mr. McCosker, chairman of the board and president, is a director of the Mutual Board. Bamberger Broadcasting Service has an application pending before this Commission for a television station in New York City and for one in Philadelphia but at the hearing it stated that it intends to withdraw the application.

2. The applicant proposes to make Washington programs of national interest available to Mutual affiliates with television stations and possibly to the Yankee Network; these arrangements, however, are only in the discussion stage. Mutual at present has an AM affiliate in Washington, WOR, which has not made an application for a commercial television station.

3. The applicant has purchased land located at Brandywine and 40th Streets, N. W., Washington, D. C., at a cost of $43,000. While plans for the transmitter and tower which are to be located there have been drawn, no site has been chosen for studio facilities, which are intended to be located in downtown Washington. The 5000 microvolt contour, assuming a radiated power of 30.25 kilowatts, will embrace 975 square miles with a population of 907,775. Within the 500 microvolt contour, there will be included 4,350 square miles with a net coverage of 1,145,079 people. These calculations are made for Channel 5, 70-82 megacycles, which has been requested by the applicant. The total estimated cost of the proposed equipment, construction and installation is $503,400, the cost of the transmitting plant being estimated at $258,400, studio and offices at $205,000 and field equipment at $60,000.

4. The estimated cost of operation for the first year on a 28-hour schedule of programming is $547,308, of which technical expenses will amount to $17,320 and program expenses $312,860. For the second year, a minimum rise of 10% in cost of operation is expected. No projected income from the sale of time has been estimated. No refinancing is expected to be made in connection with the proposed operations; hence the capital deficit period will be borne by both the applicant and Macy.

5. Although the applicant has been operating WOR since 1922 and WBAM since 1940, neither it nor any of its affiliates has ever owned or controlled the operation of a television station. However, since 1945, employees of the applicant have had experience in the operation of television studio and console equipment in connection with the production of television programs over WABD—the DuMont station in New York City—and WRGB—the General Electric station in Schenectady. About 29 persons are employed in the engineering department of the Washington station.

6. A program organization of 29 persons is planned and a minimum 28-hour weekly schedule of programs is proposed. Some of the programs have already been televised by employees of applicant and other programs will include local and public events. Programs will be relayed from New York City by coaxial cable when such facilities are available.

Application of Capital Broadcasting Company Docket No. 7015

1. The Capital Broadcasting Company is a family corporation. Ninety-five percent of its stock is owned by Joseph Katz, its president. Ben Strouse, his son-in-law, is vice-president and treasurer. Total worth of the Joseph Katz Co., an advertising agency in Baltimore, Maryland, as of October 31, 1945, was $364,202.86 and the total capital stock and surplus of the applicant as of November 30, 1945, was $83,748.82. During the last seven or eight years, the Joseph Katz Company has had a net income before taxes of $100,000 to $125,000 per year.

2. Capital Broadcasting Company is the licensee of station WWDC, in Washington, D. C., and has an application pending for change in frequency and increase in power to 50 kW. It also has applied for an FM station for Washington, D. C. In addition, Joseph Katz and Ben Strouse each have a 25% interest in WHOH, Inc., which has applied for an AM station in Baltimore, Maryland, and which proposes to file an FM application for the same city.

3. The applicant has an option for a site one mile north of Silver Spring, Montgomery County, Maryland, at which it intends to locate both its present AM transmitter and its proposed television transmitter. No evidence was offered concerning the location of studio facilities. The 5000 microvolt contour, assuming a radiated power output of 32.5 kilowatts, will embrace 74 square miles with a population of 296,677. Within the 500 microvolt contour there will be included 3,880 square miles with a net coverage of 1,185,358 people. These calculations are made for Channel 4, 66-72 megacycles, which has been requested by the applicant.

4. The estimated construction costs of the applicant are $276,810, which includes transmitting, film, studio, master control and pickup equipment. Estimated television operating costs for the three years 1947, 1948 and 1949 are $675,900. These funds are proposed to be made available to applicant in the following manner:

   An initial loan in 1946 from Joseph Katz Co. $170,000
   Another loan in 1947 from Joseph Katz Co. 150,000
   Estimated profit WWDC before taxes 1947 48,000
   Estimated profit WWDC after taxes 1948 240,000
   Estimated revenue from television 1947 75,000
   Estimated revenue from television 1948 150,000
   Estimated revenue from television 1949 200,000

Total $1,033,000

This total is about 10% larger than the total estimated expenses of $952,710 during the same period. To make up any additional and unexpected television deficits, Mr. Joseph Katz has further pledged another $300,000. Arrangements have been made for a credit purchase of necessary apparatus.

6. With respect to the $80,000 in annual profits before taxes which WWDC expects to make, it should be pointed out that in no year has WWDC succeeded in making such profits. At the hearing applicant justified this estimate on the intention of the Joseph Katz Co. to forego the payment of agency fees from WWDC in connection with sale of time, Mr. Katz to waive his interest in WWDC; Mr. Strouse to take a reduction in salary of $10,000; and in a saving of $8,000 by reductions in promotional expenses. Applicant’s estimate of profits is based further on the opinion of applicant’s officers that the advertising revenues of WWDC in post-war years will remain the same or grow larger even if the Commission licenses as many as twelve FM stations to serve Washington. At present, 70-75% of WWDC’s programs are already commercial.

6. Applicant’s estimate of revenue from television operating for 1947 is based on average of $100 an hour for 14 hours a week. Applicant’s estimate of revenue from television during the first three years of operation is based upon conversation with advertisers and a prediction of one officer that 20,000 and of another that 100,000 tele-
vision receivers would be in use in Washington by 1948. Television program costs will be low through the extra effort of applicant’s employees.

7. While the applicant has several years experience in AM broadcasting, it has never owned or controlled the operation of a television station. Its proposed staff includes Ben Streuse as general manager of all applicant’s activities, Ira Walsh as television manager, and Don Beville as technical director. Mr. Beville, who will be employed four days each month as television adviser, has not had any experience in the operation of television programs from 1938 until 1941. Mr. Beville has had some experience in the field. It is proposed to employ a technical staff of 22 people in connection with television activities. This staff will be trained under the supervision of Mr. Walsh and Mr. Beville at the Capital Radio Engineering Institute with the applicant paying for one-half the cost of course of study.

8. A program organization of 18 persons is planned under the direction of Mr. Walsh and a weekly schedule of 28 hours of programs is proposed. Many shows now produced over WWDC will be adapted to television broadcasting and the program will include local and public events. No plans have been made for the televising of programs originating from outside of Washington.

Application of Allen B. DuMont Laboratories, Inc. — Docket No. 7016

The stock of Allen B. DuMont Laboratories, Inc., Passaic, New Jersey, is divided into two groups, Class A and Class B. There are 1,046,040 shares of Class A stock issued, which is held by about 8,000 stockholders, of whom only five persons own more than 1% of the total. Allen B. DuMont Laboratories, Inc., owns 92,576 Class A shares and Paramount Pictures, Inc., owns 43,200 Class A shares beneficially but not of record. All of the 560,000 shares of Class B stock is owned by Paramount. Class A stock elects four of seven directors and also the president and vice president. Allen B. DuMont is president and Leonard F. Chamberlain is vice president. Class B stock elects three directors and also the secretary and treasurer. The secretary is Bernard Goodwin and the treasurer is Paul Raibourn.  

9. A condensed balance sheet of the applicant as of December 2, 1945, shows the value of its stock at $2,814,647 with current assets of $3,455,265 and current liabilities of $1,160,303. DuMont manufactures radio appliances including television receivers. It is the licensor of amateur television stations W2BD in New York City and has applied for commercial television stations in Cleveland, Cincinnati, and Pittsburgh, all of which would be connected with the Washington and New York stations into a network.

10. The applicant at the present time operates experimental television station W3XWT in Washington on Channel No. 5, 76-82 megacycles. This station is located at the Harrington Hotel in downtown Washington. This same site under lease for four more years is to be used for its proposed commercial television station and plans have been made for the construction of transmission and studio facilities at that place. The antenna is to be placed on a tower already built on the premises and will be 250 feet above sea level. Assuming an effective radiated power of 6,150 watts, the 500 microvolt contour will embrace 125 square miles with a population of 757,000. There will be included within the 500 microvolt contour 512 square miles with a coverage of 847,000 people. These calculations have been made for Channel 5, 76-82 megacycles, which has been recommended by the Commission. Further, during this period the lower height would make the antenna more easily accessible than in the case of a higher antenna. Applicant also stated that the choice of antenna site was based on the strong signal it will give in downtown Washington, the large expense that has gone into the construction of present facilities there and the fact that operation could begin sooner than if a new location was chosen. The applicant estimates coverage effectiveness to be very large so far as the marketing and buying power of metropolitan Washington is concerned. In the future, if it believes the need exists, a change will be made. At present it feels the coverage is adequate.

11. Applicant has had extensive experience in the technical and production aspects of television. It will have available many trained persons to operate the proposed Washington station. This is based on the employment of 31 persons in the operation of its station because of the experience of the personnel and the fact that many of its network programs will originate in New York.

12. A capital investment of approximately $115,000 has been made in the Washington experimental station. The estimated capital investment required for the commercial station is $396,355, including studio, transmission and pickup equipment. The operating costs the first year are estimated at $396,052, the second year, $623,907.22. The income from television advertising rate would be $180 per half hour the first year and $297 for the second year based on the estimated number of receivers in use.

13. Applicant has plans for a minimum weekly program schedule of 28 hours which will make use of its experimental facilities and past experience in both production and transmission. The program will include local and public events. In the first year of operation an average of 13% hours of commercial shows and 14 hours of sustaining shows are planned. Use will be made of the coaxial cable or relays for its network and the station will televise shows originating from outside of Washington.

Application of The Evening Star Broadcasting Company — Docket No. 7017

1. The Evening Star Broadcasting Company of Washington, D. C., is a wholly-owned subsidiary of the Evening Star Newspaper Company of Washington, D. C. Samuel Kaufman, president of the evening newspaper company, is treasurer of the newspaper company. The editor of the paper is Theodore W. Noyes, the president, Frank B. Noyes, and the secretary, R. M. Kaufman. B. M. Mc Kelway, a director of the paper, is vice president of applicant and W. R. Little, comptroller of the paper, is secretary-treasurer. All but 2½% percent of the paper’s stock is owned by Mr. Mc Kelway is held by descendants of its founders. All the officers and directors of both the paper and the applicant have been Washington residents for many years, some their entire lives. As of December 13, 1945, the balance sheet of the Evening Star indicated its capital stock and surplus to be $5,642,511.57. The capital and surplus of the applicant as of December 31, 1945, was $316,022.74. The applicant is the licensee of station WJLA, Washington, D. C., on which it intends to build a transmitter, station and tower facilities at the campus of American University located at Massachusetts and Nebraska Avenues, N.W., Washington, D. C., on which it would build a transmitter, station and tower for television and FM. By agreement the applicant’s facilities will be available for instructional purposes. The university will be allowed to broadcast without cost programs in furtherance of its educational program. A studio would be built on the campus in a building costing between $50,000 to $80,000, while the cost of the other technical improvements on the university campus is estimated at $180,000 to $190,000.

2. Applicant has purchased a site at the corner of 12th and K Streets, N.W., Washington, D. C., on which it intends to (Continued on next page)
erect a million dollar office building to house its present AM operations and any television and FM operations it may have. Its present AM radio transmitter, which has a 500 microvolt contour, will be used in applicant's premises on 14th Street and New York Avenue, N.W., Washington, D. C. The 500 microvolt contour, assuming a radiated power of 13.3 kilowatts, will embrace over 816 square miles with a population of 891,421. There will be included within the 500 microvolt coverage of 1,082,936 people. These calculations are based on the use of Channel 4, 66-72 megacycles, which was requested by the applicant.

3. The paper has authorized the purchase of all or any part of an issue of bonds by the applicant in a total amount not to exceed $800,000, when and as the same may be offered by the applicant in a subsequent one. No public offering of these debentures is contemplated. Further unsecured loans from the paper to the applicant are also authorized.

To finance the cost of its new million dollar building, a mortgage already over subscribed will be taken from local Washington, Denver and San Francisco. All $700,000 to $750,000. The estimated cost of the first year's operations are from $300,000 to $500,000. No estimates of future revenue have been made.

4. Applicant has never owned or controlled the operation of a television station. It plans to use its present AM staff, supplementing it with whatever personnel is necessary. If the television operations are separate it estimates it would need 42 people in the program department and 30 engineers. The cost of the additional personnel is estimated at $216,000 a year.

The engineering cost is to be $140,000. Additional studio space will be used in applicant's premises on 14th Street and New York Avenue, N.W., Washington, D. C. The 5000 microvolt contour, $167,000 a building to house its television station, in including transmission and some of its studio facilities. Its antenna will be located on a tower already erected on the site. In addition to these facilities a studio in downtown Washington will be obtained. The total cost, including building, transmission and studio facilities and pickup equipment for the proposed station is estimated at $528,423. The 5000 microvolt contour, assuming a radiated power of 3.34 kilowatts, will embrace 350 square miles with a population of 847,000. Within the 500 microvolt contour there will be included 2,640 square miles with a population of 1,153,000 people. These calculations have been made for Channel 4, 66-72 megacycles, which has been requested by the applicant.

Application of National Broadcasting Company—Docket No. 7019

1. The National Broadcasting Company, Inc., is a wholly-owned subsidiary of Radio Corporation of America. NBC owns and operates six stations engaged in AM broadcasting—including WRC, Washington, D. C.—an AM station in New York, and one television station, WNBT, New York. In addition, NBC operates a number of shortwave broadcasting stations and a network of about 155 affiliated AM stations. A consolidated balance sheet of RCA and its domestic subsidiaries as of November 30, 1945, indicates its capital stock and surplus to be worth $99,951,258. A preliminary balance sheet at December 31, 1945, shows the capital stock and surplus of the applicant as $8,641,960.60. NBC has plans for the installation of television network plans independently owned affiliated stations. Applications have been filed for television stations in Cleveland, Chicago and Los Angeles, as well as the instant application. Applications have been filed for FM stations in Washington, D. C., Cleveland, Chicago, Denver and San Francisco.

2. In December, 1941, National Broadcasting Company received a construction permit for a commercial television station that was to be located at the Wardman Park Hotel in Washington, D. C., the site of its experimental station, whose license lapsed in June, 1942. The construction permit for the commercial station was surrendered because the war made it impossible to complete the station. The presently proposed station is to be located at this same site, the Wardman Park Hotel, on which the applicant has an option for a transmitter, studio, and antenna. Plans have been made and the proposed cost of the transmitter is $117,000, audio-video facilities, $106,000, live talent theater, $91,700 and field equipment $60,000. Architectural costs are to be $140,000. Additional studio space will be used in applicant's premises on 14th Street and New York Avenue, N.W., Washington, D. C. The 5000 microvolt contour, assuming a radiated power of 13.3 kilowatts, will embrace 575 square miles with a population of 850,000. There will be included within the 500 microvolt contour 1,153,000 people. These calculations have been made for Channel 4, 66-72 megacycles, which has been requested by the applicant.

3. Applicant has had extensive experience in the technical and production aspects of television. It will have available many trained persons to operate the proposed Washington station. A detailed plan for a large staff has been completed and many experienced persons who will occupy supervisory positions have already been named. Applicant's general manager in Washington has had many years of radio experience in Washington.

4. Applicant has made available the total sum of $520,000 for the installation of its Washington television station. Its estimated operating expenses for a 24-hour a week program of network operation is $61,000 per month; for a 22-hour week, $113,300, per month. Its estimated revenue, based on 28 hours of operation per week, is $25,972 for the first year. Deficits will be made up from regular operating funds and surpluses of NBC.

5. Applicant has made plans for a minimum 20-hour week program which will televise programs originating from outside of Washington.
be necessary to construct and operate applicant’s proposed station. Its monthly cost of operation is estimated at $61,500 per month or about $750,000 a year. No estimate has been made of revenue from operation of the station but a maximum ceiling of 60% has been set on commercial program content. It is estimated that WWDC could not be operated at a profit for more than 37½ hours at full-fledged operation and will make use of its experimental facilities and past experience in both production and transmission. The program will include both local and public events. Programs originating in Philadelphia will be presented in Washington.

Conclusions of Law

1. The Commission has consistently held that where the number of applicants exceeds the facilities available, in choosing among the applicants preference will be given other factors being substantially equal to local interests. In the Commission’s opinion, maximum opportunity for local expression and development of community activity is afforded by licensing local persons who are qualified rather than persons from other cities. In this case, the Evening Star Broadcasting Company is the only local interest. The Capital Broadcasting Company is the licensee of a local station but all of its stockholders reside in Baltimore, and aside from their interests in WWDC have their business interests outside of Washington. As to the Evening Star Broadcasting Company, it has selected a transmitter site which will give it service to the metropolitan area of Washington and has made extensive plans for downtown studios. It is well equipped financially to undertake the construction and operation of a television station. Although it has had no experience in the operation of a television station, it has had extensive experience in the operation of an AM station in Washington. The Commission concludes that the Evening Star Broad- casting Company is qualified to operate a television station.

2. The remaining five applicants fall into two groups. In the first group are Bamberger Broadcasting Service and Capital Broadcasting Company—which are not the licensees of any commercial television stations—and in the second group are National Broadcasting Company, Allen B. DuMont Laboratories, Inc., and Philco Products, each of which is the licensee of one commercial television station. The Commission is of the opinion that with the repeal of the excess profits tax, with the greater availability of facilities in advertising media competitive with radio, and with the expectation that in the near future the Commission will license as many as 12 FM stations in Washington, it is extremely doubtful that WWDC can maintain such a high earning rate without unduly degrading its program service. In addition, the successful operation of a television station by Capital Broadcasting Company is dependent to a great extent upon the applicant’s ability successfully to sell time on its television station at an early date and on its ability to maintain its operating expenses at a point substantially lower than that suggested by any of the other applicants. The Commission is of the opinion that it is much too early at this stage to predict with an accuracy what the operating revenues of television stations are going to be or what television expenses are likely to be. The applicant is not convinced by the showing made by Capital Broadcasting Company that it will be in a position not only to construct its television station but to operate it for several years in the event that television should not get started as quickly as the applicant thinks it will, or in the event that it will not be possible to earn the desired profit as profitably as applicant predicts. In view of these facts and in view of the fact that there are other applicants who are well qualified to construct and operate a television station in Washington at this time, the Commission does not believe that unfilled experimental channels received by the applicant would be served by the issuance of a construction permit to Capital Broadcasting Company. The first two each own a commercial television station in New York City, and Philco is the licensee of a commercial television station in Philadelphia. All three applicants have extensive experience in television and all three would be qualified to construct and operate a television station in Washington. On the basis of the site chosen National Broadcasting Company and Philco Prod- ucts, Inc., would render service to a substantially greater area and population than Allen B. DuMont Laboratories, Inc. As a matter of fact the coverage proposed by the Du- Mont station, amounting to 98.5% of the population in the metropolitan area of the District of Columbia, is smaller than that of any other application involved in this proceeding. The importance of Washington as an origination center of programs for a television network was stressed at the hearing. Since Washington is the nation’s capital, there are many important events occurring here which are of great interest to audience throughout the United States. The Commission is of the opinion that the effect

(Continued on next page)
tive operation of a nation-wide television network will be greatly aided by network ownership of a television station in Washington. It should be noted that this finding is limited to television only where much developmental and experimental work remains to be done. Nothing herein said is to be construed as a finding concerning network ownership of AM or FM stations. National Broadcasting Company proposes a television nation-wide network and has had extensive experience in the operation of a nation-wide AM network. Philco proposes to conduct an experimental relay service between Philadelphia and Washington but has no plans for a nation-wide network. DuMont plans for a nation-wide network but expects to connect its New York station into a network with television stations in Washington, Pittsburgh, Cleveland and Cincinnati, if these applications are granted. The National Broadcasting Company application for a television station in Washington would, therefore, be preferred over that of Philco and DuMont. So far as Philco is concerned the ownership of a television station in Washington is not associated with the operation of a network, except possibly to connect its Washington and Philadelphia stations. So far as DuMont is concerned, while it does have plans for a network, it is only of a very limited sort and is to be composed of apparently only five DuMont stations and not of many independently affiliated stations as in the case of National Broadcasting Company. Moreover, as has already been pointed out, the site proposed in the DuMont application is substantially inferior to that proposed by National Broadcasting Company. Accordingly, a construction permit should issue to National Broadcasting Company.

7. This leaves the choice for the final channel between DuMont and Philco, both of which are qualified to construct and operate a television station in Washington. In favor of DuMont is the fact that a Washington outlet would be of assistance in connection with the network operation which DuMont proposes. In favor of Philco is the fact that the site the proposal is superior to that proposed by DuMont. Also, the ownership of a station in Washington would be helpful in connection with the experimentation being conducted by Philco in relaying programs between Washington and Philadelphia. The Commission is unable at this time to make a choice between Philco and DuMont and accordingly defers a decision on this point until after the conclusion of oral argument on this proposed decision in which Philco and DuMont may present their views.

8. The Commission is not unmindful of the fact that a grant of the DuMont application would make possible the establishment of a commercial television service in Washington at an earlier date than is otherwise possible because DuMont is already operating an experimental station in Washington. The Commission believes that this factor should not be controlling for two reasons. In the first place, the Commission has consistently declared that the issuance of an authorization for an experimental station is for experimental purposes only, and may not be used by the applicant as an entering wedge for securing a license for a commercial station. Therefore, the application of Allen B. DuMont Laboratories, Inc., must be considered on the same basis as the other applications—as though it were not the licensee of an experimental station. In the second place, the establishment of television in Washington at an earlier date should be made, because National Broadcasting Company has all the equipment necessary for the installation of a television station. Moreover, it could convert this equipment for operation on Channel No. 5 as readily as on Channel No. 4. Moreover, Philco Products has its tower already constructed and if its application were granted it could proceed expeditiously with the construction of a station. Since neither Bamberger Broadcasting Service, Inc., nor the Evening Star Broadcasting Company—the other two successful applicants—have any equipment on order or towers constructed, the Commission is of the opinion that the early establishment of television in Washington will be advanced if Channel No. 5 is reserved for assignment to either DuMont or Philco, whichever is the successful applicant. This leaves Channels No. 7 and 9. There appears to be no substantial difference between these two frequencies. Channel No. 7 will be granted to the Evening Star Broadcasting Company and Channel No. 9 will be granted to Bamberger Broadcasting Service.

10. All construction permits to be issued will be expressly conditioned upon a showing that the transmitter site chosen complies with the Rules and Regulations of the Civil Aeronautics Administration.

FEDERAL COMMUNICATIONS COMMISSION.

(S) T. J. SLOWIE,
Secretary.

William H. Wills

Commissioner William H. Wills of the FCC died suddenly of a heart attack at Brockton, Mass., early last Thursday morning, March 6. A former Governor of Vermont for two terms, Mr. Wills had served for less than eight months as a member of the Commission.

No announcement had been made Friday concerning a successor. With the recent appointment of Chairman Paul A. Porter to head OPA, Governor Wills' death leaves the Commission with two vacancies.

Justin Miller, President of NAB, made the following statement on the day of Commissioner Wills' death:

"The death of Governor William H. Wills early today represents a deep loss to the broadcasting industry. His service as a member of the Federal Communications Commission was grievously short but his constructive work for the industry was known and appreciated by American broadcasters, who mourn his untimely passing."

On the same day the FCC adopted this resolution:

"The Commission is saddened to learn of the death today of William Henry Wills, a member of the Federal Communications Commission since July 29, 1945."

"In the time during which Commissioner Wills was a member of the Commission, the diligence and understanding with which he applied himself to its work, and the graciousness with which he treated all who came in contact with him have earned for him the regard and affection of his fellow Commissioners, members of the Commission staff, and the communications industry."

"BE IT RESOLVED, That a copy of this expression of the Commission's deep sorrow on his death be entered on the permanent minutes of the Commission, and that a copy be mailed to his family."

Paul A. Porter expressed his distress at Governor Wills' death and praised his "contribution to communications development."

The Commissioner began his political career in 1919, when as a Republican, he was elected as a State Representative in Vermont. He became a State Senator in 1931 and served two terms. He served as Lieutenant Governor (Continued on next page)
from 1939 to 1940, and was elected Governor in 1941 and 1943.

Governor Wills is survived by his wife and one daughter, Mrs. Anne Pikes.

PORTER SAYS KY. GRANT WAS ROUTINE

In an interview with a representative of the Associated Press on Thursday (7), Paul A. Porter, former Chairman of the Commission, denied that a license was granted the Kentucky Broadcasting Co., for a radio station at Lexington, Ky., because of his personal friendship with the company's shareholders.

Porter told a reporter there was "no truth" in published reports that the application was approved as a favor to Edward Pritchard, Jr. Pritchard is a law partner of Philip Ardery, company president. His father, E. F. Pritchard, Sr., and brother, Henry Pritchard, both of Paris, and Ardery, are shareholders in the company.

"The license was granted as a routine matter," said Porter. "The case came up in a routine way and has been pending for eight months. Approval was recommended unanimously by the FCC Accounting, Engineering, and Legal staffs, as in other cases when there is no opposition the license was granted."

SECTION 1.231(d) AMENDED BY COMMISSION

The Commission on Thursday (7) amended Section 1.231(d) by providing that proposed findings of fact and conclusions of law by parties shall be filed within 20 days after the record of the hearing is closed by the presiding officer. The present rule provides for the filing of such proposed findings within 20 days after the record is filed in the Office of the Secretary which, in many cases, has resulted in much delay.

The Commission further provided that with respect to cases where the hearing had been held and the record closed before the effective date of this public notice, and where the record has not yet been filed, parties in such cases who have requested the opportunity to file proposed findings or who have been directed to do so may have 20 days from the date of this public notice within which to file their proposed findings of fact and conclusions of law.

Section 1.231(d), as amended, now reads as follows:

"Proposed findings by parties.—Within 20 days from the date when the record in the hearing is closed by the presiding officer, each party to the proceedings shall file with the Commission proposed findings of fact and conclusions which shall be served upon all parties participating in the hearing in the manner provided in section 1.141. Failure to file proposed findings of fact and conclusions by any such party within the time so required, shall be deemed a waiver by such party of any right of further participation in the proceeding, including oral argument if any is held."

In broadcast cases the interim procedure specified in the Commission's public notice of December 5, 1945, will still continue to be followed for the time being. Under that procedure parties are not required to file proposed findings of fact and conclusions of law with the Commission unless they are specifically directed to do so by the Commission or unless they request the opportunity to do so.

CALUMET APPLICATION DENIED

The Commission announces its final Decision (B-209) denying the application of the Calumet Broadcasting Corporation for construction permit for a new standard broadcast station at Hammond, Indiana, to operate on the frequency 1520 kilocycles, 5 kilowatts, daytime only. (Docket No. 6583)
Federal Communications
Commission Actions

APPLICATIONS GRANTED

WJNC—Jacksonville Broadcasting Co., Jacksonville, N. C.—Granted license to cover CP authorizing a new station to operate on 1340 kc., 250 watts, unlimited time. (B3-L-1923); also granted authority to determine operating power by direct measurement. (B3-Z-1749). The license hereunder is granted a waiver of Sec. 3.55(b) of the Commission’s Rules; conditions.

WMRF—Plattsburg Broadcasting Corp., Plattsburg, N. Y.—Granted construction permit to install a new transmitter. (B3-P-4461)

WINS—Hearst Radio, Inc., New York City—Granted modification of construction permit authorizing increase in power to 50 KW, for extension of completion date to 5-29-46. This permit is granted subject to such conditions as the Chief Engineer shall deem necessary to determine that the directional antenna pattern is obtained and maintained, and subject further to the express conditions that permits shall satisfy legitimate complaints of blanketing within the 250 mv/m contour, including external cross modulation.

WMOX—Barney Imes, Jr., Meridian, Miss.—Granted modification of construction permit which authorized a new station, for installation of a new transmitter, approval of antenna, approval of transmitter location at City Limits, Southeast of Meridian, Miss., and to specify studio location as Radio Center Bldg., corner 9th St. and 23rd Ave., Meridian. (B5-MP-1839)

WGST—Regents of the University System of Ga., for and on behalf of Ga. School of Tech., Atlanta, Ga.—Granted construction permits (B3-P-4287 and B3-P-4288) and licenses to cover same (B3-L-1917 and B3-L-1908) for main and auxiliary transmitters to operate on 920 kc., 1 KW, 5KW-L5, unlimited time; and authority to determine operating power by direct measurement. (B3-Z-1744)

NEW—Bay City Broadcasting Co., Bay City, Texas—Granted construction permit for a new station to operate on 1110 kc., 1 KW, daytime. (B3-P-1012)

DESIGNATED FOR HEARINGS

Joseph T. Connolly, George Lewis and David P. Gullette, Williamsport, Pa.—Designated for hearing in a consolidated proceeding with application of Penn Lincoln Broadcasting Co., Inc., the application of Connolly and Gullette (B2-P-1298) for a new station to operate on 1340 kc., 250 watts, unlimited time.

Penn Lincoln Broadcasting Co., Inc., Williamsport, Pa.—Designated for consolidated hearing with above application (B2-P-4298) the application of Penn Lincoln Broadcasting Co., Inc. (B2-P-4294), for a new station to operate on 1230 kc., 250 watts, unlimited time.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending February 1, 1948:

KOCA—Oil Capitol Broadcasting Assn., Kilgore, Texas—Granted renewal of license for the period ending August 1, 1946.

WFOR—Fortress Broadcasting Co., Hattiesburg, Miss.—Granted renewal of license for the period ending August 1, 1947.

WINC—Richard Field Lewis, Jr., Winchester, Va.—Granted renewal of license for the period ending August 1, 1947.

KPMK—Pioneer Mercantile Co., Bakersfield, Calif.—Granted renewal of license for the period ending May 1, 1948.

MISCELLANEOUS ACTIONS

WCAT—So. Dak. School of Mines and Technology, Rapid City, So. Dak.—Granted special temporary authority to remain silent for a period beginning March 9 to March 18, as the instructional period will be suspended. (B4-S-460)

Central Ill. Radio Corp., Peoria, Ill.—Granted petition requesting leave to amend application for construction permit, so as to change directional antenna design, etc., and the amendment was accepted.

Central Broadcasting Co., Madison, Wis.—Granted petition requesting leave to amend its application (Docket 9640), so as to change the name of applicant to “Radio Wisconsin, Inc.” Also to include new financial statements, etc., and the amendment was accepted.

Sandusky Broadcasting Corp., Sandusky, Ohio—Granted motion requesting leave to amend its application (Docket 7061), so as to show sale of additional stock; change in re officers and directors, and changes in the plan for the antenna, and the amendment was accepted.

WJBC—Radio Station WJBC, Bloomington, Ill.—Granted authority to determine operating power by direct measurement of antenna power. (B4-Z-1745)

WIBG—Seaboard Radio Corp., Glenside, Pa.—Adopted memorandum opinion granting application for license to cover construction permit as modified (B2-L-1766), and associated application for authority to determine operating power by direct measurement of antenna power, subject to such further order as may be necessary to insure compliance with NARBA.

WIND—Johnson-Kennedy Radio Corp., Chicago, Ill.—Adopted an order granting consent to transfer of control of station WIND from Ralph L. Attsen et al. (transferors), to The Chicago Daily News, Inc. (transferees).

Peoples Broadcasting Co., Lancaster, Pa.; Lester P. Etter and H. Raymond Stadiem, d/b as Lebanon Broadcasting Co., Lebanon, Pa.—Granted petition of Peoples Broadcasting Co. requesting that the frequency 1320 kc., be assigned to Lebanon Broadcasting Co., and that the Commission reconsider and grant application of Peoples Broadcasting Co., The Commission ordered that application of Peoples Broadcasting Co. (B3-P-4044) for a new station to operate on 1270 kc., 1 KW daytime, be granted, and further ordered that the application of Lebanon Broadcasting Co. for a new station in Lebanon, Pa., to operate on 1320 kc., 1 KW daytime only, be granted conditionally subject to the filing of an amendment by this applicant specifying the use of frequency 1320 kc., and indicating its assent to such grant and also subject to approval of proposed antenna location by CAA.

Diamond State Broadcast Corp., Dover, Del.—Denied petition requesting leave to amend application, cancel hearing, remove from hearing docket and grant application as amended, and granting construction permit for change in operation from 1490 kc., 250 watts, to 810 kc., 1 KW, daytime only; site be determined. (B5-P-3705)

(Continued on next page)

MARCH 11, 1946 — 191
ACTION ON MOTIONS

The Torrington Broadcasting Co., Torrington, Conn.—Granted petition requesting leave to amend its application for construction permit (Docket 5935), so as to show a transfer of the majority stock ownership from Jos. R. Schifini to his son, Gerardo T. Schifini, and his son-in-law, Jos. A. Cecagnone, and the amendment was accepted.

KROW, Inc., Oakland, Cal.—Granted petition requesting leave to amend its application (B5-P-4283) so as to remove Philip G. Lasky as a stockholder in the applicant corporation, etc., and the amendment was accepted.

KRO, Inc., Evansville, Ind.—Granted petition requesting leave to amend its application for construction permit (B5-P-3293) so as to specify power of 5 KW day, 1 KW night; change location of transmitter site; change specifications for antenna design, etc., and the amendment was accepted.

WTPS, Inc., Evansville, Ind.—Granted petition requesting leave to amend its application for construction permit (B5-P-4283) so as to remove Philip G. Lasky as a stockholder in the applicant corporation, etc., and the amendment was accepted.

San Bernardino Broadcasting Co., Inc., San Bernardino, Cal.—Granted petition requesting authority to advance the date for taking depositions from Thursday, Feb. 28 to Wednesday, Feb. 27, 1946.

Public Information Corp., Durham, N. C.—Granted permission for William B. Unstead, an attorney of the Bar of the Supreme Court of N. C., to appear and examine on behalf of movant the persons named in the motion filed requesting an order to take depositions.

Maryland Broadcasting Co., Baltimore, Md.—Granted petition to dismiss without prejudice its application for a new television station (B1-PCT-100).

WROL—S. E. Adcock, tr/as Stuart Broadcasting Co., Knoxville, Tenn.—Granted petition to amend its application for construction permit (Docket 6068), so as to show a slightly modified DA pattern.

The Crosley Corp., Washington, D. C.—Granted petition to dismiss without prejudice its application for a new FM station (B1-PH-448).

Robert Lex Easley, Laurens, S. C.—Granted petition to dismiss without prejudice application (B5-P-3575) for a new station.

Eleanor Patterson, tr/as The Times Herald, Washington, D. C.—Granted motion to dismiss without prejudice its application for a new FM station (B1-PH-229).

KFYR—Myer Broadcasting Co., Bismarck, N. Dak.—Granted petition for leave to intervene in the hearing on application of KOAC, Corvallis, Ore. (B5-MI-1229), for modification of license.

Metropolitan Broadcasting Corp., Washington, D. C.—Granted motion to amend application for a new FM station, so as to increase capital stock, show revised engineering data, etc.

FM Development Foundation, Vienna, Va.—Granted petition to dismiss without prejudice application (B1-PH-190) for a new FM station.

Potomac Cooperative Fed., Inc., Washington, D. C.—Granted petition for leave to amend application for a new FM station, to change name of applicant from Potomac Cooperative Federation, Inc., to Potomac Broadcasting Cooperative, Inc., to complete financial arrangements in re application, etc.

Chesapeake Broadcasting Co., Washington, D. C.—Granted petition for leave to amend application for FM station, so as to include complete engineering data, etc.

Cowles Broadcasting Co., Washington, D. C.—Granted leave to amend application for FM station so as to set out in full the engineering data required.

KWPT—Wichita Broadcasters, a partnership, Wichita Falls, Texas—Granted petition insofar as it requests leave to amend its application (Docket 6670), so as to specify a revised DA array; denied petition insofar as it requests grant of application without hearing; and/or revision of the issues in the consolidated hearing re 620 kc. by eliminating engineering issues; and/or postponement of consolidated hearing re 650 kc. scheduled for March 8.

Central Broadcasting Co., Madison, Wis.—Granted petition requesting leave to amend application for CP so as to change nighttime power from 500 watts to 1 KW; make changes in DA, etc.

Federal Communications Commission

APPLICATIONS ACCEPTED FOR FILING

550 Kilocycles

NEW—Manu Publishing Co., Ltd., Wailuku, T. H. (P. O. 33 High St.)—Construction permit for a new standard broadcast station to be operated on 550 kc., power of 1 KW, and unlimited hours of operation. (Call KMVI reserved)

570 Kilocycles

KLNC—Harold L. Sudbury, Blytheville, Ark.—Construction permit to change frequency from 900 kc. to 570 kc., power from 1 KW to 500 watts night and 1 KW during hours of operation from daytime to unlimited time, install directional antenna for nighttime use and change transmitter and studio locations.

580 Kilocycles

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kan.—Construction permit to mount FM antenna on top of No. 1 element of directional antenna system.

640 Kilocycles

WHK—United Broadcasting Co., Cleveland, Ohio—Construction permit to change frequency from 1420 kc. to 640 kc., increase power from 5 KW (employing directional antenna at night) to 50 KW, install new transmitter and directional antenna for day and night use and change transmitter location. (Contingent on grant of WHK B2-P-4350)

740 Kilocycles

NEW—Angel Ramos and Jose Coll Vidal, a partnership, d/b/a El Mundo Broadcasting Co., San Juan, Puerto Rico (P. O. 2 Barbosa St.)—Construction permit for a new standard broadcast station to be operated on 740 kc., power of 10 KW, directional antenna, and unlimited hours of operation.

NEW—Volunteer State Broadcasting Co., Inc., Nashville, Tenn. (P. O. Commerce Union Bank Bldg.)—Construction permit for a new standard broadcast station to be operated on 1300 kc., power of 5 KW, and unlimited hours of operation, employing directional antenna for night use.

1340 Kilocycles

WLAV—Leonard A. Versluis, Grand Rapids, Mich.—Construction permit to change frequency from 1340 kc. to 920 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use and change transmitter location.

NEW—Harry J. W. Kiessling, Carl F. Stroehmann, Frank F. Plankenhorn and William P. Wilson, a partnership d/b as Williamsport Radio Broadcasting Associates, Williamsport, Penna. (P. O. 420 Pine St.)—Construction permit for a new broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—Kentucky Lake Broadcasting System, Inc., Paris, Tenn. (P. O. Box 240)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

NEW—Twin City Broadcasting Co., Inc., Augusta, Maine (P. O. 223 Lisbon St., Lewiston, Me.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

NEW—Clearwater Broadcasting Co., Inc., Clearwater, Fla. (P. O. Box 1139)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. (Contingent on grant of WLAK-B3-P-4927).

NEW—Edward J. Jansen and Jessica L. Longson d/b as Livingston Broadcasters, Livingston, Mont. (P. O. 1702 N. Prospect St., Tacoma, Wash.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

1360 Kilocycles

KMO—Carl E. Haymond, Tacoma, Wash.—Authority to make changes in automatic frequency control equipment.

1400 Kilocycles

NEW—Billy Averite Laurie, Jacksonville, Texas (P. O. Temp. P. O. Box 649, Palestine, Texas)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 100 watts and unlimited hours of operation.

NEW—Sierra Broadcasting Service, a partnership composed of Leonard R. Trainer and Reginald H. Shirk, Hot Springs, New Mexico (P. O. 907 Juniper St.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

1420 Kilocycles

WHKK—United Broadcasting Co., Akron, Ohio—Construction permit to change frequency from 640 kc. to 1420 kc., increase power from 250 watts to 1 KW (employing directional antenna day and night) to 5 KW, change hours of operation from limited time to unlimited time, install new transmitter and new directional antenna for day and night use and change transmitter location. (Contingent on grant of WHK—P-4202).

1450 Kilocycles

WAGC—Gordon W. Gambill, Hubert M. Martin, Humphrey B. Heywood and R. T. Russell, d/b as Tennessee Valley Broadcasting Co., Chattanooga, Tenn.—License to cover construction permit (B3-P-3716) which authorized construction of a new standard broadcast station.

WAGC—Gordon W. Gambill, Hubert M. Martin, Humphrey B. Heywood and R. T. Russell, d/b as Tennessee Valley Broadcasting Co., Chattanooga, Tenn.—Authority to (Continued on next page)

MARCH 11, 1946 — 193
determine operating power by direct measurement of antenna power.

WTDO—Aurelia S. Becker and Charles Z. Hesket, d/b as Cumberland Broadcasting Co., Cumberland, Md.—License to cover construction permit (31-P-3869) which authorized changes in transmitting equipment.

NEW—Sun Country Broadcasting Co., Phoenix, Ariz. (P. O. 74 East Pierson St.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation.

KSMA—Hugh G. Shurtliff, Charles A. Shurtliff, Mareby Cardeha (Della) Shurtliff and Cleo Agnes Center, Santa Maria, Calif.—License to cover construction permit (B3-P-3094 as modified) which authorized construction of a new standard broadcast station.

KSMA—Hugh G. Shurtliff, Charles A. Shurtliff, Mareby Cardeha (Della) Shurtliff and Cleo Agnes Center, Santa Maria, Calif.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

NEW—Copper City Radio Co., Butte, Mont. (P. O. Box 128, c/o J. V. Nicholas)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation. Amended: to change frequency from 1230 kc. to 1490 kc.

NEW—John Raymond Barlett, tr/as Radio South, Quitman, Ga. (P. O. 305 N. Patterson St., Valdosta, Ga.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

1590 Kilocycles

NEW—Walter L. Edwards, Porterville, Calif. (P. O. 109 Beverly Drive, Visalia, Calif.)—Construction permit for a new standard broadcast station to be operated on 1590 kc., power of 1 KW, and unlimited hours of operation.

FM APPLICATIONS ACCEPTED FOR FILING

NEW—The New Britain Broadcasting Co., New Britain, Conn. (P. O. 272 Main St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency 98.0 mc. and coverage of 11,600 square miles.

NEW—The Argus-Press Co., Owosso, Mich. (P. O. 201 E. Exchange St.)—Construction permit for a new FM (Communumity) broadcast station to be operated on frequency as assigned by FCC and coverage of 1,937 square miles.

NEW—The Everett Broadcasting Co., Inc., Everett, Wash. (P. O. State Highway No. 1)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency and coverage to be assigned by FCC.

NEW—Luther E. Gibson, Salinas, Calif.—Construction permit for a new FM (Rural) broadcast station to be operated on frequency 103.9 mc., transmitter site and make changes in antenna system.

NEW—Geo. T. Morris and J. Newton Thompson, d/b as Dublin Broadcasting Co., Dublin, Ga.—Construction permit for a new FM (Rural) Broadcast station to be operated on 48.9 mc. and coverage of 5,000 square miles. Amended: to change name from Geo. T. Morris Whiner O. Laufer and J. Newton Thompson, d/b as Dublin Broadcasting Co. to Geo. T. Morris and J. Newton Thompson, d/b as Dublin Broadcasting Co., change frequency from 48.9 mc. to Channel #228, 93.5 mc. or as assigned by FCC, coverage from 5,000 square miles to 8,500 square miles, specify population and class of station as rural and change type of transmitter.

NEW—John W. Grenoble, Joseph L. Maguire, John T. Maguire and Kenneth F. Maguire d/b as Miners Broadcasting Service, Pottsville, Penn.—Construction permit for a new FM (Metropolitan) broadcast station to be operated with coverage of 12,600 square miles. Amended: to change name of applicant to Joseph L. Maguire, Kenneth Maguire, John T. Maguire, John Grenoble, Patrick J. McCull, James Koch and James J. Curran d/b as Miners' Broadcasting Service.

NEW—Community Broadcasting Co., Toledo, Ohio (P. O. Bell Bldg., 700 Madison Ave.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #260 (99.9 mc.), with coverage of 14,300 square miles.

NEW—Hazelwood, Inc., Orlando, Fla. (P. O. Angebith Hotel)—Construction permit for a new FM (Metropolitan) broadcast station to be operated with coverage of 7,343 square miles.

NEW—Southern Oregon Broadcasting Co., Grants Pass, Ore. (P. O. c/o Amos E. Voorhies, Box 43)—Construction permit for a new FM (Metropolitan-Rural) broadcast station.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

WMFT—Tri-Cities Broadcast Co., Florence, Ala.—Modification of construction permit (B3-P-1049, which authorized a new standard broadcast station) to make changes in transmitting equipment, approval of antenna and approval of transmitter and studio locations.

KTIS—Oil Center Broadcasting Co., Odessa, Texas—Modification of construction permit (B3-P-1148, which authorized a new standard broadcast station) to change type of transmitter and type of towers and extend commencement and completion dates from 3-16-46 and 9-16-46 respectively to 60 days after grant and 180 days thereafter, respectively.

APPLICATIONS TENDERED FOR FILING

NEW—Gonzales Broadcasting Co., a partnership consisting of Lawrence M. Walshak and Frank Wilson, Jr., Gonzales, Texas—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—James W. Gifford, Phoenix, Ariz.—Construction permit for a new standard broadcast station to be operated on frequency to be determined, power of 250 watts and unlimited hours of operation.

WCNH—Concord Broadcasting Corp., Concord, N. H.—Modification of construction permit to change location from a site to be determined at Concord, New Hampshire, to Manchester, New Hampshire.

NEW—California-Nevada Broadcasting Co., a partnership, composed of Hubert Q. Joucken and David McKay, Vallejo, Calif.—Construction permit for a new standard broadcast station to be operated on 850 kc., power of 250 watts and daytime hours of operation.

NEW—A. Dwight Newton and W. H. Wood, co-partners, d/b as San Joaquin Broadcasting Co., Stockton, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 1 KW, directional antenna and unlimited hours of operation.

NEW—The Huntsville Times Co., Inc., Huntsville, Ala.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

NEW—Dickinson Radio Assn., Dickinson, N. Dak.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

NEW—Robert H. Weck, Wood Bluff, Calif.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—Taylor Broadcasting Co., Taylor, Texas—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—John H. Schultz, Marshall True, Paul A. Wnorowski, Marvin M. Mollring and John W. Lewis, Jr., a partnership, d/b as WDEI Broadcasting Co., Belville, Ill. (Continued on next page)
Federal Trade Commission Docket

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Kittieland Studios and Beacon Studios—Misrepresentation of the price, terms of sale and quality of colored photograph enlargements is alleged by the Commission in a complaint against George D. Newman, trading as Kittieland Studios and Beacon Studios, 30 Huntington Avenue, Boston. He also operates branch studios at 175 State Street, Springfield, Mass., and 115 Bank Street, New London, Conn. (5425)

Perma-Plastic-Seal Company—Elmer I. Boyd, Hella Lou Boyd, and Elizabeth Epps, individually and trading as Perma-Plastic-Seal Company, 2256 North Elston Avenue, Chicago, and Kenosha, Wis., have stipulated to cease and desist from using the term “plastics” or of any simulation thereof, that the product or its composition shall be made by branding, marking, or otherwise marking the handle or ferrule of the brush with the name of each of the constituent materials, as for example, “Horsehair and Bristles” or “60% Horsehair and 40% Bristles.” (4145)

Superior Paint & Varnish Works—Justin Goldman and Louis Goldman, trading as Superior Paint & Varnish Works, 2276 North Elston Avenue, Chicago, and Kenosha, Wis., manufacturing and distributing paints and varnishes, including a product formerly designated “Synflo Synthetic Enamel,” have stipulated to cease and desist from use of the word “plastic” as a trade designation for or as descriptive of their product and from representing by use of the term “plastic,” or of any simulation thereof, that the product or the coating, film or finish produced by its use, possesses the characteristics of hardness, strength, resistance and wearing qualities generally associated by the consuming public with articles customarily accepted under the designation “plastics.” (4146)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist order last week:

Italian Accordion Manufacturing Co.—An order prohibiting certain misrepresentations in connection with the sale of accordions, concertinas and other musical instruments has been issued by the Commission against Walter Zulawinski and Louise Zulawinski, trading as Italian Accordion Manufacturing Co., as Italla & P. Soprani Accordion Manufacturing Co., 325 West Polk Street, Chicago. (5320)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Florit Products Co., Inc.—336 Canal Street, New York, selling a medicinal preparation designated “Italiana,” has stipulated that it will cease representing that the preparation will cleanse the stomach of impurities; and will discontinue publishing any advertisement that fails to reveal that the preparation should not be used in the case of nausea, vomiting, abdominal pain or other symptoms of appendicitis, provided, that such advertisement need only contain the statement “CAUTION: Unused or altered.” If and when the directions for use, whether appearing on the label or in the labeling, contain a caution or warning to the same effect. (6520)

Perfect Brush Manufacturing Co., Inc. and Zigmund Zamberman, 22 Wooster Street, New York City, manufacturing and distributing brushes with the words “Pure Bristles,” or words of similar import, have stipulated to cease and desist from marking, stamping or branding brushes with the words “Pure Bristles,” or words of similar import, that such brushes are composed in whole or in part of materials other than bristles; and from representing that brushes containing used or second-hand bristles are composed of all new materials by failure to stamp on an exposed surface of the handles thereof, in conspicuous and legible terms that cannot be obliterated without mutilating the handles, that the bristles are second-hand or used, as the case may be; provided, that if the brushing part of a brush contains bristles in substantial part and also other materials, and the word “bristles” is used to describe the bristle content, then the word “bristles” shall be immediately accompanied by some other word or term printed in equally conspicuous type so as to disclose clearly that the brushing part of the brush is not composed wholly of bristles; and provided further, that if the brushing part of the brush is composed in whole or in part of material other than bristles, which as a result of processing simulates bristles, then a clear and non-deceptive disclosure of its true composition shall be made by branding, stamping or otherwise marking the handle or ferrule of the brush with the name of each of the constituent materials, as for example, “Horsehair and Bristles” or “60% Horsehair and 40% Bristles.” (4446)

Superior Paint & Varnish Works—Justin Goldman and Louis Goldman, trading as Superior Paint & Varnish Works, 2276 North Elston Avenue, Chicago, and Kenosha, Wis., manufacturing and distributing paints and varnishes, including a product formerly designated “Synflo Synthetic Enamel,” have stipulated to cease and desist from use of the word “plastic” as a trade designation for or as descriptive of their product and from representing by use of the term “plastic,” or of any simulation thereof, that the product or the coating, film or finish produced by its use, possesses the characteristics of hardness, strength, resistance and wearing qualities generally associated by the consuming public with articles customarily accepted under the designation “plastics.” (4146)

MARCH 11, 1946 — 197
--COAST-TO-COAST SURVEY SHOWS OVERWHELMING PUBLIC APPROVAL—

FOR JOB U. S. BROADCASTERS ARE DOING

Radio's popularity with the American public was dramatically documented Wednesday (13) when the National Opinion Research Center of the University of Denver, Denver, Colorado, released the highlights of its nationwide survey "of popular reactions to the radio as an integral part of American life."

"More than 8 out of 10 people in the United States believe that radio is doing either an excellent or a good job in the community," the survey shows.

The initial NORC release, covering highlights of the study, is being printed in Bulletin form by NAB. A copy is enclosed herewith. The complete report will be published in book form early this summer by the University of North Carolina Press.

NAB cooperated with the NORC in undertaking this survey. The findings will be used extensively by NAB in its public relations activities. A sixteen millimeter documentary film and varied card displays are planned.

Annual Membership Meeting Set

Chicago, Oct. 21 to 24 inclusive—That is the place and time finally set for the annual membership meeting or convention of the National Association of Broadcasters. Headquarters will again be at the Palmer House, although some activities may be scheduled at the Stevens as well.

The Hilton Hotels, operators of both the Palmer House and the Stevens, have been most cooperative in working out the preliminary details in connection with the convention. A considerable block of rooms of various types has been set aside by each hotel for exclusive control by NAB in behalf of its membership. No reservations for rooms in these blocks will be accepted by either hotel until the same is cleared through NAB headquarters.

Well in advance of the dates of the meeting, preregistration forms for the convention, together with hotel reservation forms, will be sent to all members, active and associate. These forms will provide a means whereby accurate information regarding the type of accommodation desired, persons to attend, length of stay, etc., may be indicated. No reservations, other than those cleared on these forms will be accepted by the hotels.

It is requested that members withhold their requests for hotel rooms in connection with the convention until they have received these forms. It will facilitate the matter from both the standpoint of the hotels and NAB headquarters. Your cooperation will be appreciated.

Plans are now being perfected for the development of an agenda which will include all of the important matters affecting the industry. It is likely that the annual banquet will be resumed and an important announcement regarding this should be forthcoming well in advance of convention time.

NAB FILES BRIEF OPPOSING FCC PROPOSED TRANSFER RULE

On Friday (15) NAB filed a brief with the Commission objecting to the proposed section 1,388 of its rules and regulations (see NAB REPORTS, vol. 14, p. 38) which would require radio station licensees or holders of construction permits to give public notice of any proposed transfer of their station and invite competing bids. The brief, signed by General Counsel Don Petty, Milton J. Kibler, and Iver H. Peterson, as attorneys for NAB, denies that the Commission has the legal authority to adopt the rule, points out that it is not in the public interest, and also argues that if the rule is adopted a broader provision for exemptions from the rule should be included. Oral argument before the full Commission is requested and probably will be granted at some future date.

The text of the brief is as follows:

BEFORE THE
FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D. C.

DOCKET NO. 7071

In the matter of promulgation of Rules and Regulations concerning the procedure to be followed by the Commission in passing upon assignments of licenses or transfers of control of corporate licenses

BRIEF OF
NATIONAL ASSOCIATION OF BROADCASTERS

The National Association of Broadcasters, herein called NAB, as an interested party, with a membership of some 715 radio stations and construction permittees, all of whom are vitally interested in and will be seriously affected by Proposed Section 1,388 of the Commission's Rules and Regulations, files this brief in protest of the Proposed Rule.

NAB also requests that it be afforded opportunity to present oral argument to the Commission en banc as to why the Proposed Rule should not be adopted either in its proposed form or at all.

I

GENERAL STATEMENT

NAB has seriously considered the advisability of the Commission's Proposed Rule Section 1,388 (11 Fed. Reg. 890) relating to transfers, and denies that the Commission has the authority to adopt the rule. It is inconsistent with the provisions of the Act, and particularly Section 310(b), and the long and consistent history of administration of the Act and preceding legislation; and, finally, we believe that the Proposed Rule will be detrimental to the broadcasting industry and to the public interest.

II

THE PROPOSED RULE EXCEEDS THE COMMISSION'S STATUTORY AUTHORITY

Presumably the Proposed Rule is an attempted exercise by the Commission of its power under Section 303(f) and (r) to make rules and regulations, "not inconsistent with law ... to carry out the provisions of this Act," subject to the standard that "public convenience, interest, or necessity" requires that the action be taken. The provision of the Act sought to be carried out is Section 310(b), which reads as follows:

The station license required hereby, the frequencies of which are vitally interested in and will be seriously affected by the Proposed Rule, is in the public interest, and shall give its consent in writing.

In this Section, the only one in the Act relating to the transfer of licenses, Congress defined the scope of the Commission's authority as well as the ambit of its inquiry. The Commission is directed to give its consent in writing if, after "securing full information", it decides that "said transfer is in the public interest" (emphasis supplied). The Political Question is plain: The Commission is required to obtain full information about the transfer proposed and either grant or refuse its consent to "said transfer." The subject of the inquiry is the propriety of the transaction proposed by the licensees or permittees and his proposed transferee or assignee; it is concerned with whether the proposed terms and conditions are consistent with the provisions of the Act, and particularly Section 310(b), which reads as follows:

"The station license required hereby, the frequencies of which are vitally interested in and will be seriously affected by the Proposed Rule, is in the public interest, and shall give its consent in writing.

For the purposes of the discussion we assume, although we do not concede, that the Commission has similar authority with respect to construction permits by reason of the provision of Section 310(b) that the rights under any such permit shall not be assigned or otherwise transferred to any person without the approval of the Commission.

(Continued on next page)
not whether some other possible arrangement would be equally or more in the public interest. If the transfer or assignment proposed meets the test of “public convenience, interest, or necessity,” that transfer shall be approved. Nor do we find any support for the procedure proposed by the Commission by reference to other sections of the Communications Act. The Act is detailed and explicit in defining the procedure to be followed by the Commission in connection with original applications for license, renewal applications, and applications for transfer of licenses and revocation proceedings. Surely the Congress would have spoken in clear and unmistakable terms had it intended that the Commission should institute a system of publicly auctioning licenses and permits whenever a transferor desired to effect a transfer and where such a procedure would leave the transferor with no recourse if a transfer satisfactory to him were not effected. Administrative authority to act upon such a basic question of policy must find more substantial support than a tenuous inference in order to be sustainable.

We conclude, therefore, that the Proposed Rule is in excess of the authority conferred upon the Commission by the Act, not only by reference to Section 310(b)—the only provision relating to transfers—but also by clear inference from the Act as a whole. In sum, the Proposed Rule is not an exercise of the rule-making power vested in the Commission, but an attempted exercise of the legislative function of the Congress.

III

THE PROPOSED RULE IS NOT IN THE PUBLIC INTEREST

In the absence of a statement by the Commission in support of the Proposed Rule, indicating the considerations impelling its promulgation, we are somewhat at a disadvantage in addressing ourselves to the broad and fundamental question whether the Proposed Rule is in the public interest.

We are advised by the Public Notice issued January 16, 1946, that the Proposed Rule “has been promulgated as a necessary measure to carry out the Commission’s decision in the AVCO case.” We fail to discover in that decision any data demonstrating (a) that public interest has not been served by the procedure utilized in the past, or (b) that public interest will be better served, to appropriate a phrase from the majority opinion, by “reversing seventeen years of precedent and establishing new policies.”

It cannot be supposed, nor does the performance record of radio stations in this country and of the Commission itself indicate, that the Commission has been approving transfers contrary to the public interest and in violation of Congressional direction. Reference is made in the AVCO case to the fact that more than half of the existing licensees “were not selected by the Commission on the basis of basis of competitive applications but instead were selected by the Federal Communications Commission.” If we disregard subsequent renewals to transferees, but we suggest that the Commission has consented to each such transfer, after deciding “that said transfer is in the public interest.” Section 310(b). Moreover, since the statute limits the term of a license to a maximum of 3 years, the Commission has full opportunity to scrutinize the performance of the licensee at the time renewal of the license is sought. The Commission’s action upon renewal applications “shall be limited to and governed by the same considerations as are applicable to the granting of original licenses.” Section 307(d). And the number of licensees, the duration of their license, and all other relevant information are public, and well known or readily ascertainable by present or prospective licensees.

\*\*\*

The Proposed Rule in practice would lead to a less satisfactory choice of licensees; and it would discourage the sale of stations when it would actually be in the public interest for the station to be sold. It should be pointed out that the more restrictions placed around a sale the fewer, and in many instances, the more speculatively inclined, will be the persons who will enter the radio broadcasting field.

Reference to the following Section of this brief will disclose the multitude of situations in which the suggested procedure will obviously be contrary to “public convenience, interest, or necessity”. We invite careful consideration of the impact of the rule in the circumstances which we shall next discuss, none of which is in the least a remote or speculative possibility.

IV

IF ADOPTED, THE PROPOSED RULE SHOULD INCLUDE ADDITIONAL EXCEPTIONS

Should the Commission decide to place this rule into effect, despite its lack of statutory authority and though contrary to the public interest, the exceptions enumerated in Subsection (e) are inadequate for all practical purposes.

The following illustrations of problems which will inevitably arise and will require compliance with the procedure of the Proposed Rule, while not representing an exhaustive enumeration, demonstrate the futility of trying to create adequate specific exceptions.

1. Property rights involved in domestic relations, whether arising out of divorce or separate maintenance proceedings, property settlement agreements, or otherwise.

2. Property rights such as dower rights or community property rights arising under the laws of the various States.

3. Property rights arising out of operation of law or by agreement creating or relating to tenancy in common or to joint tenancy.

4. The transfer of property as a result of death, depending upon State laws, whether by will or by operation of law or otherwise, and the numerous resulting problems relating to beneficiaries’ rights; to will contests; to the creation and subsequent termination of life estates; to the remainderman’s interest; and to testamentary trusts, either charitable or otherwise.

5. Guardianship proceedings, whether relating to minors or to incompetents.

6. Problems arising out of partnership relations such as: dissolution, by death, decree or otherwise; limited partners; sale of an interest by one of several partners; sale of interest by one partner to the remaining partner; or the repurchase by one partner of his prior interest in a partnership.

7. Problems arising out of corporate licenses such as: sales of stock to employees; sales or transfers of stock, whether by operation of law or otherwise where it will or will not result in transfer of control of the corporation.

8. Problems relating to trusts, whether arising by operation of law, or otherwise, and the interests of trustees and beneficiaries thereunder.

10. Receivership by decree or otherwise.

11. Bankruptcy of licensee, whether individual, partnership or corporation.

13. Judgments, either monetary or otherwise, against individual licensee, one of several partners when partnership is licensee, or against partnership or against corporate licensee.

\(\text{(Continued on next page)}\)
14. Transfers by or to local, state, or Federal governmental agencies or organizations.
15. Transfers by or to educational or eleemosynary institutions.
16. Transfer where action of governmental bureau or authority is necessary.
17. Transfers where time is of the essence due to illness, tax problems, decline of broadcasting station service during uncertain "waiting period", or financial or market reasons. Of course, time is usually of the essence in all transfer cases. We urge, therefore, that consideration be given to reducing the waiting period in order to provide for the transfer in the interest of avoiding a deterioration of broadcast service and reducing the necessity of parties making various essential arrangements on a tentative basis.
18. The many situations which will arise where there will be direct conflict between the Proposed Rule and local or state laws.

In view of the foregoing, we suggest that exceptions be provided for in general terms and that the following clause be incorporated in Subsection (e) to cover necessary and proper exceptions. The provisions of this section shall apply only in cases where the transfer in question arises out of the voluntary contractual arrangement of two or more parties. This section shall not apply to any gift, to any testamentary disposition, to any case where the transfer of the licensee's or permittee's physical assets or any part thereof involved is effected by operation of law, or to any corporate reorganization or any other assignment or transfer that does not involve any change in beneficial ownership. Nor shall the procedure provided for in this section apply in any case in which the Commission finds, from the application or other information before it, that such procedure would work an undue hardship upon the parties involved, or would not effectuate the purposes of the Act, or would be unnecessary in that the transfer proposed would be made on the proposed conditions only to the proposed transferee.

V CONCLUSION

In conclusion, it is respectfully submitted that the Proposed Rule is a part of the Rule.

DON PETTY, General Counsel
MILTON J. KIBLER
IVAR H. PETERSON
Attorneys for National Association of Broadcasters.

March 15, 1946.

FCC SCHEDULES 341 HEARINGS

The following release, with attachments as mentioned, was received by NAB as Reports went to press:

"The Commission announces the scheduling of hearings on 341 matters during April, May, June, and July, 1946. The hearing calendar fixes a definite hearing date for every broadcast application on which the Commission, prior to March 27, 1946, ordered that a hearing be held. The hearing schedule for the second quarter of 1946, as for the first quarter, provides for five sets of hearings running simultaneously—three in Washington and two in the field. The new calendar also includes a complete schedule of hearings for the month of March, consisting of cases previously listed for that month in the hearing calendar for the first quarter of 1946 with enough new cases to fill the gaps in the original schedule.

"Attachment No. 1 is an alphabetical list of the matters scheduled for hearing, giving docket number, date on which consolidated hearing will begin, and place of hearing. Presiding officers for particular hearings in Washington and in the field will be determined at a later date, it having been found impractical to make designations several months in advance.

"Attachment No. 2 is the hearing calendar for March, April, May, June, and July, 1946, showing the docket number of the matters scheduled for each day of those months and the place of hearing.

"Attachment No. 3 lists in numerical order the docket number of the matters on which hearings are being scheduled together with the date and place of hearing.

"An effort has been made not to schedule new broadcast hearings for the period from April 1 to April 15, this period being reserved for the taking of adjourned engineerings in cases when non-technical evidence has already been presented but the records not yet closed. The only exceptions to this principle are two groups of hearings which were originally scheduled for March and which were unavoidably postponed. The last two weeks in April have been set aside for the Clear Channel proceeding (Docket No. 6741) being heard by the Commission en banc; consequently all other cases scheduled during that period will be heard by members of the staff. It will likewise be necessary, in order to maintain a quorum of the Commission in Washington, for staff members to participate in the field hearings set for May, June, and July.

"In scheduling hearings in broadcast matters the Commission has arranged to hold most of the television, FM, and 250-watt AM applications in the community affected. Hearings involving substantial engineering questions have been scheduled for Washington because it is felt that both from the standpoint of the Commission's Engineering Department and the private engineering consultants that such questions can best be heard in Washington. And even in those cases which are set for hearing in the field it is contemplated that at the discretion of the presiding officer evidence on substantial engineering questions will be heard in Washington either before or after the session in the field.

"In scheduling these hearings the Commission has made every effort to avoid setting for hearing on the same day a substantial number of cases which, according to the Commission's records, the same individual attorney is appearing. It has, however, been impossible to avoid conflicts with respect to law firms and in some instances the same firm of attorneys is scheduled to appear in as many as three simultaneous hearings. However, in all such cases the firms involved are known to have at least three members who are admitted to practice before the Commission.

"The Commission has arranged the hearing schedule upon the premise that no hearing on a single broadcast application—including direct testimony and cross-examination—shall consume more than one full hearing day. Experience with the calendar for the first quarter of 1946, arranged on a similar basis, has demonstrated that one day is more than adequate, especially in cases when pre-trial conferences are held. Accordingly, for consolidated proceedings involving two applications the Commission has allotted two days, where there are three applications three days are set aside, etc. Parties are urged to prepare and present their evidence in a manner which will permit the maintenance of this schedule.

"In view of the crowded condition of the hearing docket it will not be possible for the Commission to entertain requests that particular hearings be postponed for a specified period of time, such as 30 days. Such postponements would inevitably result in conflicts with other hearings which are today being scheduled. Accordingly, if for good
WIGGLESWORTH ATTACKS FCC—DENNY REPLIES

Replying to charges made by Rep. Richard B. Wigglesworth (R., Mass.) on the floor of the House on Wednesday, March 13, concerning practices of the FCC, Acting Chairman of the Commission, Charles R. Denny, told an AP reporter that "Mr. Wigglesworth’s charges are entirely without any legitimate basis." "He doesn’t have the facts," said Denny.

Denny’s reply referred specifically to statements made by Wigglesworth to the effect that a license for a radio station at Lexington, Ky., had been granted the Kentucky Broadcasting Co. as a favor to "the father of a political friend" of former FCC Chairman Paul A. Porter. Wigglesworth said that "the party so favored by Mr. Porter before he left the Commission to become administrator of the Office of Price Administration was Mr. Edward J. Noble, the general counsel for the Democratic National Committee.”

Porter had previously asserted that there was "no truth" to similar earlier charges concerning the grant. (See NAB Reports, p. 190.)

Mr. Wigglesworth’s statement on the House floor, as contained in a release from his office, follows:

"Mr. Chairman: Members of the House will recall, long and well, I trust, the House Select Committee of the 78th Congress appointed to investigate and report on the transactions and activities of the Federal Communications Commission; how that Committee, again and again, was thwarted in its efforts to gather pertinent information, by Presidential and other administration edicts which gagged Army, Navy, and civilian personnel; how officials of the Government, past and present, including those of the Federal Communications Commission itself, repeatedly sought to, and did, block the Committee in the discharge of the duties imposed upon it by the Congress; and how, administration pressure, together with resort by the majority members of the Committee to postponements, executive sessions, and other unusual tactics, forced the resignation of two of the Committee’s counsel and prevented the public disclosure of important facts concerning the Commission’s activities and the conduct of its officials and employees.

"The House Select Committee did, however, accomplish some good in disclosing to the Congress and the public that the Federal Communications Commission in divers ways had shown favoritism to, and bestowed political rewards upon, persons and concerns high in Administration favor; and that in the field of radio station licensing and license renewals, the Commission had so operated as to dictate and control the content of radio programs, despite the fact that section 326 of the Federal Communications Act in the plainest terms denies to the Commission all powers of censorship over radio programs.

"One of the most publicized matters brought to the attention of the House Select Committee was the sale of the Government-owned radio frequency, known as Station WMCA by Donald A. Flamm to Edward J. Noble.

"It was shown to my entire satisfaction at least that, through pressure brought presumably for the protection of certain Administration favorites, including the well-known Thomas Gardner Corcoran (Tommy the ‘Cork’), William J. Dempsey, and William C. Koplovitz, the Select Committee; acting by and through the majority of its members, first postponed hearings on the complaint of Flamm that he had been coerced into selling his station to Noble by improper representations by Noble, and his attorneys, Dempsey and Koplovitz; and then directed, when the matter was finally heard by the Committee that the hearing be held behind closed doors, with the evidence added never being published either to the House or the public.

"The majority of the Committee, taking what I conceived to be a strained view of the testimony, reported no substantial irregularities in the sale of Station WMCA to Noble by Flamm.

"Among other things, the majority found:

"That Flamm was under no pressure, coercion, or duress when he finally signed the contract for the sale of his station to Mr. Noble;

"That it found "nothing to censure in the contract of Mr. Edward J. Noble;" and

"That the Federal Communications Commission cannot be held in its duty of approving the transfer of any frequency to Flamm when Flamm himself, by his attorneys, submitted nothing to the Federal Communications Commission to justify an inquiry.

"I took occasion to file minority views on the subject, which were printed with the report of the Committee. Among other things, I said:

"‘In my judgment, the Commission cannot escape condemnation for its conduct in this case. Either the Commission was guilty of gross negligence, and failed to live up to the trust reposed in it, or it was guilty of malfeasance in office.

"‘I disagree most emphatically with the conclusions of the majority in this connection, shown to me for the first time 2 hours before the time limit for filing this report.’

"As shown by the hearings before the Select Committee, Flamm brought an action in New York City against Noble for the wrongful acts of Noble and his attorneys, and this suit has recently resulted in a verdict of $350,000 in Flamm’s favor. The verdict, of course, reflects what a jury of the peers of Flamm and Noble thought of the controversy, and is directly contrary to the findings of the majority of the Select Committee.

"The Committee hearings disclosed that the Federal Communications Commission approved the sale and transfer of radio station WMCA to Noble without hearing Flamm’s complaint that he had been fraudulently coerced into agreeing to the sale; and that the action of the Commission in approving the transfer was taken in the face of knowledge, or the means of knowledge, of widespread charges that the sale was not a proper one.

"The principal part of Flamm’s complaint was that Noble, through Dempsey and Koplovitz, his attorneys, had represented that unless Flamm sold the station at Noble’s price, they had sufficient influence with the Commission to apply for and obtain, and that they would apply for and obtain, Flamm’s assigned frequency without paying anyتحية for the station.

"And be it remembered that, when these representations were made, Dempsey and Koplovitz had but recently left the Commission in their capacities of General Counsel and Assistant General Counsel, respectively.

"Certainly, Mr. Chairman, the verdict of the New York jury leaves the Federal Communications Commission and others concerned in a sorry light.

"There can be little doubt, Mr. Chairman, that the labors of the House Select Committee produced some good. Despite the difficulties encountered, much was accomplished and enough was developed to indicate a strong and imperative need for improvement in the standards of administration by the Commission and for remedial legislation.

"The investigation unquestionably contributed to the retirement to private life of the Federal Communication Commission’s former chairman, James Lawrence Fly.

"Mr. Fly was succeeded by Mr. Paul A. Porter, previously a high official of the Democratic National Committee, as well as the prior holder of other Federal offices of importance. Mr. Porter’s incumbency was of short duration. In the very next of note, however, immediately after his last, official acts was to cause the granting to a political friend, or to the father of a political friend, without any hearing before the Commission, of a radio station license in the State of Kentucky for the use of a frequency said..."
to have been sought by an existing station licensee over a period of some seven years.

"The party so favored by Mr. Porter before he left the Commission to become Administrator of the Office of Price Administration was Mr. Edward F. Pritchard, the father of Edward F. Pritchard, Jr., General Counsel for the Democratic National Committee, by appointment of Mr. Hannegan, and high in the councils of the Administration.

"The present Acting Chairman of the Federal Communications Commission is Mr. Charles R. Denny, who throughout the long days of the Select Committee's hearings, fought the Commission's battle as its Chief Counsel, and sought to conceal its shortcomings.

"The Federal Communications Commission has requested vastly more funds for the fiscal year 1947 than were appropriated for it in war years, when it professed to be engaged in indispensable war work.

"Its claim for increased peacetime and postwar funds is predicated largely upon anticipated work incident to new discoveries and improvements in the radio art, although there is no clear showing as to how much the regulatory work incident to such discoveries and improvements has actually increased or will increase in the next fiscal year.

"The Commission has just completed and distributed a report consisting of 139 pages, entitled 'Public Service Responsibility of Broadcasting Licensees.'

"This report has been construed by some as indicating an intent by the Federal Communications Commission to assume an unlawful control over what the people shall and shall not hear over the air.

"While time for detailed study has not been available, this report makes it clear that the Federal Communications Commission has renewed the licenses of those who had obtained their original licenses on the basis of false representations; and has renewed the licenses of those whom the Commission now cites as having operated not in the public interest but for private profit.

"The report also offers striking testimony of the extent to which radio time on Sundays has been used for commercial purposes.

"Twenty-five Columbia Broadcasting System stations have devoted from ninety to ninety-five per cent of their time and twenty-eight National Broadcasting Company stations from eighty to ninety per cent of their time to money-making programs on a Sunday.

"I repeat, as I stated in my minority views, that there is an imperative need for improvement in standards of administration by the Commission and for remedial legislation. Both are essential to impartial and efficient regulation and to equality of opportunity and freedom of speech over the radio, one of the greatest single factors in the Nation today in terms of the preservation or destruction of our American way of life."

Research

KENNETH H. BAKER NAMED NAB DIRECTOR OF RESEARCH

Justin Miller, President of the National Association of Broadcasters, announced today the appointment of Mr. Kenneth H. Baker as NAB Director of Research.

Mr. Baker is at present a member of the faculty of Ohio State University. He will join the NAB April 1.

The new Director of Research has had considerable experience in this field. His radio research has included listening habits, market surveys, and panel studies. On other subjects he has conducted opinion polls and studied attitude measurement.

In addition to Ohio State University Mr. Baker has taught at Northwestern University and Ohio Wesleyan University. His education and his teaching experience have been mainly in the field of psychology.

Mr. Baker received his Doctor of Philosophy degree from Ohio State University and did further graduate study at Northwestern University. He served in the Army during World War II, where he established and directed Office of Strategic Services training, attended the Command and General Staff School, and spent thirteen months overseas in special operations and intelligence.

Engineering

PLANS OF 15 STATIONS APPROVED

The Federal Communications Commission on Wednesday (13) approved the basic engineering plans submitted by 15 applicants for FM stations thereby enabling them to place orders for transmitters and antennas and to make other engineering arrangements. In some cases antenna structures are subject to approval by the Civil Aeronautics Administration. Notification of the Commission's action is being sent to each of these applicants together with specific requests for further engineering information required by the Commission.

Previously, these applicants had been given conditional grants subject to further review of engineering details and program plans before further action by the Commission.

Each of these applicants is being sent a copy of the FCC Report of March 7 entitled "Public Service Responsibility of Broadcast Licensees" and an appropriate form on which he may make representations concerning his program plans.

This action leaves 337 conditional FM grants to be acted upon and 285 FM applications on which no action has yet been taken by the Commission.

Following is the list of applications for which engineering approval was granted by the Commission:

Alabama

Florida

Florida Broadcasting Co., Jacksonville, Fla.—Granted CP for a Metropolitan station. Channel: 95.9 Mc. (No. 240); effective radiated power: 20 KW; antenna height above average terrain: 500 ft.

Isle of Dreams Broadcasting Co., Miami, Fla.—Granted CP for Metropolitan station. Channel: 97.5 Mc. (No. 248); effective radiated power: 34.0 KW; antenna height above average terrain: 346 ft.

Georgia

Southeastern Broadcasting Co., Macon, Ga.—Granted CP for Metropolitan station. Channel: 101.5 Mc. (No. 270); effective radiated power: 36.0 KW; antenna height above average terrain: 437 ft.

Frank R. Podcock, Jr., Nr. Moultrie, Ga.—Granted CP for Metropolitan station. Channel: 100.3 Mc. (No. 262); effective radiated power: 10.4 KW; antenna height above average terrain: 401 ft.

Georgia-Alabama Broadcasting Corp., Columbus, Ga.—Granted CP for Metropolitan station. Channel: 96.3 Mc. (No. 242); effective radiated power: 9.4 KW; antenna height above average terrain: 602 ft.

Middle Georgia Broadcasting Co., Macon, Ga.—Granted CP for new Metropolitan station. Channel: 102.3 Mc. (No. 272); effective radiated power: 36.0 KW; antenna height above average terrain: 441 ft.

Iowa

Burlington Broadcasting Co., Burlington, Iowa.—Granted CP for Metropolitan station. Channel: 99.3 Mc. (Continued on next page)
(No. 257); effective radiated power: 19.2 KW; antenna height above average terrain: 538 ft.

Central Broadcasting Co., Des Moines, Iowa.—Granted CP for Rural station. Channel: 100.5 Mc. (No. 263); effective radiated power: 59143 KW; antenna height above average terrain: 583 ft.

**Minnesota**

**Missouri**

Missouri Broadcasting Corp., St. Louis, Mo.—Granted CP for Metropolitan station. Channel: 92.1 Mc. (No. 221); effective radiated power: 92.3 KW; antenna height above average terrain: 475 ft.

Thomas Patrick, Inc., St. Louis, Mo.—Granted CP for Rural station. Channel: 95.3 Mc. (No. 237); effective radiated power: 188 KW; antenna height above average terrain: 477 ft.

St. Louis University, St. Louis, Mo.—Granted CP for Metropolitan station. Channel: 94.1 Mc. (No. 231); effective radiated power: 42.6 KW; antenna height above average terrain: 525 ft.

**Nebraska**

World Publishing Co., Omaha, Neb.—Granted CP for Rural station. Channel: 92.5 Mc. (No. 223); effective radiated power: 160 KW; antenna height above average terrain: 584 ft.

**AMATEURS GET ADDED BANDS**

The Commission on Wednesday (13) announced the assignment for amateur use of three additional frequency bands, one of which, the 3700 to 4000 kilocycle band, is the first band below 25 megacycles to be available for amateurs since they were reactivated last year.

The 3700 to 4000 kilocycle band is available for amateur stations within the continental United States on April 1, 1946, 3 a.m., E. S. T. The other two bands, 235 to 240 megacycles and 27.185 to 27.455 megacycles, are available immediately for amateur stations in both continental United States and its territories and possessions. The emissions that may be employed on these bands and the restrictions and limitations imposed on their use are set forth in Order No. 130-D adopted by the Commission today.

As the Commission in its postwar reallocation of frequencies, in Docket No. 6651, has not made any final decision with respect to frequencies below 25 megacycles, the assignment of the band 3700 to 4000 kilocycles is subject to the Commission's decision in that proceeding. The frequency band 27.185 to 27.455 megacycles has been definitely allocated to the amateurs for such use as they can make of the band in view of the fact that it is also allocated to and is in use by scientific, industrial and medical apparatus. The assignment of the band 235 to 240 megacycles is an interim assignment, expected to be effective until January 1, 1949. About that date, it is expected that the 220 to 225 megacycle band temporarily in use for radar distance indicators used for safety purpose but ear-marked for amateurs in the Commission's postwar reallocation plan, can be assigned for use by amateurs in lieu of the 235 to 240 megacycle band.

On Friday (15) the Commission made public additional information regarding the temporary allocation of the band 235-240 megacycles to the amateur service.

The 235 to 240 megacycle allocation to the amateur service is on a temporary basis, terminating not later than January 1, 1949, at which time the amateur station operation on this frequency band will move to the 220-225 megacycle band in accordance with the Commission's post-war allocation plan.

The temporary allocation at 235-240 megacycles came about as a result of an interim plan for accommodating a British 200 megacycle radar distance indicator system at United States gateways of International Aviation Routes, and within interference distance of the United States-Canadian border.

United States and British experts agree that the radar distance indicator should occupy a position in the spectrum at 1000 megacycles or higher but the interim 200 megacycle allocation will permit use of present British 200 megacycle radar distance indicator equipment until the higher frequency development and production can get under way.

An "Arrangement between the United States of America and the British Commonwealth and Empire Concerning Radio Distance Indicators" was signed by representatives of both countries on February 7, 1946, which embodies the following points:

1. The United States and British Commonwealth will jointly prosecute the development of an ultimate system to operate in the vicinity of 1000 megacycles or higher, the precise frequency band to be selected not later than January 1, 1947.

2. The British Commonwealth will shift to the ultimate system at the earliest practical date.

3. The United States will permit interim use of the band 216-23 megacycles for the British indicator system at specific U. S. gateways of International Air Routes and within interference range of the United States-Canadian border. The interim use at these locations will terminate not later than January 1, 1949.

4. While the United States Allocation table above 25 megacycles is not to be modified as a result of this arrangement, an interim allocation for the period ending January 1, 1949, has been effected as follows:

- 216-231 Mc Radar Distance Indicators
- 231-236 Mc Government (in areas within interference range of the distance indicator)
- 235-240 Mc Amateur (in U. S. and Canada).

**40 STATIONS SIGN FOR TEXAS CLINIC**

At least 40 Texas stations will attend the 3 Texas radio news clinics to be held on March 26-27-28, respectively, at Houston, Fort Worth, and San Antonio. That was the count on Thursday (14), according to a wire from Jack McGrew, KPBC, Houston, general clinic chairman. He expects additional attendance to be registered well in advance of the meetings.

Twelve stations have registered for the Houston clinic, 17 for Fort Worth clinic and 11 for San Antonio clinic.

**Leading Educators Invited**

Paul B. Thompson, chairman, Department of Journalism, University of Texas; Professor J. Willard Ridings, Department of Journalism, Texas Christian College, Fort Worth; Professor Lester Jordan, Department of Journalism, Southern Methodist University, Dallas; and N. S. Patterson, head of the Journalism Department, University of Houston, have been invited to attend a clinic of their choice.

The Houston clinic will be held at the Rice Hotel; the Fort Worth clinic at the Worth Hotel and the San Antonio clinic at the St. Anthony. Latter selection was made by Ken McClure, WOAI, San Antonio chairman, and the Fort

(Continued on next page)
BIG TURN OUT FOR IOWA NEWS CLINIC

As of Wednesday (13), fifteen Iowa and two Nebraska stations had declared their intention of participating in the NAB-Iowa radio news clinic at Cedar Rapids, on Friday, March 22. These stations are:

**Iowa**
- WOI—Ames
- KFGQ—Boone
- KBFV—Burlington
- WMT—Cedar Rapids
- KROS—Clinton
- WOC—Davenport
- KRNT—Des Moines
- KSO—Des Moines
- WHO—Des Moines
- KFJB—Marshalltown
- KMA—Shenandoah
- KXEL—Waterloo

**Nebraska**
- KGLO—Mason City
- NAB—Iowa radio news clinic at Cedar Rapids, on Friday, March 22. These stations are:

Stations are to have from one to five representatives present. General Chairman Beryl Lottridge, vice president, WOC, Davenport, said that additional stations would be in attendance.

Clinic Agenda

Subjects to be discussed at the clinic include:

- General construction of newscasts—local vs. regional vs. national vs. international vs. features—with percentages, in what order, and time of day. (unassigned) (Opinions on audience reaction will guide this discussion.)
- University of Iowa special survey—Wilbur Schramm, WSUI. (Other information about surveys in general to be included in this period.)
- Methods of securing and handling radio news correspondents—local and regional. Doug Grant, WMT, Cedar Rapids.
- A farm news formula for local and regional stations. Henry B. Hook, KGLO, Mason City.
- The education and training of radio newsmen. (Hull, WOI, Marvin, WO, Schramp, WSUI.)
- The station men in the state should give a quick, concise outline of the education, ability, characteristics, and formal training that they expect of a graduate news man from either of the two State schools.

A desirable balance between international and domestic news stories today as compared with the war years. Jack Shelley, WHO, Des Moines.

Libel laws and ethics. (unassigned) (Wilbur Schramp will distribute copies of an outline on this subject that has been prepared by a University of Iowa professor.) The discussion will include opinions on ethics and good taste in handling sensational stories for the radio audience.

Round table discussion of individual problems not covered previously.

Recapitulation of the day's discussions.

PROPOSED NC EDUCATIONAL FM RULES

The Commission on Thursday (14) ordered that the proposed rules and regulations concerning noncommercial edu-
cational FM broadcasting be made public for consideration and discussion.

The order, signed by T. J. Slowie, Secretary, and the proposed rules, as released by the Commission, follow:

BEFORE THE

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON, D. C.

DOCKET NO. 7424

In the Matter of Promulgation of Rules and Regulations for the Noncommercial Educational FM Broadcast Service

ORDER

Whereas, the Commission on June 27, 1945, issued its final report allocating 20 channels for noncommercial educational FM broadcasting; and

Whereas, it is desirable that rules and regulations concerning noncommercial educational FM broadcasting be promulgated and codified at an early date;

Now, therefore, it is ordered, this 7th day of March, 1946, that the attached proposed rules and regulations be made public as a basis for consideration and discussion. Noncommercial educational FM broadcast licensees, permittees, applicants, and others are invited to submit their comments and suggestions, in writing, to the office of the Secretary, within 60 days from the date of this order. It is not contemplated that hearings or oral argument will be held on the proposed rules and regulations unless there is a demand from parties in interest.

In the absence of protests within 60 days, rules and regulations in final form will be promulgated.

Text of Commission's Release:

Sections 4.131-4.137 of the Commission's Rules and Standards of Good Engineering Practice applicable to Non-Commercial Educational Broadcast Stations would be repealed and the following rules substituted therefor.

Proposed Rules Governing Non-Commercial Educational FM Broadcast Stations

CLASSIFICATION OF STATIONS AND ALLOCATION OF FREQUENCIES

§ 3.501 Channels available for assignment.—The channels available for noncommercial educational FM broadcasting are listed in the table below, together with numerical designations for convenience:

<table>

§ 3.502 State-wide plans.—In considering the assignment of a channel for a noncommercial educational FM broadcast station, the Commission will take into consid-

(Continued on next page)
eration the extent to which each application meets the requirements of any state-wide plan for noncommercial educational FM broadcast stations filed with the Commission, provided that such plans afford fair treatment to public and private educational institutions, urban and rural, at the primary, secondary, higher, and adult educational levels, and appear otherwise fair and equitable, and provided further that such plans can be coordinated with those of other states concerned.

§ 3.503 Operation and Service.—The operation of, and the service furnished by, noncommercial educational FM broadcast stations shall be governed by the following:

(a) A noncommercial educational FM broadcast station will be licensed only to a nonprofit educational organization and upon a showing that the station will be used for the promotion of educational purposes.

(b) Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system and may transmit educational and entertainment programs to the public.

(c) Each station shall furnish a nonprofit and noncommercial broadcast service. No commercial program shall be transmitted nor shall commercial announcements of any character be made. A station shall not transmit the programs of other classes of broadcast stations unless all commercial announcements, and all commercial advertising in the continuity are eliminated.

§ 3.504 Channel Power and Service Area.—The channel operating power and service area of each noncommercial educational FM broadcast station shall be determined by the Commission. In such determination, the Commission shall consider all relevant factors including (1) the area served by the applicant’s existing educational facilities; (2) the channel, power and service area proposed in the application; and (3) the provisions of any state-wide plan filed with the Commission, which meets the requirements of Section 3.502.

§ 3.505 “Standards of Good Engineering Practice”.—The Standards of Good Engineering Practice concerning FM Broadcast Stations shall be applicable to Noncommercial Educational FM Broadcast Stations except for Section 2 concerning engineering standards of allocation. Section 2, however, provides a guide regarding methods that should be used in calculating the service area of a noncommercial educational FM broadcast station.

RULES GOVERNING ADMINISTRATIVE PROCEDURE

§ 3.510 Application for Noncommercial Educational FM Broadcast Stations.—Each applicant for a construction permit for a new noncommercial educational FM broadcast station, change in facilities of any existing noncommercial educational FM broadcast station, or noncommercial educational FM broadcast station license or modification of license shall file with the Commission in Washington, D. C., two copies of applications on the appropriate form designated by the Commission and a like number of exhibits and other papers incorporated therein and made a part thereof. Only the original copy need be sworn to. If the application is for a construction permit for a new noncommercial educational FM broadcast station, Form FCC No. 341 shall be filed; for modification of a noncommercial educational FM license or for change in facilities of an existing noncommercial educational FM broadcast station, Form FCC No. 342 should be filed.

§ 3.511 Full disclosures.—Each application shall contain full and complete disclosures with regard to all matters and things required to be disclosed by the application forms.

§ 3.512 Installation or removal of apparatus.—Applications for construction permit or modification thereof, involving removal of transmitting apparatus and installation of new transmitting apparatus, shall be filed at least 60 days prior to the contemplated removal and/or installation.

§ 3.513 Period of construction.—Each construction permit will specify a maximum of eight months from the date of granting thereof as the period within which construction of the station shall be completed and the station ready for operation, unless otherwise determined by the Commission upon proper showing in any particular case.

§ 3.514 Forfeiture of construction permits: extension of time.—

(a) A construction permit shall be automatically forfeited if the station is not ready for operation within the time specified therein or within such further time as the Commission may have allowed for completion, and a notation of the forfeiture of any construction permit under this provision shall be made in the records of the Commission as of the expiration date.

(b) Any application2 for extension of time within which to construct a station shall be filed at least thirty days prior to the expiration date of such permit if the facts supporting such application for extension are known to the applicant in time to permit such filing. In other cases such applications will be accepted upon a showing satisfactory to the Commission of sufficient reasons for filing within less than thirty days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the delay was due to causes not under the control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension.

§ 3.515 Equipment tests.—

(a) Upon completion of construction for a noncommercial educational FM broadcast station in exact accordance with the terms of the construction permit, the technical provisions of the application therefor and the rules and regulations and Standards of Good Engineering Practice concerning FM broadcast stations and prior to filing of application for license, the permittee is authorized to test the equipment for a period not to exceed 30 days: Provided, that the inspector in charge of the district in which the station is located and the Commission are notified 2 days in advance of the beginning of tests.

(b) The Commission may notify the permittee to conduct no tests or may cancel, suspend, or change the date of beginning for the period of such tests as and when such action may appear to be in the public interest, convenience and necessity.

§ 3.516 Program tests.—

(a) When construction and equipment tests are completed in exact accordance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations and Standards of Good Engineering Practice concerning FM broadcast stations, and after application for station license has been filed with the Commission showing the transmitter to be in satisfactory operating condition, the permittee is authorized to conduct program tests in exact accordance with the terms of the construction permit for a period not to exceed 30 days: Provided, that the inspector in charge of the district in which the station is located and the Commission are notified 2 days in advance of the beginning of such tests.

(b) The Commission reserves the right to cancel such tests or suspend, or change the date of beginning for the period of such tests as and when such action may appear to be in the public interest, convenience, and necessity by notifying the permittee.

(c) The authorization for tests embodied in this section or Section 3.515 shall not be construed as constituting a license to operate but as a necessary part of the construction.

§ 3.517 Normal license period.—All noncommercial educational FM broadcast station licenses will be issued so as to expire at the hour of 3 a.m. E.S.T. and will be issued for a normal license period of 1 year.

§ 3.518 License, simultaneous modification and renewal.—

When an application is granted by the Commission to expire at the hour of 3 a.m. E.S.T. and will be issued for a normal license period of 1 year.

(Continued on next page)
necessitating the issuance of a modified license less than 60 days prior to the expiration date of the license sought to be modified, or an application for renewal of such license if it is granted subsequent or prior thereto (but within 30 days of expiration of the present license) the modified license as well as the renewal license shall be issued to conform to the combined action of the Commission.

§ 3.520 Temporary extension of station licensees.—Where there is pending before the Commission any application, investigation, or proceeding which, after hearing, might lead to or make necessary the modification of, revocation of, or the refusal to renew an existing non-commercial educational FM license, the Commission may, in its discretion, grant a temporary extension of such license: Provided, however, That no such temporary extension will be construed as a finding by the Commission that the operation of any radio station thereunder will serve public interest, convenience, and necessity beyond the express terms of such temporary extension of license; And provided further, That such temporary extension of license will in no way affect or limit the action of the Commission with respect to any pending application or proceeding.

§ 3.521 Repetitious applications.—(a) Where an applicant has been afforded an opportunity to be heard with respect to a particular application for a non-commercial educational FM broadcast station or for a change of existing service or facilities and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider another application for the same class of broadcast station, investigation, or proceeding which, after hearing, might lead to or make necessary the modification of, revocation of, or the refusal to renew an existing non-commercial educational FM license, the Commission may, in its discretion, grant a temporary extension of such license: Provided, however, That no such temporary extension will be construed as a finding by the Commission that the operation of any radio station thereunder will serve public interest, convenience, and necessity beyond the express terms of such temporary extension of license; And provided further, That such temporary extension of license will in no way affect or limit the action of the Commission with respect to any pending application or proceeding.

(b) Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a date certain, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

§ 3.522 Assignment or transfer of control.—Application for consent to assignment of a noncommercial educational FM construction permit or license or for consent to voluntary transfer of control of a corporation holding a noncommercial educational FM construction permit or license shall be filed with the Commission on Form FCC No. 314 (assignment of license) and Form FCC No. 315 (transfer of license) at least 60 days prior to the contemplated effective date of assignment or transfer of control.

RULES RELATING TO EQUIPMENT

§ 3.551 Transmitter power.—The rated power and the operating power range of transmitters shall be in accordance with the Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.552 Frequency monitor.—The licensee of each non-commercial educational FM broadcast station shall have in operation at the transmitter an approved frequency monitor independent of the frequency control of the transmitter. For detailed requirements thereof see Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.555 Modulation monitor.—The licensee of each non-commercial educational FM broadcast station shall have in operation at the transmitter an approved modulation monitor. For detailed requirements thereof see, Standard of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.554 Required transmitter performance.—The construction, installation, operation, and performance of the noncommercial educational FM broadcast transmitter system shall be in accordance with the Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.553 Auxiliary Transmitter.—Upon showing that a need exists for the use of an auxiliary transmitter in addition to the regular transmitter of a broadcast station, a license therefor may be issued provided that:

(a) An auxiliary transmitter may be installed either at the same location as the main transmitter or at another location.

(b) A licensed operator shall be in control whenever an auxiliary transmitter is placed in operation.

(c) The auxiliary transmitter shall be maintained so that it may be placed into immediate operation at any time for the following purposes:

(1) The transmission of the regular programs upon the failure of the main transmitter.

(2) The transmission of regular programs during maintenance or modification work on the main transmitter, necessitating discontinuance of its operation for a period not to exceed five days.

(3) Upon request by a duly authorized representative of the Commission.

(d) The auxiliary transmitter shall be tested at least once each week to determine that it is in proper operating condition and that it is adjusted to the proper frequency, except that in case of operation in accordance with paragraph (c) of this section during any week, the test in that week may be omitted provided the operation under paragraph (c) is satisfactory. A record shall be kept of the time and result of each test.

(e) The auxiliary transmitter shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by these regulations.

(f) The operating power of an auxiliary transmitter may be less than the authorized power of the main transmitter, but in no event shall it be greater than such power.

§ 3.556 Alternate main Transmitters.—The licensee of a noncommercial educational FM broadcast station may be licensed for alternate main transmitters provided that technical need exists for such alternate transmitters and that the following conditions are met:

(a) Both transmitters are located at the same place.

(b) Both transmitters shall have the same power rating.

(c) Both transmitters shall meet the construction, installation, operation, and performance requirements of the Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.557 Changes in equipment and antenna system.—Licensees of noncommercial educational FM broadcast stations shall observe the following provisions with regard to changes in equipment and antenna system:

(a) No changes in equipment shall be made:

(1) That would result in the emission of signals outside of the authorized channel.

(2) That would result in the external performance of the transmitter being in disagreement with that prescribed in the Standards of Good Engineering Practice concerning FM Broadcast Stations.

(b) Specific authority, upon filing formal application...
(Form FCC No. 342) therefore, is required for a change in service area or for any of the following changes:

(1) Changes involving an increase or decrease in the power rating of the transmitter.
(2) A replacement of the transmitter as a whole.
(3) Change in the location of the transmitting antenna.
(4) Change in antenna system, including transmission line.
(5) Change in location of main studio, if it is proposed to move the main studio to a different city from that specified in the license.
(6) Change in the power delivered to the antenna.
(7) Change in frequency control and/or modulation system.
(c) Specify authority, upon filing informal request therefor, is required for a change in the indicating instruments installed to measure transmitter power output, except by instruments of the same maximum scale reading and accuracy.
(d) Other changes, except as above provided for in this section or in the Standards of Good Engineering Practice concerning FM Broadcast Stations, may be made at any time without the authority of the Commission, provided that the Commission shall be promptly notified thereof and such changes shall be shown in the next application for renewal of license.

RULE RELATING TO TECHNICAL OPERATION

§ 3.561 Hours of Operation.—(a) Each noncommercial educational FM broadcast station shall be licensed for unlimited time operation. Each application shall show the minimum hours of operation proposed; and each licensee shall promptly notify the Commission whenever it does not operate as many hours per week as set forth in its application; (c) the hours of actual operation during a license period shall be taken into consideration in considering the renewal of noncommercial educational FM broadcast licenses wherever it appears that the channels available for such stations are insufficient to meet the demand.

§ 3.562 Experimental Operation.—The period between 12:00 midnight and 6 a.m., local standard time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any noncommercial educational FM broadcast station on its assigned frequency and in no case less than 85 percent or more than 100 percent on peaks of frequent recurrence during any season which is in conformity with the highest level of the program under consideration.

§ 3.569 Frequency tolerance.—The center frequency of each noncommercial educational FM broadcast station shall be maintained within 2000 cycles of the assigned center frequency.

§ 3.570 Inspection of tower lights and associated control equipment.—The licensee of any noncommercial educational FM broadcast station which has an antenna or antenna supporting structure(s) required to be illuminated pursuant to the provisions of section 303(2) of the Communications Act of 1934, as amended:
(a) Shall make a visual observation of the tower lights and antennas each 24 hours to insure that all such lights are functioning properly.
(b) Shall report immediately by telephone or telegraph to the nearest Airways Communication Station or office of the Civil Aeronautics Administration any observed failure of the tower lights, not corrected within 30 minutes, regardless of the cause of such failure. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.
(c) Shall inspect at intervals of at least once each 3 months all flashing or rotating beacons and automatic lighting control devices to insure that such apparatus is functioning properly as required.

OTHER RULES RELATING TO OPERATION

§ 3.581 Logs.—The licensee of each noncommercial educational FM broadcast station shall maintain program and operating logs and shall require entries to be made as follows:
(a) In the program log:
(1) An entry of each station identification announcement (call letters and location) is made.
(2) An entry briefly describing each program broadcast, such as “music,” “drama,” “speech,” etc., together with the name or title thereof, with the time of the beginning and ending thereof, with the complete time in minutes, and in the case of a mechanical record is used, the entry shall show the exact nature thereof, such as “record,” “transcription,” etc., and the time it is announced. If the program is of network origin, its source shall be indicated. If the broadcast is under the auspices of an institution or organization other than the licensee, its name shall be noted.
(b) In the operating log:
(1) An entry of the time the station begins to supply power to the antenna, and the time it stops.
(2) An entry of the time the program service begins and ends.
(3) An entry of each interruption to the carrier wave, its cause and duration.
(4) An entry of the following each 30 minutes:
(i) Operating constants of last radio stage (total plate output power).
(ii) Frequency monitor reading.

§ 3.566 Facsimile broadcasting and Multiplex transmission.—For purposes of Section 303 of the Communications Act of 1934, as amended, application on FM channels may be permitted upon application to the Commission. The Commission may grant experimental authority to a noncommercial educational FM broadcast station for the multiplex transmission of facsimile or other signals and aural broadcast program. Provided that the transmission of facsimile or other signals does not reduce the quality of the aural program, and that a filter or other additional equipment is not required for receivers not equipped to receive facsimile or other signals.

§ 3.567 Operating power: how determined.—The operating power, and the requirements for maintenance thereof, of each noncommercial educational FM broadcast station shall be determined by the methods prescribed in the Standards of Good Engineering Practice concerning FM broadcast stations.

§ 3.568 Modulation.—The percentage of modulation of all stations shall be maintained as high as practicable in all cases consistent with good quality of transmission and good broadcast practice and in no case less than 85 percent or more than 100 percent on peaks of frequent recurrence during any season.

§ 3.569 Frequency tolerance.—The center frequency of each noncommercial educational FM broadcast station shall be maintained within 2000 cycles of the assigned center frequency.

(Continued on next page)
ture(s) is required to be illuminated the licensee shall make entries in the radio station log appropriate to the requirements of section 3.570 as follows:

1. The time the tower lights are turned on and off if manually controlled.
2. The time the daily visual observation of the tower lights was made.
3. In the event of any observed failure of a tower light:
   a. Nature of such failure.
   b. Time the failure was observed.
   c. Time and nature of the adjustments, repairs or replacements made.
4. Time notice was given to Airways Communications Station (C.A.A.) of any tower light failure not corrected within thirty minutes.
5. Time notice was given to the Airways Communications Station (C.A.A.) that the required illumination was resumed.
6. Upon completion of the periodic inspection (required at least once each three months):
   a. The date of the inspection and the condition of all tower lights and associated tower lighting control devices.
   b. Any adjustments, replacements or repairs made to insure compliance with the lighting requirements.

§ 3.582 Logs, retention of.—Logs of noncommercial educational FM broadcast stations shall be retained by the licensee for a period of 2 years.

§ 3.583 Logs, by whom kept.—Each log shall be kept by the person or persons competent to do so, having actual knowledge of the facts required, who shall sign the log when starting duty and again when going off duty. The logs shall be made available upon request by an authorized representative of the Commission.

§ 3.584 Log form.—The log shall be kept in an orderly manner, in suitable form, and in such detail that the data required by the particular class of station concerned are readily available. Key letters or abbreviations may be used if proper meaning or explanation is contained elsewhere in the log.

§ 3.585 Correction of logs.—No log or portion thereof shall be obliterated, or willfully destroyed within the period of retention provided by the rules. Any necessary correction may be made only by the person originating the entry who shall strike out the erroneous portion, initial the correction made, and indicate the date of correction.

§ 3.586 Rough logs.—Rough logs may be transcribed into condensed form, but in such case the original log or memos and all portions thereof shall be preserved and made a part of the complete log.

§ 3.587 Station identification.—(a) A Licensee of a non-commercial educational FM broadcast station shall make at least the following station identification announcements (call letters and location): (1) at the beginning and ending of each period of operation and (2) within 6 minutes of each hour and half hour during operation; provided,
   (b) Such identification announcement need not be made on the hour or half hour when to make such announcement would interrupt a single continuous program of longer duration than 30 minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the continuity, and at the conclusion of the program.
   (c) In making the identification announcement, the call letter shall be given only on the channel of the station identified thereby.

§ 3.588 Mechanical reproductions.—Each program broadcast which consists in whole or in part of one or more mechanical reproductions shall be so announced.
   (a) Each such program of longer duration than 30 minutes consisting in whole or in part of one or more mechanical reproductions, shall be identified by appropriate announcement at the beginning of the program, at each 30-minute interval and at the conclusion of the program; Provided, however, that the identifying announcement at each 30-minute interval is not required in case of a mechanical reproduction consisting of a single continuous program of longer than 30 minutes.
   (b) Each such program of a longer duration than 5 minutes and not in excess of 30 minutes, consisting in whole or in part of one or more mechanical reproductions, shall be identified by appropriate announcement at the beginning and end of the program.
   (c) Each such program of five minutes or less, consisting in whole or in part of mechanical reproductions, shall be identified by appropriate announcement immediately preceding the use thereof.
   (d) In case a mechanical reproduction is used for background music, sound effects, station identification or program identification, no announcement of the mechanical reproduction is required.

§ 3.591 Rebroadcast.—A noncommercial educational FM broadcast station may rebroadcast the program of any broadcast station providing it first procures the express authority of the licensee originating the program or programs.*

Broadcast Advertising

How Advertising Helps You
Prepared by Advertisers' Club of Cincinnati

During the past many years there have been a lot of high sounding claims made for advertising—a lot of things have been said against it—and many fancy definitions have been given it. Here are the facts about advertising—the facts about how advertising creates jobs, about the way advertising ensures quantity, and the truth about the effects of advertising on the price you pay for things. You can form your own conclusions.

Advertising, frankly, is a way to get people to do things. To buy the things offered for sale—to influence people to think well of a company—to try new ideas—to invest in War Bonds, donate blood, and save fats—to maintain American standards of living by encouraging the purchase of things made by American labor.

Advertising’s power was illustrated by the way it helped so tremendously with the War Bond drives, waste salvage campaign, blood donor work, recruitment, and many others.

In addition to this direct war effort advertising, many companies devoted large portions of their advertising to ideas that “sold” a war project and their own name at the same time.

Many companies helped the home front by suggesting ways to keep equipment in good running order. This all adds up to a great job, that tackled a great variety of problems.

Now, how will advertising help create jobs with the war over? Peacetime prosperity will require a high level of employment and income. This can be attained only if people have the urge to buy, and convert that urge into actual purchases. This urge—this desire for cars and washing machines and travel and clothing—must be kept alive by advertising.

Advertising will help do this by creating demand for the products advertised. This demand will make possible the mass production which is so largely responsible for America’s high standard of living. This mass production, in turn, will lower prices and create jobs.

Or to put it another way, companies that fail to advertise, lose business and create unemployment.

* See Sections 3.563(e) and 3.587(e). (Continued on next page)
First World War Advertising

For example, during the First World War, seventeen important companies stopped or greatly reduced advertising. Six companies sold out or were absorbed by competitors. One failed and went out of business—one went into receivership—one was deflated 97 per cent in personnel—one lost 81 per cent of its sales volume—one ended with two customers—three completely lost their industry leadership—one was operated by the banks—two found that competitors had grown at their expense.

We won't cry about the disappearance of these firms, but we can lament the loss of employment by those who had worked loyally at their jobs.

Advertising Costs

Now, what about the price we pay for advertised goods? Does advertising add to the cost or lower it?

In a recent survey by the Institute of Public Opinion, of thousands of typical consumers, it was found that 46 per cent believe advertising lowers prices, 42 per cent believe it raises prices, 12 per cent weren't sure.

Take twelve products of popular consumption and estimate how much you think the national advertising costs on each item.

First, a 5¢ glass of what is probably the best known of all soft drinks.

Next a quart of fresh milk—next, a can of the best known soup—an automobile—a package of cigarettes—a $2 watch—a bed sheet retailing at $1.75—a dozen oranges—a $10 pair of famous make shoes—a top-favorite breakfast cereal—a 7¢ cake of extremely popular soap—and finally a $1.95 shirt.

All right now let's see how you scored.

Here are the correct amounts:

That soft drink, 16, 1/100 of a cent a glass; the milk, 7/100 of a cent a quart; the soup, 36, 1/100 of a cent a can; the cars, 4¢ per dollar of the F. O. B. price; the cigarettes, 3/10 of a cent a pack; the watch, 5¢ per $2 watch; the $1.75 sheet, 1¢ per sheet; the oranges, 4/10 of a cent per dozen; the shoes, 25¢ per $10 pair; the cereal, 3/10¢ per box; the soap, 1/5 of a cent per cake; the shirt, 64, 1/100 of a cent.

Did you guess too high? Don't be ashamed if you did, because 99 out of 100 guesses are too high—usually much too high. The misunderstanding about advertising costs is a common American illusion.

Are even these tiny amounts added to the cost of goods? The fact of the matter is, these fractions of a cent actually lower the price you pay for the article—because advertising increases the demand, thus making possible the mass production that America is famous for. And the economies of mass production are passed on to you because of the national forces of American free competition.

Still another angle to remember is that your newspapers, magazines and radio would cost you far more (or might be saddled with Government-subsidized control) if they carried no advertising. For instance, it costs one big daily newspaper $40 a year per copy to prepare the papers that sell for $8 a subscription. The Saturday Evening Post, when it sold for a nickel, cost 25¢ a copy to produce.

Advertising Saves You Money

There's still one other important way advertising helps you. It's simply this: A widely advertised article is better known in whose memory the awards are given.

The fourth annual presentation of the Alfred I. Du Pont Radio Awards was made Saturday (9) at a dinner in New York. The dinner was given by Mrs. Alfred I. Du Pont, widow of the late industrialist and philanthropist in whose memory the awards are given.

The award for stations of more than 5-kw went to KDKA, Pittsburgh; for stations of 5-kw or less, to WNAX, Yankton. The commentator-report award went to Lowell Thomas of NBC. Each award carries one thousand dollars in cash.

The award for station KDKA was accepted by A. W. Robertson, chairman of the board of the Westinghouse Electric Corporation, which owns the station.

The award for WNAX was accepted by General Luther Hill, executive vice president of the Cowles Broadcasting Company and vice president of the Des Moines Register. General Hill represented Gardner Cowles, Jr., who was unable to attend the presentation because of the recent death of his father.

A trust fund was set up for the Du Pont awards in 1943 and is a permanent endowment. The rules are drawn so that F-M and Television can enter later as they develop. The awards for stations are based on public interest programming to the communities they serve. A station, in order to be considered for an award, must make a formal entry and prepare an exhibit.

Army Day Fact Sheets Mailed

The War Department this week mailed to all stations in the country a twenty page fact sheet for use in building programs in connection with Army Day, which will be celebrated this April 6th.

Attention was called by the Radio Branch of the War Department's Bureau of Public Relations to the fact that most radio transcription services are supplying their sub-
brief resume of each Fact Sheet is given below:

Help Keep Our Economy Stable

In his recent report on the first 100 days of reconversion, President Truman concluded: "Inflationary pressures are still great, and danger signals pointing to a further building up through the winter and spring are the rise of real estate, wholesale and raw materials prices. We must continue to hold the line. We cannot permit inflation."

The greatest inflationary pressures we face today are those stemming from the unprecedented demand for and the short supply of (1) housing, (2) clothing and (3) durable goods. Although rent control regulations still exist in most areas, the demand for housing is so great that people are tempted to ignore rent ceiling in their eagerness to provide shelter for themselves and their families. During the next few months the clothing supply will be the tightest since before the war, a situation that is further complicated by thousands of newly discharged veterans who are unable to find even a minimum of civilian clothing in the stores. The durable goods picture is a trifle brighter—more refrigerators, automobiles, washing machines, vacuum cleaners, radios, etc., are on the way. Here again, however, demand and purchasing power still exceed the supply and an inflationary black market is the potential result unless people curb their desires to own the first of everything that appears on the market at any price. Urge listeners to spend sensibly and to cooperate with all price and rent control regulations.

(Continued on next page)
of forest fire prevention: 1. Crush out cigarette, cigar and pipe ashes. 2. Break matches in two after using. 3. Drown all camp fires; then stir and drown again. 4. Find out the law before using fire. (Fact sheet No. 16.)

**Federal Communications Commission Docket**

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, March 18th. They are subject to change.

**Monday, March 18**

Consolidated Hearing

NEW—The Capital Broadcasting Co, Annapolis, Md.—C. P. 1450 kc., 100 watts night, 250 watts day, unlimited.

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.—C. P. to change frequency, increase power, install new transmitter and DA for day and night use. 1420 kc., 5 KW, unlimited. DA-night and day.

KSUB—Southern Utah Broadcasting Co., Cedar City, Utah—C. P. 590 kc., 250 watts night 1 KW day, unlimited.

NEW—San Bernardino Broadcasting Co., Inc., San Bernardino, Calif.—C. P. 590 kc., 1 KW, unlimited, DA-night and day.

NEW—The Star Broadcasting Co., Inc., Pueblo, Colo.—C. P. 590 kc., 1 KW, unlimited, DA-night.

**Tuesday, March 19**

Oral Argument Before the Commission

NEW—Air-Waves, Inc., Baton Rouge, La.—C. P. 1410 kc., 250 watts, unlimited.

NEW—Louisiana Communications, Inc., Baton Rouge, La.—C. P. 1450 kc., 250 watts, unlimited.

WBFG—Franklin Broadcasting Co., Norristown, Pa.—Renewal of license. 1280 kc. 1 KW night, 5 KW day, unlimited.

**March 18, 19, 20 and 21**

To Be Held in City Court Room, City Hall, Danbury, Conn., on March 18, 19, and 20, and City Hall Courtroom, Torrington, Conn., on March 21

NEW—The Torrington Broadcasting, Inc., Torrington, Conn.—C. P. 1490 kc., 250 watts, unlimited.

NEW—Murray L. Grossman, tr/as The Danbury Broadcasting Co., Danbury, Conn.—C. P. 1490 kc., 250 watts, unlimited.

NEW—The Berkshire Broadcasting Corp., Danbury, Conn.—C. P. 1490 kc., 250 watts, unlimited.

NEW—Frank Parker, Danbury, Conn.—C. P. 1490 kc., 300 watts, unlimited.

**March 21, 22 and 23**

To Be Held in City Commission Chambers, City Hall, Sandusky, Ohio

NEW—The Sandusky Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

NEW—Lake Erie Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

NEW—The Bay Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

**Thursday, March 21**

**Friday, March 22**

Consolidated Hearing

Before Commissioner Wakefield

To Be Held in City Commission Chambers, City Hall, Danbury, Conn.

NEW—The Berkshire Broadcasting Corp., Danbury, Conn.—C. P. 1490 kc., 250 watts, unlimited.

NEW—Lake Erie Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

NEW—The Bay Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

NEW—Sandusky Broadcasting Co., Sandusky, Ohio—C. P. 1450 kc., 250 watts, unlimited.

APPLICATIONS GRANTED

KTOK—O. L. Taylor (assignor), KTOK, Inc. (assignee), Oklahoma City, Okla.—Granted consent to voluntary assignment of license of station KTOK from O. L. Taylor to KTOK, Inc., a newly formed corporation whose outstanding capital stock will be owned 100 percent by assignor, O. L. Taylor (B3-AL-1515).

Rahall Broadcasting Co., Inc., Norristown, Pa.—Granted application for construction permit for a new station to operate on 1110 kc., 500 watts, daytime, on condition that permittee accept interference condition which may result if application (B2-P-1170) of The Bethlehem Globe Publishing Co., is subsequently granted.

Douglas L. Craddock, Leakesville, N. C.—Granted construction permit for a new station to operate on 1490 kc., 100 watts, unlimited time. (B5-P-1465)

Fox Broadcasting Co., Alexandria, La.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time. (B5-P-1473)

Andalusia Broadcasting Co., Inc., Andalusia, Ala.—Granted construction permit for a new station to operate on 1310 kc., 250 watts, unlimited time. (B5-P-1416)

The Independent School Dist. of The City of El Paso, Texas, El Paso, Texas—Granted construction permit for a new noncommercial educational broadcast station; frequencies to be assigned by the Commission's Chief

(Continued on next page)
Engineer; power 2.15 KW, subject to approval of transmitter, frequency and modulation monitors and antenna; 1490 kc., 250 watts, unlimited time. (B5-P-4248)
at 2.2 mi. north of Hunt County Courthouse on W. side of Highway 34, Greenville, and to specify studio location at Suite 444, Graham Fagg Bldg., Greenville. The permittee is granted a waiver of Sec. 3.50 of the Commission's rules; conditions. (B3-MP-1845)

WCAX Broadcasting Corp., Burlington, Vt.—Adopted order granting request that WCAX Broadcasting Corp. be relieved of the requirement that it file proposed findings in the proceeding on April 20, 1945, without affecting its right to except to findings filed by other parties and to participate in any oral argument or other further proceedings which may be directed.

KNOW—Frontier Broadcasting Co., Austin, Texas; WACO

W9XZN—Zenith Radio Corp., Chicago, Ill.—Granted authority to delete all records relative to authorization for a new developmental broadcast station granted Sept. 27, '45, cancel authorization and delete call letters.

Arkansas-Oklahoma Broadcasting Corp., Ft. Smith, Ark.; Donald W. Reynolds, Ft. Smith, Ark.—Ordered that the record in this proceeding be reopened, and that a further hearing be held on the following issue: "To obtain full information to determine whether Donald W. Reynolds or any newspaper owned or controlled by him was engaged in practices designed to substantially lessen competition and tending to create a monopoly in the newspaper advertising business in the City of Ft. Smith; and to determine what hearing information may have on the qualifications of Donald W. Reynolds to be the licensee of a radio broadcasting station." (Action taken 3/7)

Richard T. Sampson, Oceanside, Calif.—Upon consideration of petition of Richard T. Sampson to amend application for CP, it was ordered the petition be considered as a petition for dismissal without prejudice, pursuant to the Commission's January 5, 1946, Public Notice, and the Commission dismissed application (B5-P-4442) without prejudice to the right of applicant to request reinstatement upon the filing of a proper petition, accompanied by the amendment necessary to complete the application. (Action taken 3/6)

Everett L. Dillard, tt, Commercial Radio Eqpt. Co., Washington, D. C.—Granted leave to amend application for an FM construction permit, so as to specify new transmitter site, etc., and the amendment was accepted.

Theodore D. Cramer, Washington, D. C.—Granted leave for leave to amend his application for an FM construction permit, so as to add to the application an engineering affidavit which incorporates into the application by reference, except as to requested frequency, the engineering study accompanying the application of Potomac Broadcasting Cooperative, Inc. (Docket 7108), and the amendment was accepted.

Diamond State Broadcasting Corp., Dover, Del.—Ordered that the motion filed by Diamond State Broadcast Corp. for continuance of hearing on its application (Docket 7012) be considered as a petition for dismissal without prejudice, pursuant to the Commission's January 5, 1946, Public Notice; and the application (B3-P-4217) was dismissed without prejudice to the right of applicant to request reinstatement upon the filing of a proper petition, accompanied by such amendments as mayovant desire to file.

Nevada Radio and Television Co., Reno, Nev.—Granted motion for dismissal without prejudice of its application for CP, and the application (B5-P-3832) for a new station was dismissed without prejudice, subject to the right of petitioner to request reinstatement of his application pursuant to the Commission's January 5, 1946, Public Notice.

Ventura Broadcasters, Inc., Ventura, Calif.—Granted petition for leave to take depositions in re petitioner's application (B5-P-3867) and the application of Coast Wireless, Inc. (B3-P-3757)

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.; The Capitol Broadcasting Co., Annapolis, Md.—Granted motion of WCBM for a 30-day continuance of hearing in re their applications (Docket 7157, and the application was continued to March 11, and the hearing was continued to May 13.

WCAE, Inc., Pittsburgh, Pa.—Granted petition for waiver of Sec. 1.384 of the Commission's rules, and accepted petitioner's written appearance late, in re application (Docket 7282).

Columbia Broadcasting System, Inc., Boston, Mass.—Granted motion requesting leave to amend its application for a new FM station, so as to show revised information as to officers, etc., and the amendment was accepted.

The Associated Broadcasters, Inc., San Francisco, Calif.—Granted motion for waiver of Sec. 1.384 of the Commission's Rules, and accepted late the written appearance of movant.

Booth Radio Stations, Inc., Grand Rapids, Mich.—Granted petition (1) for leave to amend application (Docket 6755) so as to specify new transmitter site, etc.; (2) to reopen the record in this matter, and (3) scheduled a further hearing for April 15, for the purpose only of adducing testimony as to applicant's new transmitter site and the new engineering data as shown in amendment which was accepted.

Midwest Broadcasting Co., Milwaukee, Wis.—Granted petition for leave to amend its application for a new station (Docket 6755), so as to show substitution of R. C. Borchert as stockholder and director of applicant corporation in place of Herbert S. Uihlein, etc., and the amendment was accepted.

Harold H. Thoms, Durham, N. C.—Granted motion for extension of time in which to file exceptions and request oral argument in re his application (Docket 6938); and the time within which exceptions may be filed and oral argument requested was extended to April 15.

Richard T. Sampson, Oceanside, Calif.—Upon consideration of a petition of Richard T. Sampson to amend his application, the Commission ordered that this petition be considered as a petition for dismissal without prejudice of application (B5-P-4442), pursuant to the Commission's January 5, 1946, Public Notice; and the application was dismissed without prejudice to the right of applicant to request reinstatement upon the filing of a proper petition, accompanied by the amendment necessary to complete the application.

KPLC—Calcasieu Broadcasting Co., Lake Charles, La.—Granted petition requesting permission for Vance Pocha, an attorney of the Bar of the State of La., to appear specially on behalf of petitioner in the deposition proceeding to be held in Lake Charles on March 11.

KNOW—Frontier Broadcasting Co., Inc., Austin, Texas; Thomas G. Harris, Austin, Texas; Charles W. Balthrop, San Antonio, Texas—Adopted an order designating for hearing application (B3-P-1042) of KNOW to change frequency from 1960 to 1210 kc., increase power from 250 watts to 1 KW, 5 KW-LS, install DA for night use, unless consistent with applications of Thomas G. Harris (B3-P-4555), Charles W. Balthrop (B3-P-4575) and Express Publishing Co. (B3-P-4471), requesting the same facilities in San Antonio, and that the Bills of Particulars previously issued be amended to include application of KNOW.

Ogden Broadcasting Co., Inc., Ogden, Utah—Adopted order granting petition of Ogden Broadcasting Co., Inc., requesting that its application (B5-P-4555) for a new station was dismissed without prejudice, subject to the right of petitioner to request reinstatement of his application pursuant to the Commission's January 5, 1946, Public Notice.

(Continued on next page)
station to operate on 1490 kc., 250 watts unlimited time, be designated for hearing in a consolidated proceeding with applications of United Broadcasting Co., Ogden; Telegram Publishing Co., Salt Lake City; and James B. Littlejohn, Ogden, all requesting 1490 kc., 250 watts, unlimited time; further ordered the application of Ogden Broadcasting Co. designated in a consolidated proceeding with above applications, and that the Bills of Particulars heretofore issued in these proceedings be amended to include the application of Ogden Broadcasting Co., Inc.

Caprock Broadcasting Co., Lubbock, Texas; KVGB—KVGB, Inc., Great Bend, Kansas—Adopted an order designating for hearing the application (B3-P-4480) of Caprock Broadcasting Co. in a consolidated proceeding with the application of KVGB (B4-P-4439), Great Bend, Kansas, to increase power from 250 watts to 1 kw, and change frequency from 1400 to 1590 kc.

Redege Broadcasting Co., A Partnership, Hendersonville, N. C.; Radio Asheville Co., Inc., Asheville, N. C.—Adopted order granting petition of Redege Broadcasting Co. requesting that its application (B3-P-4532), 1450 kc., 250 watts, unlimited time, be designated for hearing in consolidation with application of Radio Asheville, Inc., requesting the same facilities (B3-P-1407) ; and further ordered these applications designated in a consolidated proceeding.

United Broadcasting Co., Inc., Silver Spring, Md.; The Tower Realty Co., Baltimore, Md.—Adopted orders designating for hearing in a consolidated proceeding the application of United Broadcasting Co., Inc. (B1-P-1030) 690 kc., 1 kw, limited time, with application (151-P-1460) of The Tower Realty Co. 650 kc., 5 kw, unlimited time: and granted petition of WTPF that they be made a party to this proceeding.

WJR. The Goodwill Stations, Inc., Detroit, Mich.—Granted petition to dismiss without prejudice its application (Docket 7290) for a new television station.

The WBTB Broadcasting Co., Cleveland, Ohio—Granted petition to dismiss without prejudice its application (Docket 7297) for a commercial television station.

Telegraph Publishing Co., Salt Lake City, Utah—Granted petition for leave to amend its application (Docket 7657) so as to specify frequency 1250 instead of 1490 kc.; change exhibits, etc. The amendment was accepted and application removed from hearing docket.

The Yankee Network, Inc., Providence, R. I.—Granted motion to dismiss without prejudice its application (Docket 7504) for a new television station.

WADC—Ashbacker Radio Corp., Solon, Ohio; The WGBR Broadcasting Co., Cleveland, Ohio.—Granted motion to continue hearing now scheduled for March 25 to April 24, 1946. (Dockets 7520 and 7519)

Fetzer Broadcasting Co., Grand Rapids, Mich.—Granted motion to take depositions in re its application for a new station (Docket 7587) ; exceptions noted by Ashbacher Radio Corp.

WSAY—Brown Radio Service and Lab. (Gordon P. Brown, Owner), Rochester, N. Y.—Dismissed petition of WSAY for leave to intervene in the hearing on application of WHEC, Inc. (Docket 9418). This petition was rendered moot by Commission's action on March 6 in granting WHEC's application, subject to condition they shall make satisfactory adjustment of any adverse effect on WSAY antenna system.

The Berkshire Broadcasting Corp., Springfield, Mass.—Granted petition for leave to amend its application (Docket 6957) for a new station, so as to show changes in stock distribution; changes in transmitter site, etc.

WBIC—Indiana Broadcast Co., Indianapolis, Ind.—Adopted an order granting petition of WBIC that its application (B1-P-2388) for CP to increase power from 5 to 50 kw, be designated for hearing in a consolidated proceeding with applications of Mid-America Broadcasting Corp., & Ky. Broadcasting Corp., Inc., WINN, both requesting frequency 1080 kc., with 1 kw at Louisville: further ordered that application of WBIC be designated for hearing in a consolidated proceeding with the above applications, and that the Bills of Particulars heretofore issued in these proceedings be amended to include application of WHEC.

WETH—Associated Broadcasters, Inc., Easton, Pa.; Easton Publishing Co., Easton, Pa.; Lewis Windmuller, Allentown, Pa.; Steel City Broadcasting Co. of Bethlehem, Inc., Allentown, Pa.—Adopted an order designating for hearing application (B2-P-4517) of WETH to change frequency from 1400 kc., 250 watts, unlimited time, in a consolidated proceeding with the applications of Easton Pub. Co., Lewis Windmuller, and Steel City Broadcasting Co. of Bethlehem, Inc., heretofore designated for hearing in consolidated proceeding; and that the Bills of Particulars heretofore issued in these proceedings be amended to include WETH's application.

Newnan Broadcasting Co., Newman, Ga.; Volunteer State Broadcasting Co., Inc., Nashville, Tenn.—Adopted an order designating for hearing application (B3-P-4487) of Newnan Broadcasting Co. for a new station to operate on 1300 kc., 1 kw, unlimited time, DA-night, in consolidation with application (B3-P-4531) of Volunteer State Broadcasting Co., Inc., Nashville, to use 1300 kc., 5 kw, unlimited time, DA-night.

KMTR—KMTR Radio Corp., Los Angeles, Cal.—Adopted an order of notice of petition of KMTR requesting that its application (B5-P-1585) to increase power from 1 to 5 kw-D and 1 kw-N, unlimited time, be made a party to this proceeding, 570 kc., be designated for hearing with six applications all requesting use of frequency 390-kc. at their respective locations; further ordered KMTR's application be designated for hearing in a consolidated proceeding with these applications, and that the Bills of Particulars heretofore issued in these proceedings be amended to include the KMTR application.

KORF—Eugene Broadcast Station, Eugene, Ore.—Granted renewal of license for the period ending Feb. 1, 1948.

KTRI—Sioux City Broadcasting Co., Sioux City, Iowa—Granted renewal of license for the period ending Feb. 1, 1948.

Paris Broadcasting Co., Paris, Tenn.; Kentucky Lake Broadcasting System, Inc., Paris, Tenn.—Adopted orders granting petition of Paris Broadcasting Co. that its application (B5-P-4526) be designated for hearing in consolidation with application of Kentucky Lake Broadcasting System, Inc. (B3-P-4528), both requesting frequency 1340 kc., 250 watts, unlimited time.

Gonzales Broadcasting Co., Gonzales, Texas; Taylor Broadcasting Co., San Antonio, Texas; Taylor Broadcasting Co. requesting that their applications (B3-P-4546 and B3-P-4567) for new stations to use frequency 1430 kc., 250 watts, unlimited time at their respective locations, be designated for hearing in the consolidated proceedings heretofore scheduled on the applications of Thomas G. Harris, trustee for Coleman Gay, et al., Austin, Texas; Chas. W. Balthrop, San Antonio, and Express Publishing Co., San Antonio, and the Commission further ordered that the Bills of Particulars heretofore issued in these proceedings be amended to include the Gonzales and Taylor applications.

Gilbert H. Kaynor and Howard W. Kaynor, co-partners, d/b as Kittitas Valley Broadcasting Station, Ellensburg, Wash.—Granted request to delete all records relative to authorization granted Nov. 28, 1945, for a new station to operate on 1100 kc., 250 watts, unlimited time, and cancelled said authorization.

WHEC—WHEC, Inc., Rochester, N. Y.—Adopted an order granting petition (Com. Durr for hearing), for reconsideration and grant of application (B1-P-3976), to increase power from 500 watts night, 1 kw, limit; 15 kv, unlimited time, and granted petition to dismiss without prejudice its application.

(Continued on next page)
subject to approval by the CAA of the proposed antenna site.

WRRF—Tar Heel Broadcasting System, Inc., Washington, D. C.—Granted construction permit to increase power from 1 to 5 KW, daytime only, on the frequency 930 kc. (B3-F-3954)

WGXY—Television Productions, Inc., Los Angeles, Cal.—Granted construction permit to change transmitter site of experimental television station from Los Angeles to Pasadena, Calif. (B5-PVB-163)

WGXL—Television Productions, Inc., Los Angeles, Cal.—Granted construction permit to change frequency of relay experimental television station from Ch. #11 and 12 to frequency that may be assigned by the Commission's Chief Engineer from time to time; add auxiliary transmitter with special emission for FM, 50 watts, and change type of visual transmitter from RL-210-1 to REL-2V. (B5-PVB-162)

ACTIONS ON MOTIONS

WCAE, Inc., Pittsburgh, Pa.—Granted petition for waiver of Sec. 1384 of the Commission's rules, and accepted petitioner's written appearance late, in re application (Docket 7202).

Columbia Broadcasting System, Inc., Boston, Mass.—Granted motion, requesting leave to amend its application for a new FM station, so as to show revised information as to officers, etc., and the amendment was accepted.

The Associated Broadcasters, Inc., San Francisco, Cal.—Granted motion for waiver of Sec. 1384 of the Commission's Rules, and accepted late the written appearance of movant.

Booth Radio Stations, Inc., Grand Rapids, Mich.—Granted petition (1) for leave to amend application (Docket 6857) for new station, so as to specify new transmitter site, etc.; (2) to reopen the record in this matter, and (3) scheduled a further hearing for April 16, for the purpose only of adding testimony as to applicant's new transmitter site and the new engineering data as shown in amendments which was accepted.

Midwest Broadcasting Co., Milwaukee, Wis.—Granted petition for leave to amend its application for a new station (Docket 6795), so as to show substitution of R. C. Borchert as stockholder and director of applicant corporation in place of Herbert S. Uhlein, etc., and the amendment was accepted.

Harold H. Thoms, Durham, N. C.—Granted motion for extension of time in which to file exceptions and request oral argument in re his application (Docket 6828); and the time within which exceptions may be filed and oral argument requested was extended to April 15.

Ventura Broadcasters, Inc., Ventura, Cal.—Granted petition for leave to take depositions in re petitioner's application (B5-P-3825) and the application of Coast Ventura, Inc. (B5-P-3725)

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.; The Capital Broadcasting Co., Annapolis, Md.—Granted motion of WCBM for a 30-day continuance of hearing in re their applications (Docket 7572 and 7571), and the hearing was continued to April 17.

Diamond State Broadcastr Co., Dover, Del.—Ordered that the motion filed by Diamond State Broadcast Corp. for continuance of hearing on its application (Docket 7012), be considered as a petition for dismissal without prejudice, pursuant to the Commission's January 5, 1946, Public Notice; and the application (B3-P-4217) was dismissed without prejudice to the right of applicant to request reinstatement upon the filing of a proper petition, accompanied by such amendments as movant may desire to file.

Nevada Radio and Television Co., Reno, Nev.—Granted motion for dismissal without prejudice of its application for CP, and the application (B5-P-3832) for a new station was dismissed without prejudice, subject to the right of petitioner to request reinstatement of its application pursuant to the Commission's January 5, 1946 Public Notice.

Richard T. Sampson, Oceanside, Cal.—Upon consideration of a petition of Richard T. Sampson to amend his application, the Commission ordered that this petition be considered as a petition for dismissal without prejudice of application (B5-P-4442), pursuant to the Commission's January 5, 1946 Public Notice; and the application was dismissed without prejudice to the right of applicant to request reinstatement upon the filing of a proper petition, accompanied by the amendment necessary to complete the application.

KPLC—Calcasieu Broadcasting Co., Lake Charles, La.—Granted petition requesting permission for Vance Plauche, an attorney of the Bar of the State of La., to appear specially on behalf of petitioner in the deposition proceeding to be held in Lake Charles on March 11.

WJR—The Goodwill Stations, Inc., Detroit, Mich.—Granted petition to dismiss without prejudice its application (Docket 7280) for a new television station.

The WGAR Broadcasting Co., Cleveland, Ohio—Granted petition to dismiss without prejudice its application (Docket 7297) for a commercial television station.

Telegram Publishing Co., Salt Lake City, Utah—Granted petition for leave to amend its application (Docket 7675) so as to specify new frequency instead of 1390 kc.; change exhibits, etc. The amendment was accepted and application removed from hearing docket.

The Yankee Network, Inc., Providence, R. I.—Granted motion to dismiss without prejudice its application (Docket 7304) for a new television station.

WADC—Allen T. Simmons, Tallmadge, Ohio; The WGAR Broadcasting Co., Cleveland, Ohio—Granted motion to continue hearing now scheduled for March 25 to April 24, 1946. (Dockets 7320 and 7318)

Fetzor Broadcasting Co., Grand Rapids, Mich.—Granted motion to take depositions in re its application for a new station (Docket 7587); exceptions noted by Ashbacher Radio Corp.

WSAY—Brown Radio Service and Lab. (Gordon P. Brown, owner), Rochester, N. Y.—Dismissed petition of WSAF for leave to intervene in the hearing on application of WHEC, Inc. (Docket 9048). This petition was rendered moot by Commission's action on March 6 in granting WHEC's application, subject to condition they shall make satisfactory adjustment of any adverse effect on WSAY antenna system.

The Berkshire Broadcasting Corp., Dubuury, Conn.—Granted petition for leave to amend its application (Docket 6857) for a new station, so as to show changes in stock distribution; changes in transmitter site, etc.

NEW—Grass Valley-Nevada City Broadcasters, Inc., Grass Valley, Calif.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

Federal Trade Commission
Docket

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm, to which it has been given an opportunity to show why cease and desist orders should not be issued against it.

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Pemco Corp., et al.—Five manufacturers of porcelain enamel in its raw state, known to the trade as "frit," have been ordered to cease and desist from engaging in or continuing a conspiracy pursuant to which they have fixed prices and employed other restraint-of-trade practices in violation of the Federal Trade Commission Act.

Pricing practices of the manufacturers which were found by the Commission to be discriminatory as between different purchasers of frit, and in violation of the Robinson-Patman Act, also are prohibited by the order.

Manufacturers named in the order, and who were found to produce approximately 96 percent of all the commercial frit manufactured in the United States, are Ferro Enamel Corp., Cleveland; Pemco Corp., Baltimore; The O. Hommel Co., Carnegie, Pa.; Chicago Vitreous Enamel Product Co., Cicero, Ill.; and Ingram-Richardson Mfg. Co. of Indiana, Frankfort, Ind. The order also is directed against the business management firm of Steveson, Jordan & Harrison, Inc., 10 West 44th Street, New York, and its director, Harry L. Moody, who were found to have participated in the manufacturers' price-fixing combination. Moody and the firm specialize in the management of trade associations. (5155)
BROADCASTERS OF TWO NAB DISTRICTS
CHALLENGE FCC REPORT

The first two NAB district meetings held since issuance by the FCC of its report on "Public Service Responsibility of Broadcast Licensees" brought forth unanimous protests against the report from the forty-four member stations represented.

At the 11th district meeting in Minneapolis sixty-five broadcasters, representing twenty-three stations in Minnesota, North Dakota, South Dakota, Northern Wisconsin and part of Michigan unanimously adopted a resolution challenging the Commission's assertion of authority in this respect.

In Grand Rapids, with twenty-one of twenty-four member stations represented, broadcasters of the eighth district unanimously adopted a resolution calling upon Congress to clarify the FCC law to definitely determine the Commission's powers respecting programs.

The 11th district resolution, prepared by a committee headed by Barney Lavin, WDAY, and including Ken Hancc, KSTP, and Robert Fincher, WNAX, followed a three hour discussion in an open session. The resolution follows.

"WHEREAS, The Federal Communications Commission has promulgated a report entitled, "Public Service Responsibility of Broadcast Licensees" in which it asserts the right to exercise through its licensing power a large measure of control over program policies and program content of each individual licensee which amounts to an assumption of the right of censorship by the said FCC and is contrary to both the letter and the spirit of the Federal Communications Act, and,

"WHEREAS, The Congress in legislating to regulate radio broadcasting clearly and expressly provided that it should operate as an institution of free enterprise and that there should be no censorship of the contents of programs, and,

"WHEREAS, The American system of broadcasting in the quarter century of its operation has brought to the listening audience a program service unequalled in quality, variety and general informative and educational value and uniformly acceptable to the vast majority of listeners, and

"WHEREAS, The industry has instituted standards of self-regulation and control designed to improve the quality and bring about more balanced program schedules and such voluntary plan of self-regulation, subjected to continuing scrutiny and supervision is consistent with our national ideals and traditions, and

"WHEREAS, Radio broadcasting is one of the greatest mediums of mass communication yet devised and under the plan of free enterprise has consistently been used as a medium for the free expression of divergent views on all kinds of issues and to further freedom of speech and expression, now therefore

"BE IT RESOLVED, by the broadcasters of the 11th NAB District, comprising licensees in the states of Minnesota, North Dakota, South Dakota, Northern Wisconsin and part of Michigan, in session assembled this 19th day of March, 1946, that we challenge this assertion of authority and view it as a step in the direction of complete Government control and domination of radio and an invasion of the rights of freedom of speech and,

"BE IT FURTHER RESOLVED, That we challenge the National Association of Broadcasters to take every action necessary to bring about the retraction of this policy or a judicial or congressional definition of the powers of the FCC which will prevent any control of programs, and

"BE IT FURTHER RESOLVED, That we call upon the American people in free and untrammeled radio."

In the absence of Ed Hayek, 11th District Director, who was confined to his home by illness, A. E. Josceyn, WCCO, took charge of arrangements and presided over all sessions.

Justin Miller, President, C. E. Arney, Jr., Secretary-Treasurer, and Frank Pellegrin, Director of Broadcast Advertising, represented NAB.

Hugh Feltis, BMB president, aided by Linnea Nelson, speaking for the agencies and Robert Elrick for the advertisers, reported on the progress of BMB. Another resolution dealt with this subject. It follows:

"WHEREAS, The broadcasting industry through the National Association of Broadcasters joined with advertisers through the Association of National Advertisers and other agencies through the American Association of Advertising Agencies in developing a standard method of measuring station coverage, and

"WHEREAS, Broadcast Measurement Bureau in carrying out this standard method will perform an indispensable

(Continued on next page)
and constructive service to radio as an advertising medium and enable it to better operate in the public interest, now therefore

"BE IT RESOLVED by the broadcasters of the 11th NAB District in session assembled this 19th day of March, 1946, that we heartily commend the activity and progress of BMB; extend a vote of appreciation to its Directors and officers, and strongly urge all stations not now subscribing to EMB to do so in order that complete industry statistics may be available, and

"BE IT FURTHER RESOLVED that we extend a vote of thanks to Linnea Nelson, Bob Elrick and Hugh Feltis for the splendid contribution which they made to the program of this meeting."

[Editor's Note: The 8th District meeting also adopted resolutions endorsing BMB as well as BMI. Details were not available as REPORTS went to press, but next week's issue will carry complete coverage.]

Those who registered for the meeting were: Frank E. Chizzimi, Chicago, Ill., ABC; Paul Clark, Chicago, Ill., RCA; James H. Connolly, Chicago, Ill., ABC; Robert F. Elrick, Chicago, Ill., IBM; Tom Farrell, Chicago, Ill., Radio Market Guide; Gus Hagenah, Chicago, Ill., Standard Radio; Ralph Hatcher, Chicago, Ill., CBS; Scotty Keck, Chicago, Ill., NBC; James Mahoney, Chicago, Ill., MBS; Fred Sample, Chicago, Ill., Broadcasting; J. NATIONWIDE DAYLIGHT SAVING TIME FOR THIS SUMMER PROPOSED IN CONGRESS

A bill to provide national daylight saving time from April to October this year was introduced in the House of Representatives Thursday (21) by Congressman James G. Fulton of Pennsylvania. It was referred immediately to the Committee on Interstate and Foreign Commerce.

In a brief speech before the House, Congressman Fulton referred to the proposed bill (H. R. 5843) as a means "to assist in preventing starvation abroad and increase domestic garden food production by giving an extra hour to continue the victory-garden program."

Mentioning that he had spent several months in Europe last year, Mr. Fulton said that since the United States abandoned daylight-saving time last fall "a lot has happened, and a greater realization has come to the country concerning the terrible conditions and starvation abroad."

"This extra hour each day will provide extra food and save urgently needed coal for assisting our good allies and those in need the coming winter," Representative Fulton added.

The proposed bill would provide for advancement of clocks one hour on the last Sunday in April (28) and return to standard time the last Sunday in October (27). This measure applies only to the current year.

ROSEL HYDE NEW FCC COMMISSIONER

President Truman on Thursday (21) announced that Rosel H. Hyde, general counsel for the Federal Communications Commission, has been appointed to membership on the Commission. He fills the vacancy created by the recent death of William H. Wills.

The President said that Commissioner Charles E. Denny will continue as Acting Chairman.

Mr. Hyde has had 18 years of experience with the Commission and its predecessor, the Federal Radio Commission, to which he came in 1928 soon after its establishment. From November 1932 to September 1940 he was chief of the Docket Section and reorganized docket procedures into the system still in use by the FCC.

By 1932, Mr. Hyde was an examiner in the law Department and in 1934, when the Federal Communications Commission was organized, was transferred to the new Commission as an attorney-examiner and assigned to hear both common carrier and broadcast matters.

During his years at the Commission, Mr. Hyde has taken a leading role in all studies undertaken by the Commission in the development of its rules and regulations and particularly in handling of individual applications covering all broadcast services. He played an active part in the first general radio allocation hearings of 1928, was chairman of the Staff Committee making recommendations to Congress in 1933 on allocation of radio facilities to non-profit organizations, handled much of the network investigation, clear-channel and super-power radio station studies.

In October 1942, Mr. Hyde became assistant general counsel in charge of broadcast matters. He became general counsel in April, 1945.

Mr. Hyde was born in 1900 on a farm near Downey, Idaho, the site of an original homestead claim staked out by his father, attended high school in Salt Lake City, Utah, and later studied at the Utah Agricultural College.

At the age of 24, he was manager of the state bank in Downey. In 1924, having qualified for a clerkship in a
competitive Civil Service examination, he left Idaho for Washington and a job with the Civil Service Commission. The following year, he transferred to the Office of Public Buildings and Public Parks. During 1924, Mr. Hyde studied accounting at night and in 1925 enrolled at the George Washington University Law School at night. He was graduated from the Law School in 1929.

He is married to the former Mary Henderson of Arimo, Idaho. They have three sons, Rosel, Jr., George Richard, and William Henderson.

**FM Department**

**COMMISSION GRANTS 8 FM CP'S IN D. C.**

For frequencies, etc., see Federal Communications Commission Actions elsewhere in this issue

Setting a probable pattern for the granting of Metropolitan FM construction permits in other sections of the country, the Commission on Wednesday (20) granted 8 such permits to applicants in the District of Columbia. Three other applications were not acted upon, but were passed for further study.

A public notice released by the Commission stated that Commissioner Durr felt that not more than 6 stations in the Washington, or District of Columbia, area should be granted at this time, but the Commission having taken a different view he concurred in the issuance of an order by the Commission granting 8.

Applications which were not acted upon, but which were held for further study were those of the Mid-Coastal Broadcasting Co., Capital Broadcasting Co., and the Chesapeake Broadcasting Co., all of Washington. Commissioners Jett and Denny voted for a grant of the application of the Capital Broadcasting Co.

Present at the hearing were Commissioners Denny, Acting Chairman; Wakefield, Durr and Jett.

**362 CONDITIONAL FM GRANTS NOW**

The Commission en banc on Wednesday (20) granted 10 additional FM stations, bringing the total to 362 conditional grants to date. At the same time 7 applications were designated for hearing making a total of 129 applications now in hearing status.

Following are the grants made:

**DESIGNATED FOR HEARING**

Moraine Broadcasters, Inc. Dayton, Ohio. Adopted an order designating for hearing in a consolidated proceeding with applications of the Crosley Dayton Corp. et al, (Dockets 7235-7239 incl. and 7409); and further ordered that the order heretofore issued in the consolidated proceedings be amended to include the application of Moraine Broadcasters, Inc.

Adopted an order designating for hearing in a consolidated proceeding, the applications of The Yankee Network Inc., The Traveler's Broadcasting Service Corp., Harry F. Guggenheim and Harold Thomas, all for stations in Bridgeport, Conn., and applications of Danbury News-Times Co., Danbury, Conn., and The Western Conn. Broadcasting Co., Stamford, Conn.

**PETITION DENIED**

Miami Valley Broadcasting Corp. Dayton, Ohio. Denied petition requesting that its application for FM metropolitan station be removed from the hearing docket and granted without hearing.
STATIONS TO RECEIVE NEW WAGE-HOUR MANUAL

The NAB Employer-Employee Relations Department is currently preparing a new Manual, for station use, concerning the "Fair Labor Standards Act," usually known as the Wage and Hour Act. Distribution is planned for later this week.

This new publication will be a comprehensive and up-to-date guide for broadcasters in applying the act to radio operations.

NEW MEXICO TAX CASE DISMISSED WITHOUT PREJUDICE

The U. S. District Court, District of New Mexico, has dismissed without prejudice to "the institutions of actions in the courts of the state," the several actions brought by New Mexico radio stations which sought to have set aside a New Mexico act which imposes a license and privilege tax upon radio stations.

Citing the Johnson Act, which bars Federal Courts from entertaining any suit enjoining a state from the collection of its taxes, the Court, in rendering its opinion, held that the radio stations were engaged in interstate commerce, a contention vigorously contested by the State's attorney. The Court did not, however, render an opinion as to the validity of the tax, but dismissed the actions under the provisions of the Johnson Act without prejudice to the rights of the stations to bring suit in the New Mexico state courts.

STEWART CHAIRMAN OF NAB NEW YORK NEWS CLINIC

Elliott Stewart, executive vice president of station WIBX, Utica, has been named general chairman of the NAB Radio News Clinic to be held in Utica for New York broadcasters on Wednesday, April 10.

NAVY ANNOUNCES BATTLE USES OF TELEVISION

The Navy revealed Thursday (21) that television already has an extensive and successful battle record, and demonstrated at the Naval Air Station, Anacostia, D. C., how it has been used.

Those present at Anacostia were able to see panoramic views of the vicinity of Washington, Baltimore and Annapolis, Md., as television-equipped Navy planes flew over those three areas and transmitted to receivers at the Naval Air Station.

Airborne television is militarily useful both for extending the range of vision beyond the horizon and for guiding missiles into enemy targets. The first time the latter use was employed in battle, two Japanese ships were sunk off Bougainville.

"The military television developments," the Navy Department announced, "were the result of joint efforts of ... the Navy Department and the Research and Development Laboratory of the Radio Corporation of America in conjunction with the National Broadcasting Company."

Brigadier General David Sarnoff, President of RCA, predicted vast industrial applications for airborne television.

In discussing the past and future uses, Rear Admiral Leslie C. Stevens, Assistant Chief of the Navy's Bureau of Aeronautics, announced that "Television equipment will see considerable use in the Project Crossroads test of the atomic bomb. As can well be imagined, television will report in detail close-in pictures of the explosion and data which human observers could not have access to."

Admiral Stevens explained that the Navy's first successful airborne television flights were made in 1941 and television's capabilities in controlling pilotless aircraft were demonstrated successfully in 1942.

The military equipment is divided into two classifications, "Ring" and "Bloc" television. "Ring" television is so named because it uses a special radio-electronic camera that can be moved with the freedom of an ordinary newsreel camera. It is the most powerful of airborne equipment having a range of over two hundred miles when broadcasting at an altitude of 15,000 feet. It is carried in a Martin JM-1 airplane, powered with Wright engines which maintain an average cruising speed of 200 miles an hour. Two cameras are carried, one in the nose bombardier nacelle and one in the waist of the fuselage.

The use of "Ring" television heralds a new era of combat reconnaissance because it can flash battle actions back to central headquarters, where commanding officers previously have been forced to rely upon verbal reports to determine the course of action to be taken. An entire beachhead, for example, could be relayed by television to show the actual scene of battle to the officers controlling the attack strategy.

"Bloc" television is a lighter short-range type of equipment. The camera is fixed in the nose of a Beechcraft

(Continued on next page)
JRB airplane. The image is transmitted from 15 to 20 miles and the equipment would be used in advanced field operations. The panning effect with “Bloc” equipment is accomplished by the pilot moving the controls of the aircraft so that the television camera screens the desired target.

In its early stage of development “Bloc” was used by Special Task Air Group One, during the attacks on Bougainville and Rabaul. The targets there were successfully accomplished by the pilot moving the controls of the aircraft so that the television camera screens the desired target.

Two Japanese vessels were sunk off Bougainville and Rabaul. The targets there were successfully accomplished by the pilot moving the controls of the aircraft so that the television camera screens the desired target.

Broadcast Engineers Meeting in Columbus

The Sixth Broadcast Engineering Conference has been in session during this entire week on the campus of Ohio State University. The final session closing the conference will be held early Saturday afternoon, March 23.

As in previous years, the conferences have been under the direction of Dr. W. L. Everitt, Head of the Department of Electrical Engineering of the University of Illinois, assisted by the Associate Director, Professor E. M. Boone of Ohio State University, Department of Electrical Engineering. The conference this year was sponsored jointly by the two state universities, the Institute of Radio Engineers and the National Association of Broadcasters. It is estimated that total attendance at the conference will exceed 400 of the nation’s top-notch broadcast engineering executives.

Technical sessions are conducted daily from 9:00 a.m. until 4:30 p.m. and have been well attended throughout the week. The auditorium of Campbell Hall has been filled nearly to capacity at most sessions.

A. B. Chamberlain, CBS Chief Engineer, opened the conference Monday morning with his paper entitled “Contributions of War Developments to Broadcasting.” An outstanding development applicable to the new color television was described by Chamberlain as “improved UHF high gain, broad band, horizontally polarized omnidirectional or directional antennas, the result of wartime radar and counter measure systems development and large scale production and use which may accomplish when unlimited financing and stark necessity exists. Great strides have been made in electronics during the last five years—ten or more years work at the prewar rate of work have been compressed in a few years.”

As in previous years, there was great interest in the “Round Table and Question Box” held on Thursday, March 21. This is the meeting at which engineers of the FCC and the industry get together for discussion of common problems. The Round Table Meeting was presided over by Howard S. Frazier, NAB Acting Director of Engineering. Others seated on the stage were John Willoughby, FCC Assistant Chief Engineer in Charge of Broadcasting, Edward A. Allen, Jr., Assistant Chief, FCC Division of Technical Information, Daniel Gellerup of WTMG and R. Morris Pierce of WGR, Cleveland.

The NAB Engineering Committee met on Wednesday evening, March 20, in the Fort Hayes Hotel with attendance of about 35 members and guests. NAB Executive Engineering Committee Chairman G. Porter Houston presided. Minutes of the meeting will be distributed to those in attendance and to the absentee members of the committee.

At the suggestion of Karl Hoffman, Chief Engineer of the Buffalo Broadcasting Corporation, a meeting was held for the purpose of discussing Mr. Hoffman’s proposal to organize a society of broadcast engineering executives. This meeting was well attended and resulted in the appointment of a small committee to further explore the proposal. The committee adopted as a suggested name “The Society of Executive Broadcast Engineers.” There was a unanimity of those present that such an organization can do much to improve the professional standards of engineering administration in the broadcast field. It was suggested that the purpose of this society could be partially expressed in the following declaration which was adopted, “A Society for the furtherance of ethical and professional standards of executive broadcast engineers.” Mr. James Schultz, Chief Engineer of WCAE, Pittsburgh, was elected chairman of the temporary committee.

FCC Amends 3.25 to Conform to NARBA Provision

The Federal Communications Commission (by a Board composed of Acting Chairman Denny and Commissioners Durr and Wakefield) has amended Section 3.25(c) of its Rules so as to conform that subsection to the North American Regional Broadcasting Agreement.

The subsection as amended reads as follows, with amended portion in italics:

“Section 3.25 . . .

(c) For Class II stations which will not deliver over 5 microvolts per meter ground wave or 25 microvolts (Continued on next page)
OPA MOVES TO EASE TUBE SITUATION

Radio tube manufacturers now may sell on an adjustable pricing basis until increased ceiling prices for radio tubes become effective, the Office of Price Administration has announced.

The adjustable pricing provision allows manufacturers of radio tubes to make an agreement with buyers for the delivery of the tubes at prices to be adjusted upward after OPA issues an action increasing the ceiling prices of radio tubes.

The action will allow a manufacturers' price increase of 15.5 per cent over the present ceiling prices for radio receiving tubes sold as original equipment to radio set producers. It also will allow a manufacturers' increase of 20 per cent over the October 1, 1941, prices for radio receiving tubes when sold to wholesalers and retailers.

Furthermore, these price increases may be applied to special purpose tubes of a type similar to radio receiving tubes. Such tubes generally are used in the production of public address systems, amplifiers, hearing aids, etc.

This advance announcement of price increases is made so that radio tube manufacturers will know immediately how much increase they are to be allowed, OPA said.

The increased manufacturers' prices will not increase the retail price of radio tubes because wholesalers and retailers will be required to absorb the manufacturers' increase. No decision has been made regarding the effect the retail price of radio tubes because wholesalers and retailers will be required to absorb the manufacturers' increase.

The increased manufacturers' prices were based on a recent survey of the industry and they meet the provisions of the Government's new wage-price policy. They include increases in basic wage rates and material costs since October 1, 1941.

Several months ago, a manufacturers' price increase of 10.4 per cent over the October 1, 1941, prices was granted on sales of radio receiving tubes when sold as original equipment for the production of radio sets. Coupled with the new increase of 15.5 per cent, manufacturers will receive a total increase of 27.5 per cent over their October 1, 1941, prices on such sales.

Under the new action distributors and retailers will be required to share in absorbing the manufacturers' price increases. As a result, wholesalers' margins will be reduced from 37.5 per cent to 28.6 per cent. Retailers' mark-ups will be reduced from 40 per cent to 37 per cent.

NEWSPAPERS INCREASE RADIO COLUMN SPACE

A significant trend to more intelligent use of radio space in newspapers as illustrated by a more than 100 per cent increase in the number of daily newspapers using radio columns in addition to listing services in 1945, was shown in the annual daily newspaper survey conducted by the NBC Central Division Press Department.

Results of the survey of over 750 newspapers in the 22 states served by the Central Division Press Department, were compiled by Jack Ryan, manager of the department.

Figures for 1945 showed that 111 newspapers are now using radio columns in addition to program listings and highlights, as compared to 47 newspapers in this category in 1944. Thirteen newspapers added radio columns for the first time, while five increased column space. Only one newspaper which had previously used all services, dropped its radio column.

There also was a substantial increase in the number of newspapers using radio pictures as well as other services. Seven newspapers allotted space for pictures for the first time, and five increased picture space.

Most of the new publications in this field are newspapers which previously had printed listings and highlights only, thus proving the contention that use of radio space tends to become more intelligent once a newspaper has been convinced of the basic value of using radio information, Ryan said.

Among those newspapers which in 1945 added daily radio columns to their pages as well as other radio services were the Chicago Sun, the Detroit News, and the Indianapolis Star.

INTERNATIONAL SHORTWAVE NET TO COVER UNO MEET

The International Broadcasting Division of the State Department has established an exclusive shortwave network for the coverage of the United Nations Organization Security Council, which meets March 25th at Hunter College in New York City.

The plan for overseas coverage which will involve approximately forty members of the International Broadcasting Division consists of two types of programming:

First will be the actual coverage of the Security Council meetings in their entirety. An exclusive network has been set up for this purpose with a running translation and description in French and English broadcast by "Voice of America" announcers: David Penn (English) and Fernand Auberjonois (French). The announcers will keep their coverage within the scope of straight reporting.

In addition, some eighteen different language programs with established shortwave audiences throughout the world have been designated to cover UNO. Recapitulations of the day's Security Council happenings, background and descriptive material, statements by delegates and other speakers, plus special events will be carried. The length of the portions of these programs devoted to UNO within the framework of the normal broadcast schedule will be determined by the significance of the day's events at Hunter. In other words, because of the flexibility of the Security Council meetings, these programs may on some occasions be devoted largely to UNO proceedings; on other days when news is slow, UNO reporting may be broadcast to a lesser extent.

Although the International Broadcasting Division has been programming in 25 languages approximately 64 broadcast hours a day to Europe, Latin America and the Far East, this complete coverage developed for the Security Council meetings exceeds any one plan previously attempted.

This type of complete coverage emanating from the UNO broadcasting center at Hunter College, in scope, is an unprecedented event in American radio. The set-up will

(Continued on next page)
not compete with existing radio stations or news services but the IBD personnel is prepared to cooperate and supply all domestic stations with background material and special events. IBD expects to reach the widest radio audience in the world.

The project is under the direction of John W. Ogilvie, Chief of the International Broadcasting Division, and Wilfred Roberts, Associate Chief. Actual operations will be under Werner Michel, Chief of Programming, Dorothy Van Doren, News; Hal Janis, Special Events; and J. Arthur Lazell, as UNO Coordinator for IBD.

Stations, frequencies and coverage for the exclusive network provided by the International Broadcasting Division of the State Department to be used for the Security Council broadcasts effective March 25th:

W.N.R.I.
13050 kilocycles—22.97 meters available 5:45 a. m. to 6:00 p. m. 9750 kilocycles—3077 meters—available 6:15 p. m.—conclusion (45 degree antenna; greatest strength, Berlin; good reception, Germany, low countries, France, Italy, Balkans, North Africa).

W.O.O.C.
15200 kilocycles—19.74 meters—available 5:45 a. m.—4:45 p. m. 9650 kilocycles—5.09 meters available 5:00 a.m. to 7:00 p.m. 6120 kilocycles—49.03 meters available 7:15 p.m.—conclusion (52 degree antenna; greatest strength Paris; good reception, France, London, Germany, North Italy, Balkans, etc.).

W.N.R.X.
(14560 kilocycles—20.60 meters—(available 5:45 a.m. to 3:45 p.m. (45 degree antenna; see W.R.R.I. above (7250 kilocycles—41.38 meters available 4:00 p.m. to conclusion (55 degree antenna; greatest strength South Europe, good reception, Italy, Greece, Central Europe, etc.).

Language programs and time for news and special events on a daily basis presented by the international broadcasting division of the State Department to be used for complete UNO coverage effective March 25th:

1. Austrian 7:15-7:30 a.m.
2. Bulgarian 11:00-11:10 a.m.
3. Czech 3:00-3:30 p.m.
4. French 6:00-6:15 p.m.
5. German 7:15-7:30 a.m.
6. Greek 2:10-2:30 p.m.
7. Hungarian 3:30-3:45 p.m.
8. Italian 1:00-1:15 p.m.
9. Polish 6:15-6:30 a.m.
10. Rumanian 2:20-2:45 p.m.
11. Spanish 3:30-4:00 p.m.
12. Yugoslavian 11:20-11:30 a.m.
13. Portuguese South America
14. Spanish South America
15. Cantonese and Mandarin
16. Japanese
17. Chinese
18. Tagalog (Philippines)

BOYS-GIRLS WEEK, APR. 27-MAY 4

National Boys and Girls Week will be observed in the United States from April 27 to May 4, 1946. The celebration will mark the 26th annual observance of this event. With the theme, “Building for Tomorrow with the Youth of Today,” the program is designed to focus the attention of the public on the problems, interests, and recreations of youth, and on the part played by the home, church, school, and youth-serving organizations in the development of character and good citizenship in growing boys and girls.

The activities planned for the observance emphasize important factors in the growth of youth, including citizen-
Broadcast Advertising

SMALL MARKET STATIONS

Producers' Views on Syndicated Shows

Syndicated transcribed shows, suitably produced and priced, have been subjects for discussion for several years among management in the small market stations (NAB REPORTS, P. 140 and 156). J. Allen Brown, Assistant Director Broadcast Advertising, has presented the problems of these stations to a cross-section of transcription producers. All the producers were very much interested in the small city station's cases and were quick to show their willingness to serve these stations in every way possible. Hereewith are some of the replies.

Standard Radio

"Recent NAB REPORTS have contained statements made by small market station operators indicating interest in the availability of a series of 15-minute transcribed shows which they could purchase at a nominally low price.

Standard Radio has provided an answer to this problem with Star-Shows. Early in January we announced the availability of a series of package shows which we offer to our subscribers for commercial use, at exceptionally low cost. Rates are determined mainly with a price range varying from a minimum of $1.00 to a maximum of $2.00 per show.

A member of the 1946 NAB Flea Circus, I attended all the meetings on the West Coast and heard Frank Pellegrin's comments regarding low cost transcribed shows. Broadcasters response to the announcement that the Star-Shows were available was enthusiastic.—Gus Hagenah.

World Broadcasting System, Inc.

"We think that we have the closest approach attained by anyone to the answer of the price question on special shows for small markets.

Some of our "Audi-Flex" World Features run as low as $1.18 per 15-minute broadcast for 156 programs. The top price for an "Audi-Flex" in this class market is $4.80. World is very much interested in any means, ways or suggestions for supplying low cost transcribed programs to stations and are willing to receive from stations that you can supply as well will be appreciated.—A. B. Sambrook, station relations manager.

Harry S. Goodman Radio Productions

"I have your letter of March 11th relative to syndicated shows and under separate cover we are sending you a catalog and brochures of a number of our programs.

We have always served the small stations entirely to their satisfaction because we base our costs for our programs on population. We sell 15-minute programs for as low as $3.50 a program.

I am thankful for your suggestion to have us send you this material because I know that you must come in contact with a number of inquiries from time to time. We will be very happy to cooperate to the fullest extent. If you want to hear any of the programs, just let us know and we'll send audition discs that you request. The enclosed price list, while not complete, will give you an idea of our rates.—Harry S. Goodman."

Arthur B. Church Productions

"Ever since we inaugurated The Texas Rangers Library we have made a special deal for small stations in small markets.

Specifically this special deal applies to stations of 100 w and 250 w where the station is the only one in its small city. On rare occasions we even apply this rate to 1,000 w daytime stations such as WDZ in Tuscola, Illinois.

"The price on these stations is normally $15.00 weekly, that being the price for counties of 100,000 population or under. The special deal is if the station is in the category mentioned in the previous paragraph—if the station will give us a non-cancellable 52 week contract we will sell them the service for $520.00 yearly. This, of course, is $10.00 weekly and represents a 33 1/3% discount. Our reason for doing this is solely to help the small station have a network caliber programs at a price they can afford.

"All our contracts permit the use of the library a maximum of three hours per week. Thus you can see that these small stations taking advantage of our 52 week non-cancellable contract can have a top quality program which they can sell for less than a $1.00 per quarter hour. Certainly nothing can be fairer.

"Under separate cover you are being sent a sample program prepared from The Texas Rangers Library and packed with the disc will be found a catalog of the Library, a brochure and the price list for the entire United States. This gives you the fundamental information about the Library.—George E. Halley, manager, syndicated features."

NBC Radio-Recording Division

"I think that we have quite a story for the small market groups and also for the program directors. I do not know what the agenda calls for at the meetings, but if possible I think that our men should sit in on these meetings.

"On our Syndicated Programs we have paid particular attention to the small market stations and have set up rates which many members of this group have told us are right in line with what they have been seeking for transcribed shows.

"At the same time, we have constantly improved the quality of our programs so that I think now we have a real story to tell them.

"I discussed your question with Mr. Egner and both of us feel that a little personal chat about the requirements of the small market stations and how we are meeting this need will be very beneficial both to you and us. Won't you drop me a line and let me know when you plan to be in New York as we are anxious to go into this matter further with you.—Willis B. Parsons, manager, Thesarus and Syndicated sales."

Frederic W. Ziv Company

"Naturally, we are most interested in your study of the availability and price of transcriptions for small city stations and we are pleased to give you the information you request.

"We certainly agree with your statement that 'Small market stations have for several years been interested in syndicated transcribed shows for their operations.' We are happy to say that many, many small market stations are fine, long-time customers of ours. In fact, we have devoted a great deal of thought and study in assisting small market stations to serve the prospective sponsors in their markets. The happy result is that today our programs are being broadcast on 48 stations in markets under 15,000 population.

"I note that in your NAB Report of February 18th you ask small market stations if they will pay $2.50 each for a five-times-a-week syndicated show. Let us look at that from the side of the transcription producer.

"If the pressing only cost $1.00 per program and if the music royalty is only $250 per tune (and the program features five melodies), these two items alone will amount to least $2.25. What about talent (such as Barry Wood—Kenny Baker—Easy Aces—Vincent Lopez' orchestra—The Modernaires, etc.), scripts, production, arrangements, overhead, promotion?

"If we were to name the greatest single advantage transcriptions give the local advertiser, it would be the opportunity to sponsor locally a program which will compete with his national competitor. The local baker can buy a Chevrolet truck at the same price as the national bakers. But when it comes to radio, the local baker, butcher, or

(Continued on next page)
candlestick maker does not have the talent available. Because talent, as you know, gravitates toward the production centers—New York and Hollywood. When sponsors buy one of our programs, they realize the opportunity to present a complete program featuring name entertainers on programs written and produced, and emceed by topflight New York writers and arrangers so that they may compete with the network programs. We know from our experience in selling to many small local sponsors that the sponsors themselves can and will pay a reasonable price for these network-calibre programs.

"A small city sponsor may buy Easy Aces on a five-per-week basis for a cost of $5.40 per program. Why should the station or sponsor expect to buy a program of this calibre, one of the world's most popular comedy teams, the only 'five-per-week' program selected by the most recent Radio Editors' Poll as one of their favorite 15-minute programs, for less than $5.40 per episode? It is our experience that these sponsors do not object to this price. Easy Aces is now running in such small markets as Albert Lea, Minn.; Taterve, Miss.; Butler, Pa.; Holyoke, Mass.; Lake Charles, La.; Fairmont, W. Va.; Yakima, Wash.; Vancouver, Wash.; Poplar Bluff, Mo.; Paducah, Ky.; Cairo, Champaign, and Herrin, Ill., etc.

"Many small city sponsors use the Korn Kobblers at a cost of $5.50 per episode, whether on a one or five-per-week basis, one of the Ziv operas, Dearest Mother, may be purchased for the small city market at a cost of $4.50 per episode, while programs of the calibre of The Barry Wood Show featuring, in addition to Barry Wood, Margaret Whiting, the Melody Maid, Henry Sylver and the orchestra cost the small city sponsor a price of $7.20 per episode on a five-per-week basis. Are these prices too high for sponsors such as a department store in the small city who has always supported newspapers? Would the radio stations be right in cheapening the value of their medium by insisting upon lower prices?

"Our experience is that stations have the prices and recommend that their sponsors pay our price. For example, let us look at a recent week one of our representatives spent in Rapid City, South Dakota, a city of 13,008, working with Stan Lieberman of Radio Station KOTA. We believe that this is an excellent sample market. In one week's time, Korn Kobblers started on the air for a local retailer, Manhunt for a local baker, Sincerely Kenny Baker for a local candy company, Calling All Girls for the local department store, and Boston Blackie for the local jeweler. Ask Stan Lieberman what he thinks about the prices and quality of Ziv programs. He reports to us that every one of his sponsors are happy with the program they are using, have gone "all-out" on promotion, using the extensive material we send them such as photographs, posters and proofs of ads, suggested newspaper displays, publicity, give-away booklets, etc., on truck signs, window displays, and point-of-sale displays.

"Pleasure Parade is one of our most expensive programs, necessarily because of the lavish array of talent, such as Vincent Lopez, Dick Brown, Bob Kennedy, Jimmy Wollington, Milton Cross, The Glenn Miller Modernaires, Lillian Cornell, guest stars, and a 20 piece orchestra. Small city sponsors may buy this program at a cost of $8.00 per program on a five-per-week basis. To cite a few localities where Pleasure Parade is regularly heard on the air, we point to Bluefield and Williamson, W. Va.; Johnstown, Pa.; Lima, Ohio; Bristol, Tenn.; Easton, Pa.; Clarksburg, W. Va.

"When stations and sponsors in cities such as Marysville, Calif. (7,581), Grand Junction, Colo. (12,479), Dublin, Ga. (7,814), Griffin, Ga. (19,229), Milledgeville, Ga. (6,778)—currently using three different Ziv shows), Moultrie, Ga. (10,147), Emporia, Kansas, and some 42 other markets under 15,000 population can buy Ziv programs, we are not convinced that our prices are out of reach.—Pat Murphy.

Unethical Radio Deal Reported

It has been brought to the attention of NAB that a number of stations and communities have been subjected to a radio deal involving the dubbing of music and entertainment from U. S. Treasury transcriptions.

Stations are approached by individuals who appear to represent a national radio production concern with offices in Detroit, Houston, Hollywood and other radio centers. The radio management is informed that this firm represents a large number of advertisers. These representatives produce dozens of the most flattering letters repeatedly from radio stations over the country to back up their claim. A "pitch" is based on a list containing about a hundred names of the largest national advertisers, and the radio producer's salesmen represent themselves as being in the city to arrange for radio time for certain patriotic programs and spot announcements publicizing the programs. They usually state that they have secured the cooperation of local dealers to pass out literature, etc. They represent to the station management that no solicitation for money is to be made from the local dealer, as financing is usually done by the national advertisers.

However, without the station manager's knowledge, these operators immediately start working communities nearby and gradually work in to your home city, using private telephone lines.

By the time these operators work their way into the home city of the radio station the deception is discovered and the station manager finds out that a couple hundred merchants in the area of the station have been victimized along with the reputation of the radio station. It has been reported that amounts ranging from $7.50 to $24.50 each have been secured from merchants in the area of various stations.

Station management is cautioned to verify all such promotions and check on the credentials on any radio producer representatives.

1945 NETWORK TIME SALES 128 MILLIONS

Preliminary reports submitted to the Federal Communications Commission by the four major networks indicate the revenues from the sale of radio time (before deducting commissions to agencies) by these networks amounted to $128,533,216 for 1945. Approximately $19,398,273 was paid in commissions to agencies. The net time sales which amounted to the remainder, or $109,134,943, were divided between payments to affiliated stations in the amount of $57,398,069 and a balance retained by the networks in the amount of $51,736,334.

The above figures indicate that total major network time sales have increased 1.7% over the 1944 total of $126,330,491—the previous all-time high; that payments to affiliated stations decreased 2.6% from the 1944 total of $58,900,856, and that the balance retained by the networks was an increase of 6.6% over the total of $48,537,428 reported for the year 1944.

The total time sales for previous years by these networks follow:

<table>
<thead>
<tr>
<th>Year</th>
<th>Time Sales 1945</th>
</tr>
</thead>
<tbody>
<tr>
<td>1944</td>
<td>$126,330,491</td>
</tr>
<tr>
<td>1943</td>
<td>$109,051,718</td>
</tr>
<tr>
<td>1942</td>
<td>$84,383,571</td>
</tr>
<tr>
<td>1941</td>
<td>$79,621,534</td>
</tr>
<tr>
<td>1940</td>
<td>$71,919,428</td>
</tr>
</tbody>
</table>

(It will be remembered that the Blue Network was separated from the Red Network in 1942.)

At the year-end 1945, the four major networks had a total of 762 affiliated stations compared with 730 as of December 31, 1944. This number includes stations affiliated with one or more networks.

During the year, Mutual affiliated 23 additional stations, bringing its total to 267; Columbia added 8 affiliates, making a total of 151; American added 2 affiliates, making a total of 192; and National picked up 3, making a total of 152. The number of stations shown as affiliated with each network includes stations that are on two or more networks.
Ad Council—OWMR

Allocations

APRIL 1-7

The following three public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of April 1-7 by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Building Our New Army

Congress has authorized a peace-time American Army larger and better trained than ever before in history. This Army is now being recruited by voluntary enlistment. But the Army's present recruiting drive for over one million men by July first 1946 may fail unless public attitudes can be changed and changed quickly. The Army itself is conducting a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent backdrop campaign, for which its own resources are inadequate, to build prestige for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and their friends. By explaining the purpose and character of the new Regular Army being formed since victory in World War II, and by paying tribute to the young men now joining it to guard world peace, your programs can help the Army's recruiting drive achieve the goal it seeks. Actually, the new American Army of today is a compact, carefully chosen group of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the task before them is the maintenance of the peace for which thousands of other young Americans have already died. (Fact Sheet No. 2)

Hospitals Need Help

Today, hospitals all over America are being forced to turn away patients because of a shortage of nurses and non-nursing personnel. Two out of three hospitals have had to close beds, entire wards and operating rooms. Many nurses are greatly overworked and many have to do non-professional tasks, thereby cutting down the number of hours of nursing care per patient. The situation is worse even than during the war and if allowed to continue, it will seriously affect the physical and mental health of the nation. Explain that although specific needs may vary in different localities, all hospitals urgently need some kind of help immediately and that we cannot afford to let our hospitals close down for lack of it. Urge inactive graduate registered nurses to check with their nearest hospital at once, and to return to duty if and where needed. Remind young women between the ages of 17 and 35 that nursing is a lifetime career, and urge them to apply to their local hospital for complete information concerning Student Nurses Education. Urge inactive Red Cross Nurses Aides to return to duty. Point out that hospital jobs are open for such auxiliary and non-nursing personnel as laundrymen, chefs, electricians, plumbers, janitors, orderlies. Urge qualified workers to investigate these openings now, as their services are desperately needed. (Fact Sheet No. 9)

Fat Salvage

Only by continuing their magnificent job of fat salvage can housewives help return to store shelves plentiful supplies of soap and hundreds of other things they've been waiting for. Fats and oils are just as important to the production of peace-time goods as they were for munitions, and supplies of industrial fats are far short of demands and needs. Domestic production, which has never been able to compensate fully for the loss of imports from the Pacific, is down this year and it may take many months to bring imports back to peace-time levels. Meanwhile, there is a tremendous demand for fats and oils. They are urgently needed in the manufacture of soap and nearly all other consumer goods—nylons, refrigerators, automobiles, paints. American women can actually help themselves to get the peace-time products they want and need in greater abundance and sooner by keeping their good work in salvaging fats. They are asked to: save every drop of used fat by discarding cans, skimming soups, melting down trimmings of meat—pour immediately into the salvage can—re-use those suitable for cooking, and salvage whatever is left—turn in the fat salvage containers to their meat dealers promptly. They'll get four cents for every pound turned in. (Fact Sheet No. 18)

Schedule of Hearings

Broadcast hearings on applications for AM, FM, and television as scheduled by the Commission beginning March 18 (see NAB Reports p. 202) and continuing through April, May, June and July are given below:

A

A. S. Abell Co., Baltimore, Md. (7338), June 6, D. C.
Abilene Bestg. Co. (KFDA), Abilene, Tex. (7367), June 14, Abilene, Tex.
Agricultural Bestg. Co. (WLS), Chicago (7135), June 3, Chicago.
Agricultural & Mechanical College of Tex. (WTAP), (6760), Mar. 25, D. C.
The Akron Radio Corp., Akron, Ohio (7050), April 22, Cleveland
Albuquerque Bestg. Co., Albuquerque, N. M. (6946), Mar. 21, D. C.
Albuquerque Bestg. Co. (KOB), Albuquerque, N. M. (6584), "Continued pending outcome clear channel hearing" 
Albuquerque Bestg. Co. (KOB), Albuquerque, N. M. (6585), "Continued pending outcome clear channel hearing"
Allegheny Bestg. Corp. (KQV), Pittsburgh, Pa. (7204), April 15, Pittsburgh
Allegheny Bestg. Corp. (KQV), Pittsburgh, Pa. (7287), April 25, Pittsburgh
Amalgamated Bestg. Systm, Chicago, Ill. (7136), June 3, Chicago
Amalgamated Bestg. Systm, Inc, New York (7226), July 1, New York
ABC, Chicago, Ill. (7137), June 3, Chicago
ABC, Los Angeles, Calif. (7259), May 20, Los Angeles
ABC, New York (7217), July 1, New York
ABC, New York (7245), June 3, D. C.
ABC, San Francisco, Calif. (7284), July 15, San Francisco
Earl C. Anthony (KFI), Los Angeles (7254), May 20, Los Angeles
Arkansas-Democrat Co., Little Rock, Ark. (6731), Mar. 22, Little Rock
Arkansas Valley Best. Co., Fort Smith, Ark. (7157), May 27, D. C.
Ashbacker Radio Corp (WKBZ), Muskegon, Mich. (6628), April 11, D. C.
The Ashland Bestg. Co. (WCMI), Huntington, W. Va. (7355), May 31, D. C.
The Associated Broadcasters (KSPD), San Francisco, Calif. (7229), July 15, San Francisco
Atlanta Radio Enterprises, Atlanta, Ga. (7324), May 13, D. C.
Atlantic Bestg. Co., Jersey City (7233), July 1, New York

B

Balaban & Katz Co., Chicago, Ill. (7138), June 3, Chicago
Charles W. Baltrope, San Antonio, Tex. (7374), June 10, San Antonio (Continued on next page)
Baltimore Bestg. Corp. (WCBM), Baltimore, Md. (7372), Mar. 18, D. C.
Bamberger Bestg. Service (WOR), New York (7241), June 3, D. C.
J. G. Long, James A. Clements & Travis C. Dodd, a partnership, d/b a Bay City Bestg. Co., McAllen, Tex. (7163), May 20, D. C.
Berks Bestg. Co. (WEEU), Reading, Pa. (7339), June 6, D. C.
The Berkshire Bestg. Corp. (6897), Mar. 18, Danbury and Torrington
The Wm. H. Block Co., Indianapolis, Ind. (7030), May 13, Indianapolis
The Buffalo Bestg. Corp. (WGR), Buffalo (7122), Mar. 22, Buffalo
Bremer Bestg. Corp. (WAAT), Newark (7243), June 3, D. C.
The Buffalo Bestg. Corp. (WGR), Buffalo (7187), May 10, D. C.
Buffalo Bestg. Corp. (WGR), Buffalo (7188), May 10, D. C.
Gillette & Jesse Gilbert Burton, Jr., a partnership known as Burton Bestg. Co. (7314), June 6, Mobile
David Rosenblum, t/a/ as Butler Bestg. Co. (WISR), Butler, Pa. (7208), April 15, Pittsburgh

C
Calcasieu Bestg. Co. (KPLC), (6664), Mar. 25, D. C.
Camden Bestg. Co., Camden, N. J. (7065), April 22, D. C.
The Capital Bestg. Co., Annapolis, Md. (7371), Mar. 18, D. C.
Capitol Bestg. Corp. (WISH), Indianapolis, Ind. (7035), May 13, Indianapolis
Central Bestg. Co., Madison, Wis. (6940), Mar. 29, Madison
Central Bestg. Co. (WEAU), Eau Claire, Wis. (7216), May 27, D. C.
Central Illinois Radio Corp., Peoria, Ill. (7408), July 5, Peoria
The Central Kentucky Bestg. Co. (6908), Mar. 25, Lexington, Ky.

1240 Kilocycles

NEW—J. Paul Stone and R. M. Ware, Jr., Fitzgerald, Ga. (P. O. c/o Stone Oil Co.)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—Telegraph Herald, Decatur, Ill. (P. O. 5th Ave. at Bluff St., Dubuque, Iowa.)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and specified hours of operation. (Continuance on grant of KWLC's application B4-ML-1226.)

NEW—The Guadalupe Broadcasting Co., Rhinecliff, Wis. (P. O. 29 Frederick St.)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

1250 Kilocycles

NEW—Midwest Broadcasting Co., Milwaukee, Wis.—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 5 KW, directional antenna and unlimited hours of operation. Amended: re changes in directional antenna.

1330 Kilocycles

NEW—WJPS, Inc., Evansville, Ind.—Construction permit for a new standard broadcast station to be operated on 1330 kc., power of 1 KW and unlimited hours of operation. Amended: to change power from 1 KW day and night to 5 KW day and 1 KW night, change type of transmitter, changes in directional antenna for day and night use and change transmitter location.

1340 Kilocycles

WNBH—Bristol Broadcasting Co., Inc., New Bedford, Mass.—Construction permit to change frequency from 1340 kc. to 550 kc., increase power from 250 watts unlimited time, to 5 KW unlimited time, install new transmitter and directional antenna day and night, and change transmitter location.

WOCB—Bristol Broadcasting Co., Inc., West Yarmouth, Mass.—Construction permit to change frequency from 1210 kc. to 1310 kc. (Contingent on grant of WNBH application to change to 550 kc.)

NEW—James C. Wallentine, tr as The Uintah Broadcasting Co., Vernal, Utah (P. O. 354 North Second East, Logan, Utah)—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

NEW—Harry C. Butcher, Santa Barbara, Calif. (P. O. 4435 Garfield St. N. W., Washington, D. C.)—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

1350 Kilocycles

NEW—E. L. Roberts, Gadsden, Ala. (P. O. Pioneer Life Bldg.)—Construction permit for a new standard broadcast station to be operated on 1350 kc., power of 1 KW, directional antenna and unlimited hours of operation.

1400 Kilocycles

WMSL—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Authority to determine operating power of direct measurement of antenna power.

NEW—The Joseph F. Biddle Publishing Co., Huntington, Penn. (P. O. 325 Penn St.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. (Call letters “WIIUN” reserved)

WMSL—Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—License to cover construction permit (B3-P-3878) which authorized change in transmitter location and changes in antenna.

1450 Kilocycles

NEW—Harold T. Gray, Gerald L. Wise, Vernon L. Wise, Roy E. Morgan, Thomas P. Shellburne, Leon Schwartz, Dr. Isaiah C. Morgan and Mitchell Jenkins, d/b as Wyoming Valley Broadcasting Co., Wilkes-Barre, Penna.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. Amended: to change transmitter and extend commencement and completion dates from 9-3-45 and 5-3-46 to 30 days after date of grant and 60 days thereafter, respectively.

KDXT—Harwell V. Shepard, Denton, Texas—License to cover construction permit (B3-P-3600), which authorized changes in transmitting equipment and increase power from 250 to 550 watts.

KFLW—Herald Publishing Company of Klamath Falls, Klamath Falls, Ore.—Modification of construction permit (B5-P-3684, as modified, which authorized a new standard broadcast station) to install new type of transmitter and extend commencement and completion dates from 9-3-45 and 7-3-46 to 30 days after date of grant and 60 days thereafter, respectively.

NEW—The Middlesboro Broadcasting Company, Middleboro, Ky.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. Amended, to change frequency from 1490 kc. to 1450 kc.

1460 Kilocycles

NEW—L. John Miner, Taft R. Wrathall and Grant R. Engsma, d/b as Monterey Bay Broadcast Co., Santa Cruz, Calif.—Construction permit for a new standard broadcast station to be operated on 1460 kc., power of 500 watts and unlimited hours of operation. (Continued on next page)
1480 Kilocycles

NEW—Carleton W. Morris, Douglas, Ariz. (P. O. Box C, Lowell, Ariz.).—Construction permit for a new standard broadcast station to be operated on 1480 kc., power of 1 KW and unlimited hours of operation.

NEW—Radio Wisconsin, Inc., Madison, Wis.—Construction permit for a new standard broadcast station to be operated on 1480 kc., power of 500 watts night and 1 KW day, directional antenna and unlimited hours of operation. Amended: to change name of applicant from Central Broadcasting Co. to Radio Wisconsin, Incorporated, power from 500 watts night and 1 KW day to 1 KW day and night, and make changes in directional antenna for night use.

NEW—Junto, Inc., Philadelphia, Pa. (P. O. 16 S. 10th St.)—Construction permit for a new standard broadcast station to be operated on 1480 kc., power of 250 watts and unlimited hours of operation. Amended: to change power from 100 watts to 250 watts and make changes in transmitting equipment.

NEW—Palm Beach Broadcasting Corp., Palm Beach, Fla. (P. O. 11 No. Pearl St.)—Construction permit for a new standard broadcast station to be operated on frequency to be assigned by FCC, power of 1 KW and daytime hours of operation. (Call letters “KIMO” reserved)

1540 Kilocycles

NEW—Patroon Broadcasting Co., Inc., Albany, N. Y. (P. O. 11 No. Pearl St.)—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 10 KW, directional antenna and unlimited hours of operation.

1590 Kilocycles

NEW—Altoona Broadcasting Co., Altoona, Pa. (P. O. Box 551.)—Construction permit for a new FM (Rural) broadcast station to be operated on frequency to be assigned by FCC and coverage of 11,100 square miles.

NEW—Lancaster Broadcasting Co., Lancaster, S. C. (P. O. 310 North Osage St.)—Construction permit for a new FM (Metropolitan) broadcast station, frequency to be assigned by FCC and coverage of 13,280 square miles.

FM APPLICATIONS ACCEPTED FOR FILING

NEW—Tri-Suburban Broadcasting Corp., Silver Spring, Md. (P. O. 6720 Conway Ave., Takoma Park, Md.)—Construction permit for a new FM (Community) broadcast station to be operated on frequency and coverage to be assigned by FCC.

NEW—WWSB, Inc. New Orleans, La. (P. O. 901 Canal St.)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #281, 104.1 mc., and coverage of 314 square miles.

NEW—Harwell V. Shepard, Denton, Texas. (P. O. 300 W. Ross St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #257, 95.5 mc., Channel #239, 95.7 mc., or as modified, which authorized change in frequency, transmitter, emission, antenna and increase power for extension of completion date from 3-22-46 to 5-22-46.

NEW—Express Publishing Co., San Antonio, Texas. (P. O. Avenue E and Third St.)—Construction permit for a new FM (Community) broadcast station to be operated on frequency and coverage to be assigned by FCC.

NEW—The Fort Industry Co., Lima, Ohio. (P. O. 506 New Center Bldg., Detroit, Mich.)—Construction permit for a new FM (Community) broadcast station to be operated on frequency and coverage to be assigned by FCC.

NEW—XMEK—Courier-Journal & Louisville Times Co., Eastwood, Ky.—Modification of construction permit (B2-FEX-66, as modified, which authorized change in frequency, transmitter, emission, antenna and increase power) for extension of completion date from 3-22-46 to 5-22-46.
cast station to be operated on Channel #288, 105.5 mc., or as assigned by FCC.

NEW—Connecticut Radio Foundation, Inc., (P. O. 221 Orange St., New Haven, Conn.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency and coverage to be assigned by FCC.

NEW—Plymouth County Broadcasting Corp., Brockton, Mass.—Construction permit for a new FM (Community) broadcast station to be operated on frequency and coverage to be assigned by FCC. Amended, to specify studio location.

NEW—Dairyland’s Broadcasting Service, Inc., Wisconsin Rapids, Wis.—Construction permit for a new FM (Community) broadcast station to be operated on frequency and coverage to be assigned by FCC. Amended, to specify studio location.

NEW—Southern Oregon Broadcasting Company, Grants Pass, Oreg.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by Chief Engineer of FCC and coverage to be determined by FCC (approximately 7,500 square miles).

NEW—Plymouth County Broadcasting Corp., Brockton, Mass. (P. O. 106 Main St., room 315.)—Construction permit for a new FM (Community) broadcast station to be operated on frequency to be assigned by Chief Engineer of FCC and coverage to be determined by FCC. Amended, to change frequency from “to be assigned” to Channel #226, 95.1 mc.

NEW—J. O. Fly, Sr., George F. Fly, Harvard P. Smith and J. O. Fly, Jr., d/b as Fly Broadcasting Co., Beeville, Texas—Construction permit for a new FM (Community) broadcast station to be operated on frequency to be assigned. Amended, to change power from 10 KW to 3 KW.

NEW—Gazette Printing Company, Joplin, Mo.—Construction permit for a new FM (Rural) broadcast station to be operated on frequency to be assigned. Amended, to change corporate name to Gazette Product, Incorporates.

NEW—The A. S. Abell Company, Baltimore, Md. (P. O. Baltimore and Charles Sts.)—Construction permit for a new commercial television broadcast station to be operated on Channel #2, 54-60 mc. and ESR of 1640.

NEW—Philco Products, Inc., Washington, D. C.—Construction permit for a new commercial television broadcast station to be operated on Channel #4, 66-72 mc. and ESR of 930. Amended, to change corporate name to Philco Products, Incorporates.

APPLICATIONS TENDERED FOR FILING

NEW—V. L. Rossi and John D. Rossi, d/b as Bee Broadcasting Co., Beeville, Texas—Construction permit for a new standard broadcast station to be operated on 1260 kc., power of 250 watts and unlimited hours of operation.

NEW—Paul F. Braden, Middletown, Ohio—Construction permit for a new standard broadcast station to be operated on 910 kc., power of 1 KW, and daytime hours of operation.

NEW—The General Broadcasting Corp., Altoona, Penna.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 1 KW, directional antenna and unlimited hours of operation.

NEW—Indiana Pacific Broadcasting, Inc., Indianapolis, Ind.—Construction permit to change frequency from 1340 kc. to 1190 kc., increase power from 5 KW to 50 KW, install new transmitter and change transmitter location. (Requesting facilities of Station WOWO)

NEW—SiouxFalls Broadcast Assn., Inc., Sioux Falls, S. D.—Construction permit to increase power from 5 KW to 10 KW, install new transmitter and directional antenna for night use, unlimited hours of operation and change transmitter location.

NEW—J. O. Fly, Sr., George F. Fly, Harvard P. Smith and Robert W. Rounsaville, d/b as Shelbyville Broadcasting Co., Shelbyville, Tenn.—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 250 watts and unlimited hours of operation.

NEW—Southern Broadcasting Co., Charleston, S. C.—Construction permit for a new standard broadcast station to be operated on 1430 mc., power of 250 watts, and unlimited hours of operation.

NEW—The Bowling Green Broadcasting Co., Bowling Green, Ky. (P. O. 901 Fairview Ave.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by Chief Engineer of FCC and coverage to be determined by FCC.

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Construction permit to increase power from 10 KW to 3 KW, and Unlimited hours of operation.

NEW—The General Broadcasting Corp., Altoona, Penna.—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 250 watts and unlimited hours of operation.

NEW—J. Herbert Hollister, Boulder, Colo.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—J. Herbert Hollister, Ft. Collins, Colo.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 250 watts and unlimited hours of operation.

NEW—Eastern Idaho Broadcasting & Television Co., Idaho Falls, Idaho—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—Eastern Idaho Broadcasting & Television Co., Pocatello, Idaho—Construction permit for a new standard broadcast station to be operated on 1210 kc., power of 250 watts and unlimited hours of operation.

NEW—W. C. Lucas and Roy Cox, d/b as Asheboro Broadcasting Co., Asheboro, N. C.—Construction permit for a new standard broadcast station to be operated on 1260 kc., power of 1 KW and daytime hours of operation.

NEW—El Paso Broadcasting Co., El Paso, Texas—Construction permit for a new standard broadcast station to be operated on 1560 kc., power of 500 watts and 1 KW day and unlimited hours of operation.

The Federal Trade Commission issued no complaints nor any cease or desist orders last week.

STIPULATIONS

During the past week the Commission announced the following stipulations:

Certified Electrical Corp., Warren, Pa., engaged in the sale of electrical products, including incandescent and fluorescent lamps and fuses, stipulated that it will cease and desist from representing in any manner that it manufactures such products, unless it actually owns and operates or directly and absolutely controls a plant where the products it sells are made. (4117)

Newell Co., St. Louis, Mo., entered into a supplemental stipulation in which it agrees to discontinue the dissemination of new product literature and to disclose the possible harmful effects of an alleged treatment for the tobacco habit designated “Tobacco Redeemer.” The treatment consists of a combination of drug preparations and dietary information. (910)
CPA ORDER RESTRICTING COMMERCIAL CONSTRUCTION PARTIALLY CLARIFIED; NAB TO REQUEST FURTHER CONSIDERATION

The Civilian Production Administration's order restricting commercial construction was partially clarified for the radio industry Friday (29) when the FCC issued a statement dealing with its applications to radio broadcasting. Simultaneously, NAB announced that it would ask the CPA to further consider the problems created by the order.

The Commission's statement is as follows:

"During the war the Federal Communications Commission in cooperation with the War Production Board and the Board of War Communications adopted certain policies which substantially "froze" civilian radio production and installation. This freeze was essential because the same materials, factories, and personnel were essential to the war effort.

"The Civilian Production Administration and the Federal Communications Commission believe that the situation is now materially different and that except for the actual housing structures and facilities (e.g. transmitter houses, studio buildings, etc.) the construction of radio stations would have no adverse effect on the Veterans' Housing Program. It is pointed out that the CPA limitation order does not halt the construction of radio towers, panel boards, transmitters and other similar apparatus or equipment and that the erection of new buildings can go forward if the new construction does not cost in excess of one thousand dollars. If the cost exceeds one thousand dollars, the program must be submitted to the nearest CPA office for authorization where it will be measured by the yardstick of essentially and non-deferability.

"The one thousand dollar figure is the ceiling also for building repairs and alterations. However, there is no cost ceiling on repairs to mechanical equipment.

"In view of the above the CPA and the FCC further believe that by limiting the housing plans for radio stations to absolutely essential construction a considerable number of permittees will be able to operate satisfactorily until materials for more elaborate structures become available.

"Therefore, the FCC proposes to continue processing applications with the understanding that the final decision as to whether construction will be authorized remains with the CPA. The CPA wishes it emphasized that the issuance of a permit by the Commission does not mean that the required construction will be authorized.

"The one thousand dollar figure is the ceiling also for building repairs and alterations. However, there is no cost ceiling on repairs to mechanical equipment.

The radio industry and the FCC had predicted that 100 new television stations would be in operation by the end of 1947 and at least two thousand frequency modulation stations would be broadcasting within three years. The CPA order would curtail this development and the attendant employment of additional thousands in the radio industry.

NAB to Present Brief

NAB's position will be outlined in a brief to be filed within a few days with the CPA. It will explain that the radio expansion predicted by both the FCC and the industry can not fully develop under the present order. This expansion was expected to directly provide 25 to 50,000 job opportunities and many other thousands indirectly in radio manufacturing industries.

In announcing the NAB plans, A. D. Willard, Jr., Executive Vice-president stated: "Since both the CPA and NHA have expressed the desire to hear about exceptional situations, this association feels that it can render a service by presenting the unusual facts about these extremely promising new developments which would be severely diminished for an indefinite period of time."

The radio industry and the FCC had predicted that 100 new television stations would be in operation by the end of 1947 and at least two thousand frequency modulation stations would be broadcasting within three years. The CPA order would curtail this development and the attendant employment of additional thousands in the radio industry.

LEA BILL NOW IN SENATE

Acting quickly in response to recommendations by the House and Senate Conference which on Wednesday (27) unanimously reported out the Lea Bill (now known as S. 63, formerly H. R. 5117), the House on Friday (29) passed the revised Bill, which contained minor modifications. The vote was 186 to 16.

The Bill now goes to the Senate for action, and indications were that this action would be taken at an early date.

Legal Department

EXPLANATION OF LEA BILL PROVISIONS

The Lea Bill (now known as S. 63, formerly H. R. 5117) as unanimously reported out of the House and Senate Conference on Wednesday (27) and approved 186 to 16 by the House on Friday (29) contains two changes from the original bill which was first passed by them on Feb. 21 before it went to conference. (See NAB REPORTS, p. 135)

The changes are as follows: (1) In paragraphs (1) and (2) of the proposed new Section 506 (b) the words "any exaction" are substituted for the word "tribute" and (2) Subsection (c) is rewritten to make it perfectly clear that the bill does not make illegal the enforcement by lawful means present and future contract rights and legal obligations. Complete text follows:

(Continued on next page)
The provisions of the bill as it now stands are as follows:

1. The bill makes it unlawful to coerce, compel, or constrain, or attempt to coerce, compel, or constrain a broadcasting licensee to—
   (a) Employ or agree to employ in connection with his business a greater number of persons than he needs to perform actual services.
   (b) Pay, give, or agree to pay or give, money or any other thing of value for services which are not to be performed.
   (c) Pay, or agree to pay, more than once for services performed.
   (d) Pay, give, or agree to pay or give, money or any other thing of value for services which are not to be performed.
   (e) Refrain, or agree to refrain, from broadcasting or allowing to be broadcast noncommercial educational or cultural programs in which the participants perform free of charge, other than their expenses, and the licensee does not pay or give any money or other thing of value for the privilege of broadcasting or receive any money because of the broadcasting of such a program.
   (f) Refrain, or agree to refrain, from broadcasting or permitting to be broadcast programs originating outside the United States.

2. The bill also makes it unlawful to coerce, compel, or constrain, or attempt to coerce, compel or constrain, a licensee or any other person to—
   (a) Pay, or agree to pay, any exaction for the privilege of producing, manufacturing, selling or buying, using or maintaining recordings, transcriptions, or reproductions of any device used or intended to be used in broadcasting or in the production and presentation of broadcasting programs.
   (b) Accede to or impose any restrictions on such production, manufacture, sale, purchase or use, if the restriction is designed to prevent or limit the use of articles or materials in broadcasting or in the production or presentation of a program.
   (c) Pay, or agree to pay, any exaction on account of the broadcasting, by the use of recordings or transcriptions, of a program previously broadcast for which payment has already been made or agreed upon for the services actually rendered.

3. The foregoing acts become unlawful if they are accomplished by—
   (a) The use of force, violence, intimidation, duress, or by other means, or
   (b) By the express or implied threat of the use of force, violence, intimidation, duress, or of other means.

4. The bill does not make unlawful the enforcement, by "means lawfully employed", of any present or future contract right or legal obligation.

5. Whoever willfully violates any of the foregoing provisions set forth in paragraphs 1 and 2, is subject, upon conviction, to one year's imprisonment or a fine of not more than $1,000, or both.

6. It is to be noted that subsection (a) of the bill is violated if the person coerced or attempted to be coerced is a radio station licensee, whereas subsection (b) is violated if a radio station licensee or any other person is coerced or attempted to be coerced to do any one or more of the specified acts.

7. The term "licensee" is defined to include the owner as well as the persons having control or management of the licensed radio station. This definition is broader than the definition contained in Section 3 (c) of the Communications Act, which defines licensee as meaning "the holder of a radio station license granted or continued in force under authority of this Act."

**Full Text of Lea Bill**

That title V of the Communications Act of 1934, as amended, is amended by inserting after section 505 thereof the following new section:

**"Coercive Practices Affecting Broadcasting"**

"Sec. 506. (a) It shall be unlawful, by the use or express or implied threat of the use of force, violence, intimidation, or duress, or by the use or express or implied threat of the use of other means, to coerce, compel or constrain or attempt to coerce, compel, or constrain a licensee—

(1) to employ or agree to employ, in connection with the conduct of the broadcasting business of such licensee, any person or persons in excess of the number of employees needed by such licensee to perform actual services; or

(2) to pay or agree to pay or give any money or other thing of value for services, in connection with the conduct of the broadcasting business of such licensee, in excess of the number of employees needed by such licensee to perform actual services; or

(3) to pay or agree to pay more than once for services performed in connection with the conduct of the broadcasting business of such licensee; or

(4) to pay or agree to pay or give any money or other thing of value for services, in connection with the conduct of the broadcasting business of such licensee, which are not to be performed; or

(5) to refrain, or agree to refrain, from broadcasting or from permitting the broadcasting of a noncommercial educational or cultural program in connection with which the participants receive no money or other thing of value for their services, other than their actual expenses, and such licensee neither pays nor gives any money or other thing of value for the privilege of broadcasting such program nor receives any money or other thing of value on account of the broadcasting of such program.

(6) to refrain, or agree to refrain, from broadcasting or from permitting the broadcasting of any radio communication originating outside the United States.

(b) It shall be unlawful, by the use or express or implied threat of the use of force, violence, intimidation or duress, or by the use or express or implied threat of the use of other means, to coerce, compel or constrain or attempt to coerce, compel or constrain a licensee or any other person—

(1) to pay or agree to pay any exaction for the privilege of, or on account of, producing, preparing, manufacturing, selling, buying, renting, operating, using, or maintaining recordings, transcriptions, or mechanical, chemical, or electrical reproductions, or any other articles, equipment, machines, or materials, used or intended to be used in broadcasting or in the production, preparation, performance, or presentation of a program or programs for broadcasting; or

(2) to accede to or impose any restriction upon such production, preparation, manufacture, sale, purchase, rental, operation, use, or maintenance, if such restriction is for the purpose of preventing or limiting the use of such articles, equipment, machines, or materials in broadcasting or in the production, preparation, performance, or presentation of a program or programs for broadcasting; or

(Continued on next page)
formance, or presentation of a program or programs for broadcasting; or
(3) to pay or agree to pay any exaction on account of the broadcasting, by means of recordings or transcriptions, of a program previously broadcast, payment having been made, or agreed to be made, for the services actually rendered in the performance of such program.

"(e) The provisions of subsection (a) or (b) of this section shall not be held to make unlawful the enforcement which a station license was granted."

"(d) Whoever willfully violates any provision of subsection (a) or (b) of this section shall, upon conviction thereof, be punished by imprisonment for not more than one year or by a fine of not more than $1,000, or both."

"(e) As used in this section the term 'licensee' includes the owner or owners, and the person or persons having control or management, of the radio station in respect of which a station license was granted."

### District Meetings

**NINTH DISTRICT SCORES RECENT FCC ACTION**

Meeting in Chicago last Monday and Tuesday (25 and 26), members of the Ninth NAB District challenged the Federal Communications Commission to "prove its authority under the Communications Act for the exercise of broad controls over radio broadcast programs," and asked NAB President Justin Miller to seek review by the Supreme Court of the points involved. This action was taken, in the form of an adopted resolution, after a three hour discussion in which approximately thirty radio executives actively participated. It resulted from the FCC's recent report on "Public Service Responsibility of Broadcast Licensees."

Text of the resolution is as follows:

"Resolved, that radio broadcasters of Illinois and Wisconsin comprising District 9, National Association of Broadcasters, decry the report issued March 7, 1946, by the Federal Communications Commission entitled "Public Service Responsibility of Broadcast Licensees" as being an unjustifiable indictment of the record of services rendered in the public interest by the great majority of American radio stations, and further, that the recommendations of the Commission do not equal the present and proposed degree of public service responsibility for the sake of the American listeners and viewers."

"Be It Resolved, that broadcasters of District 9, contending that free radio and free speech constitute the fundamental issue involved, challenge the Federal Communications Commission to prove its authority under the Communications Act for the exercise of the broad controls over radio broadcast programs which the Commission claims for itself, and further,"

"Be It Resolved, that inasmuch as the route of quickest relief lies in the courts, that President Miller of the National Association of Broadcasters be requested to request the Commission to join with the NAB in seeking review, on the points involved, before the Supreme Court of the United States, in order that the Supreme Court may definitely set forth and define what powers, if any, the Commission may have relative to radio broadcast station programming, and also that the court may determine once and for all what constitutes free radio and free speech under the terms of the communications act."

The meeting, with District Director Les Johnson, WHBF, presiding, opened with an address by President Miller. The remainder of Monday morning was occupied with discussions of public relations, Merrill Lindsay, WSOY, presiding, and employer-employee relations. A report on the progress of the Broadcast Measurement Bureau was made Monday afternoon by that organization's president, Hugh M. Feltis, and the first day's activities concluded with a sales managers' conference.

Tuesday's agenda included an evening conference on small market stations, at which Allan Curnutt, WOSH, presided; a discussion of the "Unsolved Music Problem"; discussion of engineering, Oscar C. Hirsch, WKRO, presiding and reporting; report of the Resolutions Committee and action on the proposed resolutions; a program clinic, Maurice P. Owens, WROK, presiding; and discussion of the FCC report on public service responsibility.

Judge Miller was guest of honor and speaker at a luncheon meeting of the Chicago Radio Executives Club on Wednesday (27).

In addition to President Miller, NAB was represented by C. E. Arney, Jr., Secretary-Treasurer, and Frank E. Pellegrin, Director of Broadcast Advertising.

The following resolutions were adopted at the meeting:

"Resolved, that 9th District broadcasters reiterate their pledge of fullest support to the industry's music copyright organization, BMI, and to the industry's Broadcast Measurement Bureau, in the conviction that both are vital to the healthy growth and development of radio broadcasting in America."

"Resolved, that President Miller and the Board of Directors of the National Association of Broadcasters take whatever action is necessary to further the adoption of uniform time, inasmuch as variations in time in the different areas of the nation spread confusion among radio listeners and work to the detriment of radio broadcasting."

"Resolved, that Broadcasters of District 9, National Association of Broadcasters, commend the Board of Directors of the Association and the officers and directors of FMBI for the action which made possible the merging of FMBI as a department of NAB under an executive committee of FM broadcasters and a budget providing for the enhancement and development of FM broadcasting, and, further, "It is Resolved, that everything possible is done to encourage the consolidation of Television Broadcasters as a department of NAB on the premise that the stronger and more representative the parent radio industry organization, the better served are all segments of the industry through the parent body."

"Resolved, that utmost cooperation is pledged by Broadcasters of the 9th District of the National Association of Broadcasters to President Justin Miller, who, it is felt, is an able, conscientious and respected leader, and whose selection as president of the National Association of Broadcasters seems a wise and forward looking move."

"Resolved, that the 9th District of the National Association of Broadcasters urge earliest possible action on the pledge of fullest support to the industry's music copyright organization."

"Resolved, that President Miller and the Board of Directors of the National Association of Broadcasters take appropriate action to secure application of the rule of clearance-at-source to all music copyright licensing organizations in addition to BMI and ASCAP, which are required to provide clearance-at-source under the terms of the so-called 'consent' decrees."

"Resolved, that the Broadcasters of Illinois and Wisconsin comprising the 9th District of the National Association of Broadcasters commend the Board of Trustees of the University of Illinois, and the Board of Directors of the Illinois High School Athletic Association for their help and (Continued on next page)
cooperation in ending discrimination between media by lifting the ban which prevented broadcast by Illinois stations, other than WILL, of State High School basketball tournament games from Huff gymnasium, Champaign, and for the further favorable action which now permits commercial sponsorship of the broadcasts of these games, and further

"Be It Resolved, that the Board of Trustees of the University of Illinois be asked to reappraise the University policies and scale of fees which now pertain to radio broadcasting of University events; that representatives of Illinois be asked to participate in such reappraisal, to the end that a policy and plan be approved which—

(1)—would eliminate confusion and result in improved public relations by tax supported institutions through more extensive service by radio, and—

(2)—could be recommended as a model for adoption by Big Ten schools and state high school associations, and further

"Be It Resolved, that under no circumstances should exclusive broadcast privileges for any university or school event be granted to any radio station or radio network."

Resolved, that Broadcasters of District 9, NAB, urge the NAB Board of Directors to continue the practice started last year of nominating and electing Directors-at-large for large, medium and small stations by direct mail referendum of the NAB membership. We believe this to be the most democratic way and the most satisfactory way for great majority of NAB members, because it directly assures every NAB member an opportunity to vote."

EIGHTH DISTRICT MEETING HELD AT GRAND RAPIDS

(Continued on next page)

(Continued on next page)
sor, John Fetzer, WKZO, has served as Director for the past eight years. Mr. Fetzer was not a candidate for re-election and refused nomination for a fifth term. His services were praised in a resolution adopted at the meeting.

The meeting began Thursday morning with an address by President Miller. This was followed by discussions of public relations, George C. Biggar, presiding, and labor relations, Mr. Fetzer presiding.

The afternoon session featured a report by the President of BMB, Hugh M. Feltis, on the work of his organization, and a sales managers clinic over which Robert Bausman, WISH, presided.

Dan Jayne, WELL, led a discussion concerning small market stations Friday morning, followed by a program of managers clinic, presided over by Willis F. Dunbar, WKZO-WJEF. In addition to the election of the new director, the final afternoon was spent discussing the "Unsolved Music Problem."

The broadcasters joined the Grand Rapids Rotary Club at luncheon Thursday (21). Over 250 broadcasters and Rotarians heard Judge Miller speak on the topic "Radio In America." His speech was enthusiastically received.

Resolutions adopted at the meeting are as follows:

- "Whereas the board of directors of the NAB extend to BMI their fullest active support and cooperation by the broadcasters."
- "Whereas the degree of its effectiveness is in direct proportion to the active cooperation and use of BMI music by the broadcasters."
- "Whereas vacancies now exist on the FCC and whereas it is deemed necessary that the interests of the general public and the radio broadcasting industry be better understood and served.

"Now be it resolved that the board of directors of the NAB strongly consider the advisability of recommending to the President of the U. S. the appointment of membership to include those trained in and by the broadcasting industry."

- "Whereas the many details necessary for the proper arrangement of the program, the accommodations and the entertainment for this convention have been most ably handled.

"Therefore be it resolved that the member stations of the 8th District extend a vote of thanks to the NAB representatives participating, to Director Fetzer, to the Pantlind Hotel, to the Grand Rapids Rotary Club and to all others who have contributed to the success of this convention."

REGISTRATION:

Frank E. Chizzini, NBC, Chicago, Illinois; V. O. Cram, WHLS, Port Huron, Michigan.

Broadcast Advertising

CORRECTION

An article entitled “Per Inquiry and Free Time” published in NAB Reports, March 4, 1946, stated that the Allan Miller Agency had mailed to stations a reprint of a station sales manager’s letter apparently encouraging per inquiry advertising in radio, and quoted from a letter from the station sales manager stating that his letter to the Miller Agency was not supposed to be used for promotional purposes.

It has been determined that the sales manager had, contrary to his letter to NAB, authorized the use of his letter by the Allan Miller Agency.

Publication of this erroneous information, quoted verbatim from the sales manager’s letter, was an unintentional error. It was not intended to injure or cast any reflection upon the integrity of Allan H. Miller or the Allan Miller Agency.

RETAIL ADVERTISING SURVEY PUBLISHED

Indicative of the continued advertising trend in various media is the third annual survey of advertising expenditures conducted jointly by Editor and Publisher and the National Retail Dry Goods Association. The following are excerpts quoted from the survey report:

“A drop in the newspaper’s share of the advertising dollar will not necessarily mean decreased image. . . . The retail trade has indicated that if an ample supply of goods is available, total advertising will be increased over 1945. In that case, expenditures in newspapers while proportionately less in relation to other media, would be greater in line and dollars.

Newspapers Decline, Radio Increases

“Newspapers, always the retailers’ medium, lost some of their lead over other media during 1945, and will continue to lose during 1946, it is indicated. Since the first survey in 1945, newspapers have shown a steady decline, and radio and direct mail an irregular but gradual increase.

Retailers to Boost Radio Budget

“The 171 stores responding to the questionnaire this year had reported an average reduction in newspaper expenditures of 1.7%, according to their estimates of their 1946 budget division. They plan an average of .7% for radio and 1.1% for direct mail.

All Sections Report

“The 171 stores who replied to the survey this year (11 more than participated last year and 55 more than took part in the first survey) represent all sections of the United States and Canada. They vary in size and type from large department stores in major cities to small shops in small towns.

Public Relations Copy Continues

“Asked, Are you more or less favorable to non-product institutional or public relations copy than you were last year? Slightly more than half of the retailers replied yes, indicating that they had been pleased with the results of such copy during the war years. As for continuing to use such copy, 74 retailers stated yes and only two gave definite no’s.

Brand Name Advertising

“In line with the growing importance of brands to the consumer and the development of brands in many new lines, all but one of the 171 retailers who answered a question on their attitude toward brand advertising signified strong belief in brand name advertising. Similarly, that same number declared they would use brand advertising in 1946.

Some of the retailers added, however, that they would advertise only those brands that were their own store brands. Some also remarked that they would be selective in their brand advertising, giving space ‘only to those brands which warrant it.’ One retailer commented, ‘Yes, but in a limited way, since we feel our store name has more prestige with our customers.’

New Products

“The question, ‘What new product line are you planning to develop during the coming year?’ brought a startling number of replies reading ‘appliances.’ Some stores went into detail to the effect that they would handle major appliances, or electric appliances, or only radios and small appliances at first, but the overall impression is that a great majority of stores plan to install appliance sections or to rejuvenate such pre-war departments.

“Next in importance in the new product development line is the home furnishings (another war casualty) classification, under which retailers mentioned furniture, rugs, house-wares, china, kitchen equipment, drapery and curtains, everything for the home, home needs. Thirdly, the retailers mentioned children’s and infants’ wear, and fourthly, sporting goods.

“A small group of retailers expressed interest in teen age sections, or junior-age clothes, men’s toilets, better jewelry sections; and fur salons.”

Controversial Housing Subject

National Association of Real Estate Boards has placed an order with producers for a series of four transcriptions dealing with the housing situation. NAB has learned through Walton Onslow, director of the real estate association, that the discs will be submitted to some 25 local radio stations.

(Continued on next page)
realty boards within the next 10 days. The boards are to sponsor the series on their local radio stations.

**Boards Have Ordered Transcriptions**

Real Estate Boards in the following cities have already ordered the transcriptions, according to Mr. Onslow: Kansas City, Mo.; Flint, Mich.; Savannah, Ga.; Baltimore, Md.; Salt Lake City, Utah; Indianapolis; Cincinnati, Ohio; Memphis, Tenn.; Louisville, Ky.; Steubenville, Ohio; Ann Arbor, Mich.; Birmingham, Ala.; Tacoma, Wash.; the New Jersey state association, and others.

**Real Estate Executive Speaks**

The series is entitled, "The Truth About Housing" and will feature an interview with Herbert Hugh Nelson, executive vice-president, National Association of Real Estate Boards.

**Small Market Station Sales**

Management of small stations has frequently discussed ways and means of selling their facilities to the national advertiser. Data from the NAB Research Department shows that stations on local channels, with unlimited time, in cities of 25,000 to 50,000 had an average gross in 1944 of $84,636. The revenue came from the three following sources: Network, $15,760; local sales, $56,983; and National Spot, $11,893.

Local channel, unlimited time stations in cities of 10,000 to 25,000 population grossed an average of $54,151. The network sales amounted to $7,015; local sales, $37,260; and National Spot, $9,876.

This type and classification of station in cities of less than 10,000 population sold time that resulted in these averages for 1944, $4,471. The gross sales were $41,744.

The overall income percentage from the three sources was as follows: Network, 15.4%; local sales, 69.4%, and National Spot, 14.2%.

The NAB Small Market Station Committee has defined a station of this category as one of less than 5000 watts in a city of 50,000 population or under. Had the regional stations been included in the above research, the income from national sources would have been higher than the approximately 30% shown. With at least this amount as the national average in small stations, they have sufficient reason for being interested in devising effective methods for attracting the national advertiser.

**Group Selling in Small Markets**

J. Allen Brown, NAB executive in charge of small market stations, while studying these statistics, has compiled other information related to selling the national advertisers. A request was made to The Tobacco Network, a group of seven small stations in North Carolina, which recently reported a 300% increase in billings over a five month period.

**Success Factors**

Philip F. Whitten, general sales manager of the group, reported to NAB as follows:

"Whatever success the Network may be accomplishing in the commercial field, I feel is due to the following factors:

1. "The presentation of a group of stations serving a unified economic and geographic area as a single market, rather than as a group of individual spot markets.
2. "The use of promotion material which crystallizes the above thought.
3. "A central office policy, permitting the advertiser and agency to work with one contract, one program, one continuity, and one contact, as compared with dealing with seven individual stations; in other words, ease and efficiency of benefit to the advertiser and agency.
4. "A combination rate through the purchase of the entire group of stations which provides a definite saving to the advertiser as compared with the purchase of time from the individual stations on their individual national rates.
5. "The cooperation of the management of the member stations in the promotion and development of the network as a going organization in which each of the stations has an equal stock interest.

**History of Group**

"The network history begins with an interchange of war news programs in 1942, 3, and 4, by three or four of the Stations now comprising the network. This cooperative action was so beneficial that it led to a further discussion of program exchange and the final decision to form a network group for that purpose both on a sustaining and commercial basis.

"Originally there were five stations in the group which took the title of 'The Tobacco Network,' and when WHIT, New Bern, was established, it was invited to become a member, and when the network was incorporated in August, 1944, it was composed of six stations. In November, 1945, Station WJNC, Jacksonville, North Carolina, joined the network.

**Sustaining Programs**

"In addition to commercial programs a considerable number of sustaining programming is done on the network, though at the present time this is not as great in quantity as we hope it may be in the future. We broadcast several programs on a sustaining basis from Raleigh and Wilson, and at least once a week we pick up a fine name band from Camp LeJeune, N. C.

"All members of the Tobacco Network are, also, affiliates of the Mutual Broadcasting System and carry a large volume of Mutual programming, both sustaining and commercial.

**Nine Commercial Hours Weekly**

"At the present time there are an average of five quarter hour commercial programs per day fed to the network; in addition we have one full hour and a half hour on Sundays both commercially fed to the Network. We are feeding the Network about an average of a half hour a day of sustaining programming. Then, in addition to the above program business we have a large number of announcement contracts. Announcements, however, are not handled on a simultaneous network basis but are broadcast individually on the stations at various times.

**Grouped as Single Market**

"To sum up, I would say that the Tobacco Network has definitely established itself as a strong regional network by capitalizing upon the unquestioned dominance of the low-powered station in the single station market and by united effort in their service to this particular area, in which the agricultural and economic factors are common to all, are able to present themselves as a group to national or regional advertisers as a single market of equal importance with any of the other metropolitan markets in the country.

**One Million Population**

"We have a population of over a million people in both primary and secondary areas and of almost 400,000 people in the home counties alone. We are able as a group to present our case on a basis which commands the serious attention of advertisers and time buyers.

(Continued on next page)
Impressive Hooper Ratings

"Add to that the results of our new Hooper Surveys, showing that our stations enjoy over 70% of the listening audience day and night, and you can see that we have a powerful story to tell which is now beginning to produce results."

These stations are members of the Tobacco Network:

WGPC, Greenville; WFGC, Fayetteville; WGBR, Goldsboro; WRAL, Raleigh; WJNC, Jacksonville; WGTN, Wilson; WHIT, New Bern.

Louis N. Howard is President of the organization.

Small Station Does Big Sales Job

WLAG, LaGrange, Georgia, has set an example of progressive work in selling radio's facilities to a department store. James G. Gallant, executive of the Belk-Gallant Company, started using WLAG five years ago as a gesture but for the past three years the small market station has taken a lion's share of the department store's advertising budget.

"We can see no reason why radio shouldn't be a major item on the advertising plans of all department stores," said Mr. Gallant. "Certainly we have received the very finest results, and we look forward to heavy use of air time for years to come."

Edwin Mullinax, general manager of WLAG, reports Belk-Gallant sponsors "Man on the Street" straight across the board, two 15-minute news periods daily, 40 spot announcements weekly, and a 30-minute daily "Santa's Mailbag" during the Christmas season. The five Belk-Gallant Stores in the LaGrange area are a part of the Belk chain of 201 stores in the Southeast.

"HOW MUCH FOR HOW MANY"
BOOKLET TO BE MAILED

The NAB media cost comparison, "How Much for How Many," first presented by Frank E. Pellegrin, NAB's Director of Broadcast Advertising, at San Francisco on January 9, has evoked much discussion and started an avalanche of requests for copies.

Accordingly, the study (with charts) in brochure form was sent to the printer and is scheduled for delivery at NAB Headquarters the week of March 31.

One copy will be mailed free to each addressee on the NAB Sales Manager's list. Additional copies will be available to member stations at a cost of 30 cents each until the supply is exhausted.

Typical of the widespread interest created by the study are the quoted excerpts taken from a partial list of requests received at the Department of Broadcast Advertising:

"... Please send a copy of the presentation made on radio vs. newspapers . . ."

—Dancer-Fitzgerald-Sample, Inc.

"... If copies are available, will you send one for file . . .?"

—Farm Journal, Inc.

"... Send me a copy of your study entitled, 'How Much for How Many?'"

—L. George Horowitz, Economics Consultant.

"... Would it be possible to have a copy? Will appreciate it very much."

—MacFadden Publications, Inc.

"... Send me at your convenience 'How Much for How Many?'"

—Ketchum, MacLeod & Grove, Inc.

CBS FILES BRIEF IN TELEVISION CASE

On Thursday (28), CBS filed its brief with the National Labor Relations Board in the test case to determine whether CBS white collar employees in New York City should be grouped into one single city-wide bargaining unit of some 735 employees, or whether there should be two units—one composed of approximately 700 workers and the other composed of some 35 employees in the Television Program and Operations Department. A second issue in the case is whether television directors and assistant directors should by themselves constitute a separate collective bargaining unit.

On the question of one or two units of white collar employees, CBS, the United Office and Professional Workers of America, and the IBEW were in agreement in urging that a single city-wide unit be established, while International Alliance of Theatrical and Stage Employees (IATSE) contended for a separation of the clerical employees of the Television Program and Operations Department. The Company, the Radio Directors' Guild, the

Employee-Employer Relations

(Continued on next page)
UOPWA, and the IBEW were in accord in wanting a separate craft group of television directors and assistant directors, whereas LATSE wanted this group either to be included in its proposed general Television Program and Operations Department unit or, if separated, lumped together with a miscellaneous group of four or five "fringe" employees.

In its brief, signed by Howard L. Hausman, Director of Personnel Relations, CBS summarized its position as follows:

The Company's general position on the appropriate unit is clear. It believes that functionally interchangeable clerical and service employees in a particular operational area, such as New York, should not be artificially divided into separate units along departmental lines. It does not object to the separation of a self-contained craft or functional unit, such as the Directors and Assistant Directors. But it urges that any craft unit so separated be a specific and clear-cut one, uncluttered by other "fringe" or "hybrid" functional groups, so as to minimize the possibility of jurisdictional friction.

Thus, on the general question of "one big unit" or "one large and one small unit" the Company is in full accord with UOPWA and IBEW in wanting "one big unit" for clerical, etc., employees; and on the specific question of a separate unit for Directors and Assistant Directors alone, the Company is in full accord with RDG, as well as with UOPWA and IBEW, in wanting such a unit.

In support of this position it was pointed out that the nature of the work performed by the clerical employees and the community of interest among them, the centralized management practices and policies, the location of the physical properties and the close relationship between the television group and the general group, as well as the history and extent of organization by the unions, required the establishment of a single clerical unit. Pointing to the craft characteristics of the television directors and assistant directors, the Company joined in the request of the Radio Directors' Guild for a separate bargaining unit limited to the highly skilled directorial group.

The Decision of the NLRB on these issues, which may be expected in about six weeks, will have an important bearing on the future bargaining patterns in television. Hearings on the case were concluded in New York City on January 23. Pending before the NLRB is a request by IATSE for oral argument before the Board in Washington.

FOURTH CIRCUIT COURT OF APPEALS DENIES ENFORCEMENT OF NLRB ORDER AGAINST STATION WAYS

In a two to one opinion rendered March 15, 1946, the United States Court of Appeals for the Fourth Circuit, sitting in Richmond, Virginia, refused to enforce the order of the National Labor Relations Board directing Inter-City Advertising Co., Inc., operators of Station WAYS in Charlotte, N. C., to bargain collectively with Local 1229 of the International Brotherhood of Electrical Workers as the exclusive representative of the station's transmitter technicians.

The majority of the Court agreed with the Board that the transmitter technicians constituted an appropriate bargaining unit, contrary to the Company's contention that studio control room operators should also have been included, and also affirmed the Board's finding that the Company committed an unfair labor practice in July 1944 by refusing to bargain with the Union. However, the Court ruled that because the Union lost its majority among the technicians through changes "made in the normal course of business," enforcement of the Board's bargaining order would "defeat the primary purpose of the statute to lodge the bargaining power of the workers in the hands of their chosen representatives."

In May 1944 the Board conducted an election, resulting in a three to one vote for the Union. The Company refused to bargain in July, claiming the Board had made "an unreasonable definition and designation of the bargaining unit." About this time one of the technicians, a member of the Union, was released with his consent because of necessary business changes and his duties were assumed by the Chief Engineer, who had been excluded from the bargaining unit as a supervisory employee. In September, one of the Union operators was transferred to the control board, and he was replaced by a new operator, who did not belong to the Union. By these shifts the Union lost its majority.

The NLRB in May 1945 found that the Company's refusal to bargain "was clearly in violation" of the Wagner Act and because of the recent selection of the Union in a secret election ordered bargaining even though the Union had lost its majority later. It is with this last determination of the Board that the majority of the Court disagrees, saying that when a union loses its majority "without fault on the part of the employer the union no longer possesses the authority to speak for the employees." Circuit Judge Dobie dissented, saying that when the Company first refused to bargain its only defense was based on objection to the bargaining unit, a "defense we have held to be untenable." Moreover, Judge Dobie pointed out that the personnel changes were made without consultation with the Union, a factor which weakened the Union.

Indication are that the NLRB will seek a rehearing or appeal the case to the Supreme Court, on the ground that the opinion is in conflict with previous cases decided by the Fourth Circuit as well as contrary to rulings of the Supreme Court.

**News Clinics**

THREE MORE NAB RADIO NEWS CLINICS HELD

Marked by record attendance, three NAB Radio News Clinics were held within the 6-day period starting Friday, March 22 with the Iowa Clinic in Cedar Rapids, and rounding out with two in Texas, one of which was held in Houston on Tuesday (26) and the other in Fort Worth on Wednesday (27). Art Stringer, NAB Director of promotion, represented NAB at all the meetings.

Details are given below in the order in which the clinics were held.

**Iowa Clinic**

"Determination of balance in newscasting should be made right in your own newsroom, by someone who knows his audience, knows the news and has 'news sense,'" News Manager Jack Shelley of WHO, Des Moines, told 63 broadcasters who attended the Iowa Radio News Clinic held in Cedar Rapids on Friday (22).

The session was highlighted by a talk given by Mr. Wilbur Schramm, director of the School of Journalism of the University of Iowa, who reported on a survey made by the University to determine what people think of the news. Mr. Schramm stated that studies were being made of various sized towns and rural communities. "We have almost completed the first of these surveys," said Mr. Schramm. "We talk for about 40 minutes to each person interviewed. They listen, on the average, 5-plus hours per day; 4 newscasts per day is the average, with some

(Continued on next page)
hearing as many as 12 per day. These are the averages for home listeners—listeners in business establishments catch an average of 6 newscasts each day."

Mr. Schramm stated that the survey did not reveal any objection to commercials on the part of the listeners. "The main impression we get," he said, "is that radio news is a terrifically important thing to these people."

Mr. Schramm described the town in which this initial survey is being made as "a typical town of about 600 population."

Two broadcasters, John J. Gillin, president of WOW, Omaha, and NAB 10th District director, and Al Haugner, news editor of WMT, Cedar Rapids, stressed the desirability of adequate news coverage by correspondents. Mr. Gillin stated that WOW has a staff of 25 correspondents, and Mr. Haugner said that WMT maintains a staff of 40.

A discussion on methods of securing and handling radio news correspondents was opened by Haugner, who told of what they have done and how WMT has been able to present better newscasts. "We cover county fairs, regional meetings of fraternal organizations, mass initiations of Legion members," he said. "We try to put the instructions on stories, on elections, and when to phone. All games in the area phoned to us. We give frequent times the news would be needed. The main thing is to instruct him on how to file, how to skeletonize, what story is very good. Correspondents are proud of their stories."

Correspondents are proud of their radio affiliation.

A discussion on farm news was opened by Mr. H. B. Hook, farm director of KGLO, Mason City. "What we give comes largely from correspondents," said Mr. Hook. "The grass roots must be represented. We have made good use of a mobile unit in covering county fairs. We covered every fair in 24 counties, and talked to 4-H boys and girls. It took time, but it was very valuable."

Mr. Hook spoke at length on the rounded-out program offered to rural listeners and methods of maintaining complete coverage of events.

Those who arrived early for the clinic were guests of W. B. Quarton, general manager of WMT. Thursday night dinner at the Cedar Rapids Country Club, Mr. Quarton and the WMT staff were also hosts at a reception at the Pickwick Club after the close of the Friday meetings.

NAB members who attended from adjoining states, in addition to 10th District Director Gillin, were: Virgil Sharpe, news director, KOIL, Omaha; Bill Ray, news editor, WQAM, Chicago; Ray Hampton, news editor, and Forest Cooke, assistant program director, WHBF, Rock Island.

A complete list of those in attendance follows:

Art Stringer, Director of Promotion, NAB, Washington, D. C.; John Gillin, Jr., president WOW, Omaha; and director NAB 10th District; Beryl Lottridge, vice president, and Bob Redeem, news editor, WOC, Davenport; Phil Hoffman, general manager, Chuck Miller, news editor, Mal Hansen, news editor, and Glen Law, news editor, all of KRNT, Des Moines; Robert Moore, news editor, and Eugene P. Flaherty, manager, KSD, Sioux City; Charles Abrens, news editor, UP; Chicago; Gerald Bogan, Iowa manager, UP; Des Moines; Virgil Sharpe, news editor KOIL, Omaha; H. R. Gross, news editor KKEL, Waterloo; H. R. Hurd, station manager and Max Smith, news editor, KFJB, Marshalltown; Bill Croker and Jim Borman, regional representatives, AP, Chicago; Craig Campbell, regional manager, INS, Omaha; Dick Burris, news director and Gene Shumato, news editor, KSO, Des Moines; H. B. Hook, farm director and Chuck Hilton, news editor, KGLO, Mason City; Ken Peterson and Drexel Peterson, news editors, KFSD, Fort Dodge; G. B. McDermott, station manager, KUR, and Mrs. G. B. McDermott, Fred Henson, news editor, KFJB, Cedar Rapids; John Haugner, news manager, M. L. Nelsen, managing editor, Herb Plambeck, farm service director, all of WHO, Des Moines; Mrs. Elsie Lawrence, coordination director and Lois Crawford, manager, KFGQ, Boone; Ralph Childs, news editor, KMA, Shenandoah, Don Jackson, graduate student, former news editor, WOI, Art Barnes, head, radio news laboratory, Dick Baxter, news director, Dick Yockam, local news manager, Wilbur Schramm, director School of Journalism, University of Iowa, all of WSUI, Iowa City; Bob Mulhall, news editor, Dick Hull program director, and Dick Vogl, chief announcer, WOI, Ames; Arnie Stierman, program director, Geo. Freund, news editor, Ken Gordon, general manager, KDTH, Dubuque; Jim Carpenter, general manager, WKBQ, Dubuque; Ray Hampton, news editor, WHBF, Rock Island, Illinois; Professor C. C. Tull, Cornell College, Mt. Vernon; Forest Cooke, Assistant program director, WHBF, Rock Island, Illinois; George Webber, manager, Iowa Tall Corn Network, Des Moines; Doug Grant, program director and managing editor, W. B. Quarton, general manager, Lew Van Nourgh, assistant manager, Fred Henson, news editor, Gene Claussen, news editor, Al Haugner, news editor, Pat Patterson news editor, Mrs. Pearl B. Broxam, public interest editor, all of WMT, Cedar Rapids; and Jack Hubbard, program director, KROS, Clinton.

Southeast Texas News Clinic Held in Houston

Southeast Texas broadcasters attending the first NAB Texas radio news clinic in Houston on Tuesday (26) hit the sawdust trail on news.

Burton Bishop, manager, KTEM, Temple, summed it up thus: "We are going in the news business in a substantial way. Our decision was crystallized today."

Bishop was seconded by Ted Hills, manager, KTHT, Houston. Hills said: "We are going into news one hundred percent."

Jack Neil, who manages KRIC, Beaumont, added his endorsement: "We think we are doing a pretty good news job. We are going to do a better one, beginning with a full-time newsman, some string correspondents, and a wire recorder."

The Houston clinic also reached a substantial measure of agreement on several phases of radio news operations. It was the consensus of those attending the meeting that the ideal newsman for radio is the man who can gather, write, edit and broadcast news. On this question, the opinion was generally expressed that such a man brings more authority to the microphone, and therefore is listened to with greater respect.

Station representatives also agreed that news will more than pay its own way, not only in the production of station revenue, but also in station prestige and in balanced programming.

The Houston meeting also discussed the special problems presented by commercially-sponsored news broadcasts. It was agreed that well-written, brief commercial copy does not detract from the news, but it was also agreed that the stations themselves have a job of convincing agencies and sponsors that lengthy copy is not necessarily the best selling copy, especially in newscasts.

Several station representatives at the Houston clinic expressed the hope that the meeting would prove to be only the first in a series of such gatherings in that section of the country.
KPRC, Houston, was host at a reception in the Rice Hotel following the Houston clinic.

Jack McGrew, program director of KPRC, was chairman of the Houston meeting, which was also attended by Art Stringer, secretary of the NAB Radio News Committee. Initial arrangements for the Houston clinic, as well as for similar meetings in Fort Worth and San Antonio, were set in motion by Martin Campbell, WFAA, 13th district director of the NAB.

Those attending the Houston clinic were: C. B. Locke, manager, and Dave Russell, program director, KPDM; Jack Neil, manager, Ed Henry, chief announcer, and Joe Trum, program director, KRIC, all of Beaumont; Ted Hills, manager, and Francis Gilbert, program director, KTHT; Harry Grier, news director, KTRH; Ken Millican, news editor, KXYZ; Kern Tips, manager, Pat Plaherty, news director, Hal Coley, news editor, Bill Whitmore, news editor, Ray Miller, news editor, and Jack McGrew, program director, KPRC, all of Houston; D. L. Clough, manager, KLUF, Galveston; J. C. Rothwell, manager, KSAM, Huntsville; Bill Laurie, manager, and M. D. Stewart, news editor, KNET, Palestine; Burton Bishop, manager and Larry Morrell, program director, KTEM, Temple; Guy Corley, manager, W TAB, College Station; N. S. Patterson, head, journalism department, University of Houston; Art Stringer, secretary, News Committee, NAB, Washington; Harry Leadingshott, Associated Press, Dallas; W. C. Nunn, journalism department, University of Houston.

Second Texas Clinic at Fort Worth

Broadcasters attending the second Texas NAB radio news clinic at Fort Worth on Wednesday (27) agreed that large and small stations alike must continue to expand their local news coverage, in the interest both of better news balance as such, and of improved overall programming.

"The individual broadcaster in every community is presented with a challenge to maintain a level of interest in news broadcasting through his own station's individual treatment of news interest, or else he shall perish," said Charles Jordan, managing director of WRR, Dallas. Jordan added: "People in my town are interested most in what happens on Main Street, and they are going to get it."

Representatives of stations in North, East and West Texas also endorsed the view expressed by Wes Izzard, veteran news editor of KGNC, Amarillo: "Radio needs trained newsmen, and the expansion of local news coverage by radio stations will also increase the job opportunities for qualified youngsters wanting to break into radio news."

The news operations of WBAP-KGKO, Fort Worth; WFAA-KGKO, Dallas, and KGNC were described in considerable detail. James Byron, news editor of WBAP-KGKO, and chairman of the Fort Worth clinic, drew a spark from his Dallas counterparts with the announcement that he was planning to add another Dallas legman to his news operation, since his stations also serve the Dallas market.

News commentators and analysts came in for considerable discussion, with station representatives drawing a careful distinction between the two. It was agreed that a commentator expresses his own personal opinion, while an analyst draws upon the best expert opinion he can find without introducing his own leanings, and presents that expert opinion to help his listeners understand the news.

It was also agreed that both fields call for considerably more than average understanding, background and responsibility. "Otherwise," Byron commented, "Radio especially is destroying its integrity."

Reverting to the subject of local news coverage, it was emphasized both by station representatives and by wire service spokesmen that the stations themselves must do the local news job—that the wire services cannot do it for them.

Broadcasters attending the Fort Worth clinic were guests of WBAP-KGKO at a reception which followed the business session.

The Fort Worth meeting was attended by Art Stringer, secretary of the NAB News Committee, and Jack McGrew, KPRC, Houston, who was appointed general chairman for the Texas clinics by Martin Campbell, WFAA-KGKO, 13th District Director of the NAB.

Attending the news clinic were: Bro Mingus, program director, and Duane Ramsey, newscaster, KRBC, Abilene; Wes Izzard, secretary and news editor, KGNC, Amarillo; Carry P. Collins, Jr., vice president, KWBU, Corpus Christi; James S. Alderman, news editor, WRR, Justin R. Anderson, chief of bureau, Press Association, John W. Bachman, educational director, KWBW, Ray Baumgardner, manager Southwest Div. Ins., Taylor Branch, news editor, WRR, Chas. Jordan, managing director, WRR, Meador Lowrey, news editor, KRLD, Jack E. Nennery, news editor, WFAA, Eley Owens, reporter, WFAA, Hugo Speck, news editor, WFAA-KGKO, Pete Teddie, program director, WRR, all of Dallas; James A. Byron, news editor, and L. E. Dupont, newscaster, WBAP-KGKO, Russ Lamb, program director KFJZ, Porter Randinall, news editor KFJZ, D. H. Engineering

AGENDA ANNOUNCED FOR CLEAR CHANNEL HEARING

The Commission has announced the following agenda for the Clear Channel Hearing which will resume on April 15 after a 3-month adjournment from Jan. 17:

April 15 and 16—Report on Survey conducted by Census Bureau for Committee IV and completion of Dr. Whan's testimony.

April 17—No session (Commission will hear oral argument in Washington Television matter and hold its regular Wednesday meeting).

April 18 and 19—Presentation of testimony by four members of Clear Channel Broadcasting Service (one-half day each).

April 22—Submission of Committee reports and recommendations for revision of Standards of Good Engineering Practice.

April 23—American Broadcasting Company.

April 24—Columbia Broadcasting System.

April 25—National Broadcasting Company.

April 26—Presentation of testimony by parties not affiliated with Clear Channel Broadcast Service or Regional Broadcasters group.

April 29—Presentation of testimony by two members of Clear Channel Broadcasting Service.

May 1—Presentation of testimony by two members of Clear Channel Broadcasting Service.

(Continued on next page)
IT IS THE COMMISSION'S INTENTION TO RECEIVE AT THE SESSION BEGINNING APRIL 15TH ALL TESTIMONY AVAILABLE FOR PRESENTATION IN THIS PROCEEDING. HOWEVER, IT APPEARS THAT THERE ARE CERTAIN MATTERS WHICH CANNOT BE PRESENTED AT THIS SESSION AND ACCORDINGLY AT THE CONCLUSION OF THE SESSION BEGINNING APRIL 15TH THE COMMISSION WILL ADJOURN UNTIL MONDAY, JULY 1ST, AT WHICH TIME THE COMMISSION WILL SIT CONTINUALLY UNTIL THE RECORD IS CLOSED.

TRUMAN URGED TO FILL FCC VACANCY WITH EXPERIENCED BROADCASTER

Justin Miller, President of NAB, wired President Truman last Monday (25) urging that the existing vacancy on the Federal Communications Commission be filled by someone who has been trained in the practical everyday operation of a broadcast station.

Pointing out that a person with these qualifications has never served as an FCC member, while many from utility regulatory bodies or utility industries have served, President Miller emphasized that radio broadcasting is not a public utility and "at least one member of the commission should have the public interest viewpoint required of station licensees as distinguished from public service or utility point of view."

Previously the Eighth NAB District Meeting in Grand Rapids, Michigan (March 22) had adopted a resolution on this subject. In it the board of directors of NAB was asked to "strongly consider the advisability of recommending to the President of the U.S. the appointment of membership to include those trained in and by the broadcasting industry."

Text of the NAB President's telegram to President Truman follows:

"PRESENT VACANCY ON FEDERAL COMMUNICATIONS COMMISSION AFFORDS SPLENDID OPPORTUNITY FOR YOU TO GIVE DESERVED RECOGNITION TO RADIO BROADCASTING PHASE OF THE COMMISSION'S WORK. IN ITS ENTIRE HISTORY NO PERSON WHO HAS BEEN TRAINED IN THE PRACTICAL EVERYDAY OPERATION OF A BROADCAST STATION HAS BEEN APPOINTED TO MEMBERSHIP ON THIS COMMISSION WHILE MANY HAVE BEEN NAMED FROM UTILITY REGULATORY BODIES OR UTILITY INDUSTRIES. BROADCASTING HAS BEEN SPECIFICALLY DECLARED BY CONGRESS NOT TO BE A PUBLIC UTILITY AND AT LEAST ONE MEMBER OF COMMISSION SHOULD HAVE THE PUBLIC INTEREST VIEWPOINT REQUIRED OF STATION LICENSEES AS DISTINGUISHED FROM PUBLIC SERVICE OR UTILITY POINT OF VIEW. EARNESTLY URGE YOU GIVE THIS SUGGESTION FAVORABLE CONSIDERATION."
The application of KRLD Radio Corporation for renewal of its license will be considered on its merits in regular course, and the petition of Sam Morris is denied.

GWBF RENEWAL DENIED

Invoking the multiple ownership rule, the Commission has denied a renewal of license for Station GWBF, Evansville, to Evansville on the Air, Inc., licensee also for WEOA of the same city. A 6-month period is provided to permit the owners to dispose of either of the two stations before the decision may become effective.

Citing that portion of the multiple ownership section (35) of the Communications Act which allows for exceptions if a showing is made that "public interest, convenience and necessity will be served through such multiple ownership situation," the applicant asked exceptions because of benefits arising from joint economies and flexibility of programming flowing from the operation of two stations under a single management.

The Commission, in its decision, stated that "The Communications Act has no room for the establishment and maintenance of monopolies in the field of radio broadcasting."

Text of the decision follows in full:

1. This proceeding is upon the application of Evansville on the Air, Inc., for renewal of license for standard broadcast station GWBF, Evansville, Indiana. It appearing that the applicant corporation is also licensee of standard broadcast station WEOA, Evansville, Indiana, the Com-

mission on August 22, 1944, designated the subject application for hearing upon issues relating to the applicability of Section 3.35 of the Commission's rules (the multiple ownership rule). The applicant had previously filed a petition on May 29, 1944, requesting a finding that this Rule be not applied to stations GWBF and WEOA as presently licensed and operated. Hearings in this matter were held on July 23 and 24, 1945, at Evansville, Indiana, and September 28 and October 17, 1945, at Washington, D. C. On November 28, 1945, applicant duly filed its proposed findings and conclusions. On January 9, 1946, the Commission adopted proposed findings of fact and conclusions proposing to deny this application. Following the filing of exceptions, oral argument was held by the Commission en banc on March 19, 1946, in which applicant participated.

2. The applicant is an Indiana corporation authorized to issue 1,000 shares of stock (par value $100 per share) of which 798 1/4 shares have been issued and are outstanding. All of this stock is owned by the Curtis Radiocasting Corporation, with 100% of its stock held by Mr. Clarence Leich, who is secretary-treasurer of Evansville on the Air, Inc., and is general manager of stations GWBF and WEOA. The Curtis Radiocasting Corporation has seventy-nine stockholders. Mr. and Mrs. Henry Walker and Mr. and Mrs. Clarence Leich hold the largest blocks of stock in the Curtis Radiocasting Corporation, and their aggregate holdings exceed 51% of the issued stock of that corporation. In addition, Mr. Leich normally votes the proxy of an additional 10% of this stock. Besides its ownership of the applicant corporation which is also licensee of FM station WMIL, Evansville, Indiana, the Curtis Radiocasting Corporation owns 100% of Banks of Wabash, Inc., licensee of standard broadcast station WBOW, Terre Haute, Indiana.

3. Station GWBF is authorized to operate on 1280 kc with power of 1 kw night and 5 kw, day. There is now on file with the Commission an application to increase its nighttime power to 5 kw. Station GWBF is licensed to operate on 1400 kc with power of 250 w, unlimited time. Both stations render interference-free service to the City of Evansville and its environs, both day and night. The service areas of GWBF completely encompass the service area of WEOA, whose daytime service is approximately one-fifth of the area and one-third of the population served by GWBF. In addition to the service from GWBF and

(Continued on next page)
WEOA, the City of Evansville receives primary service, daytime, from Station WSON (850 ke, 500 watts, daytime only), Henderson, Kentucky, ten miles from Evansville. Nighttime, the only primary service available in Evansville is from applicant's stations, although services of a secondary character is provided by a number of clear channel stations.

4. According to the 1940 census, the City of Evansville had a total population of 97,002. Recent estimates, based on OPA rationing, place the city's population at approximately 111,000. Its chief industries are electrical and mechanical manufacturing, structural steel, and plastics. Evansville is the wholesale trading center for the area comprised by south-western Indiana, western Kentucky, and southern Illinois, and is the sales and market center for that district. It is the site of Evansville College and a business college. Located in this city are the following groups and agencies: Chamber of Commerce, Junior Chamber of Commerce, Manufacturers' Association, Evansville Cooperative League, Philharmonic Orchestra, Council of Churches, Foreman's Club, Musicians' Group, Community Players and a number of other civic organizations.

5. Stations WGBF and WEOA have separate transmitter offices and maintain separate sales offices cated in the City of Evansville. Clarence Leich is the manager of each station and in charge of program policies. The same personnel operate the studio and commercial offices and gather the local news for both stations. The stations use the same wire network service, transcription and record library services. Station WGBF is affiliated with the National Broadcasting Company network, and WEOA with the Columbia Broadcasting System chain. Except for special national events which may be duplicated by these networks, there is no simultaneous broadcasting of the same programs by both stations. It is the applicant's policy to place programs intended for regional or rural listeners on WGBF and those of particularly local interest on WEOA insofar as possible. It is also its policy "to have the same type of program on both stations at the same time." For example, local religious programs would not be presented over the stations at the same time; programs of local origin over one station generally would be balanced against network programs on the other. Programs presented over one station are at times shifted to the other station in order to take care of commercial or other commitments. In practice, approximately one-third of the local religious programs are thus shifted from one station to the other. Also, listeners to basketball games of local interest being broadcast over the facilities of WGBF have been requested to tune to WEOA for the completion of the events, so that WGBF could carry network programs. An analysis of the January 1945 program structure of the two stations shows that WGBF devoted 66% of its time to network programs, 17% to records and transcriptions, and 17% to local live talent. WEOA broadcast network programs 75% of the time, recorded transcriptions 13.4%, and local live talent 8.6% of the time. Together these stations gave approximately a total of two hours per day to sustaining local live talent programs.

6. A number of local citizens appeared on behalf of the applicant and testified that applicant's stations made time available to their companies and to the public.
persons in control of one station had a substantial minority interest in another station serving primarily the same area.

4. In the instant case, applicant concedes that Station WGBF and WEOA are under common control, both day and night the service areas of WGBF completely overlap those of WEOA. However, it contends that its situation should be made an exception (as provided for in the rule) because of the benefits (such as standard of program quality, number and amount of community and philanthropic gifts, sums expended for radio experimentation and research) made possible by economies of joint operation and flexible programming. The owners stress the fact that all profits of the stations except for about 2% per annum on the investment have been left in the business instead of being distributed to the stockholders, and have been used in an improvement of programming and in experimental work.

5. The Commission concludes from the facts adduced at the hearing on the present application, that Station WGBF renders primary service to a substantial portion of the primary service area of Station WEOA, and that Station WEOA renders primary service to a substantial portion of the primary service area of Station WGBF. In making this determination, the Commission, in accordance with its policy announced on April 4, 1944, has considered the location of centers of population and distribution of population, location of the main studios, areas and populations to which services of the stations are directed as indicated by their commercial business, news broadcasts, sources of programs and talent, coverage claims and the listening audience.

6. The applicant has shown no substantial reason why Rule 3.35 should not apply to its multiple ownership situation. It is licensed to use two standard broadcast frequencies in the same city. One station's service contours completely overlap those of the other station, both day and night. Under these facts, the applicant in effect asks that an exception to the rule be made simply because of benefits resulting from joint economies and flexibility of programming flowing from the operation of two stations under a single management. However, under the circumstances of dual operation, it is not unusual for the single owner to effect substantial savings by joint use of studios, facilities, operating staffs, news and transcription services and record libraries. Carried to its ultimate conclusion, applicant's argument would mean that it would be in the public interest to license all stations in a given community, irrespective of their number, to the same group. The Commission has found, in adopting Rule 3.35, that these economies are outweighed by the fact that the public suffers under concentration of control and non-competitive program service in the same service area. The rule was adopted to end duplication and concentration of ownership which are always potential, if not actual, threats to satisfactory program service. The Communications Act has no room for the establishment and maintenance of monopolies in the field of radio broadcasting.

7. The present WGBF and WEOA situation is indicative of the effects of noncompetition so far as community service is concerned in that this applicant shows that there is no competition for listeners at a given time, in view of the fact that programs appealing to the same type of listeners are not broadcast at the same time. Programs being broadcast over one station are at times shifted to the other station by the common control. That work commitments, despite the fact that the program being replaced may be of greater local interest. Local advertisers are charged the same rates despite the fact that one station has a much greater coverage than the other station. Frequency discounts are offered to local advertisers using both stations. The city of Evansville, with a population in excess of 100,000 persons, is the center of a large trading area. The city receives no other primary service nighttime. Daytime it receives primary service from only one out-of-town station and local advertisers use such station because of the lower rates in effect there. In order to provide a truly competitive stimulus in Evansville under the present circumstances, an entirely new station would have to be constructed, which, in turn, would suffer competitively in attempting to compete with the two stations already under applicant's control. The Commission, therefore, can see no deleterious effects from separation and, on the other hand, anticipates that numerous advantages will arise from competitive operation of the two stations.

8. From the complete record, there appears to be no reason why both stations should not succeed in a financial and program sense, under separate ownership. According to the annual financial reports filed with the Commission by the applicant, the operation of both stations in the past has been profitable and from the record it appears that there is sufficient talent available in Evansville for the presentation of local programs, to say nothing of the programs which may be derived from network sources. In its proposed findings submitted in this case, applicant concedes that "the two stations may succeed in a financial and program sense under separate ownership." The listening public in Evansville is assured that the facilities separated from the control of Evansville on the Air as a result of this proceeding will not be licensed to any group unless the Commission is fully satisfied that the proposed operation of the new group will be in the public interest, convenience and necessity.

9. The Commission concludes that a grant of an application under Rule 3.35 would not be consistent with the provisions of Section 3.35 of the Rules and Regulations and that a renewal of license would not serve public interest, convenience or necessity. It is, therefore, ordered this 20th day of March, 1946, that the application of Evansville on the Air, Inc., for renewal of license of Station WGBF be, and the same is hereby denied. However, we do not believe it desirable to make this decision immediately effective since the licensee should be afforded a reasonable time to dispose of either of these stations. This procedure was contemplated in Order 84-A adopting the multiple ownership rule, and it was announced at that time that "The Commission may upon proper showing extend the licenses of the stations involved in any particular case . . . to permit the orderly disposal of properties." Accordingly, the license of Station WGBF will be extended for a period of six months from this date. If the applicant has not contracted for the sale of one of these stations and applied to the Commission for an assignment of license, or made other provision to comply with Section 3.35 of the Commission's Regulations within this six-month period, a denial of the application of Station WGBF for the renewal of its license will be entered forthwith.

FEDERAL COMMUNICATIONS COMMISSION

T. J. Scanlowh,
Secretary.

FCC APPEALS TO SUPREME COURT ON WOKO REVERSAL

Contending that it had full authority under the Communications Act to deny a renewal of license to WOKO, Albany, the Commission has filed a brief with the U. S. Supreme Court in which it asks that tribunal to hear an appeal from a recent U. S. District Court of Appeals ruling (see NAB REPORTS, p. 58). The Court of Appeals reversed the Commission's previous refusal to grant a renewal of WOKO's license to the present licensees.

In the brief, the Commission says that "The Court of Appeals decision not only seriously impairs the licensing powers of the Commission but it is also likely to have an equally restrictive effect upon the licensing powers of other federal agencies."

REP. BOREN ASKS FCC TO CHECK ON AIMS OF WASHINGTON STATION

Rep. Boren (D-Okl.) has asked the Commission to investigate "the probability" that a Washington radio sta-

(Continued on next page)
tion is "being set up for political propaganda purposes."

He wrote the Commission he had been advised that it either had approved or conditionally authorized establishment of the station and added:

"In view of the fact that many of the stockholders of this station are Federal Government employees, I am inclined to question whether it is the public convenience and necessity that this corporation seeks to serve or if it seeks to create a propaganda outlet for political purposes.

"It would appear that affiliations of the stockholders as listed indicates a connection with the political action committee of the CIO which further indicates the probability that this station is being set up for political propaganda purposes."

**FCC ASKED TO SET ASIDE WOV TRANSFER DENIAL**

Murray and Meyer Mester have filed with the Commission a petition in which they take exception to the March 4 action of the Commission in denying an application for transfer of control of Wodaam Corporation, licensee of station WOV, New York. The Mesters figured in the application as transferees, with Arde Bulova and Harry D. Henshel as transferors. The Mesters contend that the Commission was without authority to go into the character of an applicant, and that it should have confined its examination of qualifications to the information specifically called for in the Commission's application form.

They request the Commission to reconsider and set aside its action of March 4 in denying the application for transfer of control.

**FM Department**

**13 MORE CONDITIONAL FM GRANTS**

The Commission en banc on Wednesday (27) granted 13 additional FM stations, bringing the total to 375 conditional grants to date.

The Commission adopted an Order denying the joint petition of Great Trails Broadcasting Corporation and Radio Voice of Springfield, Inc., requesting in the alternative that the Commission determine that Section 3.240 of the Commission's Rules does not preclude the granting of the applications of both Great Trails Broadcasting Corp. and Radio Voice of Springfield, Inc., or that the Great Trails Broadcasting Corp. application for a metropolitan FM station to be located at Dayton, Ohio, be granted and that the Radio Voice of Springfield, Inc. application for a metropolitan FM station for Springfield, Ohio, be granted as a community FM station, or dismissed without prejudice.

The Commission granted consent to assignment of conditional grant of FM station, granted to Frank R. Pidcock, Sr., to John F. Pidcock, in line with assignment of standard station WMGA, granted November 28, 1945.
PHILCO WITHDRAWS DUMONT TO GET D. C. TELE GRANT

The Commission on Friday (29) announced that it has complied with a reiterated request from Philco Products Incorporated that Philco's application for a District of Columbia television station be dismissed.

The Commission also states that it will in the near future issue a final decision and order granting permits to construct television stations in Washington to the following companies: The Evening Star Broadcasting Company, Bamberger Broadcasting Service, Inc., National Broadcasting Company, Inc., and Allen B. DuMont Laboratories, Inc.

The Commission further announced that all four construction permits would be subject to conditions requiring construction in accordance with the Commission's standards of good engineering practice governing television broadcast stations.

The question of the assignment of specific channels to the successful applicants has not been definitely determined. The assignments suggested in the Commission's proposed decision have been challenged by exceptions filed by the Evening Star and no final decision will be made on specific channel assignments until after further consideration of this subject. On this point all of the successful applicants, namely, The Evening Star Broadcasting Company, Bamberger Broadcasting Service, Inc., National Broadcasting Company, Inc., and Allen B. DuMont Laboratories, Inc., will be given until April 8 to file such additional papers directed to this question, as they feel necessary. In the absence of request for oral argument on this question, the Commission will, after receipt of these papers, determine and announce its final channel assignments to the successful applicants named above.

Ad Council—OWMR Allocations

APRIL 8-14

The following three public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of April 8-14 by the Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

United States Savings Bonds

As a result of the United States Treasury's decision to extend its wartime bonds and stamp program into the peacetime era, individuals can now continue to purchase bonds paying the same rate of interest as those sold during the war. These securities now known as U. S. Savings Bonds and Savings Stamps will include the wartime F and G bonds as well as the popular Series E bonds which return four dollars for every three invested, when the bonds mature. The success and convenience of the Payroll Savings Plan during the war years have resulted in its continued maintenance by business and industry throughout the nation. The Treasury is also encouraging the continuance of the savings bonds and stamps program so successfully carried on in the schools. Similarly, all regular bond issuing agents will be urged to continue to sell U. S. Savings Bonds. The high rates of interest of U. S. Savings Bonds, their sound investment values and their ready availability offer the individual investor the ideal way of saving. The future Radio can perform a valuable service to its listeners by informing them of (1) the continued sale of U. S. Savings Bonds and Stamps; (2) their availability through continuation of the Payroll Savings Plan and other regular purchase facilities and (3) their many advantages as an investment. (Fact Sheet No. 11)

Famine Emergency

This is the desperate appeal which rings in America today: Famine is raging in Europe and Asia today. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. War has left chaos in its wake; in addition, a burning spreading drought, of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief and Rehabilitation Administration estimates that over 200,000,000 persons will need a diet calculated as 2,000 calories daily for a minimum for safety. The present American consumption per person is estimated at 3,500 calories per day.

Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The “have” countries, including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to 220,000,000 tons. Of this total, the United States and other exporting countries, through regulation already in effect, will make available eleven million tons. One share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June.

Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions by:

1. Reducing their consumption of all wheat and rice products and fats and oils. . . . Eating more of the plentiful foods. . . . Eliminating all food waste and turning in all used fats. . . . Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20)

Homes for Veterans

America faces a critical housing shortage—and its veterans are the worst sufferers. They feel the pinch of the shortage more acutely because they interrupted their lives to go into the Armed Services. It is simply a matter of fair play to help them in every way possible, to locate homes in which they can live with their families as they return to civilian life. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which they can return. It appears that more than 2,000,000 veterans' families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans' housing situation. But until construction gets rolling, it all means that the most important source of housing for veterans consists of vacant homes which become available in the existing housing supply. Urge listeners to help ease the housing situation by "staying put," if they possibly can, so that a maximum number of veterans can find living places in the existing housing supply; sharing their homes with veteran families; and listing vacancies and houses for sale at the veterans housing referral center, if one exists.

(Continued on next page)
in their community, so that veterans can get first chance at them. (Fact Sheet No. 5)

Safety on the Highways

Slaughter on our highways is skyrocketing. Right now smash-ups have reached an all-time high of more than one a minute...all day...every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was $1,450,000,000...almost 1 1/2 billion dollars. In the four months after gas rationing ended, traffic deaths jumped 37%. Unless something is done about it, accidents will multiply alarmingly in coming months. Your station can help "put the brakes on" America's rising traffic death toll. Make each listener realize he is a potential accident victim. Point out as specifically as time will allow the little, thoughtless chances he may be taking today...this week...jaywalking...trying to beat the light...speeding...driving when he has had a few drinks...neglecting repairs on his car...ignoring signals at crossings. Your aim is to make each listener decide right then and there never again to take even a "little" chance with injury or death. (Fact Sheet No. 15)

PAN AMERICAN DAY—APRIL 15

The following has been issued by the Ad Council as a Special Sheet:

"Pan American Day—April 14th—commemorates the founding in 1890 of the Pan American Union which has for its objective the furtherance of good will and understanding among the twenty-one American Republics of the Western Hemisphere.

"Because the 14th this year falls on Palm Sunday, Congress has designated Monday, April 15th, as its day to hail this historic event and to focus the importance of the Good Neighbor policy in these post war days and the years to come. Either day is appropriate to call attention to the many ways in which the people of the United States are bound by economic, scientific and cultural ties to our neighbors in the other American Republics to the south of us. Since 1931, Pan American Day has been observed by the American Republics to symbolize their common heritage of freedom and the growing friendship that has a direct bearing on the peace of the world.

Suggestions:

1. "Salute Pan American Day by calling attention to the unity of the Americas and their common heritage of freedom. The theme for 1946 is: 'Free and United the Americas Go Forward.'"

2. "Point out that the policy of living as good neighbors in the Western Hemisphere is a valuable example in the promotion of peace throughout the world.

3. "Stress that the more we know about our neighbors in the Americas—and the more they know about us—the closer become the ties among the 21 Republics.

4. "Stress that everyone in the United States stands to benefit from good relations with our neighbors to the South."

"Note to Writers and Producers—An excellent way of handling Pan American Day salutes is, of course, by musical tributes—the performance of tunes identified with the other Americas. Guest spots are also very effective, and speakers are available through the Advertising Council.

"Both government and private agencies are cooperating in focussing attention on the importance of this year's Pan American Day. These agencies include:

Council for Inter-American Cooperation, 57 William Street, New York.

Interdepartmental Committee on Scientific and Cultural Cooperation, State Department, Washington, D. C.

Pan American Union, Washington, D. C.

Department of Commerce, Washington, D. C.

INTERNAL REVENUE THANKS BROADCASTERS

The following statement has been received by NAB with a request that it be brought to the attention of broadcasters:

"The Bureau of Internal Revenue wishes to thank all stations for the splendid cooperation on the 'File Your Income Tax' spots. Never before have so many tax returns been filed previous to the March 15 deadline, and it is felt that the widespread radio support was responsible for this in no small measure.

"U. S. Public Health has requested support from OWMR for 'Know Your Public Health Nurse' week (April 7-13). Spot announcements are being mailed to all station managers. The aims in observing this week are: (1) to inform America of existing public health nursing services; (2) to encourage more nurses to enter the field of public health nursing; (3) to interest high school and college girls in choosing public health nursing as a career; (4) to help relieve pressure on hospitals by calling attention to the fact that part-time professional nursing care is available to people at home; and (5) to stimulate the development of organized health services in all areas of the United States.

"U. S. Public Health Service has been allocated the week of April 1-7 nationally for 'Help for Hospitals' campaign. Use of 'Know Your Public Health Nurse' spot will be a good tie-in and will insure continued support to this important program.

"Further information may be found in the March-April Radio Bulletin of The Advertising Council."

Federal Communications Commission Docket

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, April 1. They are subject to change.

Monday, April 1

Before Tyler Berry

To Be Held in Middlesboro, Kentucky

NEW—E. P. Nicholson, Jr., and John Wallbrecht, a partnership, d/b a as Pinnacle Broadcasting Co., Middlesboro, Ky.—C. P. 1490 kc., 250 watts, unlimited.

Further Hearing

NEW—The Constitution Publishing Co., Atlanta, Ga.—C. P. 550 kc., 1 KW night, 5 KW day, unlimited DA-night.

NEW—Montana Broadcasting & Television Co., Butte, Mont.—C. P. 550 kc., 1 KW, unlimited.

KSD—Pulitzer Publishing Co., St. Louis, Mo.—C. P. 550 kc., 5 KW, unlimited DA-night.

KTESA—Sunshine Broadcasting Co., San Antonio, Texas—C. P. 550 kc., 5 KW night, 5 KW day, unlimited DA-night.

NEW—Public Service Broadcasting Corp., Knoxville, Tenn.—C. P. 550 kc., 1 KW, unlimited, DA-night.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—C. P. to increase night power, 550 kc, 5 KW, unlimited, DA-night.

KCRS—Millard Eldson, Midland, Texas—C. P. 550 kc., 5 KW, using directional antenna.

WKRC—The Cincinnati Times-Star Co., Cincinnati, Ohio—C. P. 550 kc., 5 KW, unlimited, DA-night and day.

NEW—Bieberback Broadcasting Corp., 194 Moody St., Waltham, Mass.—For FM facilities.

Thursday, April 4
Further Hearing

APPLICATIONS GRANTED
NEW—D. O. Kinzie, Visalia, Calif.—Granted application for construction permit for new station to operate on 1400 kc., 250 watts, unlimited time. (15-P-4476)
NEW—Leo H. Beckley and Louise L. Beckley, d/b as Beckley Radio Co., Mt. Vernon, Washington—Granted application for construction permit for new station to operate on 1370 kc., 500 watts power, daytime only. (15-P-4427)
NEW—Tri City Broadcasting Co., McKeesport, Pa.—Granted application for construction permit for new station to operate on 1100 kc., 250 watts, daytime only. (15-P-4470)
NEW—Valley Broadcasting Co., San Jose, Calif.—Granted application for construction permit for new station to operate on 1170 kc., 5 KW, "daytime only." (15-P-4535)

APPLICATIONS GRANTED—Continued
NEW—Tri City Broadcasting Co., McKeesport, Pa.—Granted application for construction permit for new station to operate on 1400 kc., 250 watts, unlimited time. (15-P-4476)
NEW—Leo H. Beckley and Louise L. Beckley, d/b as Beckley Radio Co., Mt. Vernon, Washington—Granted application for construction permit for new station to operate on 1370 kc., 500 watts power, daytime only. (15-P-4427)
NEW—Tri City Broadcasting Co., McKeesport, Pa.—Granted application for construction permit for new station to operate on 1100 kc., 250 watts, daytime only. (15-P-4470)

APPLICATIONS GRANTED—Continued
NEW—Valley Broadcasting Co., San Jose, Calif.—Granted application for construction permit for new station to operate on 1170 kc., 5 KW, "daytime only." (15-P-4535)

APPLICATIONS GRANTED—Continued
NEW—Tri City Broadcasting Co., McKeesport, Pa.—Granted application for construction permit for new station to operate on 1400 kc., 250 watts, unlimited time. (15-P-4476)
NEW—Leo H. Beckley and Louise L. Beckley, d/b as Beckley Radio Co., Mt. Vernon, Washington—Granted application for construction permit for new station to operate on 1370 kc., 500 watts power, daytime only. (15-P-4427)
NEW—Tri City Broadcasting Co., McKeesport, Pa.—Granted application for construction permit for new station to operate on 1100 kc., 250 watts, daytime only. (15-P-4470)
NEW—Valley Broadcasting Co., San Jose, Calif.—Granted application for construction permit for new station to operate on 1170 kc., 5 KW, "daytime only." (15-P-4535)
ton, Ohio—Designated for hearing applications of KSAJ, Inc., Salina, Kansas, for construction permit to increase power to 5 KW, install new transmitter and directional antenna (for night use), and change transmitter location, using frequency 1550 kc. (B4-P-4364), and application of WOOP, Inc., for new station at Dayton, Ohio, to operate on 1620 kc., unlimited time (B2-P-3297), to be consolidated with proceedings on applications of Northwestern Ohio Broadcasting Corp., Lima, Ohio, and Fostoria Broadcasting Co., Fostoria, Ohio, heretofore designated.

Williamsport Radio Broadcasting Associates, Williamsport, Pa.—Designated for hearing application of Williamsport Radio Broadcasting Associates for new station at Williamsport, Pa., to operate on 1340 kc., 250 watts, unlimited time, to be consolidated with proceedings on applications of Joseph T. Countryman, New York City; George Louis and David P. Gallette requesting the same facilities, and of Penn Lincoln Broadcasting Co., Inc., for new station at Williamsport, Pa., to operate on 1230 kc., 250 watts, unlimited time.

Northern Kentucky Airwaves Corp., Covington, Ky., and Northern Kentucky Radio Corp., Inc., Covington, Ky.—Designated for consolidated hearing applications of Northern Kentucky Airwaves Corp. (B2-P-4522) and Northern Kentucky Radio Corp., Inc. (B2-P-4574) for new stations at Covington, Ky., both seeking 1680 kc., 370 watts, daylight time.

DOCKET CASE DECISIONS

The Federal Communications Commission announces its decision (B-231) denying the application of Evansville On The Air, Inc., for renewal of license of Station WGBF, Evansville, Indiana (Docket No. 6660). This decision, made under the Commission's multiple ownership rule, is subject to a six months' extension of license in order to permit orderly disposition of the station.

Oral argument was held on March 19, 1946, with respect to the exceptions filed by Station WGBF on the Commission's Proposed Findings of Fact and Conclusions which were issued February 1, 1946.

The Commission announces its final decision (B-227) granting the application of Air-Waves, Inc., for construction permit for a new station at Baton Rouge, Louisiana, to operate on 1400 kc., 250 watts, unlimited time. At the same time the Commission denied the application of Louisiana Communications, Inc., seeking the same facilities. (Dockets 6155 and 6157)

The Commission announces its final decision (B-229) granting the application of Southern Tier Radio Service, Inc., for construction permit for a new station at Binghamton, New York, to operate on 1490 kc., 250 watts, unlimited time. At the same time the Commission denied the application of the Binghamton Press Co., Inc., seeking the same facilities. (Dockets 6555 and 6556)

MISCELLANEOUS ACTIONS

KSJB—Jamestown Broadcasting Co., Inc., Jamestown, N. D.—Granted modification of construction permit, which authorized increase in power, installation of new transmitter and directional antenna, and change transmitter and studio locations, to install new type of transmitter. (B4-M-1856)

KID—Idaho Radio Corp., Idaho Falls, Idaho—Granted authority to install new automatic frequency control unit. (B5-P-263)

WDAD—Indiana Broadcast, Inc., Indiana, Pa.—Granted license to cover construction permit, as modified, which authorized a new standard broadcast station (B2-L-1012); granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1753)

KMO—Carl E. Haymond, Tacoma, Wash.—Granted authority to make changes in automatic frequency control equipment. (B5-P-264)

WAGC—Tennessee Valley Broadcasting Co., Chattanooga, Tenn.—Granted license to cover construction permit, which authorized a new standard broadcast station. (B5-L-1928); granted authority to determine operating power by direct measurement of antenna power. (B5-Z-1753)

KCNL—Gila Broadcasting Co., area of Safford, Ariz.—Granted license to cover construction permit which authorized a new relay broadcast station. (B5-LRE-448)

Mississippi Broadcasting Co., Inc., Mobile, area of Meridian, Miss.—Granted construction permit for new relay broadcast station. (B3-P-300)

WBCZ—WHER, Inc., area of Port, Orleans, La.—Granted license to cover construction permit, as modified, which authorized new developmental broadcast station. (B4-LEX-40)

KOVK—KOVK, Inc., Valley City, N. D.—Granted construction permit to install new antenna and ground system and change transmitter location. (B4-B-2867) (Action 3-26)

Radio Wisconsin, Inc., Madison, Wis., and WHBC—The Ohio Broadcasting Co., Canton, Ohio—Postponed consolidated hearing now scheduled for March 29 and 30, in Madison, Wisconsin, in Dockets 6340 and 7156, to April 29, 1946. (Action 3-26)

P. C. Wilson, Canton, Ohio, and W. J. Marshall, Cleveland, Ohio—Adopted orders designating for hearing in a consolidated proceeding the application of P. C. Wilson for a new station at Canton, Ohio, and the application of W. J. Marshall for a new station at Columbus, Ohio, both seeking the frequency 1540 kc., with 1 KW, daytime only. (B2-P-4117; B2-P-4157)

Middle West Broadcasting Co., Inc., St. Paul, Minn., and LaCrosse Broadcasting Co., LaCrosse, Wis.—Adopted orders designating for hearing in a consolidated proceeding the application of Middle West Broadcasting Co., Inc., for a new station at St. Paul, Minn., to operate on 580 kc., 1 KW night, 5 KW to local sunset, directional antenna day and night, unlimited time. (B4-P-4361), and the application of LaCrosse Broadcasting Company for a new station at La Crosse, Wis., to operate on 580 kc., 5 KW, directional antenna, unlimited time. (B4-P-4507)

Citizen's Broadcasting Co., Inc., Abilene, Texas—Granted petition requesting that application of Citizen's Broadcasting Co., Inc., for new station at Abilene, Texas, to operate on 1340 kc., 250 watts, unlimited time, be designated for hearing in consolidated proceeding with applications of Abilene Broadcasting Co., new station at Abilene, and Westex Broadcasting Co., new station at San Angelo, Texas, requesting the same facilities.

KXA—American Radio Telephone Co. (assignor), KXA, Inc. (assignee), Seattle, Wash.—Granted consent to voluntary assignment of license of Station KXA from American Radio Telephone Company to KXA, Inc., a newly formed corporation, for a consideration of $200,000 for the 1,000 shares of outstanding capital stock. (B5-AL-500)

WOKO—WOKO, Inc., Albany, N. Y.—Upon the Commission's own motion, ordered that the special temporary authorization for the continued operation of station WOKO be extended to 3 A.M., June 1, 1946.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Upon the Commission's own motion, ordered that the special temporary authority for the continued operation of station WBAX be extended to April 30, 1946.

(Continued on next page)
WMLT—George T. Morris and J. Newton Thompson, d/b/a Dublin Broadcasting Co. (assignor), George T. Morris, tr/ as Dublin Broadcasting Co. (assignee), Dublin, Ga.—Granted consent to voluntary assignment of license of Station WMLT from the assignor partnership (George T. Morris and J. Newton Thompson) doing business as Dublin Broadcasting Co. to assignee, an individual (George T. Morris), d/b/a Dublin Broadcasting Company, for a consideration of $16,550 to Thompson for his one-half interest in assignor partnership. (B5-AL-325)

Runolf Compton, Camden, N. J.—Granted petition requesting that application of Ranulf Compton for new station at Camden, N. J., to operate on 820 kc., 1 kW, daytime, be designated for hearing in consolidated proceedings heretofore set for Camden Broadcasting Co., Camden, N. J., to operate on 820 kc., 1 kW, daytime, and other Pennsylvania applications. (W4XCT—Joda Patterson, Ramon G. Patterson and Louise J. Patterson Pursley, d/b/a WAIPO Broadcasting Service, Chattanooga, Tenn.—Granted construction permit to change transmitter location of developmental broadcast station from Lookout Mountain Hotel, near Chattanooga, to Falmont Road, near State Highway #8, Signal Mountain, Tenn. (B3-PX-90)

Peterson and Company, Lexington, Ky., The Central Ky. Broadcasting Co., Lexington, Ky.; Garvice D. Kincaid, Lexington, Ky.—Ordered that the hearing on these applications now scheduled for March 25, be postponed to April 24, 1946.

Calif. Broadcasters, Inc., Bakersfield, Calif.—Granted petition to dismiss without prejudice its application (B3-P-4076, Docket 6950) for a new station.

KSUP—Southern Utah Broadcasting Co., Cedar City, Utah—Granted motion requesting the substitution of four persons for persons named in the Commission order of Feb. 28 authorizing the taking of depositions by movant on March 8 and 9, upon its application for construction permit (Docket 6759).

WXCT—Darrold Alexander Cannan, tr/as Wiehtex Broadcasting Co., Chattanooga, Tenn.—Granted construction permission to change transmitter location of developmental broadcast station from Lookout Mountain Hotel, near Chattanooga, to Falmont Road, near State Highway #8, Signal Mountain, Tenn. (B3-PX-90)

Petersen and Company, Lexington, Ky.: The Central Ky. Broadcasting Co., Lexington, Ky.; Garvice D. Kincaid, Lexington, Ky.—Ordered that the hearing on these applications now scheduled for March 25, be postponed to April 24, 1946.

Calif. Broadcasters, Inc., Bakersfield, Calif.—Granted petition to dismiss without prejudice its application (B5-P-4076, Docket 6950) for a new station.

KSUP—Southern Utah Broadcasting Co., Cedar City, Utah—Granted motion requesting the substitution of four persons for persons named in the Commission order of Feb. 28 authorizing the taking of depositions by movant on March 8 and 9, upon its application for construction permit (Docket 6759).

WXCT—Darrold Alexander Cannan, tr/as Wiehtex Broadcasting Co., Chattanooga, Tenn.—Granted construction permission to change transmitter location of developmental broadcast station from Lookout Mountain Hotel, near Chattanooga, to Falmont Road, near State Highway #8, Signal Mountain, Tenn. (B3-PX-90)

Jam Handy Organization, Inc., Detroit, Mich.—Granted motion for waiver of Section 1384 of the Commission's Rules, and accepted written appearance of movant. (Docket 7277)

Templetone Radio Mfg. Corp., Boston, Mass.—Granted petition for leave to amend application for construction permit for FM station to show the addition of Ivan B. Newman to the list of stockholders and officers of applicant corporation, specify data concerning equipment to be used, and to make other changes; accepted said amendment filed simultaneously with the petition. (Docket 8285)

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted petition for leave to amend application for modification of license so as to change pattern of nighttime directional antenna system, and to change Paragraphs 3, 5 and 20-24, inclusive, of the application as to show the revised engineering data as contained in amended engineering affidavit submitted with the amendment, and accepted said amendment filed simultaneously with petition. (Docket 7406)

Catalina Broadcasting Co., Tucson, Ariz.—Granted motion for leave to amend application for construction permit so as to change location of transmitter site from "Tucson Blvd. and Copper St.," to "Location to be determined"; to substitute in Paragraph 23 of application the words "Location to be determined"; and to strike from applicant's answers to other paragraphs of the application and therewith, all references to the location at Tucson Blvd. and Copper St. (Docket 7069)

WLJB, Inc., New York, N. Y.—Granted petition for leave to amend application for television construction permit so as to specify a new transmitter site, a new channel, channelized frequencies, a nighttime directional antenna system, and to change paragraphs 16, 18, 19, 21 and 28 of application, and other changes, and accepted amendment filed simultaneously with petition. (Docket 7248)

John C. McCormack, et al., d/b/a Oklahoma Television & Broadcasting Co., Tulsa, Okla.—Granted petition to dismiss without prejudice application for construction permit. (B3-P-4006; Docket 7128)

Frank D. Peterson, et al., d/b/a Peterson & Co., Lexington, Ky.—Granted motion to dismiss without prejudice application for construction permit. (B2-P-3984; Docket 6907)

Garvice D. Kincaid, Lexington, Ky.—Granted motion to dismiss without prejudice application for construction permit. (B2-P-4045; Docket 6909)

Darrold Alexander Cannan, tr/as Wichtex Broadcasting Co., Wichita Falls, Texas—Granted petition for leave to amend application for construction permit so as to specify a particular site, to request unlimited hours of operation, and make other changes; accepted said amendment filed simultaneously with petition. (Docket 7127)

James B. Littlejohn, Ogden, Utah—Granted petition for leave to amend application for construction permit so as to specify frequency 720 instead of 1300 kc., change paragraphs 16, 18, 19, 21 and 28 of application so as to reflect revised engineering data; accepted amendment filed simultaneously with petition; and removed said application from hearing docket. (Docket 7068; B3-P-4249)

Norfolk Broadcasting Corp., Norfolk, Va.—Granted petition for leave to amend application for construction permit (B2-P-3579) so as to show a redistribution of capital stock among the stockholders of applicant corporation, show formation of a block voting unit among certain stockholders, and make other changes; accepted amendment filed simultaneously with petition. (Docket 7349; B2-P-3579)

Radio Wisconsin, Inc., Madison, Wis.—Granted petition for leave to amend application for construction permit (B2-P-3500) so as to show the purchase of 105½% of Morgan Murphy's stock by the Minnesota Tribune Co. and to change paragraphs 7(g) and (h) of the application so as to reflect the addition of the Minnesota Tribune Co. as an additional stockholder; accepted amendment filed simultaneously with petition. (Docket 9420)

Federal Communications Commission Applications

APPLICATIONS ACCEPTED FOR FILING

590 Kilocycles

WGTN—Penn Thomas Watson, Wilson, N. C.—Construction permit to change frequency from 1310 to 590 kc., increase power from 250 watts to 5 KW, install new transmitter and directional antenna for day and night operation, and change transmitter location. Amended: re changes in directional antenna.

610 Kilocycles

NEW—W. Albert Lee, Houston, Texas (P. O. 902 Texas St.)—Construction permit for a new standard broadcast station to be operated on 610 kc., power of 5 KW, directional antenna, night and unlimited hours of operation.

630 Kilocycles

NEW—Henry C. Putnam, John D. Keating and J. Elroy McCaw, a partnership, d/b as The Island Broadcasting Co., Honolulu, T. H.—Construction permit for a new standard broadcast station to be operated on 630 kc., power of 5 KW, and unlimited hours of operation. Amended: to change type of transmitter and make changes in vertical antenna.

680 Kilocycles

NEW—Jose Ramon Quinones, San Juan, P. R.—Construction permit for a new standard broadcast station to be operated on 680 kc., power of 10 KW and unlimited hours of operation. Amended: to change transmitter location.

850 Kilocycles

NEW—California-Nevada Broadcasting Co., a partnership composed of Hubert Q. Joucken and David McKay, Vallejo, Calif. (P. O. 1946 Van Ness Ave., San Francisco, Calif.)—Construction permit for a new standard broadcast station to be operated on 850 kc., power of 250 watts and daytime hours of operation.

970 Kilocycles

WWSW—WWSW, Inc., Pittsburgh, Penna.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency from 1600 kc. to 1150 kc., power of 5 KW, to 970 kc., increase power from 250 watts to 5 KW, change transmitter location. Amended: re changes in directional antenna.

990 Kilocycles

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

1050 Kilocycles

NEW—Mayfield Broadcasting Co., Inc., Mayfield, Ky. (P. O. 5th and Lee Streets)—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 250 watts and daytime hours of operation.

1110 Kilocycles

NEW—Enterprise Publishing Co., Brockton, Mass. (P. O. 60 Main St.)—Construction permit for a new standard broadcast station to be operated on 1110 kc., power of 250 watts and daytime hours of operation.

1150 Kilocycles

NEW—WOOP, Inc., Dayton, Ohio—Construction permit for a new standard broadcast station to be operated on 1150 kc., power of 5 KW, directional antenna and unlimited hours of operation. Amended: to change frequency from 1600 kc. to 1150 kc., install directional antenna for day and night use and change transmitter location.

1230 Kilocycles

NEW—Eastern Idaho Broadcasting and Television Co., Idaho Falls, Idaho (P. O. Post Register Bldg)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. (Continued on next page)
1240 Kilocycles

WMOX—Birney Imes, Jr., Columbus, Miss.—License to cover construction permit (B3-P-3588 as modified) which authorized a new standard broadcast station.

NEW—Birney Imes, Jr., Columbus, Miss.—Authority to determine operating power by direct measurement of antenna power.

NEW—Pocatello Broadcasting Co., Pocatello, Idaho (P. O. 155 S. Arthur Ave.)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

1290 Kilocycles

NEW—Cream City Broadcasting Co., Inc., Milwaukee, Wisc. (P. O. Temp. c/o Gene Posner, 710 N. Plankinton Ave.)—Construction permit for a new standard broadcast station to be operated on 1290 kc., power of 250 watts, and daytime hours of operation.

1340 Kilocycles

NEW—James A. Dick and William W. Crenshaw, d/b as Paris Broadcasting Co., Paris, Tenn. (P. O. c/o J. P. Dick)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

WKRZ—Kenneth Edward Rennekamp, Oil City, Penna.—License to cover construction permit (B2-P-3723, as modified) which authorized a new standard broadcast station.

WKRZ—Kenneth Edward Rennekamp, Oil City, Penna.—Authority to determine operating power by direct measurement of antenna power.

NEW—The Tri-State Broadcasting Co., Cumberland, Md. (P. O. S. Baltimore St.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

NEW—A. W. Langill, B. J. Colbert and I. E. Rasmus, co-partners, d/b as Eau Claire-Chippewa Broadcasting Co., Eau Claire, Wisc. (P. O. 108 Bridge St., Chippewa Falls, Wisc.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

1350 Kilocycles

KCOR—Raoul A. Cortez, San Antonio, Texas—License to cover construction permit (B3-P-3743, which authorized a new standard broadcast station) and change studio location.

KCOR—Raoul A. Cortez, San Antonio, Texas—Authority to determine operating power by direct measurement of antenna power.

1360 Kilocycles

WPPA—A. V. Tidmore, tr/as Pottsville Broadcasting Co., Pottsville, Penna.—Modification of construction permit (B2-P-3508, which authorized a new standard broadcast station) to specify type of transmitter for approval of antenna and approval of transmitter and studio locations.

1400 Kilocycles

WTON—Charles P. Blackley, Staunton, Va.—License to cover construction permit (B2-P-3285, as modified) which authorized a new standard broadcast station.

WTON—Charles P. Blackley, Staunton, Va.—Authority to determine operating power by direct measurement of antenna power.

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Construction permit to install synchronous amplifier at foot of East Crump Street, Bay City, Michigan, to be operated on 1400 kc., with 100 watts power, and unlimited time, synchronized with Station WSAM, Saginaw, Michigan.

NEW—General Newspapers, Inc., Gadsden, Ala. (P. O. 450 Cherry St., Macon, Ga.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

1430 Kilocycles

NEW—The General Broadcasting Corp., Altoona, Penna. (P. O. 423 Central Trust Bldg.)—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 1 KW, directional antenna and unlimited hours of operation.

1450 Kilocycles

WNVA—Blanfox Radio Co., Inc., Norton, Va.—License to cover construction permit (B2-P-3884, as modified) which authorized a new standard broadcast station and approval of studio location.

WNVA—Blanfox Radio Co., Inc., Norton, Va.—Authority to determine operating power by direct measurement of antenna power.

NEW—Ross & Co., a partnership, consisting of Edmund Key, III, Emerson H. Lee, Clark Ross, Jr., and John Morton Taylor, Marshall, Texas (P. O. c/o Morton Taylor, Marshall National Bank Bldg.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—J. Herbert Hollister, Ft. Collins, Colo. (P. O. Box 146, Boulder, Colo.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

1490 Kilocycles

NEW—J. Herbert Hollister, Boulder, Colo. (P. O. Box 146)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. (Call letters “KBOF” reserved)

NEW—Interstate Radio, Inc., Moscow, Idaho (P. O. Lewis- ton Nat’l Bank Bldg., Lewiston, Idaho)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. (Call letters “KRLD” reserved)

KWOK—Joseph P. Ernst, Worland, Wyo.—License to cover construction permit (B5-P-3891) which authorized a new standard broadcast station.

KWOR—Joseph P. Ernst, Worland, Wyo.—Authority to determine operating power by direct measurement of antenna power.

NEW—WFCH, Inc., Superior, Wisc.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Jackson Broadcasting Company, Jackson, Tenn.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation. Amended: to change frequency from 1420 to 1490 kc., and make changes in transmitting equipment.

1560 Kilocycles

NEW—El Paso Broadcasting Co., El Paso, Texas (P. O. 202 East Marcy St., Santa Fe, N. Mex.)—Construction permit for a new standard broadcast station to be operated on 1560 kc., power of 500 watts night, 1 KW day, and unlimited hours of operation.

FM APPLICATIONS ACCEPTED FOR FILING

Courier-Times, Inc., New Castle, Ind. (218 South 14th St.)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #286, 105.1 mc.

Radio Columbus, Inc., Columbus, Ga. (P. O. 1028 Broadway)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #244, 96.7 mc.

The Derrick Publishing Co., Oil City, Pa.—Construction permit for a new FM (Metropolitan) broadcast station.

(Continued on next page)
Amended to specify class of station as Metropolitan and frequency to be assigned by FCC.

Oneonta Star, Inc., Oneonta, N.Y. (P.O. 12-14 Broad St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by Chief Engineer of FCC.

 الرابع

Binghamton Press Co., Inc., Binghamton, N.Y. (P.O. 19 Chenango St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by Chief Engineer of FCC.

WHOW, Inc., Baltimore, Md. (P.O. 313 North Charles St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by the FCC and coverage to be determined.

Lear Inc., Grand Rapids, Mich.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by the FCC and coverage to be supplied later.

The Greater Huntington Radio Corp., Huntington, W. Va. (P.O. 724 Fourth Ave.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned and coverage of approximately 11,300 square miles.

The Niagara Falls Gazette Publishing Co., Niagara Falls, N.Y. (P.O. 310 Niagara St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #248, 97.5 mc. or as assigned and coverage of 5,042 square miles.

The Tower Realty Co., Baltimore, Md. (P.O. 222 East Baltimore St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by FCC and coverage of 12,260 square miles.

Leaf Inc., Grand Rapids, Mich.—Construction permit for a new FM broadcast station to be operated on frequency not specified and coverage of 7,200 square miles. Amended to specify studio location and changes in antenna system.

J. J. Williams, d/b/a Greenville Broadcasting Co., Greenville, N.C. (P.O. Falkland Highway)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined.

Northern Broadcasting Co., Inc., Wausau, Wis. (P.O. 125 Third St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined.

Cannon & Callister, Inc., Los Angeles, Calif. (P.O. Room 324, 650 South Spring St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned and coverage of 7,000 square miles.

**MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING**

KSLM—Oregon Radio, Inc., Salem, Ore.—License to cover construction permit (B5-P-3966) which authorized installation of new transmitter.

KGFL—WFL Inc., Roswell, N.M.—Construction permit to increase power from 100 watts to 250 watts, install new transmitter and make changes in ground system.

WICAPA—WICA, Inc., Ashland, Ohio.—Construction permit to change hours of operation from daytime to unlimited time, install directional antenna for night use. Amended to change power from 1 KW day and night to 1 KW day and 5 KW day and change type of transmitter.

WAXH—Savannah Broadcasting Co., area of Savannah, Ga.—Construction permit to install new transmitter.

WHFK—United Broadcasting Co., Columbus, Ohio.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and make changes in directional antenna for night use. Amended to make changes in directional antenna for night use.

WBT—Southeastern Broadcasting Co., Charlotte, N.C.—Modification of construction permit (B3-P-3330, which authorized installation of a directional antenna for night use) for extension of completion date from 5-4-46 to 11-4-46.

**TELEVISION APPLICATIONS ACCEPTED FOR FILING**

Warner Bros. Broadcasting Corp., Hollywood, Calif.—Construction permit for a new commercial television broadcast station to be operated on Channel #5, 76-82 mc. and ESR of 1,560. Amended to change transmittor location, make changes in antenna system and change ESR from 1050 to 12,170.

**APPLICATIONS TENDERED FOR FILING**

NEW—Chesapeake Broadcasting Co., Inc., Washington, D.C.—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 5 KW and daytime hours of operation.

NEW—Ralph Compton, d/b/a Radio Camden, N.J.—Construction permit for a new standard broadcast station to be operated on 820 kc., power of 1 KW and daytime hours of operation.

NEW—Pilgrim Broadcasting Corp., Manchester, N.H.—Construction permit for a new standard broadcast station to be operated on 1040 kc., power of 1 KW and daytime hours of operation.

NEW—Douglas D. Kalile, John L. Hitchcock, Wilbur E.旗, L. Berenice Brownlow, d/b/a Montana Broadcasters, Havre, Mont.—Construction permit for a new standard broadcast station to be operated on 1260 kc., power of 250 watts and unlimited hours of operation.

NEW—C. V. Zaser, Edward Jansen & Associates—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

NEW—Jessica L. Longston, C. V. Zaser, Edward Jansen & Associates—Construction permit for a new standard broadcast station to be operated on 1110 kc., power of 1 KW, directional antenna, and nighttime hours of operation.

NEW—Radio Sales, a partnership, composed of Benjamin F. Goggin, Jr., and Howard E. Dennis, Henderson, Texas.—Construction permit for a new standard broadcast station to be operated on 1000 kc., power of 250 watts and daytime hours of operation.

NEW—Jessica L. Longston, C. V. Zaser, Edward Jansen & Associates—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

NEW—Douglas D. Kahle, John L. Hitchcock, Wilber F. Rocchio, General Partners, and Warren D. Brainard, Limited Partner, d/b/a The Northern Colorado Broadcasting Co., Fort Collins, Colo.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Loren E. Farmer, Spokane, Wash.—Construction permit to increase power from 10 KW to 50 KW, change transmitter location and make changes in directional antenna system.

NEW—Pilgrim Broadcasting Corp., Manchester, N.H.—Construction permit for a new standard broadcast station to be operated on 900 kc., power of 1 KW, and daytime hours of operation.

NEW—I. and E. Broadcasting Co., Dayton, Ohio.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 1 KW, and daytime hours of operation.

NEW—Upper Michigan-Wisconsin Broadcasting Co., Inc., Iron Mountain, Mich.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

NEW—Alpena Broadcasting Corp., Alpena, Mich.—Construction permit for a new standard broadcast station (Continued on next page)
Federal Trade Commission Docket

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

Guaranteed Products Corp.—A complaint has been issued charging Guaranteed Products Corp., Wellington, Ohio, with circulating advertisements containing numerous false, misleading and deceptive statements and representations concerning the safety, dependability and effectiveness of its electric fence controllers which are used for confining livestock. The respondent corporation advertises its products in trade journals, pamphlets and circular letters and sells them under various trade names, including Shox Stock Electric Controllers, Everbest Electric Fence Controllers, Feilo Electric Fence Controllers, Tru Test Electric Fence Controllers, and Trustworthy Electric Fence Controllers. (5427)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Allen Products Co., Inc., 602 Fifth Street, N. W., Washington, D. C., has been ordered to stop disseminating false advertisements concerning the therapeutic properties of a medicinal preparation designated Allen's Nijara. (5255)

Charles of the Ritz Distributors Corp.—An order directing Charles of the Ritz Distributors Corp., 9 University Place, New York, to cease and desist from disseminating advertisements which represent that the use of Charles of the Ritz Throat Cream will cause the throat of the user to remain smooth, firm or young looking. (5298)

Stevens Clothing Mfg. Co., Inc.—An order prohibiting Stevens Clothing Manufacturing Co., Inc., Menands, N. Y., from misrepresenting that it manufactures men's clothing and sells it direct to consumers at manufacturer's prices. (5240)

United Watch Co., St. Cloud, Minn., has been ordered to cease representing that any watch he sells is an "Elgin" unless it is manufactured by the Elgin Watch Co. (4653)

FCC CASE CLOSED

The Federal Trade Commission has closed without prejudice the case growing out of its complaint which charged Velodent Products Manufacturing Co., Inc., 120 West Broadway, New York, with certain misrepresentations in connection with the sale of a shaving cream.

Participating in the decision: Chairman Ayres and Commissioners Ferguson, Davis and Mason.

Not participating: Commissioner Freer.

APRIL 1, 1946—272
ORAL ARGUMENT ON TRANSFER PROCEDURE SET FOR 17TH

Resulting from an NAB brief (NAB Reports, p. 200) which was filed with the FCC on March 15 setting forth objections to the FCC's proposed section 1.388 of its rules and regulations (NAB Reports, p. 38), the Commission has announced that oral argument in the matter will be held on Wednesday (17).

The proposed section would require radio station licensees or holders of construction permits to give public notice of any proposed transfer of their station and invite competing bids.

The notice, signed for the Commission by T. J. Slowie, Secretary, follows:

In the Matter of Promulgation of Rules and Regulations concerning the procedure to be followed by the Commission in passing upon assignments of license or transfers of control of corporate licenses. Docket No. 7071.

NOTICE OF ORAL ARGUMENT

You are hereby notified that the Commission on the 3rd day of April, 1946, directed that oral Argument in the above-entitled proceeding be held before the Commission at its offices in Washington, D. C., on Wednesday, April 17, 1946, at 9:30 o'clock A. M.

WOLS EXPLAINS FCC PROGRAM CONTROL TO ITS AUDIENCE

N. L. Royster, manager of WOLS, Florence, S. C., went on the air personally a few days after issuance by the FCC of its report on “Public Service Responsibilities of Broadcast Licensees” discussing program control by the Communications Commission.

In a letter to Justin Miller, President of NAB, Mr. Royster reported on his broadcast as follows:

“Last night I went before the radio audience with a thirty minute speech in regards to program control by the FCC.

“The results have been startling. Today I received more than 100 requests for information from us so that these listeners might write their Congressmen and Senators in regard to this latest FCC programming move.

“I think if all radio stations would make an appeal to their listeners on the matter, in a clear cut, sensible way, it would do a world of good. In other words, when our Congressmen and Senators receive a few hundred letters from the folks back home, they might open their eyes and sit up a bit.”

Subsequently Mr. Royster made a second speech on the same subject. He reports that slightly over a hundred letters have been sent to their congressional representatives by listeners in the WOLS area.

Programming

USDA URGES STATIONS PROMOTE VICTORY GARDENING

In conjunction with the current famine emergency campaign to provide food for starving millions abroad, Paul C. Stark, Director of the National Garden Program, U. S. Department of Agriculture, has issued an appeal to all radio stations to use their facilities in promoting widespread victory gardening this year.

The importance of this undertaking was pointed up at the recent National Garden Conference in Washington when Secretary of Agriculture Anderson said: “There is more need for victory gardens in this first year of peace than there was in any year of the war.”

Earlier President Truman had stated: "The threat of starvation in many parts of the world and the urgent need for food from this country emphasize the importance of continued effort to add to our total food supply this year.

(Continued on next page)
A continuing program of gardening will be of great benefit to our people.

Here is another opportunity for radio to demonstrate the power of its public interest campaigns. In a pamphlet titled “Garden and Conserve to Save What We’ve Won,” the Department of Agriculture suggests these objectives and appeals:

1. Add your bit to the world food supply. By growing a part of your family’s needs you release food stocks that can be used somewhere else in the world. And you’ll be able to contribute more processed foods to collection drives for famine relief.

2. Plan your garden carefully. Grow enough to supply your needs for fresh vegetables and as much extra as you can preserve for family stocks. Remember that some vegetables may be stored without preserving. Maybe you’ll want to fit your plans with those of your neighbor, so that you can do some swapping.

3. Make successive plantings for continuous supplies and late crops.

4. Your victory garden will make it easier to save “a slice of bread a day” by enabling you to have an extra fresh vegetable with every meal.

5. Stay with your garden throughout the season. Keep making late plantings of late-season crops, not forgetting those that will keep after frost. Keep down weeds and grass, and cultivate as necessary. Watch for insects and other pests and apply the right treatment in time.

6. Figure how much your garden can save you in money.

7. Your own garden is the best insurance against possible crop failures here and abroad or unexpectedly large or small foreign relief needs. It is also possible that the shortage of tin and steel may limit the commercial production of certain canned foods.

8. Work toward a permanent garden. Choose soil, location, arrangement, and general gardening plan with this in mind. Consider planting fruit trees, grapevines, berry vines, and perennial plants. Gardeners should find it easy to do this. Plan with an eye for improving appearance and investment value of home and community.

9. Gardening is fine exercise. Nothing like a little spade and hoe work to keep you out in the fresh air and in good shape.

10. Relax! These times are a strain on everyone. No better way to forget your problems than to get down in the dirt and dig. This is the sort of thing a lot of fellows were dreaming about during long watches at sea and long hours of “sweating it out.”

11. And eat better. You can’t beat fresh vegetables and fruits right out of your own garden for flavor and nutrition. The average family needs a fourth more green and yellow vegetables, a fifth more tomatoes and citrus fruits than the market offered last year, according to the Bureau of Human Nutrition and Home Economics.

CRIPPLED CHILDREN’S WEEK UPCOMING

The week of April 21 has been set aside as the Shriners Hospitals for Cripple Children Week, under the theme “They shall walk again.”

Since their founding in 1923 the Shriners have healed over 100,000 crippled children from poor families without means to secure proper medical and surgical attention.

Purpose of the theme is to focus attention of the nation on the problem of crippled children in being restored to useful citizenship. No direct appeals for donations will be made.

Fact Sheets will be distributed to all stations next week. General Douglas MacArthur is Honorary Chairman of the drive.

(Continued on next page)
**WHBF USES WIRE RECORDER FOR SCOOP**

A “hot” tip on a fire which destroyed a draw span and control tower of a 3,000 foot railroad bridge over the Mississippi river, enabled WHBF, Rock Island, men to reach the scene before the arrival of firemen, police and U. S. Engineers.

The men, Ted Arnold (program director) and Bob Sinnett (chief engineer) took their wire recorder aboard a government launch, pushing a barge loaded with a pumper. Amidst the dark, swirling flood waters of the Mississippi, within blistering distance of the blaze, they interviewed two men rescued from the burning bridge, and rescue workers. The on-the-spot recording was heard on a WHBF newscast broadcast within an hour after the fire was discovered.

**NEWS AUDIENCES TO STATIONS DOING BEST LOCAL NEWS JOB**

Ken McClure, news director of WOAI, San Antonio, and chairman of the third Texas NAB Radio News Clinic, San Antonio, March 28, set the keynote for the meeting with the observation:

“News is something which the station—any station, big or little—can hang its hat on.”

“This is especially true,” McClure said, “of the smaller station which cannot afford big local productions, and which may not have the talent available for such shows. News is the peg of interest and profit for such stations.”

**Expanding Facilities**

Representatives of south and west Texas stations agreed that news is one of the best program services a station can render, and that local news constitutes the backbone of a station’s news service.

News department spokesmen at the San Antonio meeting urged that station managers give special consideration to expansion of radio news facilities, not only as a profit-making operation, but also to enhance station prestige and improve program balance. One radio newsman said:

“Stations which have been in news for any length of time will tell you that news audiences in the future are going to those stations which do the best job of gathering, selecting, writing and rewriting the news of their own respective areas.”

**Ex Officio Reporters**

Jack Hawkins, owner-manager of KIUN, Pecos, explained his own local news operation, which drew considerable interest from other station operators. Hawkins said, “Our news sources—city and county officials and so on—consider themselves ex officio members of our news staff.”

Hawkins, a former newspaper man, uses string correspondents in nearby communities, and also devotes a quarter-hour period a week to editorial comment from the section’s weekly newspapers.

G. W. Johnson, general manager, KTSA, San Antonio, said in an interview, after the clinic, that local news broadcasts proved themselves to him, last September, during the newspaper strike. “They were so effective that we have maintained them ever since,” he said. “One man devotes all of his time to the production of ‘community news’, daily at 5:00 P.M.”

**Local News Exclusively**

C. D. Reed, KNEL, Brady, reported that his own local news operation functions without a wire service. Reed, who also has a long-time newspaper background, explained that his station prefers to concentrate its news coverage on local happenings, and that his listeners have learned to depend on KNEL for news of their friends and neighbors.

Though not represented at the clinic, it was reported by a clinic attendant that KPAB, Laredo, was another station, without wire service, which concentrated on local news.

Bud Thompson, new editor of KFYO, Lubbock, expressed his convictions in these words:

“The coverage of local news is to be given primary consideration on my station from this date on. New personnel and new facilities will have to be made available, and every effort will be instituted to expand local and regional news coverage.”

**Similar Clinics Wanted**

The San Antonio meeting also joined the Houston and Fort Worth clinics which preceded it in expressing the hope that similar gatherings will be scheduled in Texas in the future.

WOAI was host at a reception following the clinic, which was held at the St. Anthony Hotel.

Jack McGrew, KPRC, Houston, general chairman of the Texas clinics, and Arthur Stringer, secretary, NAB Radio News Committee, attended the San Antonio meeting, which, like the other Texas clinics, was arranged by Martin Campbell, NAB director, 13th district.

Attending the San Antonio news clinic were: C. D. Reed, newscaster, KNEL, Brady; Bud Thompson, news editor, KFYO, Lubbock; Jack Hawkins, owner-manager, KIUN, Pecos; John W. Scott, news editor and Bob Ferrie, associate news editor, KABC, San Antonio; Marvin Broyles, program manager, and Francisco Paredes, news-caster, KCOR, San Antonio; Eddie Barker, newscaster, KMAC, San Antonio; Ray Hunt, news editor, Tommy Dee and Al Lacostie, newscasters, KONO, San Antonio; Bud Lutz, promotion manager, George Lee Marks, program manager, Col. William Niethamer, news staff, and Pat White, news editor, KTSA, San Antonio; Hugh Half, general manager, WOAI, Ken McClure, news director, Henry Howell, reporter, Jo Kemenho, news writer, and Hoxie Mundine, chief engineer, WOAI, San Antonio; Jim Stephenson, news editor, KRGV, Weslaco; Bowling Byers and Granville Price, department of journalism, University of Texas; and Major Ellsworth Chunn, journalism department, University of Tulsa.

The meeting was also attended by Major Walter J. Todd, Major A. E. Mealiff, Lt. R. E. Kennedy, Lt. Glenn Austin, Lt. Fred Bennignus and Lt. Alan Hopeman, U. S. A.

**N. Y. RADIO NEWS CLINIC IS BIG DRAW**

Elliott Stewart, chairman of the NAB up-state New York Radio News Clinic and executive vice-president WIBX, reports everything under control for next Wednesday’s 10:00 a.m. meeting at Hotel Utica.

Special invitations were sent to all up-state station managers and advance registrations point to a large attendance.

**IOWA NEWSMEN TO PERFECT SYSTEM OF ROAD AND WEATHER REPORTS**

Arrangements to perfect a system of regular weather and road reports for release over Iowa radio stations, (Continued on next page)
voted at the NAB-Iowa Radio News Clinic, in Cedar Rapids, March 22, are in the hands of H. R. Gross, news editor, KXEL, Waterloo.

Burlot Lottridge, vice president, WOC, Davenport, and general clinic chairman, for the record, confirmed the action of the Iowa stations in naming Mr. Gross chairman in a letter to him on March 27. Committee members are to be selected by Mr. Gross and, in turn, appointed by Mr. Lottridge.

The sixty members of Iowa's broadcast industry attending the clinic pledged their cooperation in carrying out the plan. The Iowa Highway Commission and the radio and reporting facilities of the Iowa State Highway Patrol are to be brought into the picture.

IOWA NEWSMEN FAVOR ASSOCIATION

Radio newsmen of Iowa stations found so much of value in the March 22 radio news clinic that they want similar meetings, periodically.

One suggestion was the formation of an Iowa Radio News Editors Association as a part of the Iowa Broadcasters Association.

District Meetings

7TH DISTRICT SCORES FCC REPORT

With five NAB District Meetings still in the offering, the entire membership of District 7, meeting in Cincinnati on March 28-29, joined broadcasters of three other Districts who have unanimously adopted resolutions protesting the right of the Federal Communications Commission to regulate the content of radio programs and control the policies of individual licensees. District 7 also petitioned NAB to seek immediate relief from the recent restrictions placed on construction of stations by the Civilian Production Administration, acting in conjunction with the National Housing Authority.

The District 7 protest against FCC's program attitude follows closely in the wake of similar action taken at scheduled meetings of Districts 11-8-9, held respectively at Minneapolis, Grand Rapids and Chicago. These four meetings are the first to be held since the issuance of the Commission's report "The Public Service Responsibility of Broadcast Licensees" which has evoked such widespread criticism of the Commission's apparent unrelenting tendency toward a censorial supervision of broadcasting.

"This question," District 7 broadcasters point out in their resolution, "involves basic considerations of Congressional intent and the question of free speech as guaranteed in the Constitution of the United States."

Unable to attend the meeting because of illness, James D. Shouse, WLW, 7th District Director, addressed a letter to his fellow members who attended the sessions, in which he expressed his regrets for his enforced absence and thanked J. Harold Ryan for presiding in his stead. Further thanks to Mr. Ryan were tendered in a resolution.

Pointing out that time changes involved in periodic daylight savings time adoption in various sections of the country work an especial hardship on stations located in the border zone between standard time zones such as Ohio and Kentucky, 7th District members urged that NAB exert every effort to the end that a national pattern be evolved for uniform time changes each year.

Text of the resolutions adopted, and a full list of those who registered during the Meeting follow:

"The recent report of the Federal Communications Commission entitled, 'The Public Service Responsibility of Broadcast Licensees,' raises the question of the power of the FCC to regulate the content of programs and control the policies of individual licensees. This question involves the considerations of Congressional intent and the question of free speech as guaranteed in the Constitution of the United States.

"Therefore the broadcasters of the 7th NAB District, comprising the licensees of stations in the states of Ohio and Kentucky, call upon the President of NAB and the executive officers of our National Association to apprise the record of broadcasters operating in the public interest; and to seek the route of quickest relief, if necessary before the Supreme Court of the United States."

"The broadcasters of the 7th District of the National Association of Broadcasters hereby petition the management of our National Association to seek immediate relief from the restrictions placed on construction of broadcast stations by the National Housing Authority.

"While it is recognized that any efforts looking toward the solution of the housing problem for veterans is to be commended in the highest terms, it is nevertheless true that such businesses as broadcasting cannot reach their full maximum of employment unless additional facilities can be constructed in the immediate future. This is especially true in a business faced with such new developments as FM, facsimile and television. The broadcasters hope that due consideration will be given the industry's problems of construction so that housing and employment may go hand in hand."

"The broadcasters of the 7th District of the NAB hereby pledge their support to our President, Justin Miller. We commend the constructive program which he has offered and pledge our wholehearted support in the attainment of the objectives of the National Association of Broadcasters."

"The 7th District of the National Association of Broadcasters urges all stations within the district to become members of B.M.I., and commend that organization for the progress they have made in organizing periodic station coverage studies. The stations of this district wish to extend to B.M.I. their fullest active support and cooperation."

"The broadcasters of the 7th District of NAB believe that the best interests of the industry can be served by maintaining B.M.I. at its highest degree of efficiency. We therefore urge all broadcasters to lend their most active support to B.M.I. and to check their program schedules so that increasing prominence may be given to B.M.I. numbers in their daily broadcasts."

"The broadcasters of the 7th District of NAB hereby extend their whole-hearted thanks to the broadcast stations of Cincinnati for the efficient arrangements which have been made to accommodate our meetings and to entertain our members while in their city."

"The broadcasters of the 7th District of NAB extend their sympathy to James D. Shouse, annek regret that he has been unable to be with us. We hope for his speedy recovery as his services on the Board of NAB as representative of this district are invaluable to the industry."

"Daylight Saving Time presents one of the most difficult problems in program scheduling to broadcast stations. This is especially true in the border zone between standard time zones, such as that occupied by the states of Ohio and Kentucky. The broadcasters of the 7th District of NAB therefore, urgently request its National Association to extend all efforts in securing a national pattern for the establishment of a uniform time in each time zone in the United States."

(Continued on next page)
“The broadcasters of the 7th District of NAB wish to take this opportunity to thank one of their members, Harold Ryan, for his unselfish action and substantial contributions to our National Association in serving as interim president during a most difficult time.”

50 KW STATIONS SHOW 60,981,196 TIME SALES

Total net time sales realized by licensees of the 53 standard broadcast stations of 50 kilowatt power located in the United States, for the year 1945, amounted to $60,981,196, according to preliminary reports submitted to the Federal Communications Commission. This was an increase of 4.3% over the 1944 total of $58,625,000.

Included in the net time sales reported for 1945 by the 53 stations was the amount of $21,772,835 which these stations received from the sale of station time to major networks. This amount was approximately 37% of the net time sales. (Continued on next page)

total payments made by the major networks to all affiliated
stations in 1945, and accounted for 35.7% of the net time
sales reported by the 53 stations.

Forty of the 53 stations reported increases, and 13 sta-
tions reported decreases, in net time sales for 1945. One
station reported an increase of more than $500,000; four
stations had increases of from $100,000 to $300,000, and
35 stations reported increases of less than $100 each. The
range of decreases was from $300 to $221,664 for the 13
stations so reporting.

NAB 7TH DISTRICT MAKES SURVEY ON
SALES MEN COMPENSATION

J. E. Willis, general manager WLAP, Lexington, Ken-
tucky, and chairman, 7th district sales managers com-
mittee, reports the findings of a study on salesmen’s com-
pen sation among radio stations in his district of Ohio
and Kentucky.

The majority of stations use the incentive pay plan,
paying salesmen either on a straight commission or salary-
and-commission basis, as follows:

<table>
<thead>
<tr>
<th>Payment Plan</th>
<th>Percent of Stations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Straight Commission</td>
<td>51.4%</td>
</tr>
<tr>
<td>Straight Salary</td>
<td>37.2%</td>
</tr>
<tr>
<td>Salary plus Commis sion</td>
<td>11.4%</td>
</tr>
</tbody>
</table>

The 35 stations reporting in the survey employ a total
of 85 salesmen, or an average per station of 2.43 sales-
men. These men are paid as follows:

<table>
<thead>
<tr>
<th>Payment Plan</th>
<th>Number</th>
<th>Percent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Straight Commission</td>
<td>47</td>
<td>55.3%</td>
</tr>

<td>Straight Salary</td>
<td>28</td>
<td>33.0%</td>
</tr>
<tr>
<td>Salary plus Commis sion</td>
<td>10</td>
<td>11.7%</td>
</tr>
</tbody>
</table>

The report on the number of salesmen employed by
individual stations is:

2 Stations employ 5 Salesmen each
4 Stations employ 4 Salesmen each
8 Stations employ 3 Salesmen each
14 Stations employ 2 Salesmen each
7 Stations employ 1 Salesman each

REALTORS RECOMMEND RADIO

The Committee on Realtor of the National Association
of Real Estate Boards recommends the use of radio to its
members in the March issue of its service bulletin. Here-
with are excerpts:

"During the past 10 years radio has become increasingly
important as a medium for Realtor promotional activities.
... Whether you decide on spot announcements or a pro-
gram, most Boards will find radio an excellent Realtor
promotional medium. Why not contact your local station,
or advertising agency, and make plans for boosting Realtor
through radio?"

ITEMS IN THE NEWS

Alabama broadcasters have elected two small market
station executives as officers of the Alabama Broadcasters
Association. John W. Buttram, WHMA, Anniston, and
M. L. Vickery, WMSL, Decatur, were named Vice Presi-
dent and Executive Committeeman respectively.

Allan Curnutt, manager WOSH, Oshkosh, Wisconsin,
is the new small market chairman for NAB District nine.
Mr. Curnutt replaces Ben A. Laird, who resigned the
management of WOSH and the chairmanship to further
plans for the construction of a new station.

FCC Wants More FM Receivers

Radio manufacturers expect to turn out almost 22,000,-
000 sets this year, the Federal Communications Commis-
sion reported Wednesday (3). This figure was based
on a survey of the probable production of 85 manufac-
turers, including all but four of the large producers.

The total set production reported is substantially larger
than the largest volume of radio receivers sold in any
prewar year. In 1941 the largest receiver sales up to
that date amounted to about 13,000,000 sets.

The companies reporting estimate that they will pro-
duce in the neighborhood of 1,800,000 FM sets. This
would be about nine percent of total set production.

TWENTY-TWO MILLION SETS EXPECTED IN '46

As of April 1, 1946, the Commission had received appli-
cations for 834 FM stations in addition to the 50 stations
now on the air. Also as of April 1, the Commission had
made 383 conditional grants to FM applicants. In the
light of the rapid progress being made for the develop-
ment of FM on the station side, the Commission hopes that
(Continued on next page)
manufacturers may revise their production schedules to include a greater proportion of FM receivers.

The commission Friday (5) officially denied a news agency report quoting an alleged FCC spokesman as saying, "that in view of the very few FM sets to be produced this year, it is hardly worth while for the broadcasters to continue with station construction plans."

"No person in any responsible position in the agency has made such a statement," the Commission declared. "The statement does not represent the views of the Commission. It is erroneous and gravely misleading."

"Far from discouraging broadcasters from continuing with their station construction plans, the Commission urges all of them to proceed with their plans with the greatest possible speed."

The following is a breakdown by type of receiver of the estimated production:

<table>

APPOINT NEW TREASURY RADIO CHIEF

Brent Gunts, effective today, is Chief, Radio Section, Treasury Department. He replaces Lt. David Levy, USNR, who expects to be out of uniform later this week.

Mr. Gunts was continuity chief, WFBR, Baltimore, before beginning nearly five years of army service. He began as a private and was discharged a major. His first promotion is to be a special June E-Bond campaign, Treasury's first peacetime effort, "Back Your Future."

Lt. Levy's last Treasury job is the Roosevelt Memorial Bond campaign of April 12. Announcement material is now in the hands of stations.

AMERICAN LIBRARY ASSOCIATION SURVEY

Station managers are urged to send their candid impressions of the utilization of radio by local libraries either through actual broadcast series or as a source for script writers and staff members. All replies will be treated in confidence. The material and information is to be used as background for a book to be distributed to libraries throughout the country. It is being written by Miss Frances G. Nunmaker, the Ohio Library Trustees Association, 1113 State Office Building, Columbus, Ohio.

The request for assistance was received from the American Library Ass'n by Dorothy Lewis, NAB Coordinator, 555 Fifth Avenue, New York. Your reply can be directed to the National Association of Broadcasters, New York office or to Ohio.

Research

BAKER ASSUMES DUTIES AS NAB DIRECTOR OF RESEARCH

Kenneth H. Baker, whose appointment as NAB Director of Research was announced recently by President Justin Miller (see NAB Reports, p. 204), assumed his new duties on Monday (1).

THANKS!

The Research Department is extremely grateful for the magnitude of the response to the recent questionnaire on the employment of musicians. Over 90% of those queried replied. The results have been tabulated and have proved invaluable. We hope we can count on a similar or better response to our requests in the future. In turn, we promise to ask only for information which we must have to be of service to the industry.

Ad Council—OWMR Allocations

PUBLIC INTEREST CAMPAIGNS—APRIL 15-21

The following three public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of April 15-21 by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Merchant Marine Officers Needed

There is still a critical need for licensed personnel to man our postwar merchant fleet. Mates and engineers are most urgently needed. No longer faced with the necessity of winning a war as an incentive to stay on the job, merchant seamen are quitting the sea. Point out the vital postwar role of the Merchant Marine and stress the fact that until it is carried out successfully, the job of the Merchant Marine will not be complete. Emphasize the fact that the Merchant Marine offers employment opportunities equal to those in any other industry today, and that the opportunities for a career in the postwar Merchant Marine are greater than seamen have ever known. Acknowledge the job the Merchant Marine did during the war but emphasize the magnitude and importance of the job still to be done. Specify the type of men needed—mates and engineers.

(Continued on next page)
engineers with licenses—or former servicemen with appropriate sea experience. Urge men with licenses and former servicemen who can qualify to apply at once by letter or collect wire to the Merchant Marine, Washington 25, D. C., giving addresses and qualifications. (Fact Sheet No. 21.)

**Famine Emergency**

(Repeat from last week)

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between now and July 1st, 50,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief and Rehabilitation Administration considers 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 3,250 calories per day.

Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The “have” countries, including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. One share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June.

Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions by—

Reducing their consumption of all wheat and rice products and fats and oils. . . . Eating more of the plentiful foods. . . . Eliminating all food waste and turning in all used fats. . . . Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20.)

**Help Keep Our Economy Stable**

In his recent report on the first 100 days of reconversion, President Truman concluded: “Inflationary pressures are still great, and danger signals pointing to a further building up through the winter and spring are the rise of real estate, wholesale and raw materials prices. We must continue to hold the line. We cannot permit inflation.” The greatest inflationary pressures we face today are those stemming from the unprecedented demand for and the short supply of (1) housing, (2) clothing, and (3) durable goods. Although rent control regulations still exist in most areas, the demand for housing is so great that people are tempted to ignore rent ceiling in their eagerness to provide shelter for themselves and their families. During the next few months the clothing supply will be the tightest since before the war, a situation that is made further complicated by thousands of newly discharged veterans who are unable to find even a minimum of civilian clothing in the stores. The durable goods picture is a trifle brighter—more refrigerators, automobiles, washing machines, vacuum cleaners, and television sets. Here again, however, the demand and purchasing power still exceed the supply and an inflationary black market is the potential result unless the public curb their desires to own the first of everything that appears on the market at all prices. Urge listeners to spend sensibly and to cooperate with all price and rent control regulations. (Fact Sheet No. 3.)

**The Veterans’ Assets**

The skills, education, and experience which our servicemen and women acquired in the armed forces—the know-how which proved deadly to the enemy in war—can be an invaluable asset to this nation in peace. Modern warfare requires a tremendous range of skills; if a recruit does not have a skill when he enters the armed forces, he acquires one through training in order to be able to do his part in the highly mechanistic, scientific, and engineering job which modern warfare is. In many instances the work served was done in the radar and electronics—was a projection of what business and industry are undertaking in this postwar period. Many veterans who have already returned to civilian life have discovered that their service experience can mean better jobs and greater responsibilities than they were able to assume before the war. Radio is now asked to help educate the general public, as well as employers, on the assets of the veteran as a citizen and an employee. Speak to employers and refer directly to the fact that thousands of employers who are employing veterans testify to the fact that these men are making good. Avoid invidious comparisons between servicemen and civilians. Explain how most service-acquired skills are directly related to civilian occupations, citing examples if possible. Point out that the skills, education and experience acquired by men and women in our armed forces will make them better citizens and more valuable employees than they were before.

**ELEVENTH ANNUAL FCC REPORT NOW ON SALE**

Requests for copies of this Report should be made directly to that agency, together with remittance.

---

**FM Department**

Issuing Report No. 800 (FM Broadcast) on Wednesday (3), the Commission announced therein that it has approved the basic engineering plans submitted by 9 more applicants for FM stations, thereby enabling them to place orders for transmitters and antennas and to make other engineering arrangements.

This makes a total of 24 applicants with approved engineering plans. In some cases antenna structures are subject to approval by the Civil Aeronautics Administration. Notification of the Commission’s action is being sent to each of these applicants, together with specific requests for further engineering information required by the Commission.

Previously, these applicants had been given conditional grants subject to further review of engineering details and program plans before further action by the Commission.

Following is the list of applications for which approval of basic engineering plans were granted. (Note: Power given is effective radiated power. Antenna height given is height above average terrain.)

J. E. Rodman, Fresno, Cal., rural; channel: 102.3 mc (No. 272); 69.5 KW; antenna: 1936 ft.

KOMA, Inc., Oklahoma City, Okla., rural; channel: 100.1 mc (No. 261); 243 KW; antenna: 485 ft.

(Continued on next page)
HEARINGS

The following broadcast hearings are scheduled to be held before the Commission during the week beginning April 8. They are subject to change.

Monday, April 8

Further Hearing

To Be Held in Washington, D. C.

NEW—Kenneth Kesterson and Charles Penix, a partnership d/b as Radio Engineering Service, Pine Bluff, Ark.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation. Amended: to change transmitter location.

1450 Kilocycles

NEW—Southern Broadcasting Co., Charleston, S. C. (P. O. 30 Broad St.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Eastern Idaho Broadcasting and Television Co., Pocatello, Idaho (P. O. Post Register Bldg., Idaho Falls, Idaho)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Edwin Mead, Miami, Fla. (P. O. 1000 Lincoln Road, Miami Beach, Fla.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

1460 Kilocycles

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Construction permit to change frequency from 1450 to 1460 kc., increase power from 250 watts to 5 KW, install new transmitter and directional antenna for day and night use and change transmitter location. Amended to change transmitter location and make changes in directional antenna.

1470 Kilocycles

NEW—Booth Radio Stations, Inc., Grand Rapids, Mich.—Construction permit for a new standard broadcast station to be operated on 1470 kc., power of 1 KW, directional antenna and unlimited hours of operation. Amended: to change transmitter location.

1480 Kilocycles

NEW—Carleton W. Morris, Douglas, Ariz.—Construction permit for a new standard broadcast station to be operated on 1480 kc., power of 1 KW, and unlimited hours of operation. Amended: to change frequency from 1480 to 1450 kc., decrease power from 1 KW to 250 watts and install new type transmitter.

1490 Kilocycles

NEW—Telegram Publishing Co., Salt Lake City, Utah—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended: to change frequency from 1490 to 1230 kc.

WCNN—Concord Broadcasting Corp., Manchester, N. H.—Modification of construction permit (11-P-1223, which authorized a new standard broadcast station) for approval to move transmitter and studio locations from Concord, N. H., to Manchester, N. H.

NEW—V. I. Rossi and John D. Rossi, d/b as Bee Broadcasting Co., Beeville, Texas (P. O. 513 Aransas St., Corpus Christi, Texas)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Manatee Broadcasting Co., Inc., Bradenton, Fla. (P. O. Bradenton, Fla.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—The Berkshire Broadcasting Corp., Danbury, Conn.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended: re changes in officers, directors, stockholders, change in transmitting equipment and change transmitter location.

NEW—Alfred Dorma, Statesboro, Ga.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended: to change transmitter and studio locations.

NEW—Charles R. Love, Calexico, Calif.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—James B. Littlejohn, Ogden, Utah—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended: to change frequency from 1490 to 1450 kc., decrease power from 1 KW to 250 watts and install new type transmitter.

(Continued on next page)
1510 Kilocycles

KGA—Louis Wasmer, Spokane, Wash.—Construction permit to increase power from 10 KW to 50 KW, install new transmitter, make changes in directional antenna for night use and change transmitter location.

NEW—The Times-Picayune Publishing Co., New Orleans, La. (P. O. 601 North) —Construction permit for a new standard broadcast station to be operated on 1560 kc, power of 500 watts night, 1 KW day and unlimited hours of operation. Amended: to change power from 500 watts night, 1 KW day to 30 KW day and night. Install new transmitter and directional antenna for day and night use and change transmitter location.

FM APPLICATIONS ACCEPTED FOR FILING

The Yankee Network, Inc., Boston, Mass.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #66, 101.1 mc. Amended: to specify coverage as 8,800 square miles, population as 3,621,368, type of transmitter, change transmitter location and make changes in antenna system.

Macomb Publishing Co., Mt. Clemens, Mich. (P. O. 67 Cass Ave.)—Construction permit for a new FM (Community) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined.

Pacific Coast Broadcasting Co., Pasadena, Calif. (P. O. 1401 South Oak Knoll)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by FCC and coverage to be determined.

Evangelical Lutheran Synod of Missouri, Ohio and other states, Clayton, Mo.—Construction permit for a new FM broadcast station to be operated on frequency and coverage not specified. Amended: to specify studio location, change type of transmitter and type of station as Metropolitan. Specify frequency to be assigned by FCC, coverage of 9,900 square miles and population as 1,703,827.

Thomas Garland Tinsley, Jr., Richmond, Va. (P. O. Broad-Grace Arcade)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #250, 97.9 mc and coverage of 10,200 square miles.

Frank Parker, Danbury, Conn. (P. O. Boulevard, Newtown, Conn.)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #255, 100.3 mc and coverage of 5,950 square miles.

Southwestern Hotel Co., Fort Smith, Ark. (P. O. 1233 Garrison Ave.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #256, 101.3 mc and coverage of 6,635 square miles.

A. J. Fletcher, Greensboro, N. C. (P. O. Box 1128 Raleigh, N. C.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #258, 98.5 mc and coverage to be determined.

Radio Station WISE, Inc., Asheville, N. C. (P. O. 100 College St.)—Construction permit for a new FM broadcast station to be operated on Channel #251, 91.0 mc and coverage of 13,300 square miles.

Tarrant Broadcasting Co., Fort Worth, Texas (P. O. 1201 West Lancaster St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #257, 99.0 mc and coverage of 13,300 square miles.

Dorothy S. Thackrey, Los Angeles, Calif.—Construction permit for a new FM (Rural) broadcast station to be operated on frequency to be determined by chief engineer of FCC and coverage to be determined.

Dorothy S. Thackrey, San Francisco, Calif.—Construction permit for a new FM (Rural) broadcast station to be operated on frequency and coverage to be assigned by FCC. Amended to specify studio location.

The Times-Mirror Co., Los Angeles, Calif.—Construction permit for a new high frequency FM broadcast station to be operated on 43.3 mc and coverage of 15,857 square miles. Amended: to change frequency from 43.3 to 96.9 mc, Channel #245 or such other frequency as assigned by Chief Engineer FCC, coverage from 15,857 to 27,900 square miles, change transmitter location, type of transmitter and antenna system.

John Gordon Studebaker and John Ward Studebaker, d/b a as Studebaker Broadcasting Co., San Diego, Calif. (P. O. 411 Biven St., Alexandria, Va.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by FCC and coverage of 950 square miles.

Stark Broadcasting Corp., Canton, Ohio—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #250, 101.9 mc and coverage of 9,330 square miles. Amended: to specify class of station as Metropolitan.

Bay State Broadcasting Co., New Bedford, Mass.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency as assigned by Chief Engineer FCC.

KMPH, The Station of the Stars, Inc., Los Angeles, Calif. (P. O. 5939 Sunset Blvd.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #241, 96.1 mc or as assigned and coverage to be determined.

The Braclow Co., Massena, N. Y. (P. O. South Main St.) —Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #226, 93.1 mc and coverage of 3,556 square miles.

Massachusetts Broadcasting Co., Boston, Mass.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #225, 91.7 mc or as assigned and coverage to be determined. Amended: to change frequency from Channel #19, 91.7 mc to Channel #225, 94.3 mc, change in antenna system, specify coverage as 8,200 square miles and population as 3,232,589.

Mattheson Radio Co., Inc., Boston, Mass.—Construction permit for a new high frequency (FM) broadcast station to be operated on 99.9 mc and coverage of 11,070 square miles. Amended: to change officers, directors and stockholders and change transmitter location.

Harvey Radio Laboratories, Inc., Cambridge, Mass.—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #21, 92.1 mc, and coverage of 5,290 square miles. Amended: to change officers, directors and stockholders, coverage from 5,290 square miles to 9,628 square miles. Change type of transmitter and make changes in antenna system.

Elia I. Godofsky, Hempstead, N. Y.—Construction permit for a new high frequency FM broadcast station to be operated with coverage of about 8,500 square miles. Amended: to change transmitter location and studio location, changes in antenna system, specify type of transmitter, type of station as community and frequency to be assigned by Chief Engineer FCC.

P. C. Wilson, Canton, Ohio (P. O. 1414 12th St. N. E.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be assigned by Chief Engineer FCC and coverage of 9,490 square miles.

The Alamo Broadcasting Co., San Antonio, Texas (P. O. 411 Biven St., Alexandria, Va.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by the FCC and coverage of 13,250 square miles.

L. J. Duncan, Leila Duncan and Josephine A. Rawls, d/b a as Valley Broadcasting Co., Lake City, Fla. (P. O. General Tyler Hotel, West Point, Ga.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on Channel #248, 97.5 mc, and coverage of 65.75 square miles.

Regents of the University System of Georgia, for and on behalf of Georgia School of Technology, Atlanta, Ga. (Continued on next page)

APRIL 8, 1946—287
TELEVISION APPLICATIONS ACCEPTED FOR FILING

W3XF—Philo Products Inc., Springfield Township, Pa.—Modification of construction permit (B2-PBV-148 as modified), which authorized a new experimental television broadcast station) for extension of commencement and completion dates from 10-1-45 and 4-1-46 to 1-1-46 and 10-1-46, respectively.

WNBT—National Broadcasting Co., Inc., New York, N. Y.—Construction permit to install new visual and audio transmitters and make changes in antenna system, and to specify frequency as Channel #3, 66 to 72 mc.

NEW—KSTP, Inc., St. Paul, Minn.—Construction permit for a new commercial television broadcast station to be operated on Channel #1, 50 to 56 mc., power of 4 KW (peak) Vis: Anc: 3 KW, ESR of 193. Amended to increase frequency from Channel #1, 50 to 56 mc., to Channel #5, 76 to 82 mc.

APPLICATIONS TENDERED FOR FILING

WPIC—Potomac Broadcasting Corp., Alexandria, Va.—Construction permit to increase power from 250 watts to 1 KW, install new transmitter and new antenna equipment. (730 kc.)

NEW—Oklahoma Agricultural and Mechanical College, Stillwater, Okla.—Modification of construction permit for a new standard broadcast station to be operated on 1700 kc., power of 10 KW and daytime hours of operation.

NEW—South Plains Broadcasting Co., Lubbock, Texas—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Southwest Iowa Broadcasting Co., Creston, Iowa—Construction permit for a new standard broadcast station to be operated on 1180 kc., power of 1 KW and daytime hours of operation.

NEW—WCBE, Inc., Eau Claire, Wis.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Tallahassee Appliance Corp., Tallahassee, Fla.—Construction permit for a new standard broadcast station to be operated on 1390 kc., power of 500 watts and unlimited hours of operation.

NEW—Thomas Maxie Self, John Eads Douglas, and Gordon Theodore Rund; a partnership d/b as The Progressive Broadcasting Co., Paragould, Ark.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Tallahassee Appliance Corp., Tallahassee, Fla.—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 250 watts and unlimited hours of operation.

NEW—Mary A. Petru, Soes N. Vratis, Gray R. Harrower, and Branch C. Todd, a partnership d/b as Port Arthur Broadcasting Co., Port Arthur, Texas—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

NEW—Kelly Bell, Nacogdoches, Texas—Construction permit for a new standard broadcast station to be operated on 1590 kc., power of 1 KW and unlimited hours of operation.

NEW—Lloyd E. Squier & William G. Ricker, d/b as Radio Station WDEV, Waterbury, Vt.—Consent to involuntary assignment of the license of Radio Station WDEV, to Lloyd E. Squier and Ernest C. Perkins, executor of the Estate of William G. Ricker, deceased. (1530 kc.)

NEW—Hollywood Broadcasting Co., Hollywood, Fla.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Broadcasting Foundation, Inc., Buffalo, N. Y.—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 50 KW, directional antenna and unlimited hours of operation.

NEW—WVLB, Inc., Brooklyn, N. Y.—Construction permit to increase power from 1 KW limited time to 10 KW unlimited. Install new transmitter and change transmitter location and install directional antenna for day and night. (1190 kc.)

NEW—KXO—Valradio, Inc., El Centro, Calif.—Consent to transfer of control of license corporation, Airfair Radio Corp., Ltd., to Paul A. Jenkins, Edith J. Jenkins, Imperial Valley Publishing Co., Kenneth H. Thornton, Harry Hovey and Mrs. Belle Hovey. (1230 kc.)

NEW—Paul F. McRoy, John H. Seering, Ann E. Seering, Southern Illinois Broadcasting Partnership, Carbondale, Ill.—Construction permit for a new standard broadcast station to be operated on 1020 kc., power of 250 watts and unlimited hours of operation.

NEW—Panhandle Broadcasting Corp., Amarillo, Texas—Construction permit for a new standard broadcast station to be operated on 1320 kc., power of 250 watts and unlimited hours of operation.

NEW—Elberton Broadcasting Co., Elberton, Ga.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—M. H. Amsden, d/b as Associated Broadcasters, Inc., in or near Kansas City, Mo.—Construction permit for a new standard broadcast station to be operated on 1220 kc., power of 250 watts and unlimited hours of operation.

NEW—High Seas Tuna Packing Co., Inc., Point Loma, San Diego, Calif., packer and distributor of fish, particularly tuna and mackerel, is charged in a Commission complaint with violating the brokerage section of the Robinson-Patman Act in connection with interstate sales of its products. (5428)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Mason Tackle—George W. Mason and Bruce B. Gee, co-partners trading as Mason Tackle, Otisville, Mich., stipulated with the Commission that they will cease representing that the tensile strength of the fishing tackle leader material sold under the name "Mason-Thitec" is greater than it actually is. (4149)

Oahu Publishing Co.—The Federal Trade Commission has accepted a complaint against the brokerage section of the Robinson-Patman Act in connection with interstate sales of its products. (5428)

Linda Sportswear Co.—Isaac Sonstiel and Gabriel Taboh, co-partners trading as Linda Sportswear Co., 1530 Broadway, New York, stipulated with the Commission that they will discontinue failing to disclose the rayon content of women's wearing apparel they sell. (4151)

(Continued on next page)
Smith Hatchery—The Commission has accepted from Melvin R. Smith, trading as Smith Hatchery, Caldwell, Idaho, a stipulation to cease and desist from advertising that baby checks he sells are "U. S. Certified" and "pullorum free." (4150)

CEASE AND DESIST ORDERS

No cease and desist orders were issued by the Commission last week.

COMPLAINTS DISMISSED

A complaint against Arch Lift Shoe, Inc., formerly in business at Providence, R. I., has been dismissed without prejudice by the Commission. The corporation and its officers had been charged with disseminating false advertisements concerning Arch Lift shoes and insole supports.

The Commission disposed of the matter after considering the respondents' answer to the complaint and their request for dismissal.

Participating in the decision: Chairman Ayres and Commissioners Ferguson, Freer and Mason.

Not participating: Commissioner Davis. (5402)

The Commission has dismissed its complaint charging P. Ballantine & Sons, brewers of Newark, N. J., with violation of section 7 of the Clayton Act by acquiring the capital stock of a competing corporation, Christian Feigenspan Brewing Co.

The Commission dismissed the complaint after considering the record in the case and the respondent's motion for dismissal.

Participating in the decision: Chairman Ayres and Commissioners Ferguson, Freer and Mason.

Not participating: Commissioner Davis. (5187)

The Commission has dismissed without prejudice its complaint charging Stewart-Warner Corp., Chicago, with misrepresentation in connection with the sale of lubricating oils.

The proceeding was disposed of after the Commission had considered the record in the case, including testimony and other evidence in support of and in opposition to the allegations of the complaint, the report of the trial examiner upon the evidence, and briefs filed by counsel for both parties.

All of the Commissioners participated in the decision. (5219)

A complaint charging Dad's Root Beer Co., 2800 North Talman Avenue, Chicago, with misrepresentation in the sale of root beer has been dismissed without prejudice by the Commission. The corporation has submitted satisfactory proof that it has discontinued the practices charged in the complaint.

The Commission dismissed the complaint after considering the testimony and other evidence in support of and in opposition to the allegations, the report of the trial examiner upon the evidence, and oral argument of counsel.

Participating in the decision: Chairman Ayres and Commissioners Ferguson, Freer and Mason.

Not participating: Commissioner Davis. (5111)

Today's conference results from the hour-long meeting last Monday between the Special Industry-wide Commit¬
tive MEET IN NEW YORK

NAB President Justin Miller and James C. Petrillo, President of the A. F. of M., will meet again today in New York, accompanied by three committee members each. With Judge Miller will be Frank White, CBS, Paul Mor¬

cussion to the establishment of such a group.

Mr. Petrillo in substance accepted the idea and suggested today's meeting with smaller groups to give detailed con¬

Mr. Petrillo in substance accepted the idea and suggested today's meeting with smaller groups to give detailed con¬

the establishment of such a group.

The meeting today will be the third time that Judge Miller and Mr. Petrillo have met at the conference table in an effort to work out a more reasonable basis for relationships between the radio industry and the musicians union. Their first meeting was an exploratory conference in Chicago last January 18th. At that time they agreed that there was need for further discussions between the two groups. A few days later Mr. Petrillo set the date for the meeting which took place last week.

At the beginning of last Monday's meeting, which was attended by the press with the mutual consent of both 
sides, Mr. Petrillo expressed the hope that there would be future meetings of a similar nature. Judge Miller, after making his suggestions for the improvement of the industry and union relations, invited Mr. Petrillo to outline the general position of the union for the benefit of the Broadcasters' group, many of whom had not had oc¬
cassion to meet or hear Mr. Petrillo in the past. The president of the A. F. of M. discussed the great contribu¬
tions which he said had been made to the radio industry by musicians, but indicated that he felt that many broad¬
casters had not utilized live musicians to a sufficient extent. He agreed with Judge Miller that it was desirable for the two groups to establish a more amicable relationship, and on several occasions expressed his confidence in President Miller.

In his initial remarks Judge Miller stated that the radio industry recognized the need for an adequate and readily available supply of competent musicians. He pointed out that in the near future NAB will establish a Program Department which will, among other things, suggest to station managers ways and means of improving and augmenting the use of their musical talent in strengthening their program structure. Aspects of this general subject, Judge Miller suggested, could appropriately be explored by the proposed Joint Advisory Committee.

While Mr. Petrillo agreed in principle with Judge Miller's proposal that a Joint Advisory Committee be established, he expressed concern with what he termed the "industry propaganda" against the Musicians Union and the "inspired press stories and cartoons" depicting him as a "czar" or "Caesar." He stated that he and the members of his union were Americans, intended to abide by the law, and were "getting tired of being pushed around."

A. F. of M. representatives present were: James C. Petrillo, President; Joseph N. Weber, Technical Advisor; Charles L. Barley, Vice-President; Thomas F. Gamble, Treasurer; Leo Cluesmann, Secretary; Oscar F. Hild, Herman Kenin, J. W. Parks, C. A. Weaver and Walter M. Murdoch, Members of International Executive Board; Joseph A. Padway and Henry A. Friedman, General Coun¬

LEA BILL AWAITS PRESIDENT'S SIGNATURE

The Lea Bill, which passed the Senate on April 6 by a vote of 47 to 3, now awaits the signature of President Truman before becoming law, having passed the House on March 29 by a 186 to 16 vote.

In a proposed decision dated April 5 (Docket No. 6755), the Commission tentatively denied the application for voluntary assignment of the license of Station WINS from Hearst Radio, Inc. to The Crosley Corporation. The Commission's proposed disapproval was based upon the fact that as part of the transaction Hearst retained the right to $400,000 worth of broadcast time for a period of 10 years, and the fact that Crosley had not made a sufficient showing with respect to the service to be provided. The Commission stated that if exceptions were filed on or before April 25 it would schedule oral argument for April 26 in order to render its final decision before May 1, the expiration date of the option to terminate the proposed sale.

The Commission found that Hearst agreed to sell WINS for $1,700,000 and that the physical assets had a present depreciated value of slightly more than $160,000. In addition, Hearst retained the right to $400,000 worth of broadcast time over a 10-year period. The Commission found that under the proposed sale agreement, Crosley was "saddled with the absolute obligation of furnishing" to Hearst approximately one hour of station time each day, and observed that this provision amounted to a delegation of control over the station's operations. Moreover, the Commission said that since the restrictive arrangement would continue for many years it was in conflict with the Communications Act which limited the maximum license period to three years. Alluding to its 1941 Report on Chain Broadcasting in which it concluded that public interest would be best served if licensees refrained from entering into network affiliation contracts for periods longer than a year, it concluded that in the present case the contract in which the transferor would absolutely retain a $400,000 time interest in the station "would prevent the transference from exercising that extent of program control which is necessary for operation in the public interest."

The Commission also found that an analysis of one week's program logs in February 1945 showed that 51 percent was devoted to commercial programs and 49 percent to sustaining. The records showed that WINS had operated at a loss during the period 1941-44, and expected to realize a small profit in 1945. Broadcast revenues for the 4-year period ranged from $248,974 to $436,539. Witnesses for Crosley testified that a fair rate of return would be 10 to 15 percent on the capital invested, and that a 10 percent return would not be realized until time sales reached a total of approximately $1,200,000. Crosley witnesses, the Commission stated, could not estimate any definite percentage limitation on commercial broadcasts nor make any commitment as to whether additional time would be set aside for sustaining programs. On these facts the Commission concluded that while it did not consider that "there should be detailed specifications or hard and fast restrictions," nevertheless the applicant's showing regarding the allocation of time for sustaining and commercial use is extremely ambiguous, with some indication that almost the entire program schedule might be devoted to commercial operation. Commissioners Walker and Durr concurred in the proposed decision but were of the opinion that there were further grounds for denying the application. They stated that the difference between the value of the physical assets and the price paid, and the fact that the station had been operating at a loss for many years, made it clear that "the purchaser is buying the station license." They also stated that the purchase price was so high that the purchaser could be expected to over-commercialize the station in order to make a small return.

On April 5 the Commission issued a proposed decision relating to the applications for licenses or construction permits to operate at Wilkes Barre, Pennsylvania, with 250 WAXT power, 10,000, on the same frequency now being used by WBAX (Docket Nos. 6169 to 6171, 6173, and 6750). It denied the applications of Central Broadcasting Co., Northeastern Pennsylvania Broadcasters, Key Broadcasters, and Baron Broadcasting Co., and granted the application of John H. Stenger, Jr., owner of WBAX, for a license to continue operation.

In a previous decision issued March 31, 1941, the Commission denied Stenger's renewal application on various grounds. Since that date the station operated on a series of temporary authorizations, the last of which is to expire on April 30. In June 1941 the other four mutually exclusive applications for construction permits were filed, and in July 1942 the Commission issued proposed findings granting the application of Northeastern Pennsylvania Broadcasting. These findings were abrogated in toto in the present proposed decision.

The Commission concluded that since the 1941 denial of the renewal application of Stenger the latter had "established himself as a responsible operator and has demonstrated his ability to provide an efficient management of the station." Since there is no provision in the Commission.
FOURTH DISTRICT MEETS AT VIRGINIA BEACH

In a speech opening the NAB Fourth District Meeting at Virginia Beach, Va., Thursday (11) Justin Miller charged the FCC with "attempting encroachment on the rights of free people to radio freedom."

He referred to the recent FCC program report as an attempt "to establish its powers by its own administrative interpretations." President Miller urged members to express their views to members of Congress on any pending issues affecting radio broadcasting.

Following Judge Miller's speech there were discussions of public relations, over which J. Frank Jarman, WDNC, presided, and employer-employee relations, presided over by District Director Campbell Arnowx, WTAR.

The afternoon session Thursday was devoted to a report on BMB by that organization's president, Hugh M. Feltis, a conference on small market stations, presided over by R. Sanford Guyer, and a conference on the "Unsolved Music Problem." President Miller urged members to press their views to members of Congress on any pending issues affecting radio broadcasting.

A program manager's clinic, discussion of the A. F. of M. situation, and the report of the resolutions committee completed the meeting Friday afternoon.

(Ed. Note: Complete reports of the meeting had not been received in Washington as NAB Reports went to press. Further material will be reported next week.)

Registration:
Abeloff, Irvin G., WLEE, Richmond; Adams, B. M., NBC, New York; Allen, Philip, WLVA, Lynchburg; Arnoux, Campbell, WTAR, Norfolk; Arnoux, Mrs, Norfolk; Aydlett, T. W., WSA, Portsmouth.
Carey, Sam, WRAV, Richmond; Carpenter, Ollie L., WPTE, Raleigh; Casey, Arthur J., WOL, Washington; Cheek, Howard L., WCHS, Charleston; Cheek, Mrs. Howard, Charleston; Clinton, Geo. H., WPAR, Parkersburg; Cooper, Virginia N., WJLS, Beckley; Crutchfield, H. W., WTAR, Newport News.
Danenberg, W. E., United Press, Atlantic; Dawson, Victor W., WFN, Fayetteville; Dodge, Fred, Fred A. Palmer Co., Cincinnati; Drew, A. L., WCBT, Roanoke Rapids; Dunlea, R. A., WMFD, Wilmington, N. C.
Edgar, Edward, New York; Eubanks, Blair, WTAR, Norfolk; Elias, Don S., WNNC, Asheville; Elias, Mrs. Don S., Asheville; Essex, Harold, WSSJS, Winston-Salem; Essex, Mrs. Harold, Winston-Salem; Evans, F. J., Huntington Bdst. Corp., Huntington.

McNamara, Fiday, WWIN, Washington; Mason, Richard, WPTF, Raleigh; Merey, Don, NBC (Recording), New York; Meyer, Ben, Associated Press, Charlotte; Millar, Judge Justin, NAB, Washington; Moore, James H., WSLS, Roanoke; Moser, Clyde, WTAR, Norfolk; Morris, R. S., WSO, Charlotte; Morris, Mrs. R. S., Charlotte; Moyle, Paul, WTSB, Lumberton, N. C.

Nelson, Wayne M., WEGO, Concord; Nelson, Mrs. Wayne M., Concord; New, John W., WTAR, Norfolk; New, Mrs. John W., Norfolk; Newman, Cy., WSSV, Petersburg; Newton, W. J., Huntington Bdst. Co.

Saumenig, J. Dudley, WIS, Columbus, S. C.; Sause, P. H., National Radio Repair, New York; Schmid, Dan, III, NBS-Recording, Atlanta; Schutt, Bill, Jr., CBS Network, New York; Seay, Henry V., WOL, Washington; Seebeck, Charles E., WTOS, Staunton; Shafer, Richard, WIS, Columbus, S. C.; Shaw, Harold B., WBRW, Welch, W. Va.; Sherwood, Alex, Standard Radio, New York; Shultz, Mrs. Alex, New York; Shultz, John W., WMVA, Martinsville; Shultz, Mrs. John W., Martinsville; Skinner, Sanford, M. M., Colte, Chicago; Smith, Carleton D., WRR, Washington; Smith, Mrs. Carleton D., Washington; Smith, George W., WWVA, Wheeling, W. Va.; Smith, Washington.

NEW CONSIDERATIONS IN GRANTING FM LICENSES
SUGGESTED BY SENATE COMMITTEE

In a twenty-one-page pamphlet issued Wednesday (9), the Senate Small Business Committee called upon the FCC to reserve a certain number of FM channels for allocation after veterans have an opportunity to apply and after a sufficient number of receivers have been sold to "make the enterprise feasible for modestly financed newcomers."

The report, entitled "Small Business Opportunities in FM Broadcasting," argues that if present practices are continued all of the desirable frequencies may have been handed out before veterans get a chance to compete with other applicants.

The FCC was also asked to take into consideration applicants' plans for future growth, and to take steps to popularize new developments in radio so that newcomers will be encouraged to enter the field. It urges FCC to keep the ownership of FM stations widely scattered so that no interests will monopolize these channels.

FCC Reply

On Thursday the FCC issued a special statement with respect to the committee's proposals. It reads as follows:

"The Commission agrees wholeheartedly with the objectives of the Senate Small Business Committee's report, which are the avoidance of monopolistic tendencies in FM broadcasting and the adoption of licensing policies which will foster wide diversity of ownership of FM stations so that 'there can be no cartelization in the media of public information and discussion.' The Commission also agrees with the Committee's conclusion that FM offers important opportunities to small business. This is particularly true of the low-power, low-cost Community stations.

"The Commission's specific comments on the Committee's three suggestions for achieving these goals are as follows:

"Suggestion 1:
That the Commission give careful attention to a plan whereby a certain number of FM channels be reserved for distribution after veterans have had a chance to organize their applications and after the number of receivers in the hands of the public make the enter-
prise feasible for modestly financed newcomers. The number of receivers now in use and in production is too small to make the venture immediately profitable. It is suggested that this reservation could be made most fairly on a city-by-city basis in the manner described in the section on "Tight Areas."

"While the Commission has not specifically reserved any channels from licensing at this time, it has been proceeding along lines which it believes are calculated to best achieve the objectives discussed above. In the first place, in making FM grants the Commission is presently proceeding on the basis of one to a customer. As is well known, there are numerous instances in the standard broadcast field where two or more stations are owned by a single person or corporation. Similarly in FM there are a number of instances where a single person or corporation has filed more than one application. In fact there are today almost 850 applications pending from 550 different applicants. The difference between these figures (300) is represented by instances where a single applicant has filed more than one application pending except the one from a multiple applicant.

"Thus, since V-J Day no applicant has received more than one FM grant without a hearing unless he offered to put service into a community which, on the basis of existing applications, would otherwise be denied FM service.

"After the Commission has processed all of the applications in these first two categories, namely one to a customer and cities without service, it will then make a thorough study of the situation to determine how it should proceed with the consideration of further applications. If at that time it should appear that the procedures outlined above have not already afforded an ample opportunity for newcomers to prepare and file applications, the Commission will consider ways and means of providing time for such further opportunity.

"As a result of the cautious policy which the Commission has been following in this regard, it appears there are more practically every area in which the Metropolitan frequencies have been assigned, and the large supply of the low-cost Community station operating assignments has hardly been drawn upon.

"Suggestion 2:
That the Commission give consideration, in weighing applications, to an applicant's plans for future growth as well as his present blueprints. Opportunity for expansion is the lifeblood of small business, and radio will benefit by the vigor and energy of those who enter on a small scale with ambitions to grow. Conversely, it will suffer if, during the next few years, it becomes merely the dumping ground for investment-thirsty capital accumulated in other fields. The section headed Opportunity for Business Growth describes a method of fostering the growth of FM stations from small beginnings.

"The Commission's policy of providing for future expansion of FM applicants was discussed by Assistant Chief Engineer John Willoughby at the Broadcast Engineering Conference in Columbus in March. This policy was further detailed in a statement issued by the Commission April 19, a copy of which is attached. There it was pointed out that the Metropolitan grantee would not initially be required to serve his eventual maximum area.

"In this connection, the Commission hopes that the report of the Senate Small Business Committee will stimulate even more and persons with modest financial resources to investigate fully the possibilities particularly of the Community class of station. This class of station does..."
not require extensive financing and offers excellent coverage and is far superior to the local class of station in the standard or AM broadcast band.

“Suggestion 3:

“That the Commission undertake to keep the public fully informed of the development of new communications devices; that it encourage the widest possible participation in their development; and that it provide information and assistance to prospective applicants, both in Washington and in its various field offices.

“Again the Commission is in full agreement with the Committee. In fact it has cooperated with the Committee in the preparation of a 100-page document entitled How to Apply for an FM Broadcast Station which contains all of the relevant information which a person seeking to enter the FM business needs to have. It is the Commission’s hope and we understand it is the Committee’s plan that a large number of these documents will be printed and that they will receive the widest possible distribution.

“With respect to the suggestion that the Commission provide information and assistance to prospective applicants, it has always been and now is the Commission’s policy, within the limit of the appropriations given it by Congress, to make its staff fully available for such purpose.”

Conclusions

Suggestions made by the Small Business Committee are quoted in the FCC statement above. The Committee’s conclusions are as follows:

“This year is crucial for FM. Upon the licensing policies pursued by the FCC depends the pattern of radio’s future. That pattern can conform to the American ideal of independent, competitive small-business enterprise, the ownership of which is so widely scattered that there can be no cartelization of the media of public information and discussion, or it can develop into a monopoly situation, in which large chains with concurrent interests in press, AM and FM regulate the spigots of our communications systems, and whole cities and States could be completely dependent upon a single company for news of their civic affairs.

“The difficult job of making the thousands of individual decisions which, in the aggregate will create this pattern, rests with the Federal Communications Commission.

“The Commission is thus given the affirmative power to preserve the meaning of the Bill of Rights in an age of electronics. It is also given the power to foster free, competitive business enterprise in radio.

“This committee is interested in the development of a democratic FM industry, the members of which are actively competing, through good program service, for the listener’s ear, the advertiser’s dollar, and the public’s franchise.

“In accord with the spirit of the Communications Act of 1934 this competition should always be kept open to newcomers.”

FCC WILL APPROVE INTERIM FM OPERATION WITH TEMPORARY EQUIPMENT

A number of inquiries have been received by the Federal Communications Commission from FM grantees concerning the use of temporary equipment pending approval and installation of regular equipment, in order to provide an FM program service as rapidly as possible.

The Commission Tuesday (9) reiterated its announce-ment that it will approve such interim operation by issuing temporary authorizations for operation with low power units and temporary antenna systems, pending the availability of full equipment and the completion of construction provided that the low power unit is a part of the final equipment, or has been previously authorized for use in experimental operation, and that a reasonable and satisfactory FM service will be furnished. Authorizations, the Commission said, will normally be issued for periods of 90 days or less upon requests from grantees describing the equipment and operation proposed, together with a statement concerning progress of regular construction. Authorizations will not be granted beyond the time of completion specified by the construction permit, and applications for extension of time of the construction permit must include a showing of diligence in construction and that failure to complete was due to causes beyond control of the permities.

In connection with the above, the Commission emphasized that the policy set forth in Section 3.204(b) of its Rules and Regulations Governing FM Broadcast Stations, issued September 12, 1945, will not be affected by the foregoing interim plan of operation.

In other words, stated FCC, applicants should understand the temporary character of the interim plan and that the Commission will expect full compliance with its Rules and Regulations at the earliest possible date.

Section 3.204(b) reads as follows:

“Metropolitan stations in Area II are designated primarily to render service to a single metropolitan district or a principal city, and to rural areas surrounding such metropolitan district or principal city. The Commission will designate service areas for Metropolitan stations in Area II and will authorize appropriate power and antenna height to cover the designated area in accordance with the Standards of Good Engineering Practice concerning FM broadcast stations; upon proper showing changes will be made in these service areas. Metropolitan stations will not be required to serve the entire service area designated by the Commission but no application will be granted for a Metropolitan station unless it is proposed to serve an area substantially greater than could be served by a Community station.”

FM APPLICATIONS GRANTED

The Commission en banc on Wednesday (10) made 10 additional grants for new FM stations, bringing the total to 385 conditional grants to date.

The effect of these conditional grants is to announce the fact that the Commission has examined the qualifications of the respective applicants, has been satisfied with respect thereto, and has made available a channel for each grantee. The Commission will now examine each application for its engineering details, and in each individual circumstance a grantee may be requested to file within a period of 90 days of such request such additional engineering and other data as may be necessary.

Under this procedure grantees are enabled to proceed

(Continued on next page)
promptly with their preliminary plans for obtaining certain items of equipment, programming and other details necessary to the establishment of their proposed stations. The proposals of each grantee relating to transmitter power and antenna height are still under review, and each will be notified if any further data is necessary in this connection.

Following are the grants made:

**DESIGNATED FOR HEARING**

P. D. Gold Publishing Co., Wilson, N. C.; Penn Thomas Watson, Wilson, N. C.—Ordered that the application of P. D. Gold Pub. Co. (B3-PH-817) and that of Penn Thomas Watson (B3-PH-829) be designated for consolidated hearing. Both request an FM metropolitan station.

Elyria-Lorraine Broadcasting Co., Elyria, Ohio—Ordered that this application (B2-PH-923) be designated for hearing in a consolidated proceeding with applications of United Broadcasting Co., et al (Dockets 7038-7052) for new FM metropolitan stations in the Cleveland and Akron areas.

**FINAL CP'S GRANTED**

The following six stations, which received engineering approval on March 13, were granted regular Construction Permits:

**Georgia**

Southeastern Broadcasting Co., Macon, Ga.—CP for Metropolitan station; Channel: 101.9 mc. (No. 270); 36.0 KW; Antenna: 437 ft.

Middle Ga. Broadcasting Co., Macon, Ga.—CP for Metropolitan station; Channel: 102.3 mc. (No. 272); 36.0 KW; Antenna: 441 ft.

**Iowa**

Burlington Broadcasting Co., Burlington, Iowa—CP for Metropolitan station; Channel: 99.3 mc. (No. 257); 19.2 KW; Antenna: 598 ft.

Telegraph Herald, Dubuque, Iowa—CP for Rural station; Channel 99.9 mc. (No. 260); 180 KW; Antenna: 662 ft.

**Minnesota**

KSTP, Inc., St. Paul-Minneapolis, Minn.—CP for Rural station; Channel: 102.1 mc. (No. 271); 318 KW; Antenna: 764 ft.

**Nebraska**

World Publishing Co., Omaha, Nebr.—CP for Rural station; Channel: 92.5 mc. (No. 223); 160 KW; Antenna: 584 ft.

**ENGINEERING APPROVAL OF CONDITIONAL GRANTS**

Following is a list of applications for which approval of basic engineering plans were granted by the Commission: (Note: Power given is effective radiated power. Antenna height given is height above average terrain): Radio Sales Corp., Seattle, Wash.—Rural; Channel: 93.5 mc. (No. 228); 14.7 KW; Antenna: 993 ft.

Queen City Broadcasting Co., Inc., Seattle, Wash.—Rural; Channel: 93.9 mc. (No. 230); 257 KW; Antenna: 1482 ft.

Evergreen Broadcasting Corp., Seattle, Wash.—Metropolitan; Channel: 95.1 mc. (No. 229); 9.6 KW; Antenna: 451 ft.

Fisher's Blend Station, Inc., Seattle, Wash.—Rural; Channel: 92.7 mc. (No. 224); 48 KW; Antenna: 1811 ft.

WXL, Broadcasters, Mt. Scott, nr. Portland, Ore.—Rural; Channel: 96.5 mc. (No. 243); 39.9 KW; Antenna: 952 ft.

Pacific Radio Advertising Service, a Partnership, Portland, Ore.—Metropolitan; Channel: 95.7 mc. (No. 239); 3.2 KW; Antenna: 911 ft.

KOIN, Inc., Portland, Ore.—Rural; Channel: 94.5 mc. (No. 233); 50 KW; Antenna: 1350 ft.

Oregonian Publishing Co., Portland, Ore.—Rural; Channel: 95.3 mc. (No. 237); 51 KW; Antenna: 1018 ft.

**Miscellaneous**

WSMB, Inc., New Orleans, La.—Approved conditional grant for a Metropolitan, possibly Rural station, subject to further review and approval of engineering details.

Fidelity Media Broadcasting Corp., Newark, N. J.—Approved conditional grant for a Community station, subject to further review and approval of engineering details.

**News Clinics**

**CONFERENCE ON STATIONS’ NEWS COVERAGE HELD AT UTICA**

Station managers and executives from upstate New York stations, with press association representatives as guests, gathered in Hotel Utica, Utica, April 10, for an all-day radio news clinic, first to be held in New York State by the NAB Radio News Committee.

Elliott Stewart, executive vice-president, representing Mrs. Margaret P. Bowen, president and general manager, (Continued on next page)
WIBX, was host to the broadcasters attending the clinic. At the request of Kolin Hager, NAB district director and general manager, WGY, Schenectady, Mr. Stewart acted as general chairman of the clinic.

Mayor Boyd E. Golder, of Utica, opened the session with a warm welcome to the broadcasters and a promise, taken up later in the day, to pocket any parking tickets the visitors might find on their cars. Mr. Stewart then turned the meeting over to E. R. Vadeboncoeur, vice-president, WSYR, Syracuse, and chairman of the NAB Radio News Committee who, with Arthur Stringer, NAB, secretary of the committee, conducted the clinic.

Discussion centered around minimum standards for the efficient operation of local news departments and the immediate necessity for broadcasters to move vigorously and thoroughly into the field of local news service. It was pointed out that this is doubly necessary now, since new FCC program log analyses classify straight telegraph news broadcasts as "wire" rather than "live" shows. In order to retain "live" classification for locally-produced news shows, more than half of the show must be produced by a station's own news department.

The clinic brought out general agreement that no station, no matter how small, can any longer carry on news activities with only a local reporter or a part-time news editor, as WGNY.

Decision to do a local news coverage job was one of the reasons advanced by FCC for a proposed decision to grant a CP in South Carolina to one of three applicants. Said the FCC release in part:

"The Commission has preferred Observer over Edisto for an additional reason. We believe that an essential function of a radio station's operations in the public interest should contemplate the gathering and broadcasting not only of national and state news received over one of the regular news wire services but also the gathering and broadcast of local news on a regularly scheduled news program. On the record, Edisto Broadcasting Company seems unwilling to assume that function. We do not believe that the business of dissemination of local news should be left solely to the local newspaper as proposed by Edisto, and we do not believe that the discharge of this function would prove unduly onerous to the owners of a radio station operating in Orangeburg."
FREEDOM OF RADIO COMMITTEE NAMED
Pursuant to a resolution adopted by the Board at its January meeting, President Miller last week appointed a "Freedom of Radio" Committee.

The Board action, calling for creation of a committee "to preserve freedom of radio," provided that the committee should be composed of the NAB president as chairman, the presidents of the four networks, a representative of the clear, regional and local channel and small market stations.

The committee is composed as follows: Justin Miller, chairman; Harold Hough, WBAP, representing clear channel stations; Henry P. Johnston, WSGN, regional stations; Eugene Curt, WPAY, local stations; James W. Woodruff, Jr., WRBL, small market stations; Mark Woods, ABC; Frank Stanton, CBS; Edgar Kobak, MBS; Niles Trammell, NBC.

It is expected that, among other things, this committee will establish a cooperative relationship with a similar committee appointed by the American Society of Newspaper Editors to "preserve freedom of news." An early meeting of the NAB committee is planned.

WILLARD SPEAKS TO ALABAMA BROADCASTERS AND BIRMINGHAM KIWANIS CLUB
A. D. Willard, Jr., Executive Vice President of NAB, spoke before a combined meeting of the Alabama Association of Broadcasters and the Kiwanis Club at Birmingham, Alabama, Tuesday (26).

The speech encompassed the history, the present, and the future of radio broadcasting. After discussing recent FCC efforts to establish its right to control programs broadcast by radio stations, Mr. Willard concluded:

"This industry will fight with all the heart and energy at its command any encroachment upon our fundamental rights—any attempt to shackle our free radio.

Complete text of the speech follows:

"I have no jokes today. The matters I want to discuss with you are of such importance that anecdotes would hardly set a proper stage. Therefore, I am going to ask you to bear with me through a talk which will be devoid of some of the best elements of showmanship—but I hope that you will agree with me, when I am finished, that the seriousness of the subject demands nothing less than the profound attention of every thinking American citizen.

"May I begin by very briefly reviewing a bit of history. Radio broadcasting in America, as we know it, is 25 years old. In that short span, it has grown from a fascinating plaything—a technical gadget—into the world's greatest medium of mass communication.

"Nurtured through the depression years, broadcasting has become one of the primary sparkplugs of our economic system. There are more than a thousand radio stations now in operation directly employing over 26,000 people fulltime and another 25,000 people, such as musicians and artists, part time. Indirectly, broadcasting is responsible for the employment of another 250,000 to 300,000 persons. Its manifold operations—broadcasting—the manufacture and distribution of sets—repairs—replacements —and power consumption, in normal years, add well to over a billion dollars to the nation's annual volume of business. This is an important transfusion pouring into the nation's economic veins from a brand new source—a source that will, in the memory of every man here, did not even exist.

"These are the hard, dry, bare-bone statistics of our industry. They do not take into account the enormous, uncalculated flow of business across the counters of America, engendered by the immense influence of radio's advertising appeals. The manufacture and sale of dozens of new products and hundreds of established items have been tremendously increased by the impact of radio's persuasive voice in their behalf. New horizons have been discovered—new desires created—new frontiers of production and distribution explored—and standards of living lifted as the direct result of broadcasting's master salesmanship. It seems to me that without saying—that advertising in general and radio advertising in particular will have a vital and expanded roll to play in America's future if we are to master the production and distribution problems implicit in our national hope for a high, healthy and prosperous society.

"I hope you will forgive the drab curtain of statistics that are necessarily the backdrop for this monologue, and I must ask you to bear with me through just a little more 'bad theater' while we change the setting and have a look at the foreseeable future of radio's probable dimensions.

The Future

"Experts generally agree that the war has advanced the science of electronics in the field of communications by more than a generation. Last October, the then Chairman of the Federal Communications Commission, Paul Porter, predicted capital expenditures and production in the broadcasting division of the communications field of more than five billions of dollars. Briefly, the prospective developments are these:

"FM—from 2,000 to 3,000 FM stations in the next few years and FM receivers numbering perhaps half the present number of radio sets, total expenditures by industry and public—some billion seven hundred and fifty million dollars.

"Television—based on responsible industry estimates—187 key cities will have television within five years. Television sets will be sold at the rate of two million five hundred thousand a year. Television stations—television sets—and the new coaxial cables and/or relays necessary to carry programs to television networks could easily account for expenditures by industry and consumers of well over two billions of dollars.

"Add to these the expenditures for our constantly expanding standard AM system (there were 521 applications and more than 400 are pending). I think it is safe to speculate that within three to five years, the business of broadcasting—and its sister art, television—may well employ an additional 50,000 people—and several hundred million dollars to the national payroll.

Size of Audiences

"There is still another dimension of radio and, indeed, it is a most important one—its audience—the people who listen to it—the people who have by their interest in it and their affection for it—made it the vital part of America which it has become.

"From 60,000 sets in 1922, radio set ownership increased a thousandfold to 60,000,000 sets in 1944. In this same year there were 36,544,000 families in the United States and 89 per cent of all these families, or 32,500,000 owned radios—55 per cent, or 20,100,000 owned automobiles, and 45 per cent—or 16,500,000 had telephones.

"This vast American audience—approximately one hundred million strong—bought sets—listens often—listens longer—listens in larger numbers—than the people of any other nation on earth. As a member of enter-
tainment, radio produces some startling results. For example, more people hear each single Sunday afternoon broadcast of the New York Philharmonic Orchestra than have heard it in its entire 103 years of concert hall playing. A single broadcast by Bob Hope is heard by as many people as heard all the radio news bulletins for all New York for the past three top attendance years. As a purveyor of news and information, radio has turned in a remarkable performance. A study by the Psychological Corporation, in November, 1942, disclosed that in all sizes of communities, people—regardless of age, sex or income—regarded radio as their prime source of war news. And, in March, 1946, the National Opinion Research Center of the University of Chicago found that 82 per cent of all listeners thought radio "fair" in giving both sides of an argument.

"I have said nothing of radio's war years and its contribution to America's war effort and its massive expenditures—except in this: radio's dollars and cents contribution exceeded the combined contributions of all the other mass media. The value of the skill, the energy and the heart which the people of radio contributed can never be calculated. Listeners recognized that contribution, too—when asked (in the same University of Denver survey I mentioned a moment ago) 71 per cent said they thought radio did the best job of all mass media "in serving the public during the war."

Freedom of Radio

"I have gone over these statistics—and I hope they have not been too uninteresting—simply because I want to point out a fact which some people seem now to be inclined to forget. America has incomparably the best radio broadcasting in the world—the only free and unfettered radio on earth—solely as the result of its phenomenal development under the stimulus of our free competitive system. Radio (like newspapers and magazines) is supported and its freedom and independence maintained by advertising revenues and these revenues are dependent solely on public acceptance and public goodwill. Either this support must be maintained or funds from other sources—government or groups—must be substituted for it. Dependence upon such handouts or largess would inevitably result in a servile radio system. The radio to which you listen today is free because it is financially independent. It can be kept free only if that position is maintained.

"Not long ago in a forum debate, Sydney Kaye, an attorney who represents many radio interests, put it in another way. 'The problem of freedom', said Mr. Kaye, 'cannot be divided into water-tight compartments with separate rules for freedom of speech, freedom of the press and freedom of radio. Maintenance of free speech in all fields is dependent upon the same factors. Our way of preserving freedom is the democratic system which is based upon an absolute prohibition against the control by government of the instruments of communication.'

Value of Advertising

"Now I want you to examine with me the historic relationship between freedom of speech and advertising. In its genesis, America's first mass medium—the newspaper—did not exist as we know it today. The very first American newspaper, called 'Pamphlet Occurrences', published in 1690, was suppressed after its very first issue—ostensibly because it wasn't licensed. Prior to 1750, you know, all newspapers (like radio today) had to be published by authority. They had to be licensed—which simply meant actual censorship by the Colonial governors of their henchmen before publication. These first newspapers were about the size of a letterhead printed on both sides—indeed, the Boston Newsletter—the first continuously printed newspaper—averaged only 40 words a page. While any number of early Colonial newspapers were suppressed, the Boston Newsletter kept its license which meant that it kept in line politically and, therefore, it stayed in business. In addition to censorship, there was another limiting factor: newspaper publishing was a working man or artisan of that period. Circulations averaged about 600 and 2,000 circulation was considered an enormous figure. These newspapers were financed by the government or by parties and, of course, they published only one side of the news, depending entirely on what served them. There was nothing in these early editions that would coincide with what we now call freedom of the press. Actually, not until the industrial and social revolutions which began in the first half of the 19th century and brought with them cheaper methods of paper making and printing did we have in this country the cheap, widely circulated, free and independent newspaper. It is a basic, historic fact and true today—that a newspaper which is unstable financially has less independence, less stamina, less ability to resist political pressures and commercial excesses. This American fact, together with the stake that we have in the profession of advertising—for advertising is the back-bone, the prop. of their freedom of the press and freedom of expression by radio.

Current Developments

"Now let us have a look at some current developments—public and governmental—which are giving a good many of us in the advertising, radio and allied professions some cause for genuine alarm—as well as a self-searching analysis of our relationship with you—the listener or reader.

"There has been growing for some years, in certain areas of the public mind and in certain government circles and administrative groups—a sharp and sometimes vicious criticism of the whole structure of advertising. This criticism falls most heavily on radio advertising for a number of reasons. First (and in this I want to be perfectly honest) because radio has been guilty of some commercial excesses and some practices that are admittedly in bad taste, but also because there are now those in government and in the agency which regulates radio, people who are apparently determined that you, the American listener—shall hear—not what you want to hear but, rather, what some individual or small group of individuals thinks you should hear.

"As it is, we in the radio industry feel that a thousand radio stations, most of which have a hundred or more advertisers represented by dozens of advertising agencies, all competing with each other for your attention, your listening and your affection, are bound by intelligent self-interest to offer the programs you want. This we must do just to live and you—the hundred million U. S. listeners—'vote' every fifteen minutes or half-hour for the programs you like and want by the simple turning of your dial. Programs which you dislike and to which you refuse to listen, soon fall by the wayside and are discarded because neither an advertiser or a radio station can exist without an audience. This is admittedly a slow process of correction but it is safe and it does protect our fundamental rights.

"Now it is a fact that our Bill of Rights protecting our freedoms is a succession of consecutive 'thou shalt nots'—for example, the first amendment says, 'The Congress shall make no law . . . abridging the freedom of speech.' It does not say that the Congress shall pass a law protecting the freedom of speech. Again, the Communications Act of 1934 itself, under Section 326, clearly states: 'Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station.'

FCC Report

"Despite these clear prohibitions, the Federal Communications Commission, in a so-called report, dated March 7, 1946, highlighted a number of examples of inadequate programming and over-commercialism and, using these scattered abuses as justification for its action, claimed that it had 'authority to concern itself with program service' and 'to determine an affirmative duty to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station.'

"And it has served notice on the radio stations of America.

(Continued on next page)
che that it proposes to take these matters into consideration in granting renewals of license. Despite the fact that every study of American listening habits indicates that they are the programs that our people like and want least—the Commission has additionally said that 'discussion programs', 'local live talent programs' and 'sustaining programs' will be given particular consideration in the issuing and renewing of broadcast licenses.

"With these proposals and with new and arbitrary definitions of what constitutes commercial and sustaining programs, the Commission has served notice that it intends to lay the clannish hand of government on the program structure of the American system of radio. Judge Justin Miller, President of the NAB, on March 11, made the following statement: 'The Report released by the FCC under date of March 7, 1946, concerning radio programming, reflects a philosophy of government control which raises grave questions of constitutionality. . . . Considered from every angle, the Report reveals a lack of faith in the American system of free radio and a desire to impose artificial and arbitrary controls over what the people of this country shall hear. . . . In this instance, as just in the issue of freedom of the press there can be no compromise.'

"In a later statement, Judge Miller added: 'Broadcasters must be aware that they are the protectors of the people's rights to a free radio just as the newspapers have, for a century and a half, jealously guarded the people's rights to a free press.

"These statements incorporate our guiding policy and I make you this pledge: This industry will fight with all the heart and energy at its command any encroachment upon our fundamental rights—any attempt to shackle our free American radio.'

**SHIP 1,250,000 RADIO SETS IN TWO MONTHS**

Manufacturers shipped 1,250,000 radio sets to distributive channels during January and February. This is in accordance with the official report on civilian production by the Civilian Production Administration.

Shipments for January were 550,000 units; for February 700,000. This later figure represented approximately 65 per cent of the prewar monthly rate of 1,100,000 sets.

**Broadcast Advertising**

**WHY BUSINESS MUST ADVERTISE**

From "NAB Manual of Radio Advertising," a series of articles by Frank E. Pellegrin, Director of Broadcast Advertising. Here are eight reasons why business must advertise:

**Because:** 1. Most consumers prefer to buy advertised brands, and to patronize those stores which make the best impression with their advertising. That is why the most successful and best-managed companies are among the most consistent advertisers.

**Because:** 2. Interests of consumers and business men are really the same in the end. Consumers want better goods, lower prices, and more efficient distribution. Business wants the benefits of greater sales volume, which it can get only by providing better goods at lower prices through more efficient distribution.

**Because:** 3. The result of advertising is greater production, more employment, higher wages and a higher standard of living for all.

**Because:** 4. Companies that advertise consistently do so because this gives them a quicker and more economical method of distributing goods, thereby saving time and money. Advertising is a low-cost form of selling, an important point for consumers as well as business men.

**Because:** 5. Advertising is the most effective and almost the only economical way to introduce a new product, improvements in old products, and new uses for existing articles.

**Because:** 6. Advertising is especially helpful in establishing trade-marks, which enable customers to know whose brand of merchandise they are buying and consequently what quality to expect.

**Because:** 7. Advertising promotes competition—the kind of competition that builds business, makes business strive harder to anticipate customers' wants, and to give them more for their money.

**Because:** 8. Business must advertise to maintain volume, payroll, dividends, profits; to protect its market for the future; to safeguard its routes of distribution; to build and hold goodwill.

**Small Market Stations**

**SMALL MARKET STATIONS EXECUTIVE COMMITTEE TO MEET**

Marshall H. Pengra, KRNR, Roseburg, Oregon, Chairman of the Small Markets Stations Executive Committee, has called a committee meeting for April 22, 23 and 24 at the Statler Hotel, Washington, D. C. This marks the first Executive Committee Meeting since J. Allen Brown was named last December to head NAB's Small Market Stations Division. Subjects of great importance to small market station operators will be covered in this session. The committee includes Chairman Marshall H. Pengra, KRNR, Roseburg, Ore.; Wayne W. Cribb, KHMO, Hannibal, Mo.; James R. Curtis, KFRO, Longview, Texas; Monroe B. England, WBRK, Pittsfield, Mass.; William C. Grove, KFBC, Cheyenne, Wyo.; Robert T. Mason, WMCR, Marion, Ohio; Glenn Marshall, Jr., WFOY, St. Augustine, Fla.

NAB Board Liaison Committee members working with small market stations are Chairman William B. Smullin, KIEM, Eureka, Calif.; Clair R. McColloough, WGAL, Lancaster, Pa.; Harry R. Spence, KXKO, Aberdeen, Wash.

**SPORTS BROADCASTING PROVES PROFITABLE FOR KFBC**

KFBC, Cheyenne, Wyo., has developed sports broadcasting on a commercial basis to a high degree, on a year-around basis. Starting in September, all Cheyenne high school football games, both home and away, are broadcast. Some of the out of town high school games are broadcast from points 250 miles away. The station also broadcasts all the University of Wyoming football games, a single game entailing a round trip of 1,000 miles.

Shortly after the end of the football season, basketball starts. During the past season KFBC carried play-by-play accounts of nearly 100 basketball games ending with the National AAU Tournament from Denver, the last game being played on March 23rd. Three series of basketball games were carried in their entirety—Cheyenne High School regular season, regional, and state play-offs; American Basketball League games; University of Wyoming Big 7 Conference in addition to the AAU.

With the beginning of National League baseball, KFBC will start one telegraphic re-creation per week which will wind up with the world series over the Mutual network.

The Cheyenne station sells each game cooperatively to 6 local accounts. The sponsors are mentioned at the beginning and end. The time-out periods are devoted to

(Continued on next page)
broadcasts. William C. Grove, Manager of KFBC, reports an outstanding sports service in the public interest. Local firms are enthusiastic about the station's coverage of these events and usually sign up for the entire series. Every sponsor has shown complete satisfaction in the broadcasts. This small market station's revenue from sports broadcasting alone has grossed approximately $30,000.

KFBC sports crew travels approximately 5,000 miles a year for this coverage. In case of time conflict where two games are played simultaneously, the Cheyenne station broadcasts a local game "live" and transcribes the out of town game for a playback immediately following the local game.

The station management reports that this is a most successful promotion, in that the intense local interest in sports, which has been largely created by KFBC extensive coverage for five years, results in unusually high listener ratings.

KFBC, Cheyenne, Wyo., is a 250-watt affiliate of the American Broadcasting Company. William C. Grove, Station Manager, is a member of the NAB Small Market Stations Executive Committee.

**Television**

**APPLICATION PROCEDURE ANNOUNCED**

The Federal Communications Commission Thursday (11) announced the following procedure for the handling of commercial television applications. Conditional grants will not be issued where applications are incomplete as has been the practice in FM broadcasting.

1. Complete applications—Applications now on file which are complete under either the new or old engineering standards will be considered. An application will be considered complete even though it does not answer completely all questions pertaining to equipment. These parts may be supplied later if information is not now available from the manufacturers of equipment. Specifically the equipment items referred to are the following numbered paragraphs in Form 330: Paragraphs 18, 19, 20, 21, 22, 23, 24(a) (6) and (g). If applications are not current regarding financial or other matters that relate to the qualifications of the licensee including the manner in which it is proposed to provide the 28-hour program service per week as required under the Commission's Rule 3.661, these matters should be brought up to date.

2. Incomplete applications—An examination of the file of pending applications indicates a high percentage of the applications are incomplete. Applications under this category must be completed before they will be given consideration. Applicants who know they have incomplete applications on file should proceed to complete them within the next sixty days. In the case of applications found incomplete at the time of processing, the applicant will be requested to furnish additional information within thirty days, Those that are not complete at that time will be dismissed. Applications should be brought to completion under the new Standards of Good Engineering Practice concerning Television Broadcast Stations adopted December 19, 1945.

3. Applications set for hearing—In order to give the Commission's Engineering Department an opportunity to study the issues involved in advance of the hearing, it is requested that sections of the applications dealing with antennas, transmitter sites and coverage (including radials) be submitted at least ten days in advance of the hearing, using the new standards as a basis for all computations.

**Engineering**

**POTOMAC AREA TO HAVE RADIOTELEPHONE TESTS**

The Federal Communications Commission Wednesday (10) granted authority to Frank C. Mallinson, trading as National Electronics Laboratories, to construct a Class 2 experimental land station at 815 King Street, Alexandria, Virginia, and to install 25 portable mobile units, to experiment for the purpose of inaugurating "a system which will provide two-way radiotelephone service for automobiles owned by doctors, nurses, taxicabs, ambulances, buses, public service trucks, and other bona-fide carriers."

The applicant stated that "such a service would enable a user to communicate with his office, hospital, headquarters, or in turn to be called by same. All communications would be handled through the land station which will maintain 24-hour service." The applicant proposes to offer the service in Virginia, Maryland and the District of Columbia.

The land station was temporarily assigned the frequency 30.56 megacycles, with 250 watts power, special emission for frequency modulation, and the mobile station was assigned 39.54 megacycles on a temporary basis, with 20 watts power, special emission for frequency modulation.

The authorization prohibited the use of these stations for the rendition of any communication service for hire. However, the applicant would be permitted to charge the user an installation fee of $25 for the time and labor involved in installing equipment in a vehicle and to make a moderate charge for replacing any parts or tubes.

Heretofore, all experimental authorizations in the common carrier general mobile service which have been authorized by the Commission were made to organizations which are already established in providing common carrier communications for hire, and this is the first application presented to the Commission for consideration by a person not already established in this business.

**Ad Council—OWMR Allocations**

**PUBLIC INTEREST CAMPAIGNS—APRIL 22-28**

The following four public interest campaigns have been given top priority on network radio allocation plans during the week of April 22-28 by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each fact sheet is given below:

**Help Keep Our Economy Stable**

Inflationary pressures are still great, and danger signals pointing to a further building up through the spring are the rise in real estate, wholesale, and raw materials prices. We must continue to hold the line. The greatest inflationary pressures we face today are those stemming from the unprecedented demand for the short supply of (1) housing, (2) clothing and (3) durable goods. Although rent control regulations still exist in most areas the demand for housing is so great that people are tempted to ignore rent ceiling in their eagerness to provide shelter for themselves and their families. During the next few (Continued on next page)
Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spread of drought of world-wide dimensions has wreaked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief and Rehabilitation Administration considers 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 3,360 calories per day.

Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The "have" countries, including the United States, are the only ones that can halt death by starvation this Spring. Even certain "importing" countries are already helping to the limit of their ability. Estimated world needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. Our share of the remaining deficit of nine million tons is already up to as much as we can voluntarily reduce their consumption of wheat products drastically during the months of April, May and June.

United States Savings Bonds

As a result of the United States Treasury's decision to extend its wartime bonds and stamp program into the peacetime era, individuals can now continue to purchase bonds paying the same rate of interest as those sold during the war. These securities, now known as U. S. Savings Bonds and Savings Stamps, will include the war-time F and G bonds as well as the popular Series E bonds which return four dollars for every three invested, when the bonds mature. The success and convenience of the Payroll Savings Plan during the war years have resulted in its continued maintenance by business and industry throughout the nation. The high rate of interest of U. S. Savings Bonds, their sound investment values and their ready availability offer the individual investor the ideal way of saving for the future. Radio can perform a valuable service to its listeners by informing them of (1) the continued sale of U. S. Savings Bonds and Stamps; (2) their availability through the Payroll Savings Plan and other regular purchase facilities and (3) their many advantages as an investment. (Fact Sheet No. 11.)

Federal Communications Commission Docket

HEARINGS

The following broadcast hearings are scheduled to be held before the Commission during the week beginning Monday, April 15. They are subject to change.

Monday, April 15

NEW—WCAE, Inc., Pittsburgh, Penna.—For FM facilities.
NEW—Allegheny Broadcasting Corp., Pittsburgh, Penna.—For FM facilities.
NEW—West Virginia Radio Corp., Pittsburgh, Penna.—For FM facilities.
NEW—Pittsburgh Radio Supply House, 1406 Chamber of Commerce Bldg., Pittsburgh, Penna.—For FM facilities.
NEW—Butler Broadcasting Co., David H. Rosenboom, tr/a.s Butler, Penna.—For FM facilities.

(Continued on next page)
Federal Communications Commission Actions

APPLICATIONS GRANTED

NEW—Mitchell C. Tackley, tr/ as North Country Broadcasting Co., Malone, N. Y.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time. (B1-P-4568)

NEW—Madisonville Broadcasting Co., Inc., Madisonville, Ky.—Granted construction permit for a new station to operate on 730 kc., 250 watts, daytime only. (B2-P-4501)

NEW—Middlesboro Broadcasting Co., Middlesboro, Ky.—Granted construction permit for a new station to operate on 1450 kc., 250 watts, unlimited time. (B2-P-4536)

NEW—Lee Broadcasting Corp., Sanford, N. C.—Granted construction permit for a new station to operate on 1630 kc., 1 KW, daytime. (B3-P-4540)

(Continued on next page)
NEW—James J. Murray, Lewisburg, Tenn.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time. (B3-P-4494)

NEW—Hillie A. Arlette, Lauric, Jacksonville, Texas.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time. (B3-P-4559)

NEW—James C. Wallentine, d/b as The Uintah Broadcasting Co., Vernal, Utah.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time. (B5-P-1592)

NEW—Mosby, Inc., Anaconda, Mont.—Granted construction permit for a new station to operate on 1230 kc., 250 watts, unlimited time. (B5-P-4511)

NEW—Alaska Broadcast Service, a partnership composed of Leonard R. Trubner and Richard H. Shirk, Hot Springs, N. Mex.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time. (B5-P-4558)

NEW—Walla Walla Broadcasting Co., Walla Walla, Wash.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time. (B5-P-4595)

NEW—Sun Country Broadcasting Co., Phoenix, Ariz.—Granted construction permit for a new station to operate on 1450 kc., 250 watts, unlimited time. (B5-P-4523)

NEW—Meridian Broadcasting Co., Meridian, Miss.; Duke H. Thornton, Philadelphia, Miss.—Upon consideration of a petition of the Meridian Broadcasting Co. for reconsideration and grant of its application of the Commission for a hearing, or in the alternative for such other reliefs as may be considered appropriate under Sec. 1.383 of the Commission's Rules, the Commission ordered that the application of Meridian Broadcasting Co. be granted, pursuant to Sec. 1.383 of the Commission's Rules, contingent upon its acceptance of the assignment of the frequency 1490 kc., the filing within 20 days of an application specifying that frequency with 250 watts power, unlimited time, and subject to approval of transmitter site and the CAA approval of antenna system; and further ordered that application of Duke H. Thornton (B5-P-4494; Docket 7375), to operate on 1450 kc., 250 watts, unlimited time be granted, subject to approval of transmitter site and CAA approval of antenna site; and granting construction permit for a new station to operate on 1230 kc., 250 watts, unlimited time. (B5-P-4417; Docket 7376), to operate on 1450 kc., 250 watts, unlimited time be granted, subject to approval of transmitter site and CAA approval of antenna site; and further ordered that application of Duke H. Thornton (B5-P-4419; Docket 7376), be granted, pursuant to Sec. 1.383 of the Commission's Rules, contingent upon its acceptance of the assignment of the frequency 1490 kc., the filing within 20 days of an application specifying that frequency with 250 watts power, unlimited time, and subject to approval of transmitter site and the CAA approval of antenna system; and further ordered that the hearing scheduled to begin on June 3 on these two applications be canceled.

NEW—Illmo Broadcasting Corp., Quincy, Ill.—Granted construction permit for a new station to operate on 1230 kc., 250 watts, unlimited time. (B1-P-4490)

NEW—Parish Newspapers, Inc., Paducah, Ky.—Granted construction permit for a new station to operate on 800 kc., 1 KW, daytime only. (B2-P-2344)

NEW—The Island Broadcasting Co., Honolulu, T. I.—Granted construction permit for a new station to operate on 630 kc., 5 KW, unlimited time. (B1-P-4444)

ACTION IN DOCKET CASES

The Federal Communications Commission announces its Proposed Decision (B-239) concluding that the application of Great Northern Radio, Inc., for a new station at Glens Falls, New York, to operate on the frequency 1450 kc., 250 watts power, unlimited time, should be granted, and the application of Glens Falls Broadcasting Corporation seeking the same facilities should be denied. The construction permit to be issued to Great Northern Radio, Inc., will be conditioned upon the filing of an application for modification of permit specifying exact transmitter site and antenna system and further conditioned on the installation of an approved modulation monitor when available. (Dockets 6892 and 6702)

The Commission announces its Proposed Decision (B-241) concluding that the application of Observer Radio Company for a new station at Orangeburg, South Carolina, to operate on 1450 kc., 250 watts, unlimited time, should be granted, and the applications of Orangeburg Broadcasting Corporation and the Edisto Broadcasting Company, seeking the same facilities, should be denied. The grant of the application of the Observer Radio Company is contingent upon the filing within 30 days from the date of the proposed decision of an application specifying a transmitter site and antenna system which will comply with the Commission's Standards of Good Engineering Practice. The provisions of Sections 3.35(b) and 3.60 of the Commission's Rules as applied to the grant herein proposed are waived to permit use of a cathode ray oscillograph as a modulation monitor and to permit operation without a frequency monitor (using commercial checks) until frequency monitors type-approved by the Commission are available. (Dockets 6758, 6754, 6801)

The Commission announces its Proposed Decision (B-242) concluding that the application of A. C. Neff for a new station at Savannah, Georgia, to operate on 1400 kc., 250 watts, unlimited time, should be granted, and the applications of the Atlantic Broadcasting Company and the Chatham Broadcasting Company for a new station at Savannah, Georgia, to operate on 1400 kc., 250 watts, unlimited time, should be denied. The grant of the application of the Observer Radio Company is contingent upon the filing within 30 days of an application specifying the exact antenna system and transmitter site and the installation of approved frequency and modulation monitors when available. The provisions of Sections 3.35(b) and 3.60 of the Commission's Rules as applied to the grant herein proposed are waived pending installation of approved monitors.

ACTIONS ON MOTIONS

Marion Radio Corp., Marion, Ind.—Granted petition for leave to amend its application (Docket 7349) so as to specify exact transmitter site, etc., and the amendment was accepted.

Midwest Broadcasting Co., Mount Vernon, Ill.—Granted petition for leave to amend its application (Docket 7369) so as to specify 1 KW instead of 500 watts power, add revised engineering data, etc., and the amendment was accepted.

Westchester Broadcasting Corp., White Plains, N. Y.—Granted motion to dismiss without prejudice its application (B1-PCT-75; Docket 7244) for a new commercial television station.

United Garage and Service Corp., Cleveland, Ohio—Granted petition for leave to amend application for new FM station (Docket 7041), so as to specify a Community instead of a Metropolitan station in Cleveland; to amend engineering and program data in conformity therewith; the amendment was accepted and the application removed from hearing docket.

Dickinson Publishing Co., Dickinson, N. Dak.—Granted petition for leave to amend its application (Docket 7480) so as to specify the frequency 1450 instead of 1230 kc. The amendment was accepted and application removed from hearing docket.

Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Cal.—Granted petition requesting dismissal without prejudice of its application for a new commercial television station. (B5-PCT-106; Docket 7201)

Marcus Loew Booking Agency, New York City—Granted petition for leave to amend its application (B1-PCT-76; Docket 7247) for a new commercial television station.

Butler Broadcasting Co., Butler, Pa.—Granted motion to amend its application (Docket 7208) so as to specify a Community instead of a Metropolitan station; the amendments were accepted and application removed from the hearing docket.

Green Bay Broadcasting Co., Green Bay, Wisc.—Granted petition for leave to amend its application (Docket 7236) so as to specify the frequency 1490 kc., instead of 1450 kc., for a new commercial television station, so as to specify a Community instead of a Metropolitan station; the amendments were accepted and application removed from the hearing docket.

Evening News Assn., Detroit, Mich.—Motion to amend and remove from the hearing docket its application for a new television station, was withdrawn.

Peach Bowl Broadcasters, Yuba City, Cal.—Granted petition insofar as it requests leave to amend its application for a new television station, was withdrawn.

Australina Broadcasting Corp., Mexico, Mo.—Granted petition requesting leave to amend its application for a new television station, was withdrawn.

(Continued on next page)
station (Docket 7453), so as to change transmitter site; to supply detailed data in re city area to be served, etc., and the amendment was accepted.

Don Lee Broadcasting System, Hollywood, Cal.—Granted petition requesting leave to amend its application for new television station CP (Docket 7256), so as to change its transmitter site, to change Channel No. 2, etc., and the amendment was accepted.

Liberty Broadcasting Co., Pittsburgh, Pa.—Granted petition requesting leave to amend application for new FM station (Docket No. 7265), so as to supply engineering data relative to proposed service area, etc., and the amendment was accepted.

Hughes Productions, Div. of Hughes Tool Co., San Francisco, Cal.—Granted motion for leave to take depositions and admit Palmer Bradley of Houston, Texas, a member of the bar of the State of Texas, to the bar of the F.C.C. pro hoc vice, for the purpose of taking depositions at Houston on May 2, on behalf of Hughes Productions application for television station (Docket 6371).

Hughes Productions, Div. of Hughes Tool Co., Los Angeles—Granted motion for leave to take depositions and admit Palmer Bradley of Houston, Texas, a member of the bar of the State of Texas, to the bar of the F.C.C. pro hoc vice, for the purpose of taking depositions at Houston on May 2, on behalf of Hughes Productions application for television station (Docket 6371).

Franklinarkin Hardy, Danbury, Conn.—Granted motion to dismiss without prejudice his application (Docket 6977) for a new station.

Alton Broadcasting Co., Alton, Ill.—Granted motion to dismiss without prejudice his application for a new station (Docket 7447), subject to the right of petitioner to request resubmission of its application pursuant to the Commission’s January 5, 1946, Public Notice.

West Va. Radio Corp., Pittsburgh, Pa.—Granted motion requesting leave to amend its application for a new FM station (Docket 7206), so as to specify a transmitter site and a definite channel, etc., and the amendment was accepted.

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.—Granted petition for leave to amend its application for a new station (Docket 7572) so as to specify the frequency 880 kc. with power of 10 KW day, 5 KW night, instead of 1420 kc., with 5 KW day and night; to specify new transmitter site, etc.; the amendment was accepted, and the Commission on its own motion, removed the application from the hearing docket.

KASA—Southwest Broadcasting Co., Tulsa, Okla.—Granted petition insofar as it requests leave to intervene in the hearing on application of Altus Broadcasting Co. for a new station at Altus, Okla. (Docket 7458); denied petition insofar as it requests inclusion of an additional issue in hearing notice in re this application.

O. E. Richardson, et al., d/b as Radio Station WJOB, Hammond, Ind.—Granted petition insofar as it requests leave to amend its application for new FM station (Docket 7407), so as to change location of proposed station from Chicago to Hammond, Ind. Ind. No. 265, etc., and the application as amended, was removed from the hearing docket.

Harry F. Guzgenheim, Bridgeport, Conn.—Granted motion for leave to amend application for a new FM station, so as to include with the application a verification relative to financial qualifications of applicant, and the amendment was accepted. (Docket 7464)

WLAP—American Broadcasting Co., Lexington, Ky.—Granted petition requesting re-opening of the record in re (Docket 6973), for the purpose of filing certain engineering exhibits and extension of time for filing proposed findings. The record was reopened and time for filing proposed findings in this proceeding extended to April 22, 1946.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted petition to intervene in the hearing on application of Syndicate Theatres, Inc., Columbus, Ind., and Universal Broadcasting Co., Inc., Indianapolis, now scheduled to be heard in Washington on April 29.

Eagle Printing Co., Inc., Butler, Pa.—Granted motion for leave to amend its application for a new FM station (Docket 7205), so as to specify a Community station instead of a Metropolitan station; the amendment was accepted and application removed from hearing docket.

WCAE, Inc., Pittsburgh, Pa.—Granted motion for leave to amend its application for a new FM station (Docket 7208), so as to change paragraph relative to channel requested, etc., the amendment was accepted and Sec. 1.254 of the Commission’s Rules was waived.

Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted petition requesting leave to amend its application for a new FM station to show revised information in initial installation costs, etc., the amendment was accepted and Sec. 1.254 of the Commission’s rules waived.

Press-Telegram Inc.—Granted petition requesting extension of time within which to file written appearance in the matter of (Docket 7446) application for special temporary authority to communicate with Montreal, Canada, for handling transiting press and government traffic, and an extension was granted to April 26 within which to file a written appearance.

Adelaide Lillian Carroll, Wichita, Kans.—Granted petition requesting leave to amend her application (Docket 6852) so as to substitute KCLC Broadcasting Co., Inc., as the applicant in lieu of Adelaide Lillian Carroll, et al., d/b as Radio Station WJOB, etc.

KOVO—Boulevard Broadcasting Co., Provo, Utah; KROW, Inc., Oakland, Calif.—The Commission on its own motion, continued the hearing on these applications now scheduled for April 12 to April 23.

DESIGNATED FOR HEARING

WTOL—Community Broadcasting Co., Toledo, Ohio—Adopted an order designating for hearing the application of WTOL (B2-P-1672), for change in facilities from 1350 kc., 500 watts, unlimited time, to 970 kc., 5 KW, DA-night, unlimited time, in a consolidated proceeding with applications of Skylands Broadcasting Corp. (Docket 7345), requesting 980 kc., 5 KW, with DA, unlimited time at Dayton; and Ohio-Mich. Broadcasting Corp. (Docket 7346), requesting 980 kc., 5 KW, with DA for nighttime use at Toledo; further ordered that the Bills of Particulars hereon issued, in connection with these applications, be amended to include application of WTOL.

Sun River Broadcasters, Inc., Great Falls, Mont.; KGVO—Mosby’s, Inc., Missoula, Mont.—Adopted an order designating for hearing of Sun River Broadcasters (B5-P-1490) for a new station to operate on 970 kc., 5 KW, DA-night, unlimited time, in consolidation with application of Mosby’s, Inc. (KGVO), to change facilities from 1290 kc. to 970 kc., 1 KW night, 5 KW-day, unlimited to 5 KW at night, DA-night, unlimited time, and further ordered that KOIN, Inc., Portland, Ore., be made a party to this proceeding.

Fulton County Broadcasting Corp., Atlanta, Ga.—Adopted an order designating for hearing the application of Fulton County Broadcasting Corp. (B3-P-1606), for a new station to operate on 1550 kc., 50 KW, unlimited time, DA, in a consolidated proceeding with applications of Radio Station WSOC, Inc., et al. (Docket 7322), and further ordered that the Bills of Particulars heretofore issued in connection with applications of Radio Station WSOC, Inc., Radio Springfield, Inc., Atlanta Radio Broadcasting Co., Inc., and The Hampton-Hampshire Corp. be amended to include the application of Fulton County Broadcasting Corp.

Electronic Time, Inc., New York City—Designated for hearing application (B1-PEX-40) for a developmental AM broadcast station to broadcast the time of day on a frequency between 25 and 30 mc. (to be selected by the Commission) for reception by watch-size receivers capable of operating on this frequency.

(Continued on next page)
The Hazard Broadcasting System, Hazard, Ky.; Bullard Metcalf and Goodlette, Hazard, Ky.—Adopted an order designating applications of Hazard Broadcasting System and Bullard, et al., for consolidated hearing; each request for 1340 kc., 250 watts, unlimited time, at Hazard, Ky. (B2-P-5584, and B2-P-4661)

Montana Broadcasters, Havre, Mont.; Havre Broadcasters, a partnership, Havre, Mont.—Adopted an order designating for hearing in a consolidated proceeding the application of Montana Broadcasters (B5-P-4671) and that of Havre Broadcasters (B5-P-4671), both seeking a new station to operate on 1240 kc., 250 watts, unlimited time, at Havre.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending August 1, 1948:

- KELN—Brady, Texas; KOVC, Valley City, N. Dak.; KTHI, Tacoma, Wash.; KFWC, Vernon, Texas; WBTB, Batavia, N. Y.; WIGM, Medford, Wisc.; WMRC, Greenville, S. C.; WMHF, Lewiston, Pa.; WJIRN, Marion, Ohio; WOMI, Owensboro, Ky.; WSAP, Portsmouth, Va.; WKBV, Richmond, Ind.

- KNEL, Brady, Texas; KOVC, Valley City, N. Dak.; KTHI, Tacoma, Wash.; KFWC, Vernon, Texas; WBTB, Batavia, N. Y.; WIGM, Medford, Wisc.; WMRC, Greenville, S. C.; WMHF, Lewiston, Pa.; WJIRN, Marion, Ohio; WOMI, Owensboro, Ky.; WSAP, Portsmouth, Va.; WKBV, Richmond, Ind.

The following stations were granted renewal for the period ending November 1, 1948:

- WJHL—WJIIL, Inc., Johnson City, Tenn.—Granted construction permit to install a new antenna and increase to 5 KW power, daytime.

- WRAB—Southern Broadcasting Co. (Assignor), Miami, Fla.—Granted renewal of license with 1 KW power, daytime only, and ordered application for rehearing or rehearing and/or leave to intervene in the matter of the grant of a construction permit to Central Broadcasting Co., Inc., Johnstown, Pa., for a new station to operate on 1190 kc., 250 watts, unlimited time.

Edwin Mend, Miami Beach, Fla.—Denied petition insofar as request for consolidation or intervention by petitioner in consolidated hearing held Feb. 15-17 at Miami Beach, upon applications of Peninsular Broadcasting Corp., et al.

The following stations were granted renewal of licenses for the period ending February 1, 1949:

- KYSM, Mankato, Minn.; WAIM, Anderson, S. C.; WBOC, Wilmington, Del.; WTMN, Quincy, Ill.; WJN, Piqua, Ohio.

The following stations were granted renewal of licenses for the period ending February 1, 1949:

- WGI—The Board of Education of Newark in the County of Essex, Newark, N. J.—Granted modification of CP which authorized a new noncommercial educational station, for extension of completion date to 8-12-46. (B1-MP-128)

- KFXS—The Hazard Broadcasting System, Hazard, Ky.—Granted renewal of license which authorized a new station to operate on 1240 kc., 250 watts, unlimited time.

- KFXD—The Hazard Broadcasting System, Hazard, Ky.—Granted renewal of license which authorized a new station to operate on 1240 kc., 250 watts, unlimited time.

- KGGO—KGIvO Broadcasting Co. (Assignor), Minneapolis, Minn.—Granted authority to assign license of station KGGO to Minnesota Broadcasting Co., Inc. (Transferee), El Dorado, Ark.; Radio Enterprises, Inc. (Licensee), KELD.—Granted consent to transfer control (55 shares of stock—55%) of Radio Enterprises, Inc., licensee of KELD, from T. H. Barton to Wilfred N. McKinney, for a consideration of $55,000. (B2-TC-465)

- WDEF—WDEF Broadcasting Co., Chattanooga, Tenn.—Granted construction permit to change frequency from 1100 to 1370 kc., increase power from 250 watts to 10 KW night, 5 KW-L.S., install new transmitter, DA for special temporary use, and change transmitter location. (B3-P-1365)

- WWSW—WWSW, Inc., Pittsburgh, Pa.—Granted a decision and order of petition denying petition for WWSW for hearing or rehearing and/or leave to intervene in the matter of the grant of a construction permit to Central Broadcasting Co., Inc., Johnstown, Pa., for a new station to operate on 1190 kc., 250 watts, unlimited time.

MISCELLANEOUS ACTIONS

- WBG—The Board of Education of Newark in the County of Essex, Newark, N. J.—Granted modification of CP which authorized a new noncommercial educational station, for extension of completion date to 8-12-46. (B1-MP-128)

- KFAB—KFAB Broadcasting Co., Omaha, Neb.—Granted CP to install auxiliary transmitter (Rigby-Williams 5-HV) at RFD (SWI Sec. 6, Twp. 13, Range 13) near Papillion, Neb. (present site of new main transmitter), to be operated on 1110 kc., 5 KW power, employing DA night. (B4-P-4578)

- KJDC—J. C. Smith, Washington, D. C.—Granted application for a new station to operate on 1220 kc., 100 watts, daytime only, and ordered application for rehearing or rehearing and/or leave to intervene in the matter of the grant of a construction permit to Central Broadcasting Co., Inc., Johnstown, Pa., for a new station to operate on 1190 kc., 250 watts, unlimited time.

Edwin Mend, Miami Beach, Fla.—Denied petition insofar as request for consolidation or intervention by petitioner in consolidated hearing held Feb. 15-17 at Miami Beach, upon applications of Peninsular Broadcasting Corp., et al.

- KGKO—KGKO Broadcasting Co. (Assignor), Carter Publications, Inc., and A. H. Belo Corp. (Assignees), Fort Worth, Texas—Granted petition for voluntary assignment of license to Twin Cities Broadcasting Corp. (Assignee), Minneapolis, Minn.—Granted consent to voluntary assignment of license of station WDGY from Mae C. Young, Executrix of the Estate of Geo. W. Young, deceased, to Twin Cities Broadcasting Corp. (Assignor), Minneapolis, Minn.—Granted consent to voluntary assignment of license of station WDGY from Mae C. Young, Executrix of the Estate of Geo. W. Young, deceased, to Twin Cities Broadcasting Corp. for a consideration of $300,000. (B4-AL-500)

- WBCA—Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Granted application for a new station to operate on 1230 kc., daytime only, and ordered application for rehearing or rehearing and/or leave to intervene in the matter of the grant of a construction permit to Central Broadcasting Co., Inc., Johnstown, Pa., for a new station to operate on 1190 kc., 250 watts, unlimited time.

Radio Corp. of America, Camden, N. J.—Granted special temporary authority to operate experimental television broadcast station W3XPB on presently assigned Channel #6, 82-88 mc., simultaneously with an FM transmitter on approximately 95 mc. and 110 mc., with a maximum power of 20 KW and special emission for FM, to be located in the RCA Plant Bldg. #35, State and Wayne Ave., Camden, in order to conduct field tests to investigate the possibility of utilizing a single antenna array for radiation of television video and sound as well as an FM broadcast carrier for the period beginning April 4 and ending no later than July 6, 1946. (B3-SH-22)

Radio Corp. of America, Camden, N. J.—Granted special temporary authority to operate experimental television broadcast station W3XPB on presently assigned Channel #6, 82-88 mc., simultaneously with an FM transmitter on approximately 95 mc. and 110 mc., with a maximum power of 20 KW and special emission for FM, to be located in the RCA Plant Bldg. #35, State and Wayne Ave., Camden, in order to conduct field tests to investigate the possibility of utilizing a single antenna array for radiation of television video and sound as well as an FM broadcast carrier for the period beginning April 4 and ending no later than July 6, 1946. (B3-SH-22)

- WJHL—WJIIL, Inc., Johnson City, Tenn.—Granted construction permit to increase daytime power from 1 to 5 KW, install a new transmitter. (B3-P-4621)

- WMOB—S. B. Quigley (Assignor), Numm Broadcasting Corp. (Assignee), Mobile, Ala.—Granted voluntary assignment of license of station WMOB from S. B. Quigley to Numm Broadcasting Corp., a newly organized corporation, for a consideration of $250,000, composed of $75,000 on deposit in escrow to be applied as liquidated damages if the proposed assignee does not execute the contract of sale in accordance with the terms of the agreement, plus $175,000 to be paid within 15 days after approval by the Commission. (B3-AL-518)

- WJHL—WJIIL, Inc., Johnson City, Tenn.—Granted construction permit to increase daytime power from 1 to 5 KW, install a new transmitter. (B3-P-4621)

Molle Broadcasting Co., Moline, Ill.—Granted permit for reconsideration and grant of application (B4-P-3678: Docket 6699) for a new station to operate on 1250 kc., 250 watts, unlimited time, at a site near the community of Moline, Ill.

The Eagle-Gazette Co., Lancaster, Ohio.—Denied petition to reconsider and grant its application (Docket 6699) for a new station to operate on 880 kc. (Class I-A) with 1 KW power, daytime only, and ordered application to be dismissed. (B3-AL-518)
Federal Communications Commission Applications

AM APPLICATIONS ACCEPTED FOR FILING

570 Kilocycles

NEW—Metropolitan Broadcasting Corp., Washington, D. C.—Construction permit for a new standard broadcast station to be operated on 570 kc, power of 250 watts and daytime hours of operation. Amended to change type of transmitter and change power from 250 watts to 500 watts.

800 Kilocycles

WMGY—Dixie Broadcasting Co., Montgomery, Ala.—Modification of construction permit (BP-3939), which authorized a new standard broadcast station to change type of transmitter and change antenna and studio locations and extension of commencement and completion dates.

850 Kilocycles

WUFU—University of Florida, Gainesville, Fla.—Construction permit to change hours of operation from limited time to unlimited time, install new transmitter and directional antenna for night use.

910 Kilocycles

NEW—Paul F. Braden, Middletown, Ohio. (P. O. 3317 Kenmore Ave., Dayton, Ohio.)—Construction permit for a new standard broadcast station to be operated on 910 kc, power of 1 KW and daytime hours of operation.

990 Kilocycles

NEW—West Memphis Broadcasting Corp., West Memphis, Ark.—Construction permit for a new standard broadcast station to be operated on 990 kc, power of 1 KW and daytime hours of operation. Amended to change frequency from 960 to 990 kc.

1100 Kilocycles

NEW—Louis P. Myers and Gertrude Jo Myers, d/b as Howdy Folks Broadcasters, Tulsa, Okla. (P. O. 502 Palace Bldg.)—Construction permit for a new standard broadcast station to be operated on 1100 kc, power of 5 KW and daytime hours of operation.

1180 Kilocycles

NEW—Southwest Iowa Broadcasting Co., Creston, Iowa (P. O. 210 Paterson St.)—Construction permit for a new standard broadcast station to be operated on 1180 kc, power of 1 KW and daytime hours of operation.

1190 Kilocycles

WLBR—WLIR, Inc., Brooklyn, N. Y.—Construction permit to increase power from 1 KW to 10 KW, change hours of operation from limited to unlimited time, install new transmitter and directional antenna for day and night use, and change transmitter location.

1230 Kilocycles

NEW—Upper Michigan-Wisconsin Broadcasting Co., Inc., Iron Mountain, Mich.—Construction permit for a new standard broadcast station to be operated on 1230 kc, power of 250 watts and unlimited hours of operation. (Call letters “WKIB” reserved.)

1240 Kilocycles

NEW—Hayve Broadcasters, a partnership, composed of O. R. Ruble, Wm. E. Rue, George L. Merrill and Paul B. McAdam, Hayve, Mont. (P. O. 360 Masonic Temple Bldg.)—Construction permit for a new standard broadcast station to be operated on 1240 kc, power of 250 watts and unlimited hours of operation. (Call letters “KCUW” reserved.)

1340 Kilocycles

WMON—Fayette Associates, Inc., Montgomery, W. Va.—Modification of construction permit (BP-MP-3976), which authorized the new standard broadcast station for approval of antenna and approval of transmitter and studio locations.

NEW—Alpena Broadcasting Corp., Alpena, Mich.—Construction permit for a new standard broadcast station to be operated on 1340 kc, power of 250 watts and unlimited hours of operation.

NEW—Inland Broadcasting Co., Fremont, Neb. (P. O. 2925 Dodge St., Omaha, Neb.)—Construction permit for a new standard broadcast station to be operated on 1340 kc, power of 300 watts and unlimited hours of operation. (Contingent upon grant of B4-P-1655 and B4-AL-519.)

NEW—Mary A. Petree, Soes X. Vratis, Gray R. Horrower, Branch C. Todd, a partnership, d/b as Port Arthur Broadcasting Co., Port Arthur, Texas (P. O. 2700 Memorial Blvd.)—Construction permit for a new standard broadcast station to be operated on 1340 kc, power of 250 watts and unlimited hours of operation. (Call letters “KCOL” reserved.)

1400 Kilocycles

NEW—Douglas D. Kahle, John L. Hitehock, Wilbur E. Koechle, General Partners and Warren D. Brainard, Limited Partner, d/b as Northern Colorado Broadcasting Co., Fort Collins, Colo. (P. O. Northern Hotel Bldg., 170 North College Ave.)—Construction permit for a new standard broadcast station to be operated on 1400 kc, power of 250 watts and unlimited hours of operation. (Call letters “KCOL” reserved.)

KGVL—Truett Kinney, Greenville, Texas.—License to cover construction permit (BP-3912), as modified, which authorized a new standard broadcast station.

KGVL—Truett Kinney, Greenville, Texas.—Authority to determine operating power by direct measurement of antenna power.

(Continued on next page)
1410 Kilocycles

NEW—Frank Mitchell Farris, Jr., Nashville, Tenn.—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 1 KW, directional antenna and unlimited hours of operation. Amended, to make changes in directional antenna system.

1450 Kilocycles

KFLW—Herald Publishing Company of Klamath Falls, Klamath Falls, Ore.—License to cover construction permit (B5-P-3883, as modified) which authorized a new standard broadcast station.

KFLW—Herald Publishing Company of Klamath Falls, Klamath Falls, Ore.—Authority to determine operating power by direct measurement of antenna power.

WMV—Jere N. Moore, Milledgeville, Ga.—License to cover construction permit (13-P-3883, as modified) which authorized a new standard broadcast station.

WMV—Jere N. Moore, Milledgeville, Ga.—Authority to determine operating power by direct measurement of antenna power.

WLAX—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Construction permit to install new vertical antenna, and change transmitter and studio location.

1490 Kilocycles

NEW—Southwest Broadcasters, Inc., Raton, N. M.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Thomas Maxie Self, John Eads Douglas and Gordon Theodore Rand, a Partnership, d/b as Progressive Broadcasting Co., Paragould, Ark. (P. O. 1129 South Flint St., Jonesboro, Ark.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—The Haverhill Gazette Co., Haverhill, Mass. (P. O. 179 Merrimack St.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

1510 Kilocycles

NEW—San Diego Broadcasting Co., San Diego, Calif.—Construction permit for a new standard broadcast station to be operated on 1510 kc., power of 5 KW, directional antenna and unlimited hours of operation. Amended, to make changes in directional antenna system and change transmitter location.

1520 Kilocycles

NEW—Broadcasting Foundation, Inc., Buffalo, N. Y. (P. O. 1420 Main St.)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 50 KW, directional antenna and unlimited hours of operation. (Facilities of WKBW requested.)
tion from 3,591,752 to 3,261,855, coverage from 11,900 to 13,408 square miles and specify type of transmitter and class of station as Metropolitan.

MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

KOKU—State University of Oklahoma, Norman, Okla.—Modification of construction permit (B3-PED-41 which authorized a new non-commercial educational broadcast station) to request frequencies of channels #220, 218, 216 or 213 (91.9, 91.5, 91.1 or 90.5 mc.), approval of transmitter, make changes in antenna system and change studio location.

W9XMT—P. R. Mallory & Co., Inc., Indianapolis, Ind.—Modification of construction permit (B1-IVB-111, as modified) which authorized a new experimental television broadcast station for extension of completion date only from 3-15-46 to 9-16-46.

KORN—Nebraska Broadcasting Corp., Fremont, Neb.—Voluntary assignment of license to Inland Broadcasting Co. (Contingent upon the grant of B4-P-10346 and B4-P-1065).

KFSD—Airfan Radio Corp., Ltd., San Diego, Calif.—Construction permit to install new 5 KW transmitter and antenna, to be determined, increase power from 1 KW to 5 KW, move transmitter. Amended, to change type of transmitter, install directional antenna for day and night use, and change proposed transmitter location.

APPLICATIONS TENDERED FOR FILING

NEW—Key Broadcasting Corp., Baltimore, Md.—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 1 KW and daytime hours of operation.

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Penn.—Request for change in hours from sharing time with WHAT to unlimited (except when WCAM is operating). (Contingent on grant of 820 kc. to WHAT.) (1540 kc.)

WCNC—Albemarle Broadcasting Co., Elizabeth City, N. C.—Consent to transfer of control of licensee, Edd Harris to Dr. J. A. Gill, W. K. Leary and S. A. Twiford. (1400 kc.)

NEW—Cherokee Broadcasting Corp., Morristown, Tenn.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—E. R. Ferguson and J. R. Pepper, Ltd., d/b/a Bluff City Broadcasting Co., Ltd., Memphis, Tenn.—Construction permit for a new standard broadcast station to be operated on 730 kc., power of 250 watts and daytime hours of operation.

NEW—Downing Musgrove, Douglas, Ga.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

KTBS—George D. Wray, Allen D. Morris, P. E. Furlow and John C. McCormack, a partnership, d/b/a Radio Station KTBS, Shreveport, La.—Construction permit to increase power from 1 KW unlimited, to 5 KW unlimited time. Install new transmitter, change transmitter location and make changes in antenna system. (1450 kc.)

NEW—News-Press Publishing Co., Santa Maria, Calif.—Construction permit for a new standard broadcast station to be operated on 1100 kc., power of 250 watts, and unlimited hours of operation.

NEW—B. Loring Schmidt, Salem, Oreg.—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 250 watts and unlimited hours of operation.

NEW—Tom S. Whitehead, Brenham, Texas—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 250 watts, and daytime hours of operation.

NEW—Statesville Broadcasting Co., Inc., Statesville, N. C.—Construction permit for a new standard broadcast station to be operated on 1100 kc., power of 250 watts and unlimited hours of operation.

NEW—Michigan Broadcasting Co., Battle Creek, Mich.—Construction permit for a new standard broadcast station to be operated on 930 kc., power of 1 KW directional antenna and unlimited hours of operation.

NEW—Tri-Cities Broadcasting Co., Goose Creek, Texas—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

NEW—Midwestern Broadcasting Co., Petoskey, Mich.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—W. C. Aldous and James W. Thain, Partnership d/b as Northwest Broadcasting Co., Everett, Wash.—Construction permit for a new standard broadcast station to be operated on 1260 kc., power of 250 watts and limited hours of operation.

Federal Trade Commission Docket

COMPLAINTS

The Federal Trade Commission issued no complaints this week.

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Manhattan Brewing Co.—The Commission has modified in part an order to cease and desist so as to permit Manhattan Brewing Co., Chicago, to use the word “Canadian” in the brand name for beer or ale if accompanying statements on labels or in advertisements “conspicuously and adequately” show that the product was brewed in the United States. The respondent sells beer and ale under the name “Canadian Ace Brand.” (4572)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Linda Sportswear Co., 1350 Broadway, New York, stipulated that they will discontinue failing to disclose the rayon content of women’s wearing apparel they sell. (4151)

Smith Hatchery, Caldwell, Idaho, stipulated to cease and desist from advertising that baby chicks he sells are “U. S. Certified” and “pullorum free.” (4570)

FTC COMPLAINT DISMISSED

A complaint charging Dad’s Root Beer Co., 2500 North Talman Avenue, Chicago, with misrepresentation in the sale of root beer has been dismissed without prejudice by the Federal Trade Commission. The order states that the respondent corporation has submitted satisfactory proof that it has discontinued the practices charged in the complaint. The Commission dismissed the complaint after considering the testimony and other evidence in support of and in opposition to the allegations, the report of the trial examiner upon the evidence, and oral argument of counsel.

Participating in the decision: Chairman Ayres and Commissioners Ferguson, Freer and Mason.

Not participating: Commissioner Davis.
Employee-Employer Relations

PRESIDENT SIGNS LEA BILL

The Lea Bill, which passed the House on March 29 and the Senate on April 6, became law when President Truman affixed his signature to the measure last Tuesday (16). The President in signing the bill made no comment.

The provisions of the new law were explained in the April 1 issue of NAB Reports. A more comprehensive analysis of these provisions is now being prepared by Ivar H. Peterson, Assistant Director of Employee-Employer Relations. Publication is planned for early next week.

MILLER AND PETRILLO MEET AGAIN

Committees of four broadcasters, headed by NAB President Justin Miller, and four representatives of the American Federation of Musicians, headed by James C. Petrillo, met in New York last Monday (15) to discuss the formation of permanent Joint Advisory Committees, representing industry and the union, which would seek to settle differences in broad national policy of mutual interest to the two groups.

A further meeting of the two committees which met last Monday is planned to complete arrangements and plans for the permanent advisory committees. No definite date for this next meeting has yet been set.

Establishment of the permanent advisory committee was originally suggested by Judge Miller at a meeting in New York April 18 between the Special Industry-Wide Committee and Mr. Petrillo and his International Executive Board (see current NAB Reports, p. 291).

At the April 8 meeting Judge Miller expressed the hope that permanent advisory committees would be able to discuss and settle differences which arise between the industry and the A. F. of M. before they reach serious proportions.

Legal Department

NAB PROTESTS NEW TRANSFER RULE

In a hearing before the FCC Wednesday (17), Don Petty, NAB General Counsel, presented the radio industry’s arguments against the Commission’s proposed new “transfer rule” relating to change of ownership of broadcasting stations.

The hearing resulted from a brief filed by NAB with the Commission on March 15 objecting to this proposal for incorporation in the FCC rules and regulations as section 1.388. It would require radio station licensees to give public notice of any proposed transfer of their station and invite competing bids. (See NAB Reports, vol. 14, p. 206.)

In his oral presentation Mr. Petty argued that the proposed rule would operate contrary to the public interest and is not a proper subject for Commission action. He stressed that a matter of this nature could lawfully be acted upon only by Congress.

The broadcasting industry spokesman stated that the FCC administrative practice of enforcing policies before they are adopted as rules and regulations, as happened in the case of the subject rule, causes grave confusion in the radio industry. FCC Chairman Charles R. Denny took exception to this point, stating that the Commission used this method of determining what results they might expect when the rule was formally promulgated.

Mr. Petty further pointed out that the proposed rule would tend to make radio broadcasting a speculative industry because of the additional uncertainties introduced. Under the new procedure, he said, the FCC would control the disposition of radio stations regardless of personal or financial considerations.

It is also in direct conflict with state laws concerning disposition of property on death or divorce, bankruptcy and numerous other situations which are now impossible to anticipate, Mr. Petty argued.

In illustrating this point the NAB counsel asked what would happen when a man who owned twenty-five per cent of the stock of a radio station died and left his portion of the station to his wife who already owned thirty-five per cent of the stock in her own right. Chairman Denny explained that the Commission planned to interpret the rule in such a way that it would not apply in a case of this type.

While requesting that wide exceptions to the rule be provided in the event of its adoption by the Commission, Mr. Petty argued that proper exceptions to cover all eventualities can not humanly be written into the regulation.

In the course of the oral argument Chairman Denny stated that the FCC is not now contemplating the proposal of any legislation to Congress concerning any matters other than those mentioned in the AVCO decision. Here it was suggested that the Commission might ask Congress for the power to control the price of radio stations.

Following Mr. Petty’s presentation, Paul Segal, representing KSOO and KELD, and Elliot Lovett, representing WICA, made statements concerning particular hardships which may arise.

Mr. Segal raised the question of what would happen in a case where a station owner dies after operating his station... (Continued on next page)
ASK CPA FOR CONSTRUCTION RELIEF

Stressing that construction of new radio stations in the U. S. would further employment of veterans, the reconversion program and advance development of mass communication held to be in the public interest, NAB has appealed to the Civilian Production Administration for relief under the recent CPA order restricting construction.

The CPA was urged to place radio stations in the fifteen thousand dollar exemption class, instead of the one thousand dollar category which the request states "is completely inadequate and would stop dead in its tracks the program for new radio stations."

It was further requested that authorization for construction of new radio stations where the cost would exceed fifteen thousand dollars be considered and passed upon by the Washington offices of the CPA.

The letter, on behalf of the entire radio broadcasting industry, highlights the fact that the requested exemption for building by radio broadcasters represents a small portion of the overall cost of construction and installation of a radio station and involves only a negligible amount of building materials now restricted by the CPA.

Studies disclosed that "building acquisition and construction represents slightly more than one-fifth of the overall expected expenditures by applicants including transmitters and studio equipment, and facilities."

Pointing out that the FCC issues a construction permit for radio stations only after thorough study to ascertain that the station will serve in the public interest, conven-

e, and necessity, the letter to CPA goes on to say that by the end of 1946 the FCC will have granted about eleven hundred permits for new stations.

It is estimated that some 20,000 new jobs will be created directly in station employment as soon as these stations can be established. In addition, the request points out, "Construction of FM radio stations at this time is essential to the creation of a vast new market for receivers and the manufacture, installation and servicing of FM transmitters and receivers would provide employment for untold thousands of veterans."

Complete text of the letter, written by Robert T. Bartley, Director of Government Relations, follows:

Mr. John D. Small, Administrator, Civilian Production Administration, 5039 Social Security Building, Washington 25, D. C.

"Dear Mr. Small:

"This is an appeal for a revision in the Civilian Production Administration's VHP Order #1 which will be shown hereunder to be in the interest of Veterans' employment, the reconversion program, and the further development of mass communication held to be in the public interest.

"The Civilian Production Administration, the trade association of the broadcasting industry with a membership of 722 standard broadcast stations, 37 FM broadcast stations, and 97 applicants for standard and FM permits, two networks, and two television stations, the broadcasting industry is actively supporting campaigns for Veterans' rehabilitation, homes for Veterans, and in fact all public issues material to the resettlement of Veterans in our national economy. Radio programs and announcements are continually stressing the need for cooperation and pointing out methods of assistance which can be employed by the general public. "Veterans' rehabilitation is the number one campaign on the air today.

"All radio station construction results from a finding by the Federal Communications Commission that each station is necessary and will serve the public interest. Under the Communications Act of 1934 an applicant for a station must state the date on which he expects to commence operation, and the permit granted by the Commission requires that he commence construction of his station within 60 days. Permits are, therefore, not free agents in selecting the time within which they may commence construction, but must abide by Commission requirements."

"The Civilian Production Administration in VHP Order #1 has provided for a degree of exemption for radio station construction, and provided for appeal locally for further authorization. The policy for the development of the expansion program for broadcast services should be determined upon a national basis so that uniform decisions and interpretations are rendered."

"In order that the CPA may better understand the adverse effects which VHP Order #1, as now written, will have upon Veterans' employment and upon the general economic reconversion program, the National Association of Broadcasters respectfully urges a revision by CPA of its present order so as to relate to broadcast services. A minor change in the Order which would involve a very negligible amount of materials for radio stations stands between the employment opportunities for thousands of Veterans by new radio stations, and additional thousands in related activities dependent upon the establishment of new services."

"While CPA has provided a degree of exemption for radio station construction, the exemption is inadequate to provide for inauguration of new services and would virtually prohibit the installation of new facilities."

"According to War and Navy Department surveys, several thousand veterans have expressed a preference for employment in radio and television broadcasting. How are these job opportunities to be provided? Veterans' employment in broadcasting stations is already at a high level. This is due, in part, to the fact that approximately 25 per cent of the personnel of America's broadcast sta-

(Continued on next page)
tions entered the armed services. These employees are now returning to their old jobs. While it is the policy of the broadcasting industry generally to give job preference to Veterans in added employment and replacements, substantial additional employment of Veterans will come only through the establishment of new radio stations.

“The Federal Communications Commission, whose responsibility it is to determine the necessity for each proposal for a new broadcast station, and can issue a construction permit only after finding that the granting of the application will serve the public interest, convenience, and necessity, estimates that by the end of 1946 it will have granted about eleven hundred permits for new stations. A number of these grants will be for FM stations to licensees of existing AM stations, whose existing facilities are adequate, so little, if any, new construction materials would be involved in those cases. New stations, the ones which will provide the bulk of new job opportunities, will, of course, require new transmitter houses and studios. A "dollar" measure of limitation on new construction works a particular hardship on radio stations. The proportion of the cost for engineering and architectural services is substantially greater for radio facilities than for the usual run of little building, due to the special use to which these facilities are put and to the necessity for special design, engineering, and acoustical considerations. Complete exemption of construction of radio stations granted construction permits by the Federal Communications Commission would involve only a negligible amount of materials.

“This differential in cost due to the extreme need for acoustical efficiency is especially true of FM studios. FM is a quality service and any attempt to compromise with high fidelity will result in stations rendering less than full quality service. Studios must be of exceptionally high quality from FM's very inception if this promising new service is to catch on with the listeners and get off to a good start. A false start or a start which produces less than its capabilities would likely result in public disappointment which could require years to overcome. In some cases, therefore, a dollar measure of exemption of $15,000 will be inadequate and special authorizations will be necessary.

"FM was on the threshold of a phenomenal growth at the outbreak of the War. The interest shown in this new method of broadcasting by broadcasters and others was so great in fact that it became necessary for the Federal Communications Commission to review its allocation of the radio spectrum and as a consequence the Commission increased the number of channels for FM from forty to one hundred channels. This expansion required the relocation of the band into another portion of the spectrum. This realignment naturally occasioned some delay so that it is only recently that the Commission has commenced to make final grants for construction. This all adds up to the fact that at the time of the VHF Order #1 the way was cleared for the greatest expansion program in the history of broadcasting. Twenty thousand new job opportunities may thus be provided in station employment as soon as these stations can be established. In addition to the benefits to be afforded listeners in a higher quality of reception and wider selection of programs, there will be created a tremendous market for new FM receivers. The fact that almost all FM receivers, of course, will be substantially retarded if construction of FM broadcast stations is stopped. Obviously, the result of eliminating such a market will vitally affect the employment of a large number of Veterans engaged in the manufacture, distribution, installation, and servicing of equipment and receivers.

“A review and spot check of applications on file with the Commission discloses that of 206 FM applications studied, the expenditure for construction or acquisition of buildings fell into the following categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Number of Applications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Below $10,000</td>
<td>128</td>
</tr>
<tr>
<td>$10,000-$15,000</td>
<td>37</td>
</tr>
<tr>
<td>$15,000-$20,000</td>
<td>20</td>
</tr>
<tr>
<td>$20,000-$30,000</td>
<td>13</td>
</tr>
<tr>
<td>$30,000-$50,000</td>
<td>5</td>
</tr>
<tr>
<td>$50,000-$70,000</td>
<td>2</td>

</tr>
<tr>
<td>$150,000</td>
<td>1</td>
</tr>
</tbody>
</table>

"Additional studies disclose that of 590 applications on file building acquisition and construction represents slightly more than one-fifth of the over-all expected expenditures by applicants including transmitters and studio equipment and facilities. If radio stations are placed in the $15,000 exemption class, most of the new construction can go ahead without the necessity for clearance at the local level where varying decisions could well interfere with the national program. In order for manufacturers to interest themselves in mass production of receivers, the market must be nationwide.

“In view of the special considerations which must be given in radio station construction, viz:

(1) It is a service found by the FCC to be necessary in the public interest;
(2) The complete expansion program could be accomplished with comparatively negligible amounts of building materials;
(3) Anticipated immediate expansion would provide thousands of jobs to veterans directly employed in radio station operation;
(4) Construction of FM radio stations at this time is essential to the creation of a vast new market for receivers, in the manufacture, distribution, installation and servicing of which untold thousands of Veterans employment would depend;
(5) The exemption provided for in VHF-1 of $1,000 is completely inadequate and would effectively stop dead in its tracks the program for new radio stations.

“IT is respectfully submitted that it is in the interest of Veterans' employment and the reconversion program that at least the following steps are necessary:

(1) Radio stations be placed among the exemptions provided for in (d) (I) (vii) instead of in (d) (I) (iii) as at present;
(2) That applications for authorizations for construction of new radio stations, the cost of which would exceed that provided for in (d) (I) (vii), be considered and passed upon by the Washington Offices of the CPA, or in the alternative, that CPA at least issue instructions and explanations to the various Construction Field Offices of CPA of the special elements which must be considered in passing upon applications for construction of Radio Stations.

“We shall be pleased to discuss this matter further and render any possible cooperation in any manner which occurs to you in which we might be helpful in clarifying the situation or supplying additional information. We will hold ourselves in readiness to be of any possible assistance.

“(Sgd.) Robert T. Bartley, Director, Department of Government Relations.”

RMA Protests Building Ban

The Radio Manufacturers Association has sent a telegram to the CPA, asking that the order be modified to permit construction of facilities for new radio stations, especially FM and television transmitting stations.

RMA stated that the CPA order, if strictly enforced, would halt all new broadcasting station construction and further retard not only the program of FM and television, but slow up the production of FM and television receiving sets.

Construction Query

Some time ago the CPA was asked a specific question on construction under VHF Order No. 1. The question and CPA's answer follow:

"A. Does the building of a radio broadcasting building and tower require authorization?

"A. Construction of an independent tower does not require authorization as the tower does not come within the definition of 'structure' in the order. Buildings in

(Continued on next page)
connection with the tower would require authorization. The radio broadcasting industry itself is classified in the Order as commercial and, therefore, would come under the commercial job exemption of $1,000 each on separate jobs."

WILLARD SPEAKS FOR RADIO AT WM. ALLEN WHITE DINNER

A. D. Willard, Jr., NAB Executive Vice President, will represent and speak for the radio broadcasting industry at the William Allen White Foundation Dinner to be held Wednesday (24) at the Waldorf-Astoria Hotel in New York.

General Dwight D. Eisenhower will be guest of honor at the dinner, the purpose of which is to present the aims and hopes of the White School and Foundation of the University of Kansas.

Other speakers scheduled are Francis Harmon, Vice President, Motion Picture Producers Association; Kent Cooper, Executive, Associated Press; Senator Arthur Capper; and Deane W. Malott, Chancellor of the University of Kansas.

DISCUSS FCC REPORT

Under the auspices of Columbia University, an "off the record" conference was held over the weekend of April 13th to discuss the FCC report concerning "the public service responsibility of broadcast licensees."

The meeting, over which Dr. Paul F. Lazarsfeld of the university presided, was attended by representatives of the FCC, education, agriculture, labor and the radio broadcasting industry. The meeting was made possible by a grant from the Rockefeller Foundation.

FELTIS DISCUSSES BMB'S VALUE TO ADVERTISERS

Hugh Feltis, president of Broadcast Measurement Bureau, discussed the uses of BMB's forthcoming uniform measurement of radio station and network audiences before the spring meeting of the Association of National Advertisers at the Westchester Country Club, Rye, N.Y., Tuesday (16).

He said that advertisers could use BMB audience information in five ways: (1) to evaluate stations and networks, (2) to help buy radio to match product distribution, (3) to help buy radio to supplement other advertising media, (4) to promote programs more effectively and (5) to foster tie-in advertising by dealers and distributors.

Panel members who assisted Feltis in answering questions included four of the ANA members of the BMB board of directors: Robert Elder of Lever Bros., Lowry Crites of General Mills, Joseph Allen of Bristol-Myers and Donovan Stetler of Standard Brands.

District Meetings

4TH DISTRICT REELECTS ARNOUX

(Ed. Note: Reports (15) P. 293 carried earlier summary of 4th District meeting.)

With the largest attendance that has marked any of the 1946 NAB District Meetings held thus far, broadcasters of the 4th District met at Virginia Beach on April 11-12 and included among many other outstanding actions the reelection of Campbell Arnoux, WTAG, as District Director.

A resolution, unanimously adopted, questioned the authority of the Federal Communications Commission to assume the control of programming. It is the opinion of 4th District broadcasters that the Communications Act does not empower the Commission to assume such control and NAB was requested by those assembled to "take such steps and action as seems advisable under the circumstances to determine the authority of the Federal Communications Commission in the regulation of program content."

This action by the 4th District brings the total of District Meetings which have thus gone on record in opposing the encroachments of the Commission to five—a thousand per cent batting average for broadcasters who have had an opportunity to formally express themselves on the subject since the issuance of the Commission's March 7 report on the "public service responsibility of broadcast licensees."

4th District Broadcasters also adopted a resolution presented by spokesmen for the recently formed West Virginia Broadcasters Association asking that the NAB Board of Directors at their next meeting inquire into the advisability of permitting NAB employees or executives to file application for frequencies or to own an interest in radio stations. The resolution recommends that the Board adopt a policy prohibiting this practice after January 1, 1947.

Another resolution urges NAB to exert all efforts toward securing the enactment, through national legislation, of uniform time in all zones in the United States.

Continued support was pledged to BMI and BMB. The selection of Justin Miller as NAB president was commended and continued active and hearty support was pledged to him.

Text of the resolutions follow:

"Whereas, The recent report on Programming of radio stations by Federal Communications Commission has raised the question of authority of Federal Communications Commission in the matter, and

"Therefore, Be it resolved that the Broadcasters of the 4th District of NAB call upon our Association to take such steps and action as seems advisable under the circumstances to determine the authority of Federal Communications Commission in the regulation of program content."

"Fourth District NAB feels it is both impractical and inadvisable for permanent employees or executives of NAB to make application for or own an interest in any radio broadcasting station while so employed after January 1, 1947."

"Whereas, The adaption of 'Daylight Saving Time' by some localities and states, annually, precipitates many difficult problems for the Broadcasting Industry, and confusion in the minds of radio listeners;

"Therefore, Be it resolved, That the Broadcasters of the 4th District of NAB urge our Association to exert all efforts toward securing the enactment, through National Legislation, of uniform time in all zones of the United States."

"Whereas, BMI was created by the Broadcasters, and

"Whereas, BMI is performing an invaluable service to Broadcasters, and

"Therefore, Be it resolved that the Broadcasters of the 4th District of NAB hereby pledge to BMI their continued interest and support."

(Continued on next page)
"Whereas, the NAB has been most fortunate in securing the services of the Hon. Justin Miller as its President, and

"Whereas, Judge Miller has impressed the meeting with his sincerity, personality, and remarkable grasp of the many problems of the Broadcasting Industry.

"Whereas, the sincere thanks of this meeting be hereby extended to Radio Stations WSAP, WGH, WTAG, our hosts, for their hospitality, courtesies, and helpful arrangements, and

"To District Director, Campbell Arnoux, for his untiring efforts, both at the meeting and in behalf of the entire broadcasting industry, as a member of the Board of Directors of the NAB."

AWD ON PROGRAM AT COLUMBUS MEETING

At the annual meeting of the Institute for Education by Radio, Ohio State University, to be held this year from May 3 to 6 at Columbus, Ohio, the AWD program on May 4 will have as its theme, “Radio’s Role on the Food Front.”

Two of the nation’s foremost experts, Chester Davis, Chairman of the President’s Famine Emergency Committee, and Paul S. Willis, President, Grocery Manufacturers of America, are scheduled to speak on the subject of the world-wide food famine.

Panel participants on the program include:

Beulah Carney, WENR, Chicago
Mary I. Barber, Kellogg Co., Battle Creek, Mich.
Jane Tiffany Wagner, Director, “Home Is What You Make It” and NBC University of the Air
Marjorie Husted, Director, Betty Crocker Program, General Mills, Inc.
Mildred Bailey, Vice President, AWD, and “Food Is Fun,” WCOP
Frances Reynolds, Ass’t Director of Information, Food and Agricultural Organization

The AWD luncheon is scheduled for Saturday, May 4. Speaker at the luncheon meeting will be Fannie Hurst.

WSAM FORMS SAGINAW RADIO COUNCIL

How radio stations can enlist the active cooperation of civic leaders in the development of local public interest programs is exemplified in the formation of a Saginaw Radio Council by station WSAM at Saginaw, Michigan.

The Council is sponsored by the station, which furnishes its own staff members as expert advisers. Proposals for public interest programs, which come to the station from a variety of local sources, must all be discussed and cleared by the council before they are submitted to the station for production.

From the beginning, the Council flourished as a public interest medium via WSAM and the 1944 season was climaxed with the first annual dinner meeting by approximately 75 people.

Milton L. Greenebaum, president of WSAM, stated that “following the annual meeting, our individual and organizational membership grew by leaps and bounds and it was through the complete cooperation of these members that we were able to achieve success in 1944.”

In a brochure explaining the operations of the Saginaw Radio Council, the organization reveals:

“This high standard has been maintained to date and we point with pride to the more than 150 broadcasts we have done for Saginaw, the community which we serve. We boast such programs as the following: The ‘Adventures for Youth’ series, an outstanding event for our school system which was under the excellent guidance of Mrs. Martin Tanner, past chairman of the Children’s Interests Committee; ‘It Can Be Done,’ our first attempt at a continuous adult program covering all phases of public service; our ‘Radio Workshop’ series which vividly portrays our agencies’ special needs in dramatic form; and an adventure new to Saginaw entitled ‘Saginaw Speaks,’ an open forum program designed to air information pertinent to the community.

To top all of this Superintendent Miller of the public schools aided us in inducing the University of Michigan to set up an extension course in Radio Speech for our friends and members. To conduct this course we were honored by having Waldo Abbot, the Uni-

(Continued on next page)
TREASURY PLANS FIRST POSTWAR BOND DRIVE

Radio section of the Treasury is steaming up for the first intensive postwar campaign back of E-bonds. Slogan is “Back Your Future.” Launched on the evening of June 5, the campaign is expected to be in full swing next day (6), the second anniversary of D-day. It will run through the 4th of July.

All live and transcribed “Back Your Future” material is sponsorable. “With the same fine cooperation as in the past,” said Treasury’s radio chief, Brent O. Gants, “radio will again lead the way in bond selling.”

“Back Your Future” Material

12 4-min. ETs “Sports Personalities” interviews
12 4-min ETs “Prominent Women” interviews
8 14-hour Treasury Salutes
Kit of live announcements of various lengths

Format of the 4-minute ETs permits local station personality to do the interviewing when carried in longer sports or women’s program. Option is use as 5-minute features.

Dramatized “Back Your Future” material will feature Treasury Salutes during the campaign.

Mary Small’s and Mark Warnow’s record, “There’s a Bond Waiting for You,” recently sent to all stations, should be good listening during the bond promotion.

Concentration Dates

Fact that D-day (June 6), Flag Day (June 14) and Independence Day (July 4) fall within the forthcoming campaign dates will permit station staffs to use their ingenuity in “killing two birds with one stone.” Other significant dates of state or regional importance also may lend themselves to bond tie-ins.

HYDE SWORN IN AS COMMISSIONER

Rosel H. Hyde took his oath of office as a Commissioner of the FCC last Wednesday (17), to fill the unexpired term of the late Governor William H. Wills who died on March 6, 1946. The term expires June 30, 1952.

Mr. Hyde was appointed Commissioner by President Truman on March 21, 1946, and was confirmed by the Senate on April 12. He is a Republican, and had been General Counsel of the Commission since March 30, 1945. When Mr. Hyde formally became a Commissioner on Wednesday, Benedict P. Cottone, who has been Assistant General Counsel since 1941, was designated Acting General Counsel.

"INS" ASKS FCC FOR PROGRAM REPORT CLARIFICATION

In a petition filed with FCC on April 18 International News Service requested "further explanation or clarification of certain terms and definitions of radio program service proposed in the Commission's report of March 7, 1946.

"Petitioner also requests the Commission, if the Commission so agrees with Petition's plaint, to redress by such further explanation or clarification, or by any other means deemed advisable, any damage that might have been done or might been done to the Petitioner through interpretation or misinterpretations of the terms and definitions as originally proposed."

The 10-page petition was presented by Robert W. Brown, INS' Executive News Editor.

Among other things INS feels that a newscast based on complete news wire reports, as differentiated from a "processed" radio wire is entitled to a "live" classification rather than a wire (W) classification.

CLEAR CHANNEL HEARINGS

Last Monday (15) the FCC began hearings on clear channel broadcasting which are expected to be concluded early in July.

The testimony already heard has stressed the studies made by the Bureau of the Census and the Department of Agriculture on rural listening habits.

The sessions this week will cover mainly the testimony of engineers and the networks. Through all these meetings the Commission has met en banc. Starting next Monday (29) the hearings will continue under a single commissioner. Though no final date has been set for the hearings before a single member of the FCC, the schedule calls for a final session of hearings before the entire Commission starting July 1.

NAB plans to issue a special bulletin covering these hearings.

"PUBLIC RELATIONS COMMISSION" IS NOT A GOVERNMENT AGENCY

NAB member stations have referred to headquarters a circular letter signed by Charles F. Warden as Chairman of "Public Relations Commission, Washington, D. C.," offering for sale to stations a syndicated series of transcribed agricultural programs. Because the letterhead, title, etc., used in this mailing are similar to those used by government agencies, stations have inquired if this organization is connected with the government.

Stations are informed that "Public Relations Commission" is in no way connected with the government. Mr. Warden operates this organization as a commercial public relations firm, and in this instance he informs the NAB (Continued on next page)
that he "is handling the public relations" for the persons who propose to produce and sell the transcribed series.

**JUNIOR ACHIEVEMENT ORGANIZATION**

A discussion of the method of operation of the Junior Achievement Organization was held at the NAB 8th District meeting recently.

G. F. Albright, General Manager, WKBV, Richmond, Indiana, outlined the operation of the organization.

"As for our own experience we find it has been rather pleasant and informative for us as well as the kids. The initial group of about twelve young boys were contacted by the traveling representative for Junior Achievement. He directed their election of officers and the sale of their corporate stock; then this group was delivered to us here at the station, set up and ready to go to work. I meet with them once a week here at the station and sit on the sidelines to advise them as to the proper procedure in going about the construction of a weekly quarter hour newscast.

"We have set up a reportorial staff that gathers news from each high school. Their sales manager goes with one of the group to read the news over the air.

"A Commercial Manager has been appointed. It is up to him to sell the show to the local merchants around town. We charge the group approximately half price for the time on the air and they in turn sell it at our regular card rate plus a small talent fee. The newscasters, salesmen, editor and reporters are all paid by the Corporation at the rate of approximately 15 cents per hour for their work in connection with the broadcast. Any profit that is made by the Corporation is held in the Corporation's account for dividend distribution to stockholders in the company. Incidentally, stock of the Corporation sells at 50 cents per share."

George Biggar, WIBC, Indianapolis, is state radio chairman of Junior Achievement. Mr. Biggar reports:

"WIBC started a 'Radio News Company' of Junior Achievement, Inc., last fall with a 15-minute program every Saturday morning. About 20 boys and girls from all of our local high schools are members. They use six or seven of the group each Saturday morning to present the news of our representative high schools with script, production and announcing by the youth. The company has a sales manager as well as a regular set of officers. Their sales manager goes with one of our salesmen to offer the program to one of our sponsors. They have been sold four weeks during this winter on WIBC but by fall we hope to have it much better organized and get them sold throughout the school year."

**SALES HELP FOR BEER ACCOUNTS WILL BE MAILED THIS WEEK**

*Here's How*, a 30-page illustrated booklet which describes the successful use of broadcast advertising by brewers, has been published by the NAB Department of Broadcast Advertising and will be mailed to member stations this week.

Intended as a sales help, the booklet is a condensation of a series of articles which were written by Marie Ford, Editor of *Radio Showmanship*, for *Modern Brewery Age* and which appeared in the last named publication during 1944-45-46.

All phases of brewers' radio activities ranging from the establishment of dealer and consumer good will to the selection of time, station and promotion of the program are studied and numerous instances of successful techniques, programs and campaigns are cited.

**SMALL MARKET STATIONS EXECUTIVE COMMITTEE IN SESSION**

The Small Market Stations Executive Committee is holding a three-day session (April 22, 23 and 24) at the Statler Hotel, Washington, D. C. The committee members are:

- Marshall H. Pengra, KRRN, Roseburg, Oregon, Chairman
- Wayne W. Cribb, KHRM, Hannibal, Missouri
- James R. Curtis, KFRO, Longview, Texas
- Monroe B. England, WBRK, Pittsfield, Massachusetts
- William C. Grove, KFBC, Cheyenne, Wyoming
- Robert T. Mason, WMRN, Marion, Ohio
- Glenn Marshall, Jr., WFOY, Saint Augustine, Florida

The NAB Board Liaison Committee members working with the small market stations are:

- William B. Smullin, KIBM, Eureka, California
- Clair R. McCollough, WGPL, Lancaster, Pennsylvania
- Harry R. Spence, KXRO, Aberdeen, Washington
- Frank E. Fellegrin, NAB director broadcast advertising
- J. Allen Brown, assistant director, will serve the committee as advisor and secretary respectively.

The NAB management study, engineering requirements, local news and public interest programming will be discussion subjects of special interest to the group.

The management study series was authorized as a result of the small market executive committee meeting, last Fall. Arthur Stringer, NAB director of promotion, began the study in January, spending 3 to 5 days at each of five stations, in various sections of the nation. Altogether, the series is to include some 10 to 12 stations in the small market classification.

The executive committee meeting, according to Chairman Pengra, will include a discussion of personnel training, local, regional and national sales; employee-employer relations, group selling, syndicated programs (BMB, FM, station promotion and publicity).

**GROUP SELLING BY THE ARIZONA NETWORK**

The NAB Small Market Stations Division, headed by J. Allen Brown, has secured information and data from several areas on "group selling" to attract national and regional sponsors. (See current NAB Reports, pages 251 and 278.) A request for information was sent to Albert Johnson, Manager of the Arizona Network which has headquarters in Phoenix. Mr. Johnson replied as follows:

"The Arizona Network consists of three stations—KOY in Phoenix, KTUC in Tucson, and KSUN in Bisbee-Douglass. They are connected together by direct leased wire. KOY has a further wire from Phoenix to Los Angeles, connecting with the Columbia Broadcasting System and switching facilities there, whereby we pick up a few programs from other Los Angeles stations. The three stations are sold as a group. We offer a rate lower than the combined individual rates of the three stations as an inducement to buy all three. When spot announcements are sold, they may be bought on the three stations to secure the lower rate, but are scheduled individually on each, as we have found it is not practical to originate spot announcements at the key station (KOY), and feed to the other two. The scheduling may be identical on each station, or it may vary according to availability and what the sponsor may desire.

"All three stations are CBS affiliates and carry the same commercial programs from Columbia. This is not necessarily true of sustaining CBS programs, as one or more

(Continued on next page)

**APRIL 22, 1946 — 317**
might carry a sustainer, whereas the third would be filling with a locally originated show.

"The real advantage of the network is in selling program time to national spot or local advertisers.

"The type of commercial programs are varied, including local live shows originating usually at the key station, but on occasion from either of the other stations. There are no repeats on our lines, and we can reverse at will. We also feature transcribed shows and the above mentioned programs which are switched to us from Los Angeles stations.

"All KOY sustaining shows are available to the other two stations as sustainers, and are automatically fed down the line unless the affiliates have expressed desire to receive the CBS sustainer at that time, in case the CBS show would be fed. The following is a representative list of national and regional sponsors: Hidalgo Pharmacy, Santa Rita Hotel, Tovrea Packing Company, Valley National Bank, Bohemian Distributing Company, Bulova, Folger Coffee Company, Frontier Foods, Dr. LeGear Medicines, Los Angeles Soap Company, Alka Seltzer, Van Camps, Tintex, Petri Wine, Plow, Inc., Gospel Broadcasting Company, Rit, Rosefield Packing Company, and Purex.

"We carry approximately ten quarter hours of networks. We also feature transcribed shows and the above mentioned programs which are switched to us from Los Angeles stations.

"Multiple Ownership—(a) No person (including all persons under common control) shall, directly or indirectly, own, operate or control more than one FM broadcast station that would serve substantially the same service area as another FM broadcast station owned, operated, or controlled by such person.

"(b) No person (including all persons under common control) shall, directly or indirectly, own, operate, or control more than one FM broadcast station, except upon a showing (1) that such ownership, operation or control would not result in the concentration of control of FM broadcast stations or provide an FM broadcasting service distinct and separate from existing services, and (2) that such ownership, operation or control would not result in the concentration of control of FM broadcasting facilities in a manner inconsistent with public interest, convenience or necessity; provided, however, that the Commission will consider the ownership, operation, or control of more than six FM broadcast stations to constitute the concentration of control of FM broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

"The one to a customer policy applies only to applications which do not go to hearing. It has no impact on cases where it is necessary or believed desirable to hold a hearing—for example, cases where the number of applications for a particular community exceeds or is approximately equal to the number of available channels. In all hearing cases the Commission will, as soon as possible after the hearing is held, render a decision upon the basis of the record.

LEMKET INTRODUCES FM BILL

Congressman William Lemke (R), South Dakota, introduced a bill in the House of Representatives on Wednesday (17), to provide assignment of a section of the fifty-megacycle band of radio frequencies for FM. The bill, H. R. 6174, was referred to the Committee on Interstate and Foreign Commerce. Text of the bill follows:

To provide assignment of a section of the fifty-megacycle band of radio frequencies for frequency modulation (FM).

* The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.
“Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Communications Commission is hereby authorized and directed to assign to frequency modulation (FM) radio broadcasting a section of the fifty-megacycle band of radio frequencies.”

Department of Information

BEN MILLER JOINS INFORMATION STAFF

Latest addition to the staff at NAB headquarters is Ben Miller, who will work under Charles A. Batson, director of information.

Miller joins NAB after 3½ years of service in the Army. Released from service with the rank of captain, he had served for over a year in the War Department Bureau of Public Relations. In the bureau, he was assigned to the Radio Branch, Army Service Forces Group.

He went into the Army in the summer of 1942 after several years of station and advertising agency experience. After seven years with Young and Rubicam in New York, Miller went into the station field. At Y & R he worked on “We the People” as a research man and writer. From the agency he went with the newly formed WPID and helped open that station in Petersburg, Va., holding the post of program director. His next position was at Augusta, Ga., with WGAC, also as program director. He left WGAC in the spring of 1942 and shortly thereafter became a member of the nation’s armed forces.

News

ORDER “ALL RADIO” COPIES NOW

Devoted entirely to broadcast subjects the May “Journalism Quarterly” should be of fundamental interest to station managers, news directors, program managers, research directors and others. This issue is edited by Wilbur Schramm, director, School of Journalism, State University of Iowa, and vice chairman, Council on Radio Journalism. It contains the following articles:

In “What Radio News Means to Middleville,” Mr. Schramm went behind the ratings to discover what radio news means to a community of 600 persons. An average of 40 minutes was spent in interviewing every one of the 600 people from the third grade up. He gave a partial review of this article at the NAB-Iowa Radio News Clinic in Cedar Rapids, March 22. From this article alone the

Quarterly is worth several times its price of 75 cents per copy. Copies may be purchased by ordering directly from Journalism Quarterly
Emory University, Georgia

ANNOUNCE 2 MORE RADIO NEWS CLINICS

John J. Gillin, Jr., NAB director, district 10, and president WOW, Omaha, announced Friday (19) the appointment of John Alexander, manager, KODY, North Platte, as general chairman of the Nebraska Radio News Clinic to be held in Kearney, Saturday, May 11.

The Clinic follows the meeting of the Nebraska Broadcasters Association, also in Kearney, on Friday (19).

K. F. Schmitt, secretary-treasurer, Wisconsin Broadcasters Association, and general manager, WIBA, Madison, also announced Friday a Radio News Clinic for Wisconsin stations on Tuesday, May 14, Hotel Loraine, Madison.

PETITION PRESS ASSOCIATIONS TO TRANSMIT CORRECT PRONUNCIATIONS OF PROPER NAMES

If petition of Iowa Radio News Editors is granted by news distributing organization, the correct pronunciation of proper names appearing in the news will accompany the releases in which they appear.

Subject of proper pronunciation came up for extended discussion at the NAB-Iowa Radio News Clinic, in Cedar Rapids, March 22. Representatives of the press associations concurred that it would be possible for them to transmit proper pronunciation, phonetically, and that such service was within their province. Two stated that a recommendation to institute this service would be transmitted to their home offices. One stated that he believed he could almost promise that the service desired would be forthcoming.

Resolution adopted by the managers and news editors at Cedar Rapids has now been formally transmitted to the press associations, according to Buryl Lottridge, general chairman of the Iowa clinic and vice president, WOC, Davenport. The resolution reads:

Be it Resolved, That the Iowa Radio News Clinic assembled in Cedar Rapids, Iowa, Friday, 22 March 1946, requests that the three major news services (AP, UP, and INS) now serving Iowa radio stations with press news by teletypewriter make every effort to include in these press reports the correct pronunciation, by phonetics, of proper names whose exact pronunciation is not readily apparent from their spelling; that local correspondents of news services, to further this aim, be instructed to include in their dispatches to bureaus the phoneticized pronunciations of proper names that appear susceptible of more than one usage, with the same system to be used wherever a similar question arises in stories of national interest; so that wire services will give the same emphasis on correct pronunciation of a name by their radio clients as has always been given correct spelling of a name by newspapers.

Ad Council—OWMR

PUBLIC INTEREST CAMPAIGNS—APRIL 29-MAY 5, 1946

The following four public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of April 29-May 5 by The Advertising

(Continued on next page)
Homes for Veterans

America faces a critical housing shortage—and its veterans are the worst sufferers. They feel the pinch of the shortage more acutely because they interrupted their daily lives to go into the Armed Services. It is simply a matter of fair play to help them in every way possible, to locate homes in which they can live with their families as they return to civilian life. It is estimated that 1,600,000 of the married veterans who will have been released by December 31, 1946, have no established homes to which to return. It appears that more than 2,000,000 veterans’ families will be looking for places to live in 1946. The Federal Government is taking a number of measures to relieve the veterans housing situation. But it can be done by all means the most important source of housing for veterans consists of vacancies which become available in the existing housing supply. Urge listeners to help ease the housing situation by “staying put,” if they possibly can, so that a maximum number of veterans can find living places in the existing housing supply; sharing their homes with veterans’ families; and listing vacancies and houses for sale at the veterans housing referral center, if one exists in their community, so that veterans can get first chance at them. (Fact Sheet No. 5)

Safety on the Highways

Slaughter on our highways is skyrocketing. Right now smash-ups have reached an all-time high of more than one a minute... all day... every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was $1,450,000,000... almost 2 billion dollars. In the four months after gas rationing ended, traffic accidents killed 28,500, injured 921,500 more, a minutes... all day.. every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was $1,450,000,000... almost 2 billion dollars. In the four months after gas rationing ended, traffic deaths jumped 37%. Unless something is done about it, accidents will multiply alarmingly in coming months. Your station can help keep the “brakes” on America’s rising traffic death toll. Make each listener realize he is a potential accident victim. Point out as specifically as time will allow the little, thoughtless chances he may be taking today... this week... jay-walking... trying to beat the light... speeding... driving when he hasn’t had a drink... neglecting repairs on his car... ignoring signals at crossings. Your aim is to make each listener decide right then and there never again to take even a “little” chance with injury or death. (Fact Sheet No. 15)

Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning, spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone, city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief and Rehabilitation Administration considers 2,500 to 2,500 calories daily the minimum for safety. The present American consumption per person is estimated at 3,300 calories per day. Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The “have” countries, including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. Our share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June.

Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions by—

Reducing their consumption of all wheat and rice products and fats and oils... Eating more of the plentiful foods... Eliminating all food waste and turning in all used fats... Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20)

United States Savings Bonds

As a result of the United States Treasury’s decision to extend its wartime bonds and stamp program into the peacetime era, individuals can now continue to purchase bonds paying the same rate of interest as those sold during the war. These securities, now known as U. S. Savings Bonds and Savings Stamps, will include the wartime F and G bonds as well as the popular Series E bonds which return four dollars for every three invested, when the bonds mature. The success and convenience of the Payroll Savings Plan during the war years have resulted in its continued maintenance by business and industry throughout the nation. The high rate of interest of U. S. Savings Bonds, their sound investment values and their ready availability offer the individual investor the ideal way of saving for the future. Radio can perform a valuable service to its listeners by informing them of (1) the continued sales of U. S. Savings Bonds and Savings Stamps; (2) their availability through continuation of the Payroll Savings Plan and other regular purchase facilities and (3) their many advantages as an investment. (Fact Sheet No. 11)

SUPPORT REQUESTED IN PROMOTING HIGHWAY SAFETY

Media Programming Division of OWMR has requested stations to give support in publicizing the objects of the President’s Highway Safety Conference to be held in the Departmental Auditorium, Washington, D. C., May 8, 9, and 10.

This Conference has been called by President Truman in an attempt to formulate a coordinated action program to cope with the marked increase in highway traffic deaths and injuries since the elimination of gasoline rationing. The Conference will bring together a large number of the Governors of the 48 States, the State Highway and Motor Vehicle Administrators, representatives of organizations active in the safety field, and individuals with a basic interest in the problem.

President Truman has appointed Major General Philip B. Fleming, Federal Works Administrator, as General Chairman of the Conference; Thomas H. MacDonald, Public Roads Commissioner, is Chairman of the Coordinating Committee, and Colonel Light B. Yost, Office of the Secretary of War, is Executive Director.

Eight committees will make reports to the Conference on the following subjects which have a direct bearing on traffic highway safety: Accident Records, Education, Enforcement, Engineering, Laws and Ordinances, Motor Vehicle Administration, Organized Public Support, and Public Information.

Spot announcements have been mailed to program managers. OWNR urges use of them whenever possible.

THANKS FROM U. S. PUBLIC HEALTH SERVICE

The United States Public Health Service wishes to express its deep appreciation for the outstanding cooperation given “Know Your Public Health Nurse Week” by station managers. Reports from various sections of the country indicate exceptional coverage.
HEARINGS

The following hearings are scheduled to be heard before the Commission during the week beginning Monday, April 22. They are subject to change.

Monday, April 22

Further Hearing

Before Commissioner Walker in Washington, D. C.

NEW—Arkansas Democrat Co., Little Rock, Ark.
KRRV—Red River Valley Broadcasting Corp., Sherman, Texas—C. P. 910 kc., 5 KW, unlimited, DA-night and day.
NEW—Mid-Atlantic Broadcasting Corp., Louisville, Ky.—C. P. 1090 kc. (1050 NARBA), 1 KW night, 5 KW day, unlimited, DA-day and night.
WINN—Kentucky Broadcasting Corp., Inc., Albany, Ind.—C. P. 1080 kc., 1 KW night, 5 KW day, DA-day and night.
WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—C. P. 1070 kc., 50 KW night, 50 KW day, directional antenna.
NEW—Chambersburg Broadcasting Co., Chambersburg, Pa.—C. P. 800 kc., 1 KW daytime.
NEW—Ranulf Compton, d/b as Radio WKDN, Camden, N. J.—C. P. 820 kc., 1 KW daytime only.

Further Hearing

Before Commissioner Walker in Washington, D. C.

NEW—Arkansas Democrat Co., Little Rock, Ark.—C. P. 1400 kc., 250 watts, unlimited.

Monday, April 22 to May 10

To Be Held at Cleveland-Akron, Ohio

NEW—United Broadcasting Co., Cleveland, Ohio—For FM facilities.
NEW—National Broadcasting Co., Inc., Cleveland, Ohio—For FM facilities.
NEW—WOJW, Inc., Cleveland, Ohio—For FM facilities.
NEW—United Garage and Service Corp., Cleveland, Ohio—For FM facilities.
NEW—International Union, United Automobile Aircraft and Agricultural Implement Workers of America (UAW-CIO), Cleveland, Ohio—For FM facilities.
NEW—WGAR Broadcasting Co., Cleveland, Ohio—For FM facilities.
NEW—Telair Co., Cleveland, Ohio—For FM facilities.
NEW—Cleveland Broadcasting, Inc., Cleveland, Ohio—For FM facilities.
NEW—Allen T. Simmons, Akron, Ohio—For FM facilities.
NEW—Summit Radio Corporation, Akron, Ohio—For FM facilities.
NEW—The Akron Radio Corp., Akron, Ohio—For FM facilities.
NEW—Knight Radio Corp., Akron, Ohio—For FM facilities.

Further Hearing

To Be Held at Pittsburgh, Pennsylvania

NEW—Allen B. DuMont Laboratories, Inc., Pittsburgh, Pa.—For television facilities.
NEW—Westinghouse Radio Sta., Inc., 310 Grant St., Pittsburgh, Pa.—For television facilities.

Friday, April 26

Tuesday, April 23

Further Hearing

KROW—KROW, Inc., Oakland, Calif.—C. P. 960 kc., 5 KW, unlimited, DA-night.

Wednesday, April 24

WADC—Allen T. Simmons, Tallmadge, Ohio—C. P. 1220 kc., 50 KW, DA-day and night use.
WGAR—WGAR Broadcasting Co., Hotel Statler, 12th & Euclid Sts., Cleveland, Ohio—C. P. 50 KW, 1220 kc., new DA for day and night.

To Be Held at Lexington, Ky.

NEW—The Central Kentucky Broadcasting Co., Lexington, Ky.—C. P. 1340 kc., 250 watts, unlimited.

Commercial Television Broadcast

To Be Held in Detroit, Michigan

NEW—The Evening News Assn., Detroit, Mich.—C. P. for new television broadcast station.
NEW—The Jam Handy Organization, Inc., Detroit, Mich.—C. P. for new television broadcast station.
NEW—King Trendle Broadcasting Corp., Detroit, Mich.—C. P. for new television broadcast station.
NEW—United Detroit Theatres Corp., Detroit, Mich.—C. P. for new television broadcast station.
NEW—Midwest Broadcasting Co., Mount Vernon, Ill.—C. P. 910 kc., 500 watts, daytime.

Thursday, April 25

Television Broadcast

To Be Held at Pittsburgh, Pennsylvania

NEW—Allen B. DuMont Laboratories, Inc., Pittsburgh, Pa.—For television facilities.
NEW—Westinghouse Radio Sta., Inc., 310 Grant St., Pittsburgh, Pa.—For television facilities.

Federal Communications

Commission Actions

AM APPLICATIONS GRANTED

NEW—Union City Broadcasting Co., Inc., Union City, Tenn.—Granted construction permit for a new station to operate on 1240 kc., 250 watts, unlimited time. Site to be determined. (B3-P-4508)
NEW—John Raymond Bartlett, d/b as "Radio South," Quitman, Ga.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time. (B3-P-4558)
NEW—Joseph F. Biddle Publishing Co., Huntington, Pa.—Granted construction permit for a new Class IV station; 1100 kc., 250 watts, unlimited time. (B2-P-4500)
NEW—The New Mexico Publishing Co., Santa Fe, N. Mex.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time. (B5-P-3925; Docket 68031)
NEW—Santa Clara Broadcasting Co., Sun Jose, Cal.—Granted construction permit for a new station to (Continued on next page)
operate on 1390 kc., 1 kw., daytime only. (B5-P-3957; Docket 7453)

NEW—Manit Publishing Co., Ltd., Wainuku, T. H.—Granted construction permit for a new station to operate on 550 kc., 1 kw., unlimited time. (B-P-4544)

NON-COMMERCIAL EDUCATIONAL FM APPLICATION GRANTED

NEW—Board of Education, Sevanhaka High School, Floral Park, N. Y.—Granted construction permit for a new non-commercial educational FM station; Channel: 90.5 mc. (No. 251); 0.35 kw.; antenna height above average terrain: 112 ft.; site subject to approval by C.A.A. (B-P-3245-45)

TELEVISION APPLICATIONS GRANTED

NEW—King Trendle Broadcasting Co., Detroit, Mich.; The Evening News Assn., Detroit, Mich.—Granted application of King Trendle Broadcasting Co. (B2-PCT-45), and application of The Evening News Assn. (B2-PCT-100) for new television stations, subject to frequency and engineering details to be determined. (Docket 7255 and 7278)

ACTIONS ON MOTIONS

Wabash Valley Broadcasting Corp., Terre Haute, Ind.; West Central Broadcasting Co., Peoria, Ill.—The Commission, on its own motion, ordered that the further consolidated hearing on these two applications, now scheduled for April 15 in Washington, be continued to Monday, May 15. (Docket 6924; 7108)

WGAL, Inc., Lancaster, Pa.; Lancaster Television Corp., Lancaster, Pa.—The Commission, on its own motion, ordered that the hearing on these two applications for commercial television stations, now scheduled for April 18 and 19 at Lancaster, be continued without date until further order of the Commission. (Docket 7308; 7309)

Walter A. Graham, Tifton, Ga.—The Commission, on its own motion, ordered that the hearing on this application (Docket 6918) now scheduled for April 18, be continued without date until further order of the Commission.

KVAN—Vancouver Radio Corp., Vancouver, Wash.; KSEI—Radio Service Corp., Pocatello, Idaho—The Commission, on its own motion ordered that the consolidated hearing on these applications now scheduled for May 15, be continued without date until further order of the Commission. (Dockets 6556; 6558)

Southern California Broadcasting Co., Pasadena, Calif.; Orange County Broadcasting Co., Santa Ana, Calif.—The Commission, on its own motion, ordered that the consolidated hearing on these applications now scheduled for April 18, be continued without date until further order of the Commission. (Dockets 7337; 7338)

Capital Broadcasting Corp., Annapolis, Md.; WCBM—Balto. Broadcasting Corp., Baltimore, Md.—The Commission, on its own motion, ordered that the consolidated hearing on these applications, now scheduled for April 17, be continued without date until further order of the Commission. (Docket 7571; 7572)

Bay Broadcast Co., Sandusky, Ohio—Granted motion for authority to take depositions and waiver of Sees. 1,221 and 1,227 of the Commission's rules, and for reopening of the record for the purpose of receiving depositions when taken. (B2-P-4355)

Southern California Broadcasting Co., Pasadena, Calif.; Orange County Broadcasting Co., Santa Ana, Calif.—The Commission, on its own motion, ordered that the consolidated hearing in re these two cases, be scheduled for 10 A. M., Thursday, April 18. (Docket 6557; 6558)

KHMO—The Courier-Post Pub. Co., Hannibal, Mo.—Granted petition for leave to amend its application (Docket 7454), so as to specify the use of a directional antenna day and night, instead of night only, etc., and the amendment filed with the petition was accepted.

Monona Broadcasting Co., Madison, Wis.—Granted petition for leave to amend its application (Docket 7551), so as to specify a revised direction antenna system, etc., and the amendment was accepted.

F. M. Radio and Television Corp., Riverside, Cal.—Granted motion for leave to amend its application (Docket 7558), so as to specify a revised direction antenna system, and add explanatory statement, and the amendment was accepted.

Bieberbach Broadcasting Corp., Boston, Mass.—Granted motion to dismiss without prejudice its application (B2-PH-358; Docket 7410) for a new FM station.

Beaver County Broadcasting Corp., Beaver Falls, Pa.—Granted petition to dismiss without prejudice its application for a new FM station (Docket 7210, B2-PH-755).

Rirsch Battery and Radio Co., Cape Girardeau, Mo.—Granted petition for continuance of hearing on application for CP (Docket 7130) and application of So. Ill. Broadcasting Co., Inc., Centralia, Ill. (Docket 7129), and continued hearing to June 3, 1946.

Texoma Broadcasting Co., Wichita Falls, Texas—Granted petition for continuance of consolidated hearing on its application for CP (Docket 7126) and that of Wichtex Broadcasting Co., Wichita Falls, Texas (Docket 7127), and continued said hearing to June 3, 1946.

Lewis Windmuller, Allentown, Pa.—Granted motion to amend its application for CP (Docket 7150), so as to substitute the Allentown Broadcasting Corp. for Lewis Windmuller as applicant; change paragraphs, etc., and the amendment was accepted.

Mt. Vernon Radio & Television Co., Mt. Vernon, Ill.— Granted petition for application for CP (Docket 7160), so as to show the substitution of L. F. Tomlinson for Paul Rudisilich as stockholder, director and V. P. of applicant corporation; change paragraphs, etc., and the amendment was accepted.

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.— Granted petition to amend its application for CP (Docket 7164) so as to specify modified D3 pattern; revised engineering data, etc., and the amendment was accepted.

Roy Hofheinz and W. E. Hooper, a partnership, d/b as La. Broadcasting Co., New Orleans, La.—Granted in part the request for leave to take depositions in re hearing now scheduled for Washington, D. C., to begin May 20, upon movant's application for CP (Docket 7162) in consolidation with application of Frank R. Gibson, Lake Charles, La. (Docket 7160), Times Picayune Pub. (Docket 7162), limiting depositions to 10 witnesses in each case.

WADC—Allen T. Simmonis, Tallmadge, Ohio—Granted petition for leave to amend its application for CP (Docket 7339), so as to propose a directional antenna for station WGAR, operating on 1350 kc., at Cleveland; change paragraphs, etc., and the amendment was accepted.

WGAR Broadcasting Co., Cleveland, Ohio—Granted petition requesting leave to amend application for FM station (Docket 7043), so as to supply engineering data and make other minor changes, and the amendment was accepted.

United Broadcasting Co., Cleveland, Ohio—Granted petition to dismiss without prejudice its application (B2-PCT-77; Docket 7296) for a new commercial television station.

Knight Radio Corp., Akron, Ohio—Granted petition to dismiss without prejudice application for new FM station (B2-PH-622; Docket 7051).

The Akron Radio Corp., Akron, Ohio—Granted motion to dismiss without prejudice its application for a new FM station (B2-PH-857; Docket 7050).

Enterprise Publishing Co., Brownsville, Mass.—Granted petition for leave to amend application for CP (Docket 7568), so as to specify the frequency 990 instead of 1110 kc.; change paragraphs 16 and 19, etc. The amendment was accepted, and the Commission on

(Continued on next page)
its own motion removed application from hearing docket.

WADC—Allen T. Simmons, Tallmadge, Ohio.—Granted motion for leave to amend its application for CP (Docket 7484), so as to specify frequency 1290 kc., unlimited time, instead of 790 kc., 500 watts night, 1 KW day, etc. The amendment was accepted and application removed from hearing docket.

Missionary Society of St. Paul the Apostle, New York City.—Denied petition requesting the Commission, on its own motion, to issue subpoenas for the attendance of certain witnesses at the hearing now scheduled for May 20, in re Dockets 7316, 7317 and 7318.

WQXR— Interstate Broadcasting Co., Inc., New York City.—Granted petition requesting leave to intervene in the hearing on application for CP (Docket 7161), scheduled for May 20, 1946, in re application of The Times Picayune Pub Co., New Orleans, for a new station.

Mid-State Broadcasting Co., Peoria, Ill.—Granted petition for leave to amend its application for CP (Docket 7430), so as to specify modified DA pattern, and the amendment was accepted.

F. H. B. Broadcasting Co., Inc., Denver, Colo.—Granted petition requesting leave to intervene in the consolidated hearing on applications of Eastern Broadcasting and Television Co., Idaho Falls, Idaho—Designated application of Idaho Falls Broadcasting Co. (B3-P-3599) and application of Eastern Idaho Broadcasting and Television Co. (B3-P-4633), for hearing in a consolidated proceeding; both seek a new station at Idaho Falls to operate on 1330 kc., 250 watts, unlimited time.

KWSC—State College of Washington, Pullman, Wash.—Designated for consolidated hearing application of KWSC (B3-P-3940) to change facilities from 1350 kc., 250 watts, sharing time with KTW, Seattle, to 1030 kc., 5 KW day, 1 KW night, DA-night at Pullman, Wash., in consolidated proceeding with applications of Alvin E. Nelson, Inc. (Docket 7389), KARM (Docket 7124); KFRE (Docket 7125) and KROY (Docket 7170); further ordered the Bills of Particulars hereoffore issued in this proceeding be amended to include KWSC, and that WBZ, Boston, be made a party to this proceeding.

Plains Empire Broadcasting Co., Amarillo, Texas.—Denied for hearing application for a new station to operate on 1320 kc., 500 watts night, 1 KW-LS, directional antenna night, unlimited time (B3-P-4551).

Charleston Broadcasting Co., Charleston, S. C.—Designated for hearing application for a new station to operate on 1530 kc., 250 watts, unlimited time, (B3-P-4248).

Southern Broadcasting Co.—Richard E. Adams, James H. Shoemaker and Albert A. Anderson, d/b as Coastal Broadcasting Co.; Charleston Broadcasting Co. and Fort Sumter Broadcasting Co., Charleston, S. C. — Designated for consolidated hearing these three applications, all seeking a new station in Charleston to operate on 1450 kc., 250 watts, unlimited time, (B3-P-4640; B3-P-4570; B3-P-4248 and B3-P-4765).

Frederic LeMieux, et al., d/b as Gulf State Broadcasting Co., Crowley, La.; Max Thomas, Crowley, La. — Designated application of Gulf State Broadcasting Co. (B3-P-4248) for consolidated hearing with application of Max Thomas. Both applicants seeking 1450 kc., 250 watts, unlimited time.

Chesapeake Radio Corp., Annapolis, Md.; United Broadcasting Co., Inc., Silver Spring, Md. — Designated application for a new station to operate on 810 kc., 250 watts, unlimited time (B1-P-4139) for consolidated hearing with application of United Broadcasting Co., Inc. (B1-P-4030), for a new station to operate on 810 kc., 1 KW, limited time.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending November 1, 1948:

KFBR, Great Falls, Mont.; KVOR, Colorado Springs; WBRR, Brooklyn; WDRC, Hartford, Conn.; WBRC, Dubuque, Minn.; WEVD, New York City; WVLJ, Niagara Falls; WDTM, Athens, Ga.; WLOL, Minneapolis; WMRO, Aurora, Ill.; WMMS, Cleveland; WMCA, New York City; KMCO, Council Bluffs, Iowa; KRSP, Seattle.

WORK—York Broadcasting Co., York, Pa.—Granted renewal of license for the period ending November 1, 1948.

The following stations were granted renewal of licenses for the period ending February 1, 1948:

(Continued on next page)
The following stations were granted renewal of licenses for the period ending August 1, 1948:

KFPA, Helena, Ark.; WTIV, E. St. Louis, Ill.; KALE, Portland, Ore.; WWSW, Pittsburgh, Pa.

**MISCELLANEOUS ACTIONS**

WHNF—Marcus Low Booking Agency, New York City—Granted authority to change call letters of FM station from WHNF to WMGM.

KTRO—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Granted authority to change call letters of FM station from KTRO to KMGM.

KWOS—Tribune Printing Co. (Assignee), Capital Broadcasting Co. (Assignee), Jefferson City, Mo.—Granted consent to voluntary assignment of license of station KWOS from Tribune Printing Co. to Capital Broadcasting Co., a new corporation, a subsidiary of Assignor, so as to separate their newspaper and radio business. (B4-AL-505)

KSO—Kingsley H. Murphy, Des Moines, Iowa—Granted construction permit to change the transmitter location and install a new antenna and ground system for station KSO operating on 1460 kc., 5 KW, unlimited time, DA-night. (B4-P-4327)

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted construction permit to increase daytime power from 1 to 5 KW and install a new transmitter; 1 KW night, unlimited. (B3-P-4360)

Charlesston Broadcasting Co., Charleston, S. C.—Adopted a decision and order denying petition of Charleston Broadcasting Co. for reconsideration or rehearing of the grant of the application of Carter C. Peterson (B3-P-4255); and the grant of said application of Carter C. Peterson for a new station in Savannah, authorized February 20, 1946, is affirmed.

F. R. Pidcock, Sr., and James M. Wilder, d/b as Georgia Charleston Broadcasting Co., Savannah, Ga.—Granted petition to grant without further proceedings, application for a new station to operate on 2530 kc., 250 watts, unlimited time. (B3-P-3666; Docket 6639)

WNEW—Greater New York Broadcasting Corp., New York City—Denied petition for review of decision of the Presiding Officer of the Motions Docket granting of the application of Richard E. O'Dea, Patterson, N. J., for leave to intervene in the consolidated hearing on applications of WNEW for CP and renewal of license, and application of Missionary Society of St. Paul the Apostle for CP; and the action of the Presiding Officer of the Motions Docket of April 4 granting O'Dea's petition to intervene, is sustained.

WHRK—United Broadcasting Co., Cleveland, Ohio—Granted construction permit to change frequency from 1420 to 1420 kc.; increase power from 100 watts to 500 watts night, 1 KW day; make changes in antenna and install new transmitter. (B5-P-4455)

KGKY—Hilliard Co., Scottsbluff, Neb.—Granted construction permit to change from 1400 to 1110 kc.; increase power from 250 watts to 750 kc., and install directional antenna for night time use, without prejudice to the filing of a petition for reinstatement after conclusion of proceedings in Docket 6741.

KABC—The Alamo Broadcasting Co., Inc., San Antonio, Texas—Granted modification of CP, which authorized change in frequency, etc., for extension of completion date from 4-9-46 to 7-8-46. (B3-MP-1806)

WPPA—A. V. Tidmore, Jr/as Pottsville Broadcasting Co., Pottsville, Pa.—Granted modification of CP which authorized a new type of transmitter (N.E. 485-A1), for approval of antenna, and approval of transmitter and studio locations at Minersville Road, W, of Pottsville, and 7 South Centre St., Pottsville, respectively. Permittee is granted a waiver of Secs. 3.55(b) of the Commission's Rules, conditions. (B2-MP-1858)

WING—Great Trails Broadcasting Corp., Dayton, Ohio—Granted modification of CP, which authorized changes in DA for night use, etc., for extension of completion date from 4-14-46 to 7-14-46. (B2-MP-1898)

KSMK—Hugh G. Shurtliff, et al., Santa Maria, Calif.—Granted license to cover CP which authorized a new station; 1450 kc., 250 watts, unlimited time. The licensee hereunder is granted a waiver of Secs. 3.55(b) and 3.90 of the Commission's rules; condition (B5-I-1927); also granted authority to determine operating power by direct measurement of antenna power. (B5-Z-1752)

KRLD Radio Corp., Area of Dallas, Texas—Granted CPs for the new radio station to be used with standard station KRLD; frequencies: 38.32, 33.74, 33.82 and 37.98 mcs.; 35 watts for one, 2 watts for the other. (B3-PRE-362 and B3-PRE-460)

WSXCT—The Crosley Corp., Cincinnati, Ohio—Granted modification of CP which authorized an experimental television station, for extension of completion date from 4-28-46 to 10-28-46. (B2-MPVB-148)

W9XEK—Courier-Journal & Louisville Times Co., Eastwood, Ky.—Granted modification of CP which authorized change in frequency, etc., in developmental station, for extension of completion date from 3-22-46 to 5-22-46. (B2-MPXE-26)

The Penna. State College, Moshannon State Park, Pa.—Granted special temporary authorization to operate a composite transmitter on 106 mcs., with 100 watts and an inaudible modulation, in order to make field intensity measurements to determine the location of proposed FM transmitter to operate as an educational broadcast station—the transmitter and half-wave vertical antenna to be located near the Rattlesnake Fire Tower at Moshannon State Park, Pa., for the period April 15 and ending no later than May 14, 1946.

WHK—United Broadcasting Co., Cleveland, Ohio—Adopted an order dismissing without prejudice to the filing of a petition for reinstatement after conclusion of the proceeding in Docket No. 6741, the application of WHK for CP, with the action of March 28, 1946, and the decision and order dismissing without prejudice to the filing of a petition for reinstatement after the conclusion of the proceeding in Docket No. 6741, the application of WHK for CP, are affirmed.

WCBM—Baltimore Broadcasting Co., Baltimore, Md.—Adopted an order dismissing without prejudice to the filling of a petition for reinstatement after conclusion of the proceeding in Docket No. 6741, the application of WHK for CP, are affirmed.

WJJD—WJJD, Inc., Chicago, Ill.—Granted construction permit to increase power from 20 to 50 KW, DA, on present frequency 1160 kc.: Install a new trans¬mitter and directional antenna, and operation limited to KSL, Salt Lake City, the dominant A-A station on the channel. (B4-P-3988)

WIEB—WIEB, Inc., Portsmouth, N. H.—Denied petition to reinstate application for construction permit (B1-P-3626; Docket 6595), to increase hours of operation from limited-WSB to unlimited time, on frequency 750 kc., and install directional antenna for night time use, without prejudice to the filing of a petition for...
others for new television stations, be continued without date, until further order of the Commission.
The Evening News Ass'n, The Jam Handy Organization, Inc., King Trendle Broadcasting Corp., United Detroit Theatres Corp., Detroit, Mich.—Ordered that the Commission's order of February 1, 1946, designating these five applications for new television stations for consolidated hearing, be vacated. (Docket 7275; 8277, 7278 and 7279).

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted CP to install a new vertical antenna. (B1-P-4009)

NEW—American Broadcasting Co., Inc., Area of New York City—Granted CP for a new relay broadcast station to be used with applicant's standard station WJZ; frequencies: 31.22, 35.62, 37.02 and 39.26 mc.; 50 watts. (B1-PRF-459)

Liberty Broadcasting Co., Pittsburgh, Pa.—Denied petition of Liberty Broadcasting Co. for reconsideration and grant without hearing of its application for a new station to operate on 730 kc., 1 KW, daytime only.

KROP—Broadcasting Corp. of America, Brawley, Cal.—Granted modification of CP which authorized a new station, for changes in vertical antenna and transmitting equipment. Permittee is granted a waiver of Sec. 3.55(b) of the Commission's Rules and Regulations, conditions.

Federal Communications
Commission Applications

AM APPLICATIONS ACCEPTED FOR FILING

630 Kilocycles

NEW—Washington Broadcasters, Inc., Spokane, Wash.—Construction permit for a new standard broadcast station to be operated on 630 kc., power of 5 kW, directional antenna and unlimited hours of operation. Amended re stockholders and directors.

640 Kilocycles

NEW—Mike Benton, d/b as General Broadcasting Co., Atlanta, Ga.—Construction permit for a new standard broadcast station to be operated on 640 kc., power of 1 KW and limited hours of operation. Amended to change hours of operation from limited time to daytime.

690 Kilocycles

NEW—United Broadcasting Co., Inc., Silver Spring, Md.—Construction permit for a new standard broadcast station to be operated on 690 kc., power of 1 KW and limited hours of operation. Amended to change frequency from 690 kc. to 810 kc., and change hours of operation from limited time to daytime. Amended to change frequency from 810 to 1190 kc., make changes in transmitting equipment and change transmitter location.

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio—Voluntary assignment of license to Crosley Broadcasting Corp.

730 Kilocycles

WPIK—Potomac Broadcasting Corp., Alexandria, Va.—Construction permit to increase power from 250 watts to 1 KW and install new transmitter.

750 Kilocycles

NEW—C. Merwin Dobyns, San Bernardino, Calif. (P. O. Temp., 800 East Ocean Ave., Long Beach, Calif.)—Construction permit for a new standard broadcast station to be operated on 750 kc., power of 1 KW and daytime hours of operation.

850 Kilocycles

KOA—National Broadcasting Co., Inc., Denver, Colo.—Construction permit to mount FM antenna on present vertical antenna.

870 Kilocycles

NEW—Tulsa City Broadcasting Co., McKinney, Pa.—Construction permit for a new standard broadcast station to be operated on 870 kc., power of 1 KW and daytime hours of operation. Amended to change frequency from 870 to 890 kc.

890 Kilocycles

NEW—Tom S. Whitehead, Brenham, Texas (P. O. 306 E. Main St.)—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 250 watts and daytime hours of operation.

NEW—Chesapeake Broadcasting Co., Inc., Washington, D. C. (P. O. Temp., 7250 N. W. 4th St.)—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 5 KW and daytime hours of operation.

940 Kilocycles

NEW—Hollywood Broadcasting Co., Hollywood, Fla. (P. O. 1924 Hollywood Blvd.)—Construction permit for a new standard broadcast station to be operated on 940 kc., power of 1 KW and daytime hours of operation.

950 Kilocycles

NEW—Lubbock Broadcasting Co., Lubbock, Texas—Construction permit for a new standard broadcast station to be operated on 950 kc., power of 1 KW and daytime hours of operation. Amended to change frequency from 960 to 950 kc.

960 Kilocycles

NEW—Maricopa Broadcasters, Inc., Phoenix, Ariz.—Construction permit for a new standard broadcast station to be operated on 960 kc., power of 5 KW, directional antenna night, and unlimited hours of operation. Amended re stockholders and directors.

970 Kilocycles

WAAT—Bremer Broadcasting Corp., Newark, N. J.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and make changes in directional antenna for night use.

1020 Kilocycles

NEW—Paul F. McCloy, John H. Searing, and Ann E. Searing, d/b as Southern Illinois Broadcasting Partnership, Carbondale, Ill. (P. O. 211 West Main St.)—Construction permit for a new standard broadcast station to be operated on 1020 kc., power of 3 KW and daytime hours of operation. Call letters “WCHL” reserved.

1090 Kilocycles

NEW—Greater Muskegon Broadcasters, Inc., Muskegon, Mich.—Construction permit for a new standard broadcast station to be operated on 1090 kc., power of 1 KW and daytime hours of operation. Amended to change frequency from 980 to 1090 kc.

1130 Kilocycles

NEW—Albert E. Furlow, Frank G. Forward, Roy M. Ledford, Fred H. Roer and Mary W. Hetzler, d/b as Silver Gate Broadcasting Co., San Diego, Cal.—Construction permit for a new standard broadcast station to be (Continued on next page)
operated on 1210 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1240 to 1130 kc., change hours of operation from unlimited time to daytime, and to make changes in vertical antenna.

1190 Kilocycles

WBUY—Omar G. Hilton and Greeley N. Hilton, d/b as Davidson County Broadcasting Co., Lexington, N. C.—Modification of construction permit (133-P-1186, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter and studio locations.

1210 Kilocycles

NEW—Charles A. Sprague, Glenn R. Thayer and William W. Behrman, d/b as WMIL Broadcasting Co., Milwaukee, Wisc.—Construction permit for a new standard broadcast station to be operated on 1200 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 1200 to 1210 kc.

1220 Kilocycles

NEW—Millard Kibbe and Donald K. Deming, d/b as D & K Broadcasting Co., Palo Alto, Cal.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and daytime hours of operation.

1230 Kilocycles

KGAK—Albert E. Buck and Merle H. Tucker, a partnership, d/b as Gallup Broadcasting Co., Gallup, N. Mex.—License to cover construction permit (B5-P-3862, as modified) which authorized a new standard broadcast station.

KGAK—Albert E. Buck and Merle H. Tucker, a partnership, d/b as Gallup Broadcasting Co., Gallup, N. Mex.—Authority to determine operating power by direct measurement of antenna power.

1300 Kilocycles

KROP—Broadcasting Corporation of America, Brawley, Cal.—Modification of construction permit (B5-P-3568, which authorized a new standard broadcast station) for changes in vertical antenna and transmitting equipment.

1340 Kilocycles

NEW—Thomas Henry Golding, Sr., Thomas Henry Golding, Jr., Emmett Holmes McMurty, Jr., and Frank Wilson Baldwin, a partnership d/b as Radio Services Co. of Brookhaven, Missisissipi, Brookhaven, Miss. (P. O. 107 So. Poplar St., Greenville, Miss.)—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation.

KPDN—C. H. Holles, Harry Holles and Jane Holles Hardie, a partnership, d/b as Radio Station KPDN, Pampa, Texas—License to cover construction permit (B3-P-3890, which authorized an increase in power and installation of new transmitter.

KPDN—C. H. Holles, Harry Holles and Jane Holles Hardie, a partnership, d/b as Radio Station KPDN, Pampa, Texas—Authority to determine operating power by direct measurement of antenna power.

NEW—John P. Rabb, Lenoir, N. C.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. Amended to change transmitter location.

1400 Kilocycles

WIRA—Indian River Broadcasting Co., Fort Pierce, Fla.—Modification of construction permit (B3-P-3905, which authorized a new standard broadcast station) for change in type of transmitter and change in transmitter and studio locations.

NEW—Big Horn Basin Broadcasting Co., Cody, Wyo. (P. O. 1119 Alger Ave.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency to 1119 Alger Ave. (Facilities to be relinquished by KWYO.)

NEW—Arizona Radio and Television, Inc., Mesa, Ariz. (P. O. Route 3, Box 134)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Green Bay Broadcasting Co., Green Bay, Wisc.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. Amended to change transmitter location.

FM APPLICATIONS ACCEPTED FOR FILING

Siskiyou Broadcasting Co., Yreka, Calif. (P. O. 150 N. Main St., Ashland, Ore.)—Construction permit for a new FM (Community) broadcast station to be operated on Channel #282, 101.3 mc.

Siskiyou Broadcasting Co., Ashland, Ore.—Construction permit for a new FM (Community) broadcast station to be operated on Channel #282, 101.3 mc.

Capital Broadcasting Co., Jefferson City, Mo.—Construction permit for a new FM (Rural) broadcast station to be operated on frequency to be determined by Chief Engineer of FCC and coverage to be determined.

Springfield Broadcasting Co., Springfield, Mo. (P. O. 508 St. Louis St.)—Construction permit for a new FM (Metropolitan) broadcast station to be operated on frequency to be determined by Chief Engineer of FCC. (Continued on next page)
TELEVISION APPLICATIONS ACCEPTED FOR FILING

NEW—Associated Broadcasters, Inc., 1550 Mckinley Ave., Dayton, Ohio.—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 5 kw. and unlimited hours of operation.

NEW—The Drovers Journal Publishing Co., Chicago, Ill.—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 5 kw. and unlimited hours of operation.

NEW—L. R. M. A. Corp., 1001 Market St., Kansas City, Mo.—Construction permit to increase power from 90 kw. to 500 kw. and unlimited hours of operation.

NEW—Del Norte Broadcasting Co., El Paso, Texas.—Construction permit for a new standard broadcast station to be operated on 1560 kc., power of 500 watts and unlimited hours of operation.

NEW—The Traveleer Publishing Co., Inc., Kansas City, Kans.—Construction permit for a new standard broadcast station to be operated on 1320 kc., power of 1 kw. and unlimited hours of operation.

APPLICATIONS TENDERED FOR FILING

WLWJ—The Crosley Corp., Area of Cincinnati, Ohio—Voluntary assignment of license to Crosley Broadcasting Corp.

WLWH—The Crosley Corp., Area of Cincinnati, Ohio—Voluntary assignment of license to Crosley Broadcasting Corp.

WLW—The Crosley Corp., Area of Cincinnati, Ohio—Voluntary assignment of license to Crosley Broadcasting Corp.

WLWD—The Crosley Corp., Area of Cincinnati, Ohio—Voluntary assignment of license to Crosley Broadcasting Corp.
Independent Grocers Alliance Distributing Co., Chicago, its directors, and four of its affiliated wholesale grocers for whom it operates a buying and merchandising service, are charged in a Commission complaint with violation of the brokerage section of the Robinson-Patman Act by accepting brokerage fees or commissions from sellers of foodstuffs, groceries and related products. Four sellers of such commodities, who pay the brokerage to the respondent buyers, likewise are charged with violating the Act. (5432)

West Coast Packing Corp., Long Beach, Calif., and its officers, packers and distributors of fish and seafood products, are charged in a Commission complaint with violating the brokerage section of the Robinson-Patman Act by paying brokerage fees or commissions to direct buyers or buying brokers who purchase the respondents' products for their own accounts for resale. The officers of the corporation are Albert Vignolo, Sr., president; Eugene Giacomo, vice president; and Albert Vignolo, Jr., general manager and treasurer. (5432)

CEASE AND DESIST ORDERS

The Commission issued the following Cease and Desist orders last week:

Lakeland Highlands Canning Co., Inc.—An order directed against violation of the brokerage section of the Robinson-Patman Act in connection with interstate sales of fruit, juices and other fruit products has been issued against Lake-land Highlands Canning Co., Inc., Highland City, Fla., and its officers, Carroll E. Lindsey and Gordon T. Rou. (5383)

Pixacol Co.—The Commission has issued an order prohibiting Bernard Singerman, trading as Pixacol Co., Cleveland, Ohio, from making false representations concerning a medicinal preparation designated Pixacol, advertised as having therapeutic value in the treatment of psoriasis. (5329)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Soilless Growers Guild—Henry Phillips, trading as The Soilless Growers Guild, Grand Rapids, Mich., entered into a stipulation with the Federal Trade Commission to discontinue certain misrepresentations in connection with the sale of Phillips Magical Plant Balls, advertised for use in sprouting seed and growing flowers, vegetables and other plants indoors. (53301)

Standard Factories, Inc., 317 East Fifth St., Des Moines, Iowa, and G. A. Stanzel, who owns all of the corporation's stock and conducts its business, stipulated that in advertising and selling a compound for use in automobile radiators they will cease and desist from designating or describing it as "Dental Metal," or otherwise representing that it is composed of metals used in dentistry or is comparable in application or effect to the filling of teeth by a dentist. (4192)
District Meetings

HANNA ELECTED SECOND DISTRICT DIRECTOR

Michael R. Hanna, manager of WHCU, the Cornell University station, Ithaca, New York, was elected director of the Second NAB District at the membership meeting of that district in New York City last Thursday and Friday (25 and 26). He succeeds Kolin Hager, WGY, Schenectady, who had previously expressed the intention of not becoming a candidate for reelection.

The program managers clinic Friday afternoon became a highlight of the two-day session when Charles A. Siepmann, author of the new book “Radio's Second Chance,” and Justin Miller, NAB President, spoke concerning the FCC program report. Mr. Siepmann was an FCC employee during the time the program report was being prepared.

Following Mr. Siepmann's talk, Judge Miller was invited by the presiding officer of the clinic, John H. McNeil, WJZ, to reply. At the conclusion of his remarks, Judge Miller was given a tremendous ovation by the assembled broadcasters.

(Ed. Note: Full coverage of the Second District Meeting will be carried in next week's edition of REPORTS.)

Small Market Stations

SMALL MARKETS COMMITTEE MEETS IN WASHINGTON

The FCC Program Report was the topic for considerable discussion at the Small Market Stations Executive Committee meeting held at the Statler Hotel, Washington, D. C., last week (22, 23 and 24). The Committee drew up resolutions relative to the subject to be presented to the NAB Board of Directors when it meets next month.

George Adair, Chief Engineer of the FCC, was guest of the Committee at a luncheon on Monday. He discussed engineering requirements and FM operations in the future.

In an address to the Committee, A. D. Willard, Jr., Executive Vice-President, discussed the music situation and expressed appreciation to this group of stations for their assistance in all matters related to this subject.

The NAB management study series in the small market field was presented to the Committee by Arthur Stringer, NAB Director of Promotion. The Committee went on record to say that this was one of the major benefits rendered to their segment of the industry by the NAB, and were enthusiastic about the good of the over-all operations experienced as a result of this series of studies.

Personnel training was discussed by Frank Pellegrin; sales promotion by Hugh Higgins; syndicated shows and group selling by J. Allen Brown.

Kenneth H. Baker, NAB Director of Research, emphasized that the motto of the Research department was one of “service.” He explained the new office forms scheduled for early release.

Charles Batson reported on the Department of Information and discussed with the Small Market Stations Committee effective methods for publicizing the aims and work of the Committee and its stations.

C. E. Arney, Jr., NAB Secretary-Treasurer, outlined plans for arranging the National Convention to be of special benefit to the small stations. The group unanimously agreed that a “discussion of internal industry affairs only” agenda at the convention would be followed.

The Committee went on record as urging all small stations to bring along a second man with the manager to the National convention.

The Committee members were guests of President Miller on Thursday at a luncheon honoring Robert Lange, North American Director of Radiodiffusion Francaise.

At the Tuesday afternoon session, Milton J. Kibler, and Ivar H. Peterson, Assistant Directors of the Employee-

EDITORIAL

PRESIDENT VIEWS REACTION TO NAB STAND

A few newspapers and trade journals have objected to the blunt warning issued by NAB, following release of the recent FCC Report. A few broadcasters have been inclined to confess bad conduct in their programming and have suggested that NAB should have acquiesced in the Commission's Report. There was very real reason for our action, which properly understood was the only possible course which we could have taken.

When a fire is roaring through the buildings which adjoin your home, it is a poor time for quiet, contemplative discussion of insurance policies and methods of fire prevention. Your time would be spent more intelligently in getting out fire extinguishers, calling the fire department, attaching hoses and teaming-up with your neighbors in desperate battle against an impending danger.

If at such a time a bystander were to get in your way and prevent you from fighting the fire, you might well question his intelligence or his motives. And this would be true even though your own conscience might be chiding you for your failure to take greater precautions when no fire was threatening.

The situation is much the same with respect to the recent report of the Federal Communications Commission. That report was issued on March 7, 1946. Less than a week later, on March 13, a letter went out to licensees, instructing them to comply with the requirements of the report on or before March 29, 1946. Compliance by the broadcasters without protest, would have constituted acquiescence in the Commission's interpretation of the Communications Act. That interpretation constitutes an overriding of the limitations placed by the Act upon the powers of the Commission. It constitutes also a flaunting of the right of freedom of speech guaranteed by the Constitution of the United States. Acquiescence in the Commission's interpretation, therefore, would have constituted a surrender of the people's right to a free radio.

Under the circumstances it was necessary to send out an immediate warning. This we did.

It was not an appropriate time for discussion of program content. To have done so would have obscured the main issue and blunted the warning. Neither was it an appropriate time for friendly conversation with the Commission. Such a conversation might, very appropriately, have preceded the issuance of the report, and we would have been happy to respond to an invitation for that purpose. Unfortunately, as in other instances of Commission action, this report was issued without notice, and with demands for immediate compliance. Now that the issue has been made clear, conversations may very appropriately take place at any time in the future.

JUSTIN MILLER.

(Ed. Note: The following editorial is reprinted with permission from Collier's, April 27, 1946.)

FCC RIDES AGAIN

The Federal Communications Commission is up to its old tricks again, trying to interfere with the content of radio programs.

In a current 140-page report on the public responsibility of broadcasters, the FCC takes it on itself to warn radio people that renewal of station licenses and granting of new ones will depend henceforth on what is vaguely described as a station's service to its audience.

Elements of this service, it then appears, include the amount of commercials put on the air by a station, the amount of time given to discussions of public affairs, and the actual character of some of the entertainment features. A solemn curse is put on soap operas and excessive commercials. Then the FCC piously disclaims a desire to regulate radio programs, and calls for "forces outside the broadcasting industry" to do the regulating via criticisms and objections.

Holding no brief at all for the bad taste of certain soap operas and commercials, we think nevertheless that the FCC still suffers from its long-time itch to control radio broadcasting; to censor programs; to tell radio what it may and may not put on the air. The FCC has been slapped down on this score by an angry public opinion on previous occasions, but it is in the nature of bureaucrats never to stop trying to expand their powers.

This is the same commission that recently, and against the advice of various outstanding scientists in radio, booted Frequency Modulation (FM) radio off its long-occupied 50-megacycle wave band. If this ruling sticks, more than 400,000 existing FM receiving sets in this country will be made obsolete from the standpoint of FM reception; FM service will be pretty much confined to city areas; and truly effective broadcasting will stay largely in the hands of four big networks.

Radio's tens of millions of U. S. listeners had better get up on their hind feet and fight these latest FCC moves to arrogate radio-program control to itself and to destroy the brilliant promise of FM radio. One way to fight is to clip this Collier's editorial and send it to your congressmen or one of your senators with any remarks you feel like adding.

If the public doesn't fight, as it has done in the past, the FCC encroachments will go forward, and a time can come when the FCC will be admonishing Mortimer Snerd to smarten up, or gagging Walter Winchell or Raymond Swing, or kicking some immensely popular comedian off the air because the FCC doesn't consider him an elevating influence. The upshot can be U. S. radio programs as dreary and depressing as most of those of the British Broadcasting Corporation, a government-controlled concern rather than whose offerings there are notoriously none duller on this earth.

Congress should long ago have taken away from the FCC its life-and-death licensing power over radio, and confined it strictly to the duties of an umpire among stations in the matter of assigning wave bands. The only proper censor for radio, as for the press, is the public.

(Continued on next page)
To set up any other control is to violate the Constitution’s guarantee of freedom of speech.

There may have been some excuse during the war, though we doubt it, for postponing drastic reform of the FCC till after the war. The war is over now, and the reform is overdue.

**SMALL MARKETS COMMITTEE MEETS IN WASHINGTON**

(Continued from page 329)

Employer Relations Department, discussed matters related to this phase of the industry.

Tuesday afternoon at 5:30 the Small Market Stations Committee gave a cocktail party for representatives of the trade press.

The Committee drew up a resolution “recommending that NAB codify FCC rules and regulations and bring up to date, making provisions for supplements."

A resolution was drawn up expressing appreciation to Justin Miller for creation of the Small Market Division, headed by J. Allen Brown.

Those present were:

Marshall Pengra—KRNR, Roseburg, Oregon; Wayne W. Cribb—KHMO, Hannibal, Missouri; James R. Curtis—KFBO, Longview, Texas; William C. Grove—KFBC, Cheyenne, Wyoming; Robert T. Mason—WMRN, Marion, Ohio; Glenn Marshall, Jr.—WFOY, St. Augustine, Florida; Clair R. McCollough (NAB Board Liaison Committee).—WGAL, Lancaster, Pennsylvania; Frank E. Pellegrin—Advisor, NAB; J. Allen Brown—Secretary, NAB.

**Employee-Employer Relations**

**EFFECT OF RETROACTIVE WAGE INCREASE ON OVERTIME**

In a ruling dated December 12, 1945, which was made public last week, the Wage and Hour Division of the Department of Labor ruled that payment of a retroactive increase in basic wage rates requires that overtime payments made since the effective date of the retroactive increase must be adjusted upward in conformity with the increase in the basic rate.

This interpretation of the Wage and Hour Act is applicable, the Division ruled, even though the agreement between a company and a union provides that the retroactive increase “will be applicable only to base rates, and will not increase incentive or overtime pay retroactively.”

In the case on which the Administrator ruled, the company and the union had entered into an agreement providing for new job classifications and increased pay rates, retroactive to May 1944. After having obtained War Labor Board approval for the increased rates on March 30, 1945, the company requested the Administrator to give his opinion as to whether the clause in the agreement stating that incentive or overtime pay should not be increased retroactively was in conformity with the Wage and Hour Act.

In ruling that the new base rates must be included in the regular rate of pay on which overtime compensation for the retroactive period was based, the Administrator stated that such payments “are in the nature of deferred compensation for services rendered” and “must be included in the computation of the employee’s regular rate of pay.” He also stated that “regardless of the provision of the union agreement, the employer will not have complied with the provisions” of the Wage-Hour Act “unless he pays overtime compensation at the rate of time and one-half of the employee’s regular rate based on straight-time earnings, including payments made at the regular pay period and those subsequently paid pursuant to the contract.”

**COMPENSATION AND EMPLOYMENT DATA RELEASED BY COMMISSION**

The Commission recently made public figures on the number of employees working in radio stations for the week beginning October 14, 1945, and their average compensation for that week. This information is similar to data released in past years by the Commission and is compiled from Schedule 13, which is one of the reports required to be filed by networks and licensees.

A total of 29,405 full-time employees, including executives, was employed during the week of October 14 by 9 networks and 876 standard stations; of this number, 22,518 were employed by 866 standard stations (excluding key stations and networks). The latter figure represents an increase of slightly more than 2,000 employees, or about 10 per cent, over 1944. Total compensation for the week paid to the full-time employees of the 866 stations was $1,397,353, or about $73,000,000 for the year. This does not include part-time employees.

The number of full-time operating technicians, according to the FCC data, has increased from 3,807 in standard stations in 1942 to 4,155 in 1945, and during the same period the average weekly compensation has increased 22.3 per cent, or from $46.54 in 1942 to $56.92 in 1945. In the same 4-year period the number of full-time announcers increased from 2,937 to 3,601, while their average compensation increased slightly more than 37 per cent, or from $41.41 in 1942 to $56.80 in 1945.

The average compensation paid operating technicians in all stations located in population areas of less than 50,000 was $41.07 in October 1945 as compared with $34.89 in 1943 and $38.24 in 1944. In all city sizes the average weekly pay for operating technicians in regional stations was $57.00 and for 454 local stations was $42.47. For the same two groups of stations the average pay of announcers was $59.67 and $42.25, respectively. This compares with the 1944 figures of $53.46 for operating technicians in regional stations, and $38.92 in local stations.

The detailed figures of the Commission show various breakdowns by occupational classifications in various size stations, by regions and districts, by states, and by number of stations in each community.

In addition to the number of full-time employees mentioned, the Commission reported that networks and standard stations employed for the week in October 1945 a total of 5,578 part-time employees, who were paid an average of $47.39 each during the week.

**JOB TRAINING PROGRAM**

Radio station managers interested in obtaining the services of veterans for “On the Job Training Program” should secure from their local United States Employment Service office, Veterans’ Administration Circular No. 61, entitled “Guide to Employers Who Wish to Set Up On the Job Training Programs.”

The NAB Employer-Employee Relations Department will be glad to assist station managers in this connection. Inquiries may be addressed to Employer-Employee Relations Department.
BROADCASTERS AND THE FCC REPORT
by Justin Miller

President, National Association of Broadcasters

(Reprinted by permission from the New York Times)

On March 7, 1946, the Federal Communications Commission issued a 139-page book which it has euphemistically called a “Report” concerning the “public service responsibility of broadcast licensees.” Some people, both broadcasters and others, who have read the report think that it involves no more than a study of radio programs and a criticism of some of them, with suggestions for improvement. Only ignorance or lack of attention could bring them to such a conclusion. While the report does contain these things, its most important aspect is its subtle encroachment upon freedom of speech in radio, through the Commission’s assertion of power to control broadcast programs.

In saying this, I want to make clear, beyond all peradventure of doubt, that the National Association of Broadcasters, its constituent members and its president, are vitally concerned with the continued improvement of radio programs. With the return from service of many of its best personnel; with constantly improving cooperation between broadcasters, advertisers, agencies, journalists, educators, listener-councils, and other interested groups; with the development of a program department in our Association; the broadcasting industry is going ahead, with increasing momentum, in a program of self-discipline, research and experimentation.

Moreover, the National Association of Broadcasters will join, gladly, with the Commission in any way to facilitate the final determination of the vital question which is presented by the Commission’s assertion of power; and will oppose, by every lawful means at its command, this or any other encroachment upon the liberties of the American people.

It is not necessary to question the motives of the Commissioners in this situation. They are sincere, earnest men, who have a large and important duty to perform. Their limitation is that their experience has been largely in the field of common carriers; in other words, the regulation of public utilities. They, apparently, fail to make the distinction—which the Communications Act does, make clearly—between regulation of such common carriers and, on the other hand, regulation of the means of radio broadcasting. The very title which they have, given to their report illustrates their confusion.

When Congress created the Communications Commission, it gave to it two separate and distinct functions. The first of these has to do with the regulation of “common carriers.” The term “public service,” which the Commission used to title its report, is one used by lawyers and judges to describe the nature and operation of such carriers. It has no application to radio broadcasting. Conversely, the right of freedom of speech is not involved in the regulation of such common carriers.

In Title III of the Communications Act, “Provisions Relating to Radio,” Congress was careful to use other language to describe the Commission’s duties. Here, it spoke of “the public interest,” “the public convenience,” “the public necessity.” As to this part of its work, the Commission must act as if it were a separate and distinct governmental agency. In this respect the Commission would be better off—and the people would be better served

—if several of its members were men trained in the actual operation of broadcasting stations or who have an intimate working acquaintance with constitutional law.

This is true because the Constitution provides that: “Congress shall make no law . . . abridging the freedom of speech.” And Congress, recognizing this limitation upon its power, wrote into Title III of the Communications Act—the title which relates to radio—a similar limitation upon the power of the Commission. In order to make the limitation doubly clear, Congress wrote it in two ways. First, it said: “Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications . . . transmitted by any radio station.” Then, Congress went on to say: “No regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.”

The language last quoted is of the greatest significance. The report of the Commission has been promulgated; its contents contain regulations and conditions; those regulations and conditions interfere with the right of free speech by means of radio communication.

This is the point at which a person, untrained in the interpretation of the Constitution and of statutes, is apt to go astray. This is the point at which we should look to the decisions of the Supreme Court for interpretation. But the Supreme Court has not yet interpreted the language of the Act quoted above.

In the absence of such Supreme Court interpretation, the Commission has been doing its own interpreting. Among other things it has, in one of its decisions, forbidden the broadcasters to speak editorially over their transmitters. Can anyone doubt that this is a direct and vital interference with freedom of speech? Unless the Commission’s process of administrative interpretation is challenged by some licensee, the Supreme Court will never get a chance to say what “censorship” means, or what constitutes interference with the right of free speech by means of radio communication. A broadcasting industry, working under short-term, temporary licenses—as nearly one-third of the broadcasters are doing under present Commission practices—may well be timid and fearful of Commission reprisals. But unless some of them are willing to risk their licenses—for that is the only way to secure a judicial determination of the Commission’s powers—its interpretation of the law will be the law, for all practical purposes. In this manner the right of the people to free radio will be whittled down.

The Commission itself—if it has a proper understanding of its own status as a servant of the people—should not only be willing, but anxious to get the issue presented to the Supreme Court for decision. At the first proper opportunity it should decide a case, squarely and solely, upon the point of law involved in the language with which Congress limited its power. It should be the first to assert the need for such an interpretation of the law, so clear and unmistakable, as to leave no doubt upon the subject. It should be alert to leave no possible question of its intentions, in order that no one may impute to it a purpose to despoil the people of their constitutional right.

In the absence of a Supreme Court decision upon the vital question thus presented, it is proper for us to turn to its decisions in cases involving other forms of encroachment upon freedom of speech and of the press. One of the most helpful of such cases is a recent decision of the Supreme Court in the Esquire case, where it said:

“An examination of the items makes plain, we think, that the controversy is . . . whether the contents are ‘good’ or ‘bad.’ To uphold the order of revocation would, therefore, grant the Postmaster General a power of censorship. Such a power is so abhorrent to our traditions that a purpose to grant it should not be easily

(Continued on next page)
inferred. . . . Under our system of government there is an accommodation for the widest varieties of tastes and ideas. . . . a requirement that literature or art conform to some norm prescribed by an official smacks of an ideology foreign to our system. . . . From the multitude of competing offerings the public will pick and choose. What seems to one to be trash may have for others fleeting or even enduring values. But to withdraw the second-class rate from this publication today because its contents seemed to one official not good for the public without sanction withdrawal of the second-class rate tomorrow from another periodical whose social or economic views seemed harmful to another official. . . . Congress has left the Postmaster General with no power to prescribe standards for the literature or the art which a mailable periodical disseminates."

As for intellectual smart-alecks and professional appeasers who would play down the danger involved in such encroachments—there were just such smart-alecks and appeasers prior to World War II, carrying their umbrellas and assuring us that there would be no war. And there were similar people, in the court of George III of England, who ridiculed and insulted Benjamin Franklin and other representatives of the American colonies when they tried, patiently, to explain the dangers of revolution.

Those colonists lived close to the "insolence of office" and out of their bitter experience, wrote the United States Constitution, which guarantees our civil liberties. The question, now, is whether we are such a slothful, degenerate brood that we shall abandon without protest the rights which our forefathers secured for us.

Broadcasters are the champions of the people's right to listen to uncensored radio communications. They and their Association—while recognizing, fully, their own responsibility for continued improvement of programming—must resist this encroachment upon the people's rights, with every lawful means at their command.

**FCC CONTINUES CLEAR CHANNEL HEARINGS**

During the past week, the FCC continued the clear channel hearings which started on Monday (15). Among those testifying this week were representatives of three networks and educational standard stations, while part of one day's session was devoted to a report on the progress of the Engineering Committee.

Direct testimony throughout the week was submitted both by witnesses for the Clear Channel Broadcasting Service and witnesses from the Bureau of the Census for the Commission, for presentation of the survey which the Bureau completed last fall.

One of the points stressed throughout the hearings was the desirability of completing the present hearings in time for the Commission to have formulated its policy and finished the case which it will present at the meeting with the Commission will make an appropriate public announcement and set forth the conditions under which licenses may be obtained. A simple licensing procedure requiring only a minimum knowledge of the regulations is contemplated.

The Commission also pointed out that none of the Army surplus walkie-talkie equipment which has come to its attention is built to operate in the 460-470 megacycle band allocated for the Citizens Radiocommunication Service.

(Continued on next page)
"It is impossible," Mr. Willard stated, "to divide freedom of utterance into separate categories of freedom of speech, freedom of the press, freedom of radio, freedom of motion picture display, and so on—each independent of the other. Rather, an assault upon one endangers all,"

Discussing the FCC's report on "Public Service Responsibilities of Broadcast Licensees," Mr. Willard urged that every newspaper editor read the document and strongly contested the Commission's authority to supervise the program structure of radio stations. Speaking of program selection, he added: "To substitute the judgment of a government commission for the judgment of the American listener would be intolerable."

Mr. Willard concluded with the statement that broadcasters "will resist, by every lawful means at their command, any assault upon the right of freedom of utterance."

Complete text of speech follows:

"One quick glance at the general state of communications throughout this post-war world is enough to arouse the gravenst apprehension. I should like to speak to this point in terms of radio broadcasting. By necessity, in the occupied countries, and by government decree in the liberated countries, broadcasting the world over is now a virtual government monopoly—a subservient medium of propaganda in both its domestic and international use. One by one, as the nations of Europe and Asia were freed from the control of the conqueror, the interim governments, and even the elected governments, regarded the complete control over the airwaves as essential to their stability and self-perpetuation. Only here in these United States does there remain anything that resembles a free radio. Much the same situation obtains in the other media of communications. Though radio is only a generation old, it already has a happily focused one historic fact. The degeneration of one method of dissemination of free speech within a nation is almost invariably followed by dissipation of the freedom of the others.

It is impossible to divide freedom of utterance into separate categories of freedom of speech, freedom of the press, freedom of radio, freedom of motion picture display, and so on—each in a water-tight compartment, each independent of the other. Rather, an assault upon one endangers all. For our way of preserving freedom of the instruments of communication. The program structure of the American system of communications characterizes the early growth and development of the older mass communication media. That it is achieving maturity with remarkable rapidity is attested by the fact that a hundred million people devote more time to listening to it than to any other leisure occupation—or, indeed, to any other type of communicative behavior.

"Now, let us examine a few of the actions of the Federal Communications Commission. In one of its decrees, it has fåssed broadcasting, and has thus achieved an end to which we have no opposition. The section is as follows: "The program structure of the American system of communication is not subject to the rules and regulations of the FCC eliminating editors of periodicals."

"On March the 7th the Federal Communications Commission issued what it eunestically calls a report concerning the "public service responsibility of broadcasters." Highlighting a few examples of inadequate programming, bad taste and lack of program balance, the report then proceeds to indict our whole radio industry. Then, relying upon its own administrative practices, the Commission asserts in the report for the first time an authority to grant full consideration to program service in the consideration of applications for stations and for the renewal of licenses. In addition, the report puts upon broadcasting stations, as a prerequisite for the renewal of their licenses, an arbitrary requirement to broadcast specific types of programs which it deems to be in the public interest. The report was issued on March 7th. On March 13th a form letter went to broadcasters demanding compliance—in many instances by March 20th. If not, then the administrative interpretation by the Federal Communications Commission will assume the authority of law by acquiescence and by default. The program structure of the American system of broadcasting has been built upon the solid foundation of the wants and needs of its hundred million listeners who vote 'for' or 'against' those programs which they like or dislike at every hour of the day and night. To substitute the judgment of a government commission for the judgment of the American listener would be intolerable. As the Supreme Court pointed out in the recent Esquire Case:"

"An examination of the items makes plain, we think, that the controversy is . . . whether the contents are "good" or "bad." To uphold the order of revocation would, therefore, grant the Postmaster General a power of censorship. Such a power is so abhorrent to our traditions that a purpose to grant it should not be easily inferred. . . . Under our system of government there is an accommodation for the widest varieties of taste and ideas. . . . a requirement that literature or art conform to some norm prescribed by an official smacks of an ideology foreign to our system. . . . From the multitude of competing offerings the public will pick and choose. What seems to one to be trash may have for others fleeting or even enduring values. But to withdraw the second-class rate from this publication today because its contents seemed to one official not good for the public would sanction withdrawal of the second-class rate tomorrow from another periodical whose social or economic views seemed harmful to another official. . . . Congress has left the Postmaster General with no power to prescribe standards for the literature or the art which a mailable periodical disseminates.

"Similarly, the Congress left the Commission with no power to prescribe standards—specifically it said in the Radio Act: 'Nothing in this Act shall be understood or

(Continued on next page)
construed to give the Commission power of censorship over the radio communications ... transmitted by any radio station.'

"It is not necessary to question the motives of the members of the Federal Communications Commission in this matter. As Judge Justin Miller, President of the NAB, has pointed out, they are sincere, earnest men who have a large and important duty to perform. Their limitation is that their experience has been largely in the field of common carriers ... they apparently fail to make the distinction which the Communications Act does make clearly between the regulation of such common carriers ... and regulation of the means of radio broadcasting." But - the Commission should not only be willing but anxious to bring these matters to the Supreme Court for final decision and the National Association of Broadcasters will join gladly with them to make a final determination of the grave questions of constitutionality presented by the Commission's assertions of power.

"I am glad to be able to report to you this evening that, despite the penalty of economic execution which the Federal Communications Commission holds, like a sword of Damocles, above the head of every radio station in the United States - the broadcasters of America, aware of their full responsibility as the champions of our people's right to a free radio, will no longer accept these or any other encroachments upon the right of free speech by means of radio communication. They will resist by every lawful means at their command, any assault upon the right of freedom of utterance."

**PEABODY AWARDS DINNER**

Justin Miller, President NAB, extended greetings from the radio broadcasting industry in an informal talk at the annual dinner during which the George Foster Peabody awards have been a sponsor since their inception in 1940.

Principal speaker of the evening was Mayor Earl Glade of Salt Lake City, member of the Board of Directors of KSL, former chairman of the NAB code committee and former vice president and general manager of KSL.

The awards were presented by Dean John E. Drewry of the Henry W. Grady School of Journalism, University of Georgia.

**NAB PARTICIPATES EXTENSIVELY IN INSTITUTE FOR EDUCATION BY RADIO**

With the subject "Radio's Postwar Responsibilities" as its theme, the Sixteenth Institute for Education by Radio, under the auspices of Ohio State University in cooperation with Columbus radio stations, will meet in Columbus May 3 to 6.

At the first meeting of the general session on the evening of May 3, NAB's president, Justin Miller, will participate in a symposium on two questions "Has Radio Ratified?" and "Is Broadcasting Assuming Its Postwar Obligations?" On the panel, presided over by Edgar Kobak, MBS President, will be Clifford J. Durr, Federal Communications Commission, H. B. McCarty, Director, Station WHA, University of Wisconsin, Nathan Straus, President, Station WMCA, and Davidson Taylor, Vice President and Director of Programs, CBS.

Kenneth H. Baker, former OSU faculty member, and present Director of Research, NAB, will be chairman at two meetings on radio research. The first of these meetings is scheduled for the afternoon of Saturday, May 4, and will be carried over to the following morning.

Radio public relations and its social responsibility will be discussed at a luncheon on the Industry's closing day. Edward M. Kirby, NAB Public Relations Counsellor, will participate in the discussion, along with top public relations personnel from networks, stations and civic organizations.

Two meetings are scheduled to cover radio journalism. The first, on May 4, will be based on "Covering Local News for Radio." The second meeting arranged by the Council on Radio Journalism will discuss the question "What is Good Radio Copy?"

The program arranged by AWD was included in reports last week (p. 315).

**MILLER HOST TO NORTH AMERICAN DIRECTOR OF FRENCH RADIO**

Speaking at a luncheon given in his honor Tuesday (23) by Justine Miller, President of the NAB, Robert Lange, Director, North American Services, Radio-diffusion Francaise, expressed his admiration for American radio. He said that he liked America in general and American radio in particular.

M. Lange acknowledged that the effectiveness of radio in America is a result of support given it by advertisers. In regard to the future of French radio, he stated only that for the time being the situation in France demanded that its radio be operated by the government.

Congressman Clarence F. Lea of California was a guest speaker. He recalled his visit to France last summer and repeated the message of friendship from the American people which he had stated to the French people at that time.

Between now and June 10th, at which time he will go to Canada, M. Lange will visit various parts of the United States, observing the operation of American radio and developing plans for an augmented exchange of programs between France and the United States. He expressed the hope that language barriers between the French and Americans could be overcome in exchange programs through the universal language of music.

A letter has been sent by M. Lange to radio stations throughout the country outlining programs which can be made available to them by Radiodiffusion Francaise.

Present at the luncheon were: Frank Beatty, Broadcasting Magazine; Capt. Ted Bergman, War Department; Kenneth Berkeley, WMAL; Wayne W. Cribb, KHMO; James R. Curtis, KFRO; Earl Gammons, CBS; William C. Grove, KPBC; Robert Lange, Radiodiffusion Francaise; Clarence F. Lea, Congressman from California; Glenn Marshall, WFOY; Robert T. Mason, WMRN; Clair McCullough, WGAL; Marshall Pengra, KRRN; Joseph Ream, CBS; Frank M. Russell, NBC; Frank Stanton, CBS; Ben Strouse, WWDC; Sol Taishoff, Broadcasting Magazine.

Representatives of NAB present were: Justin Miller, A. D. Willard, Jr., Don Petty, Frank E. Pellegrini, Edward Kirby, J. Allen Brown and Charles Batson.

**WILLARD TO PRESIDE AT CCNY AWARDS DINNER**

A. D. Willard, Jr., Executive Vice-President, NAB, will preside at the National Radio Awards Dinner, and will participate in a panel discussion on the FCC program report this Wednesday (1), in connection with the second annual radio and business conference sponsored by the City College of New York.

Charles A. Batson, NAB's Director of Information, will also participate in the conference when he presides over the general morning session on the same day, theme of which will be "Veterans Chances in Radio."

The awards to be announced at the dinner include five plaques and 18 certificates for Awards of Merit and will be presented for entries in each of the following groups: Sponsors, Advertising Agencies, Program Producers; Re-

PATTERSON PRAISES RADIO COOPERATION IN ARMY DAY CELEBRATION

In a letter to NAB President Justin Miller, Secretary of War Robert P. Patterson expressed the appreciation of the War Department for the cooperation extended by the radio broadcasting industry during the recent observance of Army Day.

Text of Mr. Patterson's letter follows:

"WAR DEPARTMENT
Washington "19 Apr. 1946.

"The Honorable Justin Miller, President
National Association of Broadcasters
1760 N Street N. W.
Washington 6, D. C.

DEAR JUDGE MILLER:

"I would like to take this opportunity to express to
the National Association of Broadcasters, and through you
to the radio broadcasting industry, the appreciation
of the War Department for the thorough and excellent
cooperation received on Army Day, 6 April 1946.

"It was the first official observance in five years, and
the radio broadcasting industry generously made available
talent, facilities throughout the nation. This cooperation played an important part in making the day an outstanding success.

"Sincerely yours,
(s) ROBERT P. PATTERSON,
Secretary of War."

SHRINERS BEGIN RADIO CAMPAIGN IN INTEREST HOSPITALS FOR CRIPPLED CHILDREN

Pointing out that 1700 crippled children from impoverished families are standing in line, awaiting entrance into one of the 15 hospitals operated by the Shriners, a radio Fact Sheet has been distributed to all radio stations seeking such cooperation as American radio can and will give.

With an Advisory Committee headed by General of the Army Douglas MacArthur, including General Jimmie Doolittle, Admiral Chester Nimitz, J. Edgar Hoover, Edgar A. Guest and Jack Warner, the Shriners are seeking to focus attention on the problem of rehabilitation of crippled children from families not able to pay hospital and surgical fees.

Pointing out that since 1923, the Shriners have healed over 100,000 crippled children of all races, and creeds, the special radio campaign next week will have no direct appeal for funds whatever.

Program managers and women directors are urged to read the Fact Sheet now in their hands.

News Clinics

SET MINNESOTA RADIO NEWS CLINIC

E. L. Hayek, director, 11th NAB district, and, licensee, KATE, Albert Lee, has appointed Richard M. Day, program director, WDGY, Minneapolis, general chairman of the Radio News Clinic to be held in Minneapolis on Friday, May 17. The hotel has not yet been selected. Invitations will be extended to all Minnesota stations, stations near the state borders and to the journalism faculty of the University of Minnesota.

Nebraska Clinic at Ft. Kearney Hotel

The Nebraska Radio News Clinic, May 11, is to be held at the Fort Kearney Hotel, Kearney, according to word from John Alexander, general clinic chairman, and, general manager, KODY, North Platte.
DIA THERMY RESTRICTIONS LIFTED

The Federal Communications Commission announced Friday (26) that, with the approval of the Board of War Communications, it had rescinded its wartime orders Nos. 90-06-C, adopted pursuant to Board of War Communications Order No. 4, providing for the registration of diathermy equipment. The purposes of these orders, the first of which was issued on May 18, 1942, was to assist the Commission in preventing the use of diathermy equipment for the transmission of radio messages for subversive purposes, and to assist in the prevention of interference to radio services.

In rescinding the above orders, the Commission emphasized the fact that diathermy equipment remains a very serious source of interference to radio services and that, as the Commission has previously announced, steps will be taken to achieve elimination of such interference. An engineering conference to discuss proposed standards of good engineering practice for the operation of diathermy equipment and a procedure for obtaining Commission type approval of diathermy equipment designed to operate within the three frequency bands already allocated for such operation will be held under the chairmanship of the Chief Engineer of the Commission on May 9, 1946.

BUREAU OF STANDARDS TAKES ON NEW RADIO FUNCTIONS

A Central Radio Propagation Laboratory will be established May 1st in the National Bureau of Standards, Department of Commerce, it was announced last week by Dr. Edward U. Condon, Director of the Bureau.

The new division’s chief emphasis will be on ionospheric and tropospheric propagation research. Division 14—as the new set-up is known—will be responsible for all radio activities of the Bureau of Standards except the electronics work of Division 13—Ordnance Development.

Dr. J. Howard Dellinger has been designated chief of the new division. He joined the staff of the Bureau in 1907 and became head of its Radio Section in 1919. Dr. Dellinger is past president of the Institute of Radio Engineers and a recipient of its Medal of Honor.

During the past four years a large part of the Radio Section’s work has been the operation of the Interservice Radio Propagation Laboratory for the Joint Chiefs of Staff. This laboratory developed research methods for the study and forecasting of conditions in the ionosphere and tropospheric propagation research. Division 14—as the new set-up is known—will be responsible for all radio activities of the Bureau of Standards except the electronics work of Division 13—Ordnance Development.

You are urged to write to Media Programming Division, Office of War Mobilization and Reconversion, Washington, 25, D. C. for transcriptions of all of the above and to broadcast them with continuity. Do so at once.

PLEAS E! There is no time to lose in getting these messages to the public.

PUBLIC INTEREST CAMPAIGNS—MAY 6-12, 1946

The following four public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of May 6-12, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Hospitals Need Student Nurses

Latest figures from a continuing study conducted by the American Hospital Association show that 2 out of 3 hospitals throughout the country are suffering from acute nursing shortages. A high percentage of these hospitals have been forced to close beds and facilities—often whole floors or wings. As a result, literally thousands of patients are doing without adequate nursing care. During pre-war years, where were available, the bulk of patient care was given by student nurses. During the war, members of the U. S. Cadet Nurse Corps carried most of the nursing load in their hospitals. However, Cadet Nurse recruitment was terminated last fall and at the present time there is an alarming and growing shortage of student nurses in training. Therefore, a nation-wide effort must (Continued on next page)
be made immediately to interest young women in nursing as a career, and to urge them to enroll at once for existing vacancies in schools of nursing. Explain that there are opportunities, at extremely low cost, for 40,000 young women between the ages of 17 and 35, who are high school graduates of good standing, to enter one of the highest-paid professions by enrolling in a summer or fall student nurse training class. Point out that information concerning schools of nursing may be obtained from either the hospital or divisional or state registered nurses' association. Emphasize the fact that, compared with average net earnings of teachers, secretaries, office workers, librarians, bank employees, retail store employees and other services open to women the earnings of a professional nurse are among the highest. (Fact Sheet No. 9-A)

Safety on the Highways

Slaughter on our highways is skyrocketing. Right now smash-ups have reached an all-time high of more than one a minute—every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was ... $1,450,000,000 ... almost 1 1/2 billion dollars. In the four months after gas rationing ended, traffic deaths jumped 37%. Unless something is done about it, accidents will multiply alarmingly in coming months. Your station can help “put the brakes” on America’s rising traffic death toll. Make each listener realize he is a potential accident victim. Point out as specifically as time will allow the little, thoughtless chances he may be taking today ... this week ... jaywalking ... trying to beat the light ... speeding ... driving when he has had a few drinks ... neglecting repairs on his car ... ignoring signals at crossings. Your aim is to make each listener decide right then and there never again to take even a “little” chance with injury or death. (Fact Sheet No. 15)

Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of the Pharaohs, now has had a 40% failure in 85 years. In much of Europe alone, city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 900 unless we help. United Nations Relief and Rehabilitation Administration considers 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 3,260 calories per day. Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The “have” countries including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Expect the United States to export about 110 million bushels of flour, 50 million bushels of wheat, 22 million bushels of corn, 11 million bushels of rice and 4 million bushels of oatmeal. They will make available eleven million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. Our share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically until the middle of April. Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions by—Reducing their consumption of all wheat and rice products and fats and oils ... Eating more of the plentiful foods ... Eliminating all food waste and turning in all used fats ... Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20)

Fat Salvage

Fats and oils are essential to the production of soap, large quantities of which are desperately needed by the destitute people of war-torn Europe and Asia to maintain even the minimum cleanliness necessary to combat disease. They are likewise essential to the production of countless other peacetime consumers items like paints and varnishes, textiles and leather, pharmaceuticals and lubricating oils. Supplies of fats and oils are still far short of demands and needs due to a decline in domestic production and the war-born loss of foreign imports. Only by continuing to salvage used kitchen fats can housewives help prevent possible shortages of soap for both domestic use and foreign relief and accelerate the production of innumerable other peacetime consumers items. They should be urged to (1) save every drop of used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on plates and platters, (2) re-use those suitable for cooking and pour immediately into salvage cans those fats which can’t be re-used, (3) turn in the fat salvage container to their meat dealers promptly—they’ll get four cents for every pound turned in. (Fact Sheet No. 19)

SUGGESTED COPY FOR APRIL 29 NAB “REPORTS”

The Media Programming Division, OWMR, has requested stations to give support to “I Am An American Day” (National Citizenship Day) May 19, 1946. Also, attention is invited to Veterans’ Hospitals on National Hospital Day—May 12, 1946.

“I Am An American Day”—Department of Justice

The President has designated Sunday, May 19, 1946 as the annual “I Am An American Day.” Community ceremonies are urged, both to honor our “new citizens” (naturalized and native-born) and to encourage all Americans to rededicate themselves to the principles and ideals of this Republic. Last year such ceremonies were held in 1100 communities. The Department of Justice, through its Immigration and Naturalization Service, the National Education Association, the American Legion and other organizations give nationwide leadership and provide materials for the assistance of local committees.

The use of radio, both for special programs on citizenship themes and for broadcasting the community programs, has greatly extended the influence of the local observance. Spot announcements have been mailed to Station Managers, and will be especially pertinent in communities with foreign populations.

Information About Veterans’ Hospitals

In conjunction with National Hospital Day (May 12), Veterans’ Hospitals throughout the country will hold open houses so that representatives of the press, radio and civic groups may become better acquainted, first hand, with the new medical set-up of the Veterans’ Administration. The Veterans’ Administration is anxious that the public know about the extensive Veterans’ Hospital-building program, now in process. Ninety-five hospitals are now open, and 85 more are being built. This program represents the largest permanent Hospital-building project ever undertaken. It will be an opportunity to tell the public about the superior medical service available to hospitalized veterans in all fields of medicine.
Federal Communications
Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission during the week beginning Monday, April 29. They are subject to change.

Monday, April 29

NEW—Norfolk Broadcasting Corp., Norfolk, Va.—C. P. 1220 kc., 250 watts, daytime.
NEW—Tidewater Broadcasting Corp., Norfolk, Va.—C. P. 1230 kc., 100 watts, unlimited.
NEW—Syndicate Theatres, Inc., Columbus, Ind.—C. P. 1130 kc., 500 watts, daytime.
NEW—Skylark Broadcasting Corp., W. of Lenanon Road, Richmond, Va.—C. P. 1450 kc, 250 watts, unlimited.
NEW—Radio Wisconsin, Inc., Madison, Wis.—C. P. 1480 kc., 5 KW, unlimited, DA-night and day.

Further Hearing

NEW—The Constitution Publishing Co., Atlanta, Ga.—C. P. 1310 kc., 5 KW night, 5 KW day, unlimited, DA-night.
NEW—Montana Broadcasting & Television Co., Butte, Mont.—C. P. 550 kc., 1 KW, unlimited, DA-night and day.
NEW—Public Service Broadcasting Corp., Kansas City, Mo.—C. P. 1310 kc., 5 KW, unlimited, directional antenna.
NEW—Buffalo Broadcasting Corp., Buffalo, N. Y.—C. P. 1310 kc., 5 KW night, unlimited, DA-night.
NEW—The City of Camden, Camden, N. J.—Modification of license. 1310 kc., 500 watts night, unlimited.
NEW—Community Broadcasting Co., Toledo, Ohio—Modification of license. 1310 kc., 500 watts night, unlimited.

Wednesday, May 1

NEW—Skyland Broadcasting Corp., W. of Lemon Road, Dayton, Ohio—C. P. 980 kc., 5 KW, unlimited.
NEW—Community Broadcasting Co., Toledo, Ohio—C. P. 980 kc., 5 KW, unlimited, DA-night.

To Be Held in Court Room Federal Building, Elmira, N. Y.

FM FINAL CP'S GRANTED

The following stations, which received engineering approval on March 13, were granted regular construction permits:

- St. Louis University, St. Louis, Mo.—CP for Metropolitan station; Channel: 941 Me. (No. 291); 426.6 KW; Antenna: 325 ft.
- Missouri Broadcasting Corp., St. Louis, Mo.—CP for Metropolitan station; Channel: 92.1 Me. (No. 291); 323 KW; Antenna: 475 ft.
- Thomas Patrick, Inc., St. Louis, Mo.—CP for Rural station; Channel: 95.3 Me. (No. 297); 288 KW; Antenna: 472 ft.
- Frank P. Pidcock, Sr., Moultrie, Ga.—CP for Metropolitan station; Channel: 100.3 Me. (No. 262); 10.4 KW; Antenna: 401 ft.

DESIGNATED FOR HEARING

The following 5 applications for new Metropolitan-FM stations in the St. Louis, Mo., area, were designated for consolidated hearing:

- Columbia Broadcasting System, Inc., St. Louis; Globe-Democrat Publishing Co., St. Louis; Union Broadcasting Corp. of Mo., St. Louis; Mississippi Valley Broadcasting Co., E. St. Louis, Ill.; Evangelical Lutheran Synod of Mo., Ohio and other States, Clayton, Mo.

The 5 following applications for new Metropolitan stations in the Atlanta, Ga., area, were designated for consolidated hearing:

- Bleecker P. Seaman and Carr P. Collins, Jr., d/b/a Seaman and Collins, El Paso, Texas—Designated for hearing application for new station (B3-P-1120), to operate on 1490 kc., 250 watts, unlimited time.
- Central Broadcasting Corp., Flint, Mich.—Designated for hearing application for new station (B2-P-4463) to operate on 600 kc., 1 KW, DA, unlimited time.
- KCTH—Natrona County Tribune, Casper, Wyo.—Granted request for change in call letters of new station from WAGA to KVOC.
- WKNF—Harry C. Wilder, et al. (Transferees), Joseph K. Close, Lyman Spitzer, Abbott K. Spencer and Robert T. Colwell, (Transferees), WKNF Corp. (Licensee), Keene, N. H.—Granted application for consent to voluntary transfer of control of WKNF Corp. Licensee of station WKNF, from Harry C. Wilder, Mark S. Wilder, Helen W. Miller, Frank Lyman, Jr., David Carpenter, N. L. Kidd, George W. Smith, and Philip H. Faulkner to Joseph K. Close, Lyman Spitzer, Abbott K. Spencer and Robert T. Colwell, for a consideration of $85,000, plus an agreed margin by which current assets exceed current liabilities as at closing date, for all outstanding capital stock of the licensee. (B1-TC-475)
- KMLK—R. H. Murphy (Assignee), Murphy Broadcasting Co. (Assignee), Des Moines, Iowa—Granted consent to voluntary assignment of license (B2-P-4516) and CP (B2-P-4527) from Kingsley H. Murphy to Murphy Broadcasting Co., for a consideration of $240,000, composed of 2490 shares of the capital stock of assignee corporation.
- KMBC-FM—Midland Broadcasting Co., Kansas City, Mo.—Granted temporary waiver of Sec. 3.261 of the Commission's Rules so as to permit operation of FM station only one hour per day (12 noon to 1:00 P. M.) five days per week (Monday thru Friday) for a period of 90 days, during period of transfer from the old to the new FM band.

ACTIONS ON MOTIONS

- Southern Calif. Broadcasting Co., Pasadena, Calif.; Orange County Broadcasting Co., Santa Ana, Calif.—Ordered that the hearing on these applications now scheduled for April 18, be continued without date. (Docket 6737 and 7337)
- Central Kentucky Broadcasting Corp., Lexington, Ky.—Ordered that the hearing on this application now scheduled for April 24, be continued to May 23, at 10 A.M., at Lexington, Ky. (Docket 6908)
- Cleveland Broadcasting Inc., Cleveland, Ohio—Granted motion for leave to amend its application for a new FM station, so as to show an increase in the number of authorized outstanding shares of stock; show the substitution of Alvanley Johnston for Paul C. Aiken as a director, etc., and the motion was accepted. (Docket No. 7046)
- General Broadcasting Co., Independence, Mo.—Granted petition for leave to intervene in the consolidated hearing now scheduled for April 19 on applications of KTOP, Inc. (Docket 6980); Emporia Broadcasting Co., Inc. (Docket 6981), and Collinson-Wingate Broadcasting Co. (Docket 7382). Exception to the ruling noted by counsel for KTOP, Inc.; Emporia Broadcasting Co., Inc., and Collinson-Wingate Broadcasting Co. (Docket No. 7046)
- Universal Broadcasting Co., Inc., Indianapolis, Ind.—Granted motion to amend its application for CP (Docket 7100), so as to bring its engineering data up to date, etc., and the amendment was accepted.
- Citrus Belt Broadcasters, Inc., Winter Haven, Fla.—Granted motion for change in call letters of new station. (Docket 7310)
- Capitol Broadcasting Corp., Inc., Indianapolis, Ind.—Granted petition to amend its application for a new FM station (Docket 7055), so as to complete its engineering data, and the motion was accepted.
- Radio Asheville, Inc., Asheville, N. C.—Granted motion for leave to amend its application for a new station (Docket 7439) so as to specify frequency 1490 with 100 watts power, instead of 1450 kc. with 250 watts; change paragraphs, etc. The amendment was accepted and application removed from hearing docket. (Continued on next page)
Dorrance D. Roderick, El Paso, Texas—Denied motion for continuance of consolidated hearing now scheduled for June 17 at Pueblo, Colo., in re applicant’s application for CP (Docket 7001) and application of Pueblo Radio Co., Inc. (Docket 7092).

Joseph M. Zamolsky Co., Baltimore, Md.—Granted petition to dismiss without prejudice its application for a new commercial television station. (Docket 7302)

WFIL Broadcasting Co., Philadelphia, Pa.—Granted motion to dismiss without prejudice its application for a new commercial television station. (Docket 7265)

Texoma Broadcasting Co., Wichita Falls, Texas—Denied motion for leave to amend its application for a new station (Docket 7137), so as to specify the frequency 1290 with 1 KW, unlimited time, instead of 970 kc., with 1 KW, daytime only. The amendment was accepted and application removed from the hearing docket.

Baltimore Radio Show, Inc., Baltimore, Md.—Granted petition requesting dismissal without prejudice of its application for a new station (Docket 7330), and said hearing was continued to June 10.

KTHT—Texas Star Broadcasting Co., Houston, Texas—Denied motion to dismiss without prejudice its application for a new television station (Docket 7396). (Movant alleges its desire to give further consideration to the feasibility of its television enterprise.)

Bluegrass Broadcasting Co., Inc., Versailles, Ky.—Granted petition to dismiss without prejudice its application for a new station (Docket 7340).

The Peninsula Broadcasting Co., Salisbury, Md.—Denied motion for leave to intervene in the consolidated hearing on applications of Tidewater Broadcasting Corp., Norfolk, Va. (Docket 7390) and Norfolk Broadcasting Corp., Norfolk, Va. (Docket 7187), and Sec. 1.389 of the Commission’s Rules was waived.

Alamance Broadcasting Co., Inc., N. C.—Dismissed petition requesting leave to intervene in the hearing in re application of Bluegrass Broadcasting Co., Inc. (Docket 7340).

Atlantic Radio Corp., Boston, Mass.—Denied petition insofar as it requests leave to amend application for new station (Docket 7404); granted as to continuance of hearing now scheduled for April 29, and continued said hearing to May 29.

CORRECTION

The following is a correction by FCC on an item which appeared in Reports on April 22, p. 322:

Texoma Broadcasting Co., Wichita Falls, Texas—Granted oral request of counsel for withdrawal of petition for continuance of consolidated hearing in re its application and that of Wichtex Broadcasting Co.

ACTION IN DOCKET CASES

The Federal Communications Commission announces adoption of a decision making final its proposed decision (B-232), granting the application for assignment of license of Station WPRP, Ponce, Puerto Rico, from Julio M. Conesa to the Voice of Puerto Rico, Inc., a corporation composed of Julio M. Conesa, Andres Grillasca, Francisco Susoni and Felipe Segarra (Docket No. 6868).

The application of Consolidated Broadcasting Corporation for a construction permit for a new standard station at Ponce, Puerto Rico, requesting the facilities of Station WPRP, was denied without prejudice.

The applications of Julio M. Conesa for construction permit to increase power of Station WPRP to 5 KW (Docket No. 5676), for approval of transmitter site (Docket No. 5676), was denied without prejudice.

The applications of Julio M. Conesa for construction permit to increase power of Station WPRP to 5 KW (Docket No. 5676), for permission of antenna type of transmitter (Docket No. 6017), and for change in transmitter site for 250 watt operation (Docket No. 6084) were dismissed, since there was no evidence presented in support of these requests.

MISCELLANEOUS ACTIONS

WNCA—Community Broadcasting Co., Asheville, N. C.—Granted modification of CP which authorized a new station, for change in type of transmitter, approval of antenna, and approval of transmitter and studio locations at between Asheville-Emma Highway and Southern Railway, Asheville, and Woodfin and North Market St, Asheville, respectively (B-MP-1857).

WMBB—Bull. Broadcasting Co., Inc., Macon, Miss.—Granted modification of CP which authorized a new station, for approval of transmitter location at Macon, Miss., approval of studio location at Hotel Macon Bldg., Jefferson St, Macon, approval of antenna and change type of transmitter (Gates Radio Co. 250-C). Permits are granted a waiver of Sec. 3.59(b) of the Commission’s Rules, conditions.

KNEI—New Iberia Broadcasting Co., New Iberia, La.—Granted modification of CP which authorized a new station, for approval of antenna, approval of transmitter and studio locations at 1400 Inside city limits, West Main Street, N. E. side, New Iberia, and 101 St. Peter St, New Iberia, respectively. Permittee hereunder is granted waiver of Secs. 3.59(b) and 3.69 of the Commission’s Rules, conditions. (B-3-MP-1863) (Continued on next page)
Grants of license:

- WBT—Southeastern Broadcasting Co., Charlotte, N. C.—Granted modification of CP, which authorized installation of a DA for night use, for extension of completion date from 5-4-46 to 5-14-46. (B3-MP-1570)
- WSPA—Spartanburg Advertising Co., Spartanburg, S. C.—Granted special temporary authority to use a 70 watt composite transmitter on 93.75 mc, with AO emission, in order to conduct signal measurement tests from proposed FM transmitter site, for a period of 30 days from date of grant. (Applicant was granted conditional Metropolitan station 1-9-46.)
- WSTP—St. Paul, Minn.—Granted special temporary authority to operate a composite, 250 watt transmitter on 102.1 mc, with a single-layerturnstile antenna located on St. Paul Hotel, 363 St. Peter St., St. Paul, for a period of 90 days from date of grant. (Applicant was given conditional grant for a Metropolitan, possibly Rural station on 10-19-46.)

Following is a list of FM applications for which approval was given of basic engineering plans. Conditional grants were originally made on October 19 and November 1, 1945.

(Continued on next page)
NEW—Mt. Vernon Radio and Television Co., Mt. Vernon, Ill.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 1 KW and daytime hours of operation. Amended to direct change the type of directional antenna for day and night use.

940 Kilocycles

NEW—KROW, Inc., Oakland, Calif.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and directional antenna for night use, and change transmitter location. Amended to change the type of directional antenna for day and night use.

990 Kilocycles

NEW—Public Radio Corp., Tulsa, Okla. (P. O. 214 Beacon Building)—Construction permit for a new standard broadcast station to be operated on 990 kc., power of 250 watts and daytime hours of operation.

1020 Kilocycles

NEW—Mid-State Broadcasting Co., Peoria, Ill.—Construction permit for a new standard broadcast station to be operated on 1560 kc., power of 1 KW, and unlimited hours of operation. Amended to change frequency from 1560 to 1020 kc., power from 1 KW day and night to 1 KW day and change hours of operation from unlimited time to daytime only.

NEW—Fred Jones and Mary Eddy Jones, d/b as Fred Jones Broadcasting Co., Tulsa, Okla.—Construction permit for a new standard broadcast station to be operated on 1030 kc., power of 50 KW, directional antenna and daytime hours of operation. Amended to change frequency from 1030 to 1020 kc., change power from 50 KW to 10 KW and change type of transmitter.

1030 Kilocycles

NEW—Marion Radio Corp., Marion, Ind.—Construction permit for a new standard broadcast station to be operated on 1030 kc., power of 1 KW and daytime hours of operation. Amended to specify type of vertical antenna and to change transmitter location.

1040 Kilocycles

NEW—Mid-America Broadcasting Corp., Louisville, Ky.—Construction permit for a new standard broadcast station to be operated on 1040 kc., power of 1 KW day and 5 KW day, directional antenna and unlimited hours of operation. Amended re corporate structure.

1050 Kilocycles

NEW—Key Broadcasting Corp., Baltimore, Md. (P. O. 1031 Cathedral St.)—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 1 KW and daytime hours of operation.

1060 Kilocycles

NEW—Panhandle Broadcasting Co., Amarillo, Texas (P. O. 604-5 Oliver Eakle Building)—Construction permit to change frequency from 1310 to 1070 kc., increase power from 250 watts day and night to 5 KW day, and 1 KW night, install new transmitter and directional antenna for night use, and change transmitter location. Amended to install directional antenna for day and night use.

NEW—WADC—Allen T. Simmons, Tallmadge, Ohio—Construction permit for a new standard broadcast station to be operated on 1070 kc., power of 10 KW, directional antenna night, and unlimited hours of operation. Amended to change proposed type of transmitter and directional antenna for day and night use.

1140 Kilocycles

NEW—Panhandle Broadcasting Co., Pekin, Ill.—License to cover construction permit (B4-P-3962) which authorized a new standard broadcast station.

1150 Kilocycles

NEW—Mid-America Broadcasting Corp., Boston, Mass.—Modification of construction permit (B1-P-4063, which authorized increase in power, changes in transmitting equipment, installation of new directional antenna for day and night use, and change in transmitter location) for installation of new transmitter.

NEW—Radio Americas Corp., Mayaguez, Puerto Rico—Construction permit for a new standard broadcast station to be operated on 950 kc., power of 1 KW and unlimited hours of operation. Amended to change frequency from 950 to 1150 kc. and make changes in vertical antenna.

1190 Kilocycles

NEW—James E. Murray, Hutchinson, Kansas (P. O. 12 West 18th St.)—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 1 KW and daytime hours of operation.

NEW—Annapolis Broadcasting Corp., Annapolis, Md. (P. O. Morris H. Blum, 2824 Ulman Ave., Baltimore, Md.)—Construction permit for a new standard broadcast station to be operated on 1190 kc., power of 1 KW and daytime hours of operation.

1220 Kilocycles

NEW—WADC—Allen T. Simmons, Tallmadge, Ohio—Construction permit to change frequency from 1350 to 1220 kc., increase power from 5 KW to 50 KW, install new transmitter and new directional antenna for day and night use and change transmitter location. Amended to make changes in directional antenna and change studio location.

1230 Kilocycles

NEW—Lewis Windmuller, Allentown, Pa.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Amended to change name of applicant from Lewis Windmuller to Allentown Broadcasting Corporation.

NEW—WFOM—Fred B. Wilson and Channing Cope, d/b as Chattahoochee Broadcasters, Marietta, Ga.—Modification of construction permit (B5-P-3652, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna and approval of transmitter and studio locations.

NEW—WADC—Allen T. Simmons, Tallmadge, Ohio—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 250 watts and unlimited hours of operation.
1280 Kilocycles

NEW—Genee Broadcasters, Inc., Eugene, Ore.—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1280 to 1310 kc., power of 250 watts, and unlimited hours of operation.

1310 Kilocycles

NEW—Northern Allegheny Broadcasting Co., Warren, Pa. (P. O. 124 East Washington)—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 1 KW and daytime hours of operation.

1320 Kilocycles

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Construction permit to install FM antenna on top of west tower of direction antenna.

1340 Kilocycles

NEW—Glances C. Merrill and Andrew H. Kovlan, a Partnership, d/b as Mountain State Broadcasting Co.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—Midwestern Broadcasting Co., Petoskey, Mich. (P. O. 705 Warren Bank & Trust Building)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—Blix Sioux Broadcasting Co., Sioux Falls, S. Dak. (P. O. Rooms 202-211 First National Bank Bldg.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—James Valley Broadcast Co., Huron, S. Dak.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1400 to 1310 kc.

NEW—The Central Kentucky Broadcasting Co., Lexington, Ky.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1400 to 1310 kc.

1400 Kilocycles

NEW—News-Press Publishing Co., Santa Maria, Calif. (P. O. De la Guerra Plaza, Santa Barbara, Calif.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Milburn H. Struckwish, Charles E. Bruce, and F. M. Lindsay, Jr., d/b as a partnership, Centrallia, Ill. (P. O. Box 780, Decatur, Ill.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

1420 Kilocycles

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.—Construction permit to change frequency from 1400 to 1420 kc., increase power from 250 watts to 5 KW and install new transmitter and directional antenna for day and night use. Amended to change frequency from 1420 to 680 kc., increase power from 5 KW day and night to 10 KW day and 5 KW night, install new type transmitter and new directional antenna for day and night use and change transmitter location.

1450 Kilocycles

NEW—Lake Erie Broadcasting Co., Sandusky, Ohio—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. Amended re stockholders and directors and to change type of transmitter.

NEW—West Alabama Broadcasting Co., a partnership composed of Frank W. Bruce and John E. Reynolds, Sr., Tuscaloosa, Ala.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. Amended to change transmitter location.

NEW—Midwestern Broadcasting Co., Alpena, Mich.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation.

NEW—Dowling Musgrove, Douglas, Ga. (P. O. Box 115, Homerville, Ga.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

NEW—Tallahassee Appliance Corp., Tallahassee, Fla. (P. O. 123 S. Monroe St.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

KXLR—Arkansas Airways Co., Little Rock, Ark.—License to cover construction permit (135-P-406, as modified) which authorized a new standard broadcast station.

KXLR—Arkansas Airways Co., Little Rock, Ark.—Authority to determine power by direct measurement of antenna power.

WLEE—Thomas Garland Tinsley, Jr., Richmond, Va.—Construction permit to make changes in vertical antenna and mount FM antenna on top.

1470 Kilocycles

NEW—Robert Schuler, Sheldon Anderson and Lester Eugene Chenault, Fresno, Calif. (P. O. 3155 Alta Ave.)—Construction permit for a new standard broadcast station to be operated on 1470 kc., power of 1 KW, and unlimited hours of operation.

NEW—Gila Broadcasting Co., Coolidge, Ariz.—Construction permit for a new standard broadcast station to be operated on 1590 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1590 to 1470 kc., and make changes in vertical antenna.

1490 Kilocycles

NEW—Tri-Cities Broadcasting Co., Goose Creek, Texas—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation.

WARD—Central Broadcasting Co., Inc., Johnstown, Penn.—Modification of construction permit (131-P-3732, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and approval of transmitter and studio locations. Amended re ground system.

NEW—The Gardner Broadcasting Co., Gardner, Mass.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

NEW—Worth H. Kramer, Robert E. Wasdon and Jack J. Siegel, a partnership d/b as Florinai West Coast Broadcasting Co., Tarpon Fla.—Construction permit for a new standard broadcast station to be operated on 1300 kc., power of 1 KW, and daytime hours of operation.

(Continued on next page)
MISCELLANEOUS APPLICATIONS ACCEPTED FOR FILING

NEW—College of the Pacific, Stockton, Calif. — Construction permit for a new non-commercial educational broadcast station to be operated on any available frequency and FM type of emission. Power of 1 KW. Amended to change type of FM transmitter site.

KSU—The State University of Iowa, Iowa City, Iowa.—Modification of construction permit (B4-PED-28, as modified, which authorized a new non-commercial educational broadcast station) for extension of completion date.

NEW—The Trustees of the University of Pennsylvania, Philadelphia, Pa.—Construction permit for a new non-commercial educational broadcast station to be operated on 42.9 MHz and special for FM emission. Amended to change frequency from 42.9 to 91.7 MHz, to change type of transmitter and to make changes in antenna system.

APPLICATIONS TENDERED FOR FILING

NEW—Radio Kentucky, Inc., Louisville, Ky.—Construction permit for a new standard broadcast station to be operated on 900 ke., power of 1 KW and daytime hours of operation.

NEW—Grenada Broadcasting Co., Grenada, Miss.—Construction permit for a new standard broadcast station to be operated on 1100 ke., power of 250 watts and unlimited hours of operation.

NEW—Raymond V. Eppel and Jas. P. Ryan, d/b as Mitchell Broadcasting Association, Mitchell, S. D.—Construction permit for a new standard broadcast station to be operated on 1190 ke., power of 250 watts and unlimited hours of operation.

NEW—John Dawes Ames, Robert Francis Hurleigh and Nevin Paul Nielson, a partnership d/b as Lake Shore Broadcasting Co., Evanston, Ill.—Construction permit for a new standard broadcast station to be operated on 1200 ke., power of 5 KW and daytime hours of operation.

KPMC—Pioneer Mercantile Co., Bakersfield, Calif.—Construction permit to increase power from 1 KW to 10 KW, install new transmitter and change transmitter location, and make changes in antenna system. (1500 kc.)

NEW—Great Falls Broadcasting Co., Great Falls, Mont.—Construction permit for a new standard broadcast station to be operated on 1100 ke., power of 250 watts and unlimited hours of operation.

NEW—Champlain Valley Broadcasting Corp., Albany, N. Y.—Construction permit for a new standard broadcast station to be operated on 850 ke., power of 10 KW, directional antenna and unlimited hours of operation.

NEW—Parkersburg Broadcasting Co. (a Corporation), Parkersburg, W. Va.—Construction permit for a new standard broadcast station to be operated on 1230 ke., power of 250 watts and unlimited hours of operation.

KGKB—Jas. G. Ulmer, Tyler, Texas—Construction permit to change frequency from 1190 to 690 ke., power from 250 watts to 1 KW night and 5 KW day, install directional antenna for day and night use, new transmitter and change transmitter location.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why Cease and Desist Orders should not be issued against them. (Continued on next page)
A. C. Beeken Co., a corporation, located at 29 East Madison Street, Chicago, and Austin N. Clark and Joseph L. McNab, officials of the corporation, all engaged in the wholesale distribution of jewelry, giftware and related products, are charged in a complaint with misrepresentation. (5434)

Independent Grocers Alliance Distributing Co., Chicago, its directors, and four of its affiliated wholesale grocers for whom it operates a buying and merchandising service, are charged in a complaint with violation of the brokerage section of the Robinson-Patman Act by accepting brokerage fees or commissions from sellers of foodstuffs, groceries and related products. Four sellers of such commodities, who pay the brokerage to the respondent buyers, likewise are charged with violating the Act. (5433)

**STIPULATIONS**

During the past week the Commission announced no stipulations.

**CEASE AND DESIST ORDERS**

The Commission issued no cease and desist orders last week.

**FTC COMPLAINT DISMISSED**

The Federal Trade Commission has dismissed without prejudice its complaint charging Stayner Corporation, San Francisco, with disseminating false advertisements concerning the therapeutic properties of a medicinal preparation designated Minra.

The order of dismissal states that the respondent has discontinued the practices alleged in the complaint as being in violation of the Federal Trade Commission Act and has given satisfactory assurance that they will not be resumed. All of the Commissioners participated in the decision.
PETRILLO REITERATES BAN ON FM-AM DUPLICATION

James C. Petrillo, AFM President, in an article published in the April issue of the "International Musician" reiterated the union's ban on the simultaneous broadcasting of radio programs containing music over FM and AM stations.

He also discussed the union's refusal to permit its members to perform for television broadcasts, an order which was first issued by the AFM in February, 1945. "Television is not going to grow at the expense of the musicians," the article stated. "As television grows, the musician is going to grow with it, or we are not going to assist in its development."

KIWANIS MARKS RADIO WEEK

The second annual observance of Kiwanis Radio Week starting next Sunday (12) will be marked by salutes to the radio broadcasting industry at local Kiwanis meetings in the United States and Canada.

Reports indicate that local stations are cooperating actively with Kiwanis clubs to make this year's observance successful.

Three members of NAB's staff are scheduled to make addresses before Kiwanis groups. A. D. Willard, Executive Vice President, will speak to the Cleveland members on Thursday (16). General Counsel Don Petty plans to visit the Roanoke, Virginia, club on Tuesday (14), and Director of Government Relations Robert T. Bartley is scheduled for two talks in Louisiana. His first stop will be at the Bossier-Caddo group on Wednesday (15) and the following day he will talk at the meeting in Shreveport.

Be It Resolved, that the 5th District of NAB does mourn his passing and that, further our collective sympathy be extended his survivors and further, that a copy of this resolution be spread on our minutes and a copy furnished his family and to his station.

Resolved, that the National Association of Broadcasters prepare a series of programs that will tell the true story of our system of broadcasting and its accomplishments; that the networks provide time for the broadcasting of these programs, and that transcriptions of the programs be prepared for distribution to the stations not carrying network programs.

Be it resolved, that Fred Borton, director of the 5th district, recommend to the Board of Directors of the National Association of Broadcasters that a bureau be instituted for the handling of controversial copy, and/or copy of unsuitable nature. It is recommended that if this work can be accomplished by an existing bureau or department, such action as necessary to effect this, be taken.

It is the belief of the members of the 5th District of NAB that the publication and circulation by the Federal Communications Commission of the book entitled, “Public Service Responsibility of Broadcast Licensees” is an unfair and an unjust presentation of the practices of broadcast stations in general throughout the United States; that the specific case examples cited in the publication in no way justifies control of program content by the Communications Commission; that the 5th District requests the National Association to proceed as rapidly as possible to prepare and have presented to Congress necessary amendments to guarantee freedom of radio as well as freedom of the press in an effort to maintain the essential freedoms in the only democracy left in the world.

would be the development of congressional relations work¬
provided; that one of the main duties of the state groups
headquarters; that a field organization for the continuous
zation than the basic district unit. We recommend that the
there is a need of smaller units in the broadcasting organi¬
United States.

members in their daily broadcasts.
contain B.M.I. at its highest degree of efficiency. We
the best interests of the industry can be served by main¬
2. That the radio industry through the NAB petition
Congress for definitive legislation, defining and limiting the
powers of the FCC.

The members of the 5th District of the NAB are opposed to
the adoption of any so-called Academy Awards or Oscar
Awards connected with the National Association of Broad¬
the future, for the reasons that the majority of broadcas¬
tor for which wide broadcast coverage would not be in a
position to benefit from any such project, and it is our recommendation that any stations interested in any such plan of Awards, organize and
finance such a scheme separately and apart from the Na¬
tional Association of Broadcasters.

The 5th District of the National Association of Broad¬
casters urges all stations within the district to become members of B.M.B., and commend that organization for the progress they have made in organizing periodic station coverage studies. The stations of this district wish to extend to B.M.B. their fullest active support and cooperation.

The broadcasters of the 5th District of NAB believe that the best interests of the industry can be served by main¬
taining B.M.I. at its highest degree of efficiency. We
therefore urge all broadcasters to lend their most active support to B.M.I. and to check their program schedules so that increasing prominence may be given to B.M.I. numbers in their daily broadcasts.

Daylight Savings Time presents one of the most difficult problems in program scheduling to broadcast stations. This is especially true in the border zone between standard time zones, such as that occupied by the states of Ohio and Kentucky. The broadcasters of the 5th District of NAB therefore urgently request its National Association to extend all efforts in securing a national pattern for the establishment of a uniform time in each time zone in the United States.

It is the belief of the members of the 5th District that there is a need of smaller units in the broadcasting organization than the basic district unit. We recommend that the National Association lend itself to the immediate development of state groups—the study be made of the functions of the existing state organizations, and that a development program be adopted, with the assistance of headquarters; that a field organization for the continuous service and development of such state organizations be provided; that the duties of the main duties of the state groups would be the development of congressional relations working toward a better understanding by our congressmen of the problems of the broadcasters.

The broadcasters of the 5th District of NAB wish to take this opportunity to thank one of their members, Harold Ryan, for his unselfish action and substantial contributions to our National Association in serving as interim president during a most difficult time.

The broadcasters of the 5th District of the NAB hereby pledge their support to our President, Justin Miller. We commend the constructive program which he has offered and pledge our wholehearted support in the attainment of the objectives of the National Association of Broadcasters.

The broadcasters of the 5th District of NAB hereby extend their wholehearted thanks to broadcast station WCOA and our genial host, Jack Rathbun, for the efficient arrangements which have been made to accommodate our meetings and to entertain our members in the city.

REGISTRATION LIST

(Continued on next page)
SECOND DISTRICT MEETING

Excellent representation of NAB membership marked the Second District meeting held in New York (25 and 26).

Following a report on NAB activities by Justin Miller, a discussion on public relations with Robert Soule, WFBI, presiding was held with A. D. Willard speaking in place of Ed Kirby who was unable to attend. Mr. Willard followed immediately with a discussion on employer-employee relations.

One of the highlights of the meeting was the joint luncheon of the Radio Executives Club and NAB. With Murray Crabhorn, president of REC presiding; the election of Michael R. Hanna, announced in last week's REPORTS (p. 829), along with the program manager's reports.

Texts of the resolutions follow:

"Whereas, the Federal Communications Commission report entitled, 'Public Service Responsibility of Broad- cast Licensees,' constitutes a direct threat to freedom of speech and arrogates to the FCC powers of censorship never intended for, nor granted to the Commission, and

"Whereas, President Truman has said, 'Radio must be as free as the press,' and

"Whereas, Radio broadcasting is recognized as one of the greatest mediums of mass communication yet de vised and, as such, must resist attempts to abridge the Constitutional Right of Freedom of Speech, now therefore,

"Be It RESOLVED, That the Broadcasters of the Second District of the National Association of Broadcasters challenge the FCC's unwarranted assertion of authority and call upon the NAB to take all necessary steps to seek the quickest relief from whatever source is deemed advisable."

"Whereas, BMI was a creation of, and is sponsored by, the Broadcasting industry, and

"Whereas, It is essential to the industry that BMI be maintained as a strong factor in the music field, and

"Whereas, The Broadcasters have it within their power to perpetuate and strengthen BMI by intelligent musical programming, now therefore,

"Be It RESOLVED, That the members of the Second District actively intensify their support of the BMI through a higher percentage of use of BMI selections throughout their program schedules."

"Whereas, the Hon. Justin Miller has completed his first six months as president of the National Association of Broadcasters, and

"Whereas, he has won the confidence and admiration of broadcasters by his thorough grasp of broadcasters' problems and his aggressive approach to them, now therefore,

"Be It RESOLVED, That the members of the Second NAB District pledge to him their loyal support in his constructive leadership in the industry's constant endeavor to operate most effectively in the public interest."

FCC ORDER NO. 91-C CANCELLED BY COMMISSION

The Federal Communications Commission has adopted an order cancelling its order No. 91-C which permitted certain engineering operations in standard broadcast stations by persons not holding first class radio-telephone operators license. The cancellation becomes effective on August 1, 1946.

The Small Market Stations Executive Committee which met in Washington last week, conveyed informally to the FCC the hardships which might be worked on some of the small stations in the event the order were cancelled. However, it was indicated by the commission that their plans were already in motion, and that an announcement (order 91-D) would cover the FCC decision. (See Engineering Department)

SMALL MARKET STATION MANAGER NAMED DISTRICT DIRECTOR

Michael R. Hanna, general manager, WHCU Ithaca, New York was elected director NAB 2nd District in New York last week. He succeeds Kolin Hager, WGY Schenectady, who was not a candidate for re-election. Hanna led an interesting discussion period on sustaining vs. commercial religious programming during the small market station's session. He advocated the elimination of "commercial" religious broadcasts, and scheduling only of sustaining religious matter, working in close harmony with the local ministerial alliance.

NAB ENCOURAGES PERSONNEL TRAINING PROGRAM FOR SMALL STATIONS

The current expansion in the broadcasting industry and the consequent creation of the need for additional trained radio personnel is causing small market stations management considerable concern, according to J. Allen Brown, head of NAB's Small Market Stations Division.

Special emphasis has been given to this subject at all NAB district meetings by Frank E. Pellegrin, director of Broadcast Advertising.

(Continued on next page)
In addition to the hundreds of professional schools and colleges now offering courses in radio, Mr. Brown pointed out that the Veterans Administration's ON-THE-JOB TRAINING program offers a valuable means of training the additional personnel which will be required.

Among several radio stations now conducting ON-THE-JOB TRAINING programs is radio station WOSH, Oshkosh, Wisconsin. At the request of NAB, Allan Curnutt, general manager of this station has outlined the procedures used there. His experiences are reported as follows:

“At radio station WOSH we think it is excellent. This opinion is based on three months operation under the program with veterans in the announcing and promotion departments. Three years were set up for the training of staff announcers and promotion men. These programs were approved by the Wisconsin Industrial Commission for training at WOSH. Comprehensive schedules were developed to offer veterans on the premise that, first—three years is the usual length of previous experience required by Regional Midwest Stations for staff announcers, and, second—a broad development of apprentice announcers is absolutely necessary in a local channel station. The fact that a staff announcer on a station of this size is expected to be able to write, produce, and announce almost every conceivable type of program was carefully considered in laying out the training program. Maybe we were just lucky, maybe we got a break, maybe we looked for the openings and made that break for ourselves. At any rate, we were fortunate in the services of three exceptionally alert and ambitious veterans at WOSH. Their fine attitude must, of course, be given due consideration. In addition, the attitude of the experienced members of my staff who aided no end both in the drawing up of this program and carrying it out, have convinced me the plan is a sound one for the local station.

“The preparation of a training program is relatively simple. If you have an office of the Veterans Administration or the Industrial Commission in your town, it is wise to discuss your plans with them before starting. After that, it is merely a matter of listing down the various things a trainee has to learn to be able to do the work he or she is training for. You have to state what the wage objective is or what a fully trained person receives. You have to work out a pay scale for the trainee which will start low and gradually approach the objective wage. This scale will depend on the length of the training program desired. It is supposed to be low enough to compensate the employer for the time and trouble involved in the training. Yet, it is not supposed to be a method of securing low cost employees. If the training program is for a period of three years, for example, the trainee must not receive from the employer less than 60% of the experienced employees pay. The single veteran receives $65 per month from the government and the man with a dependent receives $90 per month.

“At no time will the government permit the trainee to receive from the employer and from the government a total in excess of the salary of a fully training employee. It is easy to see why this would create bad employee relations. So, when the scale he receives from the employer begins to approach the objective wage, then the amount he receives from the government is gradually decreased until he reaches the end of the training program.

“Each veteran is entitled to different amounts of assistance under this plan. "All honorably discharged veterans who were in the service 60 days or more are eligible. The length of the assistance they are entitled to is based on the length of time they were in the service. Each veteran is entitled to one year of government assistance under this plan plus the amount of time he was in the service. For example, if the trainee was in the service two years, he is entitled to the one year and two years in service or a total of three years.

“The three veterans now taking training at WOSH—one from the Army Air Forces and two from the Marine Corps—all expressed enthusiasm for the Veterans’ Training program. One of them has written, 'I am of the opinion that On-The-Job Training to the ex-GI is an excellent means of getting a start in his chosen profession. It not only offers excellent training opportunities, but at the same time enables a man to earn a suitable living wage.' Another says, 'Many who were industrially misplaced, now are realizing the ambition which before Veteran's Administration seemed to have an endless line of barriers,' and the third has said, 'It is my sincere hope that the practice becomes more widespread in the radio industry, hereby offering its many advantages to both the employer and the veteran.'

SMALL MARKET BROADCASTER GOES TO WASHINGTON, GETS CPA APPROVAL

When the original plans of The Radio Division of The Review Publishing Company at Alliance, Ohio, to construct a new building for its FM radio station were forced aside by high building costs and scarcity of materials, the switch to an existing structure pointed the way out of mounting difficulties.

A three-story brick residence and adjoining two-story, four-car garage were acquired. A Cleveland, Ohio, firm of architects found the ground floor well adapted for conversion into a two-studio-control room operational setup, with space left over for a four-desk general office and a combination manager’s office and sponsors’ audition room.

The second and third floors and the finished second story of the adjoining garage are to be remodeled into living quarters for the station manager and two members of his staff, all three of whom are veterans of World War II. Had it not been for the availability of space in the setup for living quarters for three veterans and their families, the station construction would have been caught in the CPA construction freeze.

Paul W. Reed, manager of The Radio Division of The Review Publishing Company and a newspaperman of 32 years’ experience, had laid aside his uniform as a major in the Ordnance Department after four years’ active duty and found himself fighting on a new “front,” trying to get a radio station on the air. Several plans for the new radio station had been drawn by capable architects, and as quickly thrown aside, due to the uncertain state of affairs in the building industry. Plans for the remodeling job had just been completed and a contractor had been found who was ready to proceed with the remodeling work....when the CPA “freeze” set in.

Reed dashed off to Cleveland and filed a request with the regional office of the CPA for permission to proceed with the construction, citing the fact that the three apartments would occupy far more floor space than the radio station. The Cleveland CPA office promised reasonably prompt action but stated that the application would be screened out in Cleveland and then forwarded to a sub-regional office that was still in the visionary stage in Canton, Ohio.

Not content to wait, Reed boarded a train for Washington, threaded his way through the crowds in the hotel lobbies and found his path leading to the Social Security Building, where the national headquarters of the CPA are located. He found a sympathetic listener in Capt. Ivan A. Bickelhaupt, deputy director, Construction Bureau, CPA, who promised to telephone the Cleveland regional office and expedite the application. The following day in Washington, a wire reached Reed from his associate in Alliance, stating that the Cleveland office had approved the application.
HONOLULU BROADCASTER KEENLY INTERESTED IN SYNDICATED SHOWS

Webley Edwards, Executive Vice President and Station Manager, KHON, Honolulu, Hawaii, has written NAB as follows:

"In the March 25th issue of NAB Reports there is a very interesting section devoted to syndicated transcribed shows. I am glad to see this matter brought up for discussion. There is almost always a need for a good transcribed feature for selling locally or nationally, even among stations who have a considerable number of net-work co-ops for sale. Down here, we are almost always hungry for features of this kind. The more you can print about them in the report the better we will like it."

IMPORTANT OF FREE RADIO TO PROSPEROUS AMERICA DISCUSSED AT CCNY CONFERENCE

Robert F. Elder, Assistant to the President of Lever Brothers Company, in a speech at the awards dinner of the Second Annual Radio and Business Conference of the City College of New York's School of Business, outlined the role of radio advertising in keeping America prosperous and the importance of maintaining a free radio in America.

Contrasting the situation now where the "demand for most goods far exceeds the supply" with that "within the next two or three years, perhaps even sooner" when we will have "depleted inventories restored to normal," he concluded: "We are going to get the American people to raise their average living standard by 50%—the level necessary to insure full employment—only if we make them want the extra goods and services that must be produced, sold and consumed if everybody who wants a job is to be able to find one. That's a job for advertising—a big job—and a sobering challenge.

In reference to maintenance of free radio, Mr. Elder said: "The Commission appears to be steadily moving to tighten its control over radio . . . . Now I don't think that anyone can quarrel with the concept that radio should be operated 'in the public interest.' The real question is how the public interest is to be defined and who is to do the defining."

Of the present system of sponsor-supported radio programming, he said, "We have only goods and services to sell, not ideologies. We want to attract the biggest audience we can. The way to do that is to find out what the people want to hear, and give it to them. That, I submit, is the essence of democratic radio . . . . The real answer, it seems to me, lies in intelligent self-regulation by advertisers and broadcasters, who have a great deal at stake in maintaining the approbation of the listening public."

Observing that "there are a lot of things that need improving," he added "the self-interest of broadcasters and advertisers is the surest guarantee that this progress can be expected to continue."

In conclusion, Mr. Elder stated: "If we can keep radio free—if we can retain the favor of the American public—then there is no doubt that radio can do its full share in helping build a permanently prosperous America."

Other speakers at the awards dinner were Edgar Kobak, President of the Mutual Broadcasting System, and Harry Noble Wright, CCNY President, who presented awards to networks and stations for outstanding accomplishments. A. D. Willard, Jr., NAB Executive Vice President, presided.

PER-INQUIRY AND FREE TIME

Station management of member stations has reported to NAB headquarters the efforts of Selznick-International Studios to obtain free time by providing good entertainment material via transcription. The 15-minute programs "plug" the picture "Duel in the Sun."

While the radio director of the motion picture firm points out that you may secure a local sponsor for the series, stations are cautioned that one of the programs can be broadcast ONLY on a sustaining basis.

Rock Advertising Agency has offered stations a "profit package" to stations on a per-inquiry basis, according to information sent to the Department of Broadcast Advertising.

NAB has written both concerns advising them of the industry's attitude toward such practices and inviting them to use radio at card rates. A copy of a resolution adopted at the 1942 NAB convention was sent to each of the firms.

BROADCAST ADVERTISING ORDER BLANKS

Stations desiring the latest sales and commercial program aids should write the Department of Broadcast Advertising for an order blank. This form lists the material and information available to date.

FIRST CLASS OPERATOR'S LICENSE REQUIRED AGAIN

Effective August 1, 1946, the operation of a standard broadcast transmitter will again require the holding of a first class radiotelephone operator's license, according to an announcement made by the FCC last Monday (29).

The temporary relaxation of the Commission's requirements regarding the class of operators authorized to operate a radio station went into effect on February 21, 1942, to relieve the critical shortage of qualified operators which resulted from the wartime demand of the armed services for radiotelephone and radiotelegraph operators.

Promulgation of the new order, No. 91-D, said the Commission, followed a careful study of operation availability from which the Commission concluded that, chiefly as the result of the release of large numbers of operators from the armed services and war industries, the shortage of commercial radio operators of the higher classes had been alleviated to an extent that would permit the cancellation of Order No. 91-C by August 1, 1946. The FCC said, "this action is in accord with the express purpose of the

(Continued on next page)
warrtime orders previously adopted, the Commission hav-ing stated in its public notice of February 21, 1942, at the time Order No. 91 was adopted, that if it is deter-mined that the first class operators are available, the Commission will restore the higher standards."

The Commission went on to say that it "is now making a very intensive study of the whole operator situation as applicable to broadcast stations. It is expected that prior to August 1, 1946, the effective date of the termina-tion of Order No. 91-C, proposed modifications of the Commission's Rules will be promulgated at which time ample opportunity will be given to all parties interested to indicate their approval or disapproval or to suggest changes."

(See Small Market Stations.)

**OPA AUTHORIZES HIGHER CEILINGS FOR COMMUNICATIONS EQUIPMENT**

New ceilings for various types of communications equip-ment were announced last week (2, 3 and 4) by the OPA. The new ceilings include prices on radio receiving tubes and allied special purpose tubes, radio transformers used on power circuits and vibrators, and new and used (in as good as new operating condition) radio receiving and send-ing sets and other electronic and communication materials declared surplus by the Government.

Although an increase factor was given for tubes sold as replacement parts as well as those sold on original equipment, consumer costs for replacement tubes will not be affected, according to the agency. Two increase factors were given manufacturers of these products:

1. For sales of tubes to resellers for replacement pur-poses—20 per cent over March 31, 1942 levels at which maximum prices for these sales were previously frozen.

2. For all other sales of tubes, including those used as original equipment on radios—27.5 per cent over March 31, 1942 levels at which price ceilings were frozen prior to September 1945. The latest increase, which replaced the one granted in September, actually raises current maximum prices for these sales only 15.5 per cent.

The price increase factor on radio transformers has been raised from 16.1 per cent to 19 per cent. This is the same increase as was granted for specialty transformers other than fluorescent transformers.

These increases, OPA declared, are necessary to bring the ceiling prices in line with increased factory costs, including higher wage rates recently granted.

The new mark-ups for new and used receiving and send-ing sets and other electronic and communication materials applies to such materials declared surplus by the Govern-ment and sold by any government agency or by a prime contractor or sub-contractor selling termination inventory.

Retail ceilings will approximate the ceilings for similar models purchased through regular civilian channels.

Effective May 8, 1946, the mark-ups are as follows:

1. For resales by a distributor to a dealer, the ceiling will be the price paid the government disposal agency, plus a mark-up of 33-1/3 per cent on Government selling price.

2. For resales by a dealer who purchases direct from a government disposal agency, prime contractor or sub-contractor, the ceiling will be the price paid the seller plus a mark-up of 82 per cent on Government selling price.

3. For resales by a dealer who purchases from a distri-butor, the ceiling will be the price paid the distributor, plus a mark-up of 66-2/3 per cent on Government selling price, provided the selling price does not exceed the original Government or contractor disposal price plus a mark-up of 122 per cent.

The purpose of this order, OPA said, is to provide a uniform method of pricing for all resellers of these sur-

**RELEASE REPORT ON GERMAN RESEARCH**

A German super-Iconoscope, said to be ten times as sensitive as the standard German type of scanning tube for television, is described in a report released Monday (29) by the Department of Commerce. The increased sensitivity of the new tube reportedly is due to the superior storage properties of its mosaic.

The report covers wartime research on electronic and other physical and optical instruments at various German laboratories.

The mosaic of the super-Iconoscope is capable of storing images for several seconds. It is made of mica, with a coating of magnesium oxide. Magnesium is evaporated onto the mica through a series of meshes to make the deposit uniform. The magnesium is then oxidized by an electric discharge in a few millimeters of oxygen.

Other research discussed in the report was concerned with electronic devices including research on crystal valves for rectification at centimeter wave length.

Additional material covers research on large-scale produc-tion of phosphors for television, image converters, radar, fluorescent lighting, production of graphite wall coatings for cathode ray tubes and synthetic quartz crystals for frequency control.

Information is included also on the activities of dark trace tubes and zinc oxide fluorescence cathode ray tube screens. The zinc oxide grains used on the screens were extremely small.

Orders for the report, PB-6674, should be addressed to the Office of the Publication Board, Department of Com-merce, Washington 25, D. C. and should be accompanied by check or money order, payable to the Treasurer of the United States. (Photostat, $3; microfilm, 50 cents; 32 pages.)

**FCC**

**FCC ANNOUNCES AVAILABILITY OF FREQUENCY IN EL PASO**

The Federal Communications Commission announced Monday (29) the availability of the frequency 1340 kilo-cycles for use in the El Paso, Texas area, by virtue of the deletion by Mexico of this frequency at Ciudad Juarez, Chihuahua.

**A. T. AND T. GRANTED EXPERIMENTAL PERMIT**

The FCC granted special temporary authority on Thurs-day (2) to the American Telephone and Telegraph Com-pany for a three month period, for a Class 1 experimental portable station to be used in connection with a public, educational lecture tour to illustrate some of the technical and operational characteristics of radar.

The station will operate on frequencies with the 8600 to 8700 kilocycle bands, with peak power not to exceed 50,000 watts. The authority is granted subject to the condition that no interference is caused to any other radio services.

**NARBA ASSIGNMENT NOTIFICATION**

FCC public notices issued on Monday (29) contain notification under the provisions of Part III, Section 2, (Continued on next page)
of the North American Regional Broadcasting Agreement.

Change No. 1 is in relation to the Dominican Republic
and Change No. 28 deals with Canada.

List of changes, proposed changes, and corrections in
assignments of Canadian and Dominican Republic broad¬
cast stations modifying appendix containing assignments
of Canadian and Dominican Republic broadcast stations
(Mimeograph #47214-2-3) attached to the recommenda¬
tions of the North American Regional Broadcasting
Agreement Engineering Meeting, January 30, 1941, follow:

CKRC, Winnipeg, Manitoba, 5 kw., 630 kc., DA-N,
Class III-A; CKBI, Prince Albert, Saskatchewan, 5 kw.,
900 kc., DA; CFBC, St. John, New Brunswick, 5 kw., 930
kc., DA, Class III-A; CHNS, Halifax, Nova Scotia, 5 kw.,
900 kc., DA-N, Class III-A; CKVI, Verdun, Quebec, 950
kc.; CJNB, North Battleford, Saskatchewan, 100 w., 1240
kc., Class IV; CJA V, Port Alberni, B. C. (change in call
letters from CKPA); CHWK, Chilliwack, B. C., 250 w.,
1340 kc., Class IV; CFAB, Windsor, Nova Scotia, 250 w.,
1450 kc., Class IV; CFJM, Brockville, Ont. (change in call
letters from CFBR); CFBC, St. John, New Brunswick,
1470 kc., (delete—see assignment on 930 kc.).

HI3T, Ciudad, Trujillo, 10 kw., 1170 kc., Class I-B,
expected to commence operation in July, 1946.

**General**

**CPA CONSIDERING NAB REQUEST**

Although no final decision has been made by the CPA
in answer to the request filed by NAB for relief under
the recent order restricting construction, Hugh Porter,
Deputy Director, Bureau Construction, CPA has informed
NAB the request is under consideration.

Text of the letter follows:

April 27, 1946.

"National Association of Broadcasters
1760 N Street, N. W.
Washington 6, D. C.

Gentlemen:

"This will acknowledge receipt of your communication
of April 12 addressed to Mr. John D. Small.

"Your request for an amendment to Veterans Hous¬
ing Order 1 is being given consideration. Because it
is a policy determination requiring careful study it
will undoubtedly take some time to reach a final decision.

"Yours very truly,

(Sgd.) HUGH PORTER,
"Deputy Director Bureau Construction."

**TEMPORARY WAIVER OF TRANSCRIPTION
ANNOUNCEMENTS**

In a letter to the American Broadcasting Company made
public last Monday (29), the FCC granted a request to
eliminate certain announcements of transcribed programs
for a period of 30 days.

ABC had requested that the Commission waive the re¬
quired transcribed announcements during the period of
daylight saving time, since the network was recording
practically all of its programs and feeding them to the
various legs of the network an hour later in order to
eliminate local changes in broadcast schedules.

In granting the waiver for 30 days the FCC said that
"the waiver is not to be applicable where an individual
station makes an off-the-line recording. It is to be ap¬
licable only when the off-the-line recording is made by
the American Broadcasting Company as indicated in your

**FRAZIER AND PETER FORM NEW RADIO
CONSULTANTS FIRM**

Howard S. Frazier, NAB Consulting Engineer, and Paul
F. Peter, former NAB Director of Research, announced
Wednesday (1) the formation of the firm of Frazier and
Peter, Radio Management Consultants with temporary
offices at 1730 Eye Street, Northwest, Washington 6, D. C.

The services of the new firm will be engaged to assist
broadcasters and prospective broadcasters in all phases of
management except legal and engineering. Some of the
services of the firm are broadcast station management and
organizational studies, program policy recommendations,
program analysis systems and audits, advertising rate
studies, market evaluations, operating cost analyses, and
broadcast station appraisals.

With a combination of thirty-eight years experience in
broadcast station management and research shared be¬
tween them, Frazier and Peter bring a practical know¬
how to radio management confronted with the increased
complexity of serving the public interest along with prudent
economic control of station operation.

Frazier has served in all phases of broadcast station
operation, ranging from control room operator to president
and general manager of stations in all classifications in
large and small market areas.

Peter, formerly of NAB, the Joint Committee on Radio
Research, the Radio Corporation of America, the National
Broadcasting Company and a pioneer in radio research
and statistical analysis of broadcast operation, public
attitudes and listening habits, and has an intimate knowl¬
dge of radio problems on both the national and local levels.

Mr. Frazier and Mr. Peter stated that their firm will
offer an advisory management service based on the pre¬
mise that true knowledge comes only from sound funda¬
mental investigation, and the application of knowledge
must be made in the light of practical experience.

**CITE INDUSTRY FOR WAR WORK**

The radio broadcasting industry, through NAB, and
two members of the NAB staff have been cited recently
by government agencies for valuable contributions made
in behalf of the war effort.

The Treasury Department's Silver Medal has been pre¬
sented to President Justin Miller and citations have been
awarded to NAB by the Commanding General, Army Air
Forces, and the Commandant of Armed Forces Radio
Service, a joint operation of the War and Navy Depart¬
ments.

Treasury Department Medals have also been awarded
to Arthur C. Stringer, Director of Promotion, and J. Allan
Brown, Asst. Director of Broadcast Advertising. Mr.
Brown was honored for his work during the period he was
an executive at Station WFOY, St. Augustine.

**COLLEGE STUDENTS TO ATTEND UN MEETING
UNDER AUSPICES OF KGW**

Inaugurating west coast participation with NBC's
United Nations' project June 6th through September 9th,
H. Quenton Cox, General Manager of station KGW, Ports¬
(Continued on next page)
land, Oregon, has announced that KGW, in conjunction with the Portland League of Women Voters, will send two northwest college students to the United Nations' Conference to present findings and opinions of 47,000 northwest college students to the UN assembly.

The students will be chosen from among the 62 delegates who attended the Pacific Northwest Students' Congress at Reed College in Portland April 5th and 6th to discuss and formulate resolutions determining the "Student's Place in the Atomic Age."

Of the 31 colleges represented at the Congress, one student will be chosen from student bodies of more than one thousand, and one from the smaller schools to present their findings to the United Nations' Conference in New York.

The students competing for the expense-free trip will be judged on three points: their success in publicizing on their home campus the findings of the Congress; the percentage of home campus students voting in the poll of student opinion on the Congress resolutions (this poll to be conducted by the contestants, using ballots prepared by the Portland League of Women Voters); the completeness and clarity of the written reports; and the speed with which they are submitted to the judging committee.

Closing time for submission of the reports was midnight, April 28th. Winners will be announced this month. KGW and the Portland League of Women Voters expect to be able to announce the date on which the winning students will present their resolutions to the United Nations' Conference at an early date.

The judges for the Students' Congress contest include H. Quentin Cox, General Manager of KGW; Mrs. E. W. St. Pierre, President of the Women Voters League; and Ted Gamble, former National Director of the War Finance Division and Assistant Secretary of the Treasury.

STATIONS GIVE TRANSCRIPTIONS TO STEPHENS COLLEGE

Stations KXOK and KFRU have presented a transcribed library of important speeches given by world leaders to Stephens College. The presentation was made during a half hour program broadcast by both stations.

The speeches, beginning with the late President Roosevelt's address to the nation following the attack on Pearl Harbor, include all the important talks made since then by leaders such as Roosevelt, Truman, Churchill, Willkie, Mme. Chiang Kai Shek, Hoover, Eisenhower, Nimitz and MacArthur.

The Speech and Radio Division of Stephens College will use the transcriptions in their studies by observing the techniques employed by these speakers.

The library service will be continued to the college indefinitely, furnishing transcriptions of addresses by national and international personalities.

News Clinics

THREE STATES READY FOR RADIO NEWS CLINICS

Minnesota's Radio News Clinic, Minneapolis, Friday, May 17, will be held in the Hotel Nicollet. Clinic Chairman Richard M. Day, of WDGY, last week, notified all stations of the forthcoming event and nailed down a block of hotel rooms for Thursday and Friday nights.

Wisconsin

The Wisconsin Clinic at the Loraine Hotel, Madison, Tuesday, May 14, is expected to be "extremely productive and well attended," according to Kenneth F. Schmitt, clinic chairman, and general manager, WIBA, Madison.

Nebraska

In addition to station personnel, the Nebraska Radio News Clinic, Fort Kearney Hotel, Kearney, May 11, will be attended by journalism heads of Nebraska schools. Clinic Chairman John Alexander, KODY, North Platte, already has received acceptances from the University of Nebraska and Creighton. Arthur Stringer, NAB, will represent the Radio News Committee at the three clinics.

Nebraska Broadcasters Association

The Nebraska Broadcasters Association meets in Kearney on May 10, preceding the radio news clinic. Its president, Lumir Urban, KORN, Fremont, will preside. Other NAB officers are: Duane Watts, KHAS, Hastings, vice president; and Art Thomas, WJAG, Norfolk, secretary-treasurer.

Ad Council—OWMR Allocations

MESSAGE FROM OWMR

Station managers:

The Advertising Council and the National Housing Agency want to enlist your support in a grass-roots campaign designed to relieve and eventually overcome the housing shortage.

All over the country, Mayors' Emergency Housing Committees are now being organized to help remedy this situation. They are setting up Veterans' Housing Centers, facilitating the rapid construction of new homes and fighting to avert a disastrous housing inflation.

Each of these tasks requires the understanding and support of the public. Mr. Wilson W. Wyatt, Housing Expediter and Administrator of the National Housing Agency, has therefore suggested that each Mayors' Committee appoint a public relations sub-committee.

This is where you come in. If an Emergency Housing Committee exists in your community, it is urged that you work closely with the public relations sub-committee. Your experience will enable you to make a real contribution in connection with this important campaign.

The "Kit"

With the help of the Advertising Council, the National Housing Agency has prepared a comprehensive Kit of material to help the Mayors' Emergency Housing Committees with their information campaign. The part of the Kit which will naturally be of most interest to you is the radio material. The Kit includes about 40 spot announcements, material that can be used for radio speeches, and two 15-minute skits. Transcriptions of both skits are available.

Much of this radio material lends itself to sponsorship. Some of the announcements are specifically written for sponsorship by particular types of firms—banks or other

(Continued on next page)
lending institutions; home builders; real estate firms; or building material firms. Still other announcements are suitable for sponsorship by any radio advertiser, and will appeal particularly to businesses with a stake in housing, such as department stores, home furnishing stores and utility companies.

Additionally, you may wish to carry some of this material over your station. Either way you will be making an important contribution to a program that can do much to ease the desperate housing situation facing returning veterans.

You will find the material skillfully written and persuasive. Much of it is the product of one of America's foremost advertising agencies, which donated its services to this campaign through The Advertising Council.

How To Get the Material

If there is a Mayors' Emergency Housing Committee in your town, it is suggested that you get in touch with it immediately and offer your assistance in getting this radio material placed. Chances are that the Committee will already have all the radio material on hand. If not, you can order through it.

If there is no Emergency Housing Committee in your town, you can secure the radio material which is in the Kit by dropping a line to the Information Service, National Housing Agency, Washington 25, D. C.

The cooperation of America's radio stations is essential to the success of this housing campaign. Local announcements are needed . . . announcements which mention the address and phone number of the Veterans' Housing Center, and lend human interest to the statistics on the housing shortage by describing some of the families actually looking for homes—or by actually bringing them to the "mike" to speak for themselves.

Your cooperation will be of real value. And it will be appreciated.

OWMR SPOTS TO AID JOB CAMPAIGN

With two million more veterans scheduled for release from the armed forces by July 1, the United States Employment Service and the Office of War Mobilization and Reconversion is seeking all-out support in the campaign for job development.

In March, 1946, there were 1,168,000 persons who applied for jobs through USES offices, 700,000 of whom were veterans.

Radio stations are requested by OWMR to assist in this campaign by urging employers to list job availabilities with USES. Spot announcements of 10 and 20 seconds are being mailed directly to all Program Directors. Employment would be materially stimulated, according to OWMR, by frequent use of these spots during the months of May and June.

NETWORK CAMPAIGNS—MAY 13-19

The following four public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of May 13-19, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

The Veteran's Assets

The skills, education and experience which our service-men and women acquired in the armed forces—the knowledge which proved deadly to the enemy in war—can be an invaluable asset to this nation in peace. Modern warfare requires a tremendous range of skills; if a recruit does not have a skill when he enters the armed forces, he acquires one through training in order to be able to do his part in the highly mechanistic, scientific and engineering job which modern warfare is. In many instances the work servicemen did in the war—such as in radar and electronics—was projected to businesses and industry of what business and industry in peacetime is undertaking in this postwar period. Many veterans who have already returned to civilian life have discovered that their service experience can mean jobs and greater responsibilities than they were able to assume before the war. Radio is now asked to help educate the general public, as well as employers, on the assets of the veteran as a citizen and an employee. Speak to employees indirectly by referring to the fact that thousands of employers who are employing veterans testify to the fact that these men are making good. Avoid invidious comparisons between servicemen and civilians. Explain how most service-acquired skills are directly related to civilian occupations, citing examples if possible. Point out that the skills, education and experience acquired by men and women in our armed forces will make them better citizens and more valuable employees than they were before. (Fact Sheet No. 23)

Fat Salvage

Only by continuing their magnificent job of fat salvage can housewives help return to store shelves plentiful supplies of soap and hundreds of other things they've been waiting for. Fats and oils are just as important to the production of peace-time goods as they were to the manufacture of munitions. Without them, supplies of industrial fats are far short of demands and needs. Domestic production, which has never been able to compensate fully for the loss of imports from the Pacific, is down this year and it may take many months to bring imports back to pre-war-time levels. Meanwhile, there is a tremendous demand for fats and oils. They're urgently needed in the manufacture of soap and nearly all other consumer goods—nylons, refrigerators, automobiles, paints. American women can speed the return of these things by saving used fats and turning them in as soon as they can no longer be re-used for cooking. They are asked to:—save every drop of used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on platters and plates; pour immediately into the salvage can those fats which can't be re-used; re-use those suitable for cooking, and salvage whatever is left; turn in the fat salvage container to their meat dealers promptly. They'll get four cents for every pound turned in. (Fact Sheet No. 19)

Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought about famine to peoples to the very brink of death. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone, city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief and Rehabilitation Administration considers 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 2,960 calories per day. Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The "have" countries including the United States, are the only ones that can halt death by starvation this Spring. Certain "importing" countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available (Continued on next page)
eleven million tons. Our share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June. Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions by—Reducing their consumption of all wheat and rice products and fats and oils. . . . Eating more of the plentiful foods. . . . Eliminating all food waste and turning in all used fats. . . . Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20)

Hospitals Need Student Nurses

Latest figures from a continuing study conducted by the American Hospital Association now show that 2 out of every 3 hospitals throughout the country are suffering from acute nursing shortages. A high percentage of these hospitals have been forced to close beds and facilities—often whole floors or wings. As a result, literally thousands of patients are doing without adequate nursing care. During pre-war years, where available, the bulk of patient care was given by student nurses. During the war members of the U. S. Cadet Nurse Corps carried 80% of the nursing load in their hospitals. However, Cadet Nurse recruitment was terminated last fall and at the present time there is an alarming and growing shortage of student nurses in training. Therefore, a nation-wide effort must be made immediately to interest young women in nursing as a career, and to urge them to enroll at once for existing vacancies in schools of nursing. Explain that there are opportunities, at extremely low cost, for 40,000 young women between the ages of 17 and 35, who are high school graduates of good standing, to enter one of the highest-paying professions by enrolling in a summer or fall student nurse training class. Emphasize the fact that, compared with average net earnings of teachers, secretaries, office workers, librarians, bank employees, retail store employees and other services open to women, the earnings of a professional nurse are among the highest. (Fact Sheet No. 9-A)

**Federal Communications Commission Docket**

**HEARINGS**

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, May 6. They are subject to change.

**Monday, May 6**

NEW—Times-World Corp., 124 W. Kirk Ave., Roanoke, Va.—For FM facilities.

NEW—Roanoke Broadcasting Corp., 301 First St., S. W., Roanoke, Va.—For FM facilities.

NEW—Piedmont Broadcasting Corp., Hotel Danville Bldg., Danville, Va.—For FM facilities.

**Monday, May 6**

Further Hearing

NEW—Syndicate Theatres, Inc., Columbus, Ind.—C. P. 1130 kc., 500 watts, day.

NEW—Universal Broadcasting Co., Inc., Indianapolis, Ind.—C. P. 1130 kc., 10 kW, unlimited, D/night and day.

**Monday, May 6**

Room 208, Montgomery County Court House, Dayton, Ohio

Courts of Appeals, Room Third Floor, Court House, Springfield, Ohio

NEW—The Crosley Corp., Dayton, Ohio—For FM facilities.

NEW—Great Trails Broadcasting Corp., 121 North Main St., Dayton, Ohio—For FM facilities.

NEW—Miami Valley Broadcasting Corp., Dayton, Ohio—For FM facilities.

NEW—Unity Corporation, Inc., 34 West High St., Springfield, Ohio—For FM facilities.

NEW—Skyland Broadcasting Corp., Dayton, Ohio—For FM facilities.

NEW—Moraline Broadcasters, Inc., Dayton, Ohio—For FM facilities.

**Tuesday, May 7**

NEW—Fred O. Grimwood, Bloomington, Ind.—C. P. 1190 kc., 250 watts, unlimited.

**Tuesday, May 7**

Further Hearing

For the Purpose of Introducing Depositions To Be Held in the Office of Samuel Miller, Presiding Officer, Room 7520

NEW—The Sandusky Broadcasting Co., Sandusky, Ohio—C. P. 1150 kc., 250 watts, unlimited.

NEW—Lake Erie Broadcasting Co., Sandusky, Ohio—C. P. 1150 kc., 250 watts, unlimited.

NEW—The Bay Broadcasting Co., Sandusky, Ohio—C. P. 1150 kc., 250 watts, unlimited.

**Tuesday, May 7**

For the Purpose of Taking Engineering Testimony To Be Held in the Office of Tyler Berry, Presiding Officer, Room 428, Star Building

NEW—Syndicate Theatres, Inc., Columbus, Ind.—C. P. 1130 kc., 500 watts, unlimited.

NEW—Allentown Broadcasting Co., Allentown, Penna.—C. P. 1230 kc., 250 watts, unlimited.

For the Purpose of Taking Engineering Testimony To Be Held in the Office of Tyler Berry, Presiding Officer, Room 428, Star Building

NEW—Smoky Mountain Broadcasting Co., Knoxville, Tenn.—C. P. 1340 kc., 250 watts, unlimited.

NEW—Clarence Beamum, Jr., tr/as East Tennessee Broadcasting Co., Knoxville, Tenn.—C. P. 1340 kc., 250 watts, unlimited.

**Friday, May 10**

NEW—Buffalo Broadcasting Corp., Buffalo, N. Y.—For FM facilities.

NEW—Buffalo Broadcasting Corp., Buffalo, N. Y.—For FM facilities.
AM APPLICATIONS GRANTED

NEW—Harry C. Butcher, Santa Barbara, Calif.—Granted construction permit for a new station to operate on 1310 kc., 250 watts, unlimited time. (B5-P-4615)

NEW—J. Paul Stone and R. M. Ware, Jr., Fitzgerald, Ga.—Granted construction permit for a new station to operate on 1210 kc., 250 watts, unlimited time. (B3-P-4607)

NEW—Paul Stone and R. M. Ware, Jr., Fitzgerald, Ga.—Granted construction permit for a new station to operate on 1100 kc., 250 watts, unlimited time. (B3-P-4635)

NEW—The Central Kentucky Broadcasting Co., Lexington, Ky.—Granted construction permit for a new station to operate on 1390 kc., 250 watts, unlimited time. (B2-P-1116; Docket 696)

NEW—KWHN Broadcasting Co., Inc., Fort Smith, Ark.—Granted construction permit for a new station to operate on 1320 kc., 5 KW day, 1 KW night, with DA nighttime, unlimited time, subject to proof of performance.

FM CONDITIONAL GRANT

The Commission made one additional conditional grant to McClatchy Broadcasting Co., for a new Metropolitan FM station in Bakersfield, Calif. Permittee is licensee of standard station KERN, Bakersfield. (This brings total conditional grants to 426 as of May 2.)

FM FINAL CP'S GRANTED

The following stations which have heretofore received engineering approval, were granted regular construction permits:

J. E. Rodman, Fresno, Calif.—CP for Rural station; Channel: 102.3 mc. (No. 272); 69.9 kw; antenna, 1936 ft. (B5-PH-115)

KOMA Inc., Oklahoma City, Okla.—CP for Rural station; Channel: 100.1 mc. (No. 261); 243 kw; antenna: 485 ft. (B3-PH-531)

The Southern Minn. Supply Co., Mankato, Minn.—CP; Channel: 92.7 mc. (No. 224); 29.2 kw; antenna: 541 ft. (B4-PH-519)

The Kansas City Star Co., Kansas City, Mo.—CP for Rural station; Channel: 100.3 mc. (No. 262); 150 kw; antenna: 754 ft. (B4-PH-356)

KARM, The George Harms Station, Fresno, Calif.—CP for Metropolitan station; channel: 101.9 mc. (No. 270); 27.2 kw; antenna: 406 ft. (B3-PH-465)

Queen City Broadcasting Co., Inc., Seattle, Wash.—CP for Rural station; channel: 93.9 mc. (No. 230); 257 kw; antenna: 1482 ft. (B3-PH-159)

Evergreen Broadcasting Corp., Seattle, Wash.—CP for Metropolitan station; channel: 95.1 mc. (No. 220); 9.6 kw; antenna: 481 ft. (B3-PH-501)

Fisher's Blend Station, Inc., Seattle, Wash.—CP for Rural station; channel: 95.7 mc. (No. 224); 48 kw; antenna: 1811 ft. (B5-PH-154)

Oregonian Publishing Co., Portland, Ore.—CP for Rural station; channel: 95.5 mc. (No. 237); 51 kw; antenna: 1018 ft. (B5-PH-272)

Atlantic Coast Broadcasting Co., Charleston, S. C.—CP for Metropolitan station; channel: 92.3 mc. (No. 222); 225 kw; antenna 115 ft. (B3-PH-104)

Harcenito Broadcasting Co., Inc, Harlingen, Texas.—CP for Metropolitan station; channel: 93.3 mc. (No. 237); 137 kw; antenna 492 ft. (B3-PH-339)

Havens & Martin, Inc., Richmond, Va.—CP for Metropolitan station; channel: 96.3 mc. (No. 242); 47 kw; antenna 125 ft. (B2-PH-185)

Houston Printing Corp., Houston, Texas—CP: channel: 99.7 mc. (No. 250); 196 kw; antenna 297 ft. (B3-PH-126)

Boise Broadcast Station, Boise, Idaho—CP for Metropolitan station; channel: 102.1 mc. (No. 271); minus 370 ft. (Transmitter is in a valley; tower 200 ft.); 33 kw. (B5-PH-371)

Montgomery Broadcasting Co., Inc., Montgomery, Ala.—CP for Rural station; channel: 100.5 mc. (No. 263); 257 kw; antenna: 771 ft. (B3-PH-109)

Glidden & Rester, a partnership, Mobile, Ala.—CP for a Metropolitan station; channel: 99 mc. (No. 259); 10.5 kw; antenna: 308 ft. (B3-PH-708)

Joe L. Smith, Jr., Beckley, W. Va.—CP for Rural station; Channel: 100.7 mc. (No. 264); 31.7 kw; antenna: 978 ft. (B2-PH-94)

The Greenville News-Piedmont Co., Greenville, S. C.—CP for Rural station; channel: 92.9 mc. (No. 225); 160 kw; antenna: 1176 ft. (B3-PH-291)

Stanley M. Goard, Geo. W. Phillips, Robert T. Zabelk, James L. Murray, co-partners, d/b as Broadcasters Oreg., Ltd., Portland, Ore.—CP for a Metropolitan station; channel: 91.9 mc. (No. 255); 153 kw; antenna: 389 ft. (B5-PH-267)

WAIR Broadcasting Co., Winston-Salem, N. C.—CP for Metropolitan station; channel: 96.1 mc. (No. 244); 32 kw; antenna: 397 ft. (B3-PH-408)

DESIGNATED FOR HEARING

The Tri-State Broadcasting Co., Cumberland, Md.—Designated for hearing (Comr. Jett voting for grant) application for a new station to operate on 1310 kc., 250 watts, unlimited time. (B1-P-4625)

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—Designated for hearing application for C. P. to increase power from 1 to 5 KW, install new transmitter, and make change in directional antenna for night use, on 610 kc., at Duluth. (B3-PH-155)

Tri-Suburban Broadcasting Corp., Silver Spring, Md.; Key Broadcasting Corp., Baltimore, Md.—Designated for hearing in a consolidated proceeding the application of Tri-Suburban Broadcasting Corp. (B1-P-151) for a new station in Silver Spring, Md., with the application of Key Broadcasting Corp. (B1-P-171) for a new station in Baltimore, both requesting the facilities 1050 kc., 1 KW, daytime only.

WLOF—Hazlewood, Inc, Orlando, Fla.—Designated for hearing application for change in facilities to 950 kc., 5 KW, unlimited time. Present facilities: 1250 kc., 250 watts, unlimited.) (Action taken 4-25.) (B3-P-3973)

E. T. Wright, Orlando, Fla.—Designated for hearing application for a new station to operate on 1250 kc., 250 watts, unlimited time, contingent on grant of pending WLOF application for change in facilities to 950 kc. (B3-P-4268) (Action taken 4-25.)

Eau Claire-Chippewa Broadcasting Co., Eau Claire, Wis.—Designated for hearing application (B4-P-4619) for a new station to operate on 1310 kc., 250 watts, unlimited time.

Woodrow Miller, San Bernardino, Calif.—Designated for hearing application (B4-P-4180) for a new station to operate on 1550 kc., 250 watts, unlimited time.

KFDA—Amarillo Broadcasting Co., Amarillo, Texas—KVAK—S. H. Patterson, Atchison, Kans.—KEYS—(Continued on next page)
License renewals for the following stations were extended upon a temporary basis, pending determination upon applications for renewal, for the period ending July 1, 1946:

- KDYL and Auxiliary, Salt Lake City: KGHN, Springfield, Mo.; KGLO, Mason City, Iowa; KRGV, Weslaco, Texas; KRGX, Corpus Christi, Texas—Designated for hearing application of KGDA (B3-P-3153) to change facilities from 1230 kc., 250 watts, unlimited time, to 1440 kc., 1 KW, 5 KW-D, S in consolidation with application of KVAK (B3-P-3177) to change frequency from 1450 to 1290 kc., increase power from 250 watts to 1 KW, and hours of operation from unlimited to daytime, to make changes in transmitter equipment, and in a new vertical antenna and ground system, and application of KEYS (B3-P-3299), to change frequency from 1490 to 1440 kc., power from 250 watts day and night to 1 KW night, 5 KW day, install new transmitter and DA for night operation, and change transmitter location, and application of S. H. Patterson for new station at Topeka. (B4-P-4389)

Marshall Broadcasting Co., Marshall, Texas; Ross & Co., a partnership composed of Edmund Key, III, Emerson H. Lee, Clark Ross, Jr., and Joseph Morton Taylor, Marshall, Texas—Designated for hearing the application of Marshall Broadcasting Co. (B3-P-3515) for a new station to operate on 1450 kc., 250 watts, unlimited time, in consolidation with application of Ross & Co. (B3-P-1477), requesting the same facilities.

Calif.-Nevada Broadcasting Co., Vallejo, Calif.—Designated for hearing application for new station (B3-P-4614) to operate on 850 kc., 250 watts, daytime.

KUHTX, Inc., Houston, Texas; W. Albert Lee, Houston, Texas—Designated for hearing application for a new station (B1-P-5359) to operate on 610 kc., DA (night), unlimited time, in consolidation with W. Albert Lee application (B3-P-4628) requesting the same facilities.

WCBM—Baltimore Broadcasting Corp., Baltimore, Md.—Tower Realty Co., Baltimore, Md.—Designated for hearing application for CP (B1-P-3996) to increase power to 10 KW day, 5 KW night on 680 kc., in a consolidated proceeding with application of Tower Realty Co. (B1-P-1890; Docket 7429) for a new station on 680 kc., 5 KW, DA-night, unlimited, and further ordered that hearing on Tower application scheduled for May 6, be postponed, and consolidated hearing held in Washington.

Licenses for the following non-commercial Educational broadcast stations were extended upon a temporary basis only, pending receipt of and/or determination upon applications for renewal, for the period ending July 1, 1946:

- WBEZ, Chicago; WXN, Brooklyn; KALW, San Francisco; WBOE, Cleveland; WIC, Urbana, Ill.; WBKY, Beverly, Ky.

WSXWI—Guy S. Cornish, Area of Cincinnati.—Granted renewal of license on a temporary basis, pending determination upon renewal. (Continued on next page)
Kans.; KSD, St. Louis; KSFO, San Francisco; KSJB, Jamestown, N. Dak.; KTG, Phoenix; KTOA, San Antonio; KUTA, Salt Lake City; KVI, Tacoma, Wash.; KVOD, Denver; KVOS, Bellsham, Wash., KWTO, Springfield, Mo.; KXOK, St. Louis; WAGA, Atlanta; WAGE and auxiliary, Smyrna; WAYS, Charlotte, N. C.; WCAO and auxiliary, Baltimore; WCAX, Burlington, Vt.; WDAB, Kansas City, Mo.; WDEV, Waterbury, Vt.; WDBO, and auxiliary, Orlando; WDCW, WEDC, and auxiliary, Chicago; WIOD and auxiliary, Miami; WIP and auxiliary, Philadelphia; WIS, Columbus, S. C.; WJLS, Beckley, W. Va.; WKQA and auxiliary, San Juan; WKBQ, Youngstown, Ohio; WKRC, Cincinnati; WKZO, Kalamazoo; WLBZ, Bangor, Maine; WMLL, Washington; WMM, Marina, Wis.; WMB and auxiliary, Uniuontown, Pa.; WMC and auxiliary, Memphis; WMCA and auxiliary, New York City; WMT, Cedar Rapids; WNAX, Yankton, S. D.; WMMU, Manchester, N. H.; WOW, Omaha; WPIC, Sharon, Pa.; WPRO and auxiliary, Providence; WQAM and auxiliary, Miami; WROL, Knoxville; WRTC and auxiliary, Memphis; WSGN, Birmingham; WSJS, Winston-Salem; WSUN, St. Petersburg; WSVA, Harrisonburg, Va.; WSYR and auxiliary, Syracuse; WTAG and auxiliary, Worcester, Mass.; WTAR and auxiliary, Norfolk, Va.; WTJJ, Milwaukee; WWIN, Asheville, N. C.; WNYN, Watertown, N. Y.; WTMJ, auxiliary; WDSU, auxiliary.

Licenses for the following stations were further extended upon a temporary basis pending determination upon applications for renewal of licenses, for the period ending July 1, 1946:

KFAC, Los Angeles; KFQQ, Boone, Iowa; KFJZ and auxiliary, Fort Worth; KFOX, Long Beach, Cal.; KGCU, Mandan, N. D.; KGGM, Albuquerque; KGHF, Pueblo; KGVO, Missoula, Mont.; KHS, Chico, Cal.; KID, Idaho Falls; KMO and auxiliary, Tacoma, Wash.; KOB, Albuquerque; KOLL, Omaha; KOL, Seattle; KRLD, Dallas; KRMT, Des Moines; KRSO, Santa Rosa, Cal.; KTF, Twin Falls, Idaho; KUOA, silica Springs, Ark.; KYA, San Francisco; WADC, Village of Tallmadge, Ohio; WATR, Waterbury, Conn.; WBT, Charlotte, N. C.; WDGY, Minneapolis; WDOD, Chattanooga; WDSU, New Orleans; WFDM and auxiliary, Indianapolis; WFBN, and auxiliary, Baltimore; WHB and auxiliary, Rock Island; WHHL, Sheboygan; WHO, Dayton; WHKY, Hickory, N. C.; WINS and auxiliary, New York; WJDJ, Jackson, Miss.; WKNE, Keene, N. H.; WNAQ and auxiliary, Boston; WNBF, Binghamton, N. Y.; WNMU, San Juan, N. M.; WNYC, New York; KTOA, Tampa, Fla.; KTR, Dallas; WRJ, Rapid City, S. D.; WROC, Worcester, Mass.; WSKB, McComb, Miss.; WTAG, Green Bay, Wis.; WTNC, Minneapolis; WTOP, Savannah, Ga.; WVVW, Wheeling, W. Va.; WRR and auxiliary, Dallas.

KFRC—Don Lee Broadcasting System, San Francisco, Calif. —Present license for main and auxiliary transmitter was extended upon a temporary basis only, pending determination upon renewal, for the period ending June 1, 1946.

MISCELLANEOUS ACTIONS

WSLS—Junius Parker Fishburn (Transferor), Shenandoah Life Ins. Co., Inc. (Transferee), Roanoke Broadcasting Corp., Roanoke, Va.—Granted consent to acquisition of control of Roanoke Broadcasting Corp. by Shenandoah Life Insurance Co., Inc., for a consideration of $64,000 for 160 shares of capital stock of Roanoke Broadcasting Corp. (B2-TC-480)

WFLA—The Tribune Co., Tampa, Fla.—Granted construction permit to make changes in directional antenna for night use, present assignment 970 kc., 5 KW, unlimited time. (B3-P-1171)

WSPA—Spartanburg Advertising Co., Spartanburg, S. C.—Granted modification of construction permit, to change directional antenna system of station WSPA. (B3-MP-1788)

KFGAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska —Granted extension of special service authority to operate on 650 kc., 10 KW, unlimited time, for the period ending July 1, 1946. (B3-PR-432)

Radio Wisconsin, Inc., Madison, Wis.; WHBE—The Ohio Broadcasting Co., Canton, Ohio—Continued consolidated hearing now scheduled for April 29 in Madison. Wis., for a period of 30 days, in re application of WABC, WABC-FM, WABC-TV (Docket 6940) and application of WHBC (Docket 7186).

W2XMN—Edwin H. Armstrong, Alpine, N. J.—Granted extension of special temporary authority to retransmit the transmissions of high frequency broadcast stations W2XMR, W2XMT and W2XMT for the period May 4 and ending June 2, in order to continue retransmission experiments.

Templeton Radio Mfg. Corp., Boston, Mass.—Granted petition for removal from hearing docket and grant of its application for a construction permit; ordered that the application (B1-P-4146; Docket 6846) be granted to operate on frequency 1090 kc., 1 KW, daytime only, subject to approval of location of main studio.

Enterprise Publishing Co., Brockton, Mass.—Granted petition for leave to amend its application (B1-P-4620) to request frequency 2160 kc., type of transmission AM, approval of antenna, and approval of transmitter location at State Line Road, approx. 3/4 mi. from center of business district, Elizabethon. The permittee hereunder is granted a waiver of Sec. 3.55(b) of the Commission's Rules; conditions.

KSGO—The Associated Broadcasters, Inc., San Francisco, Cal.; KQW—Pacific Agr. Foundation, Ltd., San Jose, Cal.—Granted petitions of KSGO and KQW to re-instate their applications and ordered that the record in Dockets 6065 and 6214 be reopened; ordered that the applications of KSGO and KQW requesting use of frequency 740 kc., with 50 KW power, DA day and night, unlimited time be set for consolidated hearing. (B3-P-2776; B3-PR-2621)

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Special temporary authorization for the continued operation of station WBAX was extended to June 30, 1946.

The following action was taken by the Administrative Board on May 1:

WJXN—Ewing Broadcasting Co., Jackson, Miss.—Granted CP to make changes in vertical antenna and ground system. (B3-P-4280)

WBEJ—Elizabethton Broadcasting Co., Elizabethton, Tenn.—Granted modification of CP which authorized a new station, for the period April 15, 1946; approval of antenna, and approval of transmitter location at State Line Road, approx. 3/4 mi. from center of business district, Elizabethton. The permittee hereunder is granted a waiver of Sec. 3.55(b) of the Commission's Rules; conditions.

WKHZ—Kenneth Edward Renneckak, Oil City, Pa.—Granted license to cover CP which authorized a new station to operate on 1310 kc., 250 watts, unlimited time except hours assigned to WSAJ. (B2-L-1936) Also granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1743) The license hereunder is granted a waiver of Sec. 3.60 of the Commission's Rules; conditions.

Loyola University, Area of New Orleans, La.—Granted CP for a new relay broadcast station to be used with applicant's standard station WWL; frequencies: 1625, 2058, 2150 and 2790 kc.; 4 watts. (B3-PR-313)

WXMN—F. B. Mallory & Co., Inc., Indianapolis, Ind.—Granted modification of CP which authorized a new experimental television station, for extension of completion date to 9-16-46, in order to continue rebroadcasting experiments. (B1-P-2776; B3-P-2776)

WQX—Mass., Broadcasting Corp., Boston, Mass.—Granted modification of CP which authorized increase in power, etc. for installation of a new transmitter (WQX-FM). (Action taken 4-26.)

WMPT—Tri-Cities Broadcast Co., Elizabethton, Tenn.—Granted modification of CP which authorized a new station, to make changes in transmitting equipment, for approval of antenna and approval of transmitter and studio locations at Cypress Mill Road, near Florence. (B3-MP-1848)
ENGINEERING APPROVAL OF FM CONDITIONAL GRANTS

Following is a list of applications for which approval of basic engineering plans were granted by the Commission:

City of Jacksonville, Jacksonville, Fla.—Rural: channel 96.3 mc. (No. 242) : 159 kw. 564 ft. (B3-PH-655)

Couerier-Journal and Louisville Times Co., Louisville, Ky.—To be determined: channel 99.5 mc. (No. 255) : 26 kw. 140 ft. (B3-PH-171)

WKY Radio Co., Oklahoma City, Okla.—Rural: channel 98.9 mc. (No. 255) : 152 kw. 928 ft. (B3-PH-171)

ACTIONS ON DOCKET CASES

The Commission (Commissioner Hyde not participating) announces its Proposed Decision (B-258) proposing to grant the application of Frank E. Hurt and Son requesting a new standard broadcast station at Boise, Idaho (by changing frequency of Radio Station KFXD from 1290 kc. to 380 kc., increase power from 250 kw. to 1 kw., operating unlimited time, employing a directional antenna day and night, and change location of antenna site and of transmitter site from Nampa, Idaho, to a site approximately mid-way between Nampa and Boise). The proposed grant is conditioned upon antenna modifications applicant stated would be made in order that greater protection would be afforded Station KNV, Fresno, Calif., and Station CKUA, Edmonton, Alberta, Canada, and further conditioned upon Civil Aeronautics Administration's approval of the proposed transmitter site. (Docket No. 6652)

At the same time, the Commission proposed to deny the application of Queen City Broadcasting Co., Inc., for a new standard broadcast station at Boise to operate on 600 kc., 1 kw., unlimited time, employing a directional antenna at night. (Docket No. 6653)

The Commission announces its Proposed Decision (B-243) proposing to grant the application of Thomas N. Beach for a new standard broadcast station at Birmingham, Alabama, to operate on 1490 kc., 250 kw., unlimited time. (Commissioner Hyde not participating.) (Docket No. 6651)

At the same time, the Commission proposed to deny the applications of Ernest E. Forbes, Jr., tr/ as Magic City Broadcasting Co., and Ramon C. Patterson and Louise Patterson (Pursley), d/b as Patterson Broadcasting Service, each seeking the same facilities. (Dockets Nos. 6679 and 6680)

ACTIONS ON MOTIONS

Fred W. Albertson, Washington, D. C.—Granted motion for admission pro hac vice of G. R. Redding, a licensed practicing attorney of Indianapolis, for the purpose of participating in the hearing on the application of Indiana Broadcasting Corp., Indianapolis, for a new FM station (Docket 7064), to commence in Indianapolis on May 13.

Shawnee Broadcasting Co., Chillicothe, Ohio—Granted petition for waiver of Sec. 1384 of the Commission's Rules, and accepted written appearance of petitioner in re application for new television station (Docket 7145)

Coastal Broadcasting Co., Charleston, S. C.—Granted petition requesting denial of pre-judice application for a new station. (Docket 7529; B3-P-4570)

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Granted motion to take deposition in re application for CP. (Docket 7292)

WILL—University of Ill., Urbana, Ill.—Granted petition to intervene in the hearing on application of La Crosse Broadcasting Co. (Docket 7173) and Midwestern Broadcasting Co., Inc. (Docket 7172)

Allen B. DuMont Labs., Inc., Pittsburgh, Pa.—Granted petition requesting leave to amend application for new television station (Docket 7288), so as to show increase in capital stock of applicant, supply revised engineering data, etc., and the amendment was accepted.

Joseph M. Viana, Woonsocket, R. I.—Granted petition requesting leave to amend application for new television station. (Docket 7403) so as to make minor changes in engineering data, etc., and the amendment was accepted.

KPMC—Pioneer Mercantile Co., Bakersfield, Calif.—Granted motion to take deposition in re application for CP. (Docket 7410)

KPMC—Pioneer Mercantile Co., Bakersfield, Calif.—Granted petition for leave to intervene in the hearing on application of The Times Picayune Pub. Co. (Docket 7161) scheduled for hearing on May 22.

The Baltimore Sun—Granted leave to take depositions in re application for a new station (Docket 6732) scheduled for hearing June 7, 1946.

WCAU—New Laurel Radio Station, Inc., Laurel, Miss.—Granted motion to dismiss without prejudice application for a new television station. (Docket 6939; B3-PCT-18)

Continued on page 351
Monroe Oppenheimer, Washington, D. C.—Granted motion of Monroe Oppenheimer, for admission pro hac vice of Tom Martin Davis, a licensed practicing attorney of Houston, Texas, for the purpose of representing Dorothy S. Thackrey in certain depositions to be taken in Houston on May 2, by Hughes Production Div. of Hughes Tool Co. (Docket 7286)

Miami Valley Broadcasting Corp., Dayton, Ohio—Granted petition for leave to amend its application for a new FM station (Docket 7297), so as to specify a new transmitter site, type of equipment, etc., and the amendment was accepted.

Hearst Radio, Inc., Baltimore, Md.—Granted petition for leave to amend its application for a new television station (Docket 7298), so as to show a new transmitter site, make minor engineering changes, etc., and the amendment was accepted.

Allentown Broadcasting Co., Allentown, Pa.—Granted petition insofar as it requests leave to amend and refile application for a new television station. (Docket 7263; B5-PCT-156)

Northeastern Penna. Broadcasters, Inc., Wilkes-Barre, Pa.—Granted petition for waiver of Sec. 1.231 (g) of the Commission's Rules, and extended to April 26, 1946, the time within which Northeastern Penna. Broadcasters, Inc. may file its exceptions and request oral argument in re its application (Docket 6179), and others in the consolidated proceeding.

Frank H. Ford, Shreveport, La.—Granted petition for leave to amend his application for a new television station (Docket 7114), so as to request power of 1 KW day, 500 watts night, with DA at night only, instead of 250 watts, unlimited, etc., and the amendment was accepted.

Allentown Broadcasting Co., Allentown, Pa.—Granted petition insofar as it requests leave to amend and remove application from hearing docket; accepted amendment to specify frequency 1580 kc., instead of 1510 kc., etc., and removed application from hearing docket. (Docket 7475)

W. Walter Tison, Tampa, Fla.—Granted petition insofar as it requests leave to amend and remove from hearing docket; accepted amendment so as to specify frequency 1110 kc., with 1 KW, daytime only, instead of 1490 kc. with 250 watts, unlimited time, etc., and the application was removed from the hearing docket (Docket 7451)

Walt Disney Productions, Burbank, Calif.—Granted petition for dismissal without prejudice of its application for a new television station. (Docket 7203; B5-PCT-156)

WAKR—Summit Radio Corp., Akron, Ohio—Granted motion for continuance of hearing on application for CP (Docket 7214) now scheduled for May 5, and continued same to June 3, 1946.

Times-World Corp., Roanoke, Va.; Roanoke Broadcasting Corp., Roanoke, Va.; Piedmont Broadcasting Corp., Danville, Va.—Granted joint petition of applicants requesting continuance of consolidated hearing on applications for new FM stations, now scheduled for May 6, and continued same to June 5, 1946. (Dockets 7394, 7395 and 7396)

Chicago Board of Trade and International Apple Assn. and The Nat'l League of Wholesale Fresh Fruit and Vegetable Distributors, and United Fresh Fruit and Vegetable Assn.—Granted joint petition requesting leave to intervene in the proceeding in the matter of The Western Union's petition for rate increase. (Docket 7457)

Tower Realty Corp., Baltimore, Md.—The Commission, on its own motion, dismissed without prejudice the application of Tower Realty Corp. for a new television station (Docket 7301), which was inadvertently designated for hearing.

Skylan Broadcasting Corp., Dayton, Ohio—Granted petition for leave to amend its application for a new television station (Docket 7345) so as to show addition of new stockholders, etc., and the amendment was accepted.

Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted motion for an indefinite continuance of hearing now scheduled for May 10 on application for new FM station (Docket 7187), and continued same without date until further order of the Commission.

Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted petition to dismiss without prejudice its application for a new FM station. (Docket 7188; B5-PH-68)

Hearst Radio, Inc., Baltimore, Md.; Tower Realty Co., Baltimore, Md.—The Commission, on its own motion, continued without date until further order of the Commission, the hearing now scheduled for May 6 on applications for new television stations. (Dockets 7298 and 7301)

KTOK—KTOK, Inc., Oklahoma City, Okla.—Granted petition for leave to intervene in the hearing on application of Wichetx Broadcasting Co., Wichita Falls, Texas (Docket 7297) now scheduled for hearing on May 1, 1946, continued until further order of the Commission.

Mt. Vernon Radio & Tele. Co., Mt. Vernon, Ill.—Granted authority to take depositions in re applications in consolidated hearing involving applicants' application (Docket 7060) and Midwest Broadcasting Co., Mt. Vernon. (Docket 7659)

Allen R. DuMont Labs, Inc., Pittsburgh, Pa.; Westinghouse Radio Stations, Inc., Pittsburgh, Pa.—The Commission, on its own motion, ordered that the consolidated hearing on applications of DuMont Labs, and Westinghouse for new television stations (Dockets 7288 and 7291), scheduled for April 25, be continued without date until further order of the Commission.

WINS—Hearst Radio, Inc., New York, N. Y.; The Crosley Corp., Cincinnati, Ohio—Joint petition granted in part to extend time within which exceptions may be filed to June 1, 1946; oral argument scheduled for April 27 continued without date until further order of the Commission. (Docket 6755)

United States of America—Granted petition for leave to intervene in the proceeding involving Western Union's petition for rate increase. (Docket 7445)

Globe Wireless, Ltd.—Denied motion of Globe Wireless, Ltd., to eliminate from the Notice of Hearing in re application (Docket 7491) for modification of license to include Havana as an authorized point of communication, the issue of charges for the proposed service and the division of such charges, by striking from Par. 6 of such notice the following language: "The charges to be made for each such class and the division of such charges." (Docket 7127)

KTOK—KTOK, Inc., Oklahoma City, Okla.—Denied petition of KTOK to designate its application for CP to change operation from 1400 kc., 250 watts, unlimited time, to 1000 kc., 1 KW night, 5 KW day, DA night, unlimited time, for hearing in a consolidated proceeding with application of Wichetx Broadcasting Co. (Docket 7297)

RCA Communications, Inc.—Granted petition for leave to intervene in re application of Press Wireless, Inc. (Docket 7446) for special temporary authorization to communicate with Montreal, for handling transiting press and government traffic.

Federal Communications Commission Applications

AM APPLICATIONS ACCEPTED FOR FILING

750 Kilocycles

KSTT—Davenport Broadcasting Co., Inc., Davenport, Iowa—Modification of construction permit (B4-P-14194, which authorized a new standard broadcast station) for approval of antenna and to change proposed studio location.

(Continued on next page)
760 Kilocycles
NEW—Oklahoma Agricultural and Mechanical College, Stillwater, Okla.—Construction permit for a new standard broadcast station to be operated on 760 kc., power of 10 KW and daytime hours of operation.

790 Kilocycles
KFQD—Wm. J. Wagner, tr/as Alaska Broadcasting Co., Anchorage, Alaska—Construction permit to install new vertical antenna and move main transmitter. Amended to increase power from 1 KW to 5 KW, install new type of transmitter and make changes in vertical antenna.

WTAR—WTAR Radio Corp., Norfolk, Va.—Authority to determine operating power by direct measurement of antenna power.

800 Kilocycles
WDSC—The Border Broadcasting Co., Dillon, S. C.—Modification of construction permit (B3-P-4632, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter location.

850 Kilocycles
NEW—Champlain Valley Broadcasting Corp., Albany, N. Y. (P. O. Room 1203, 508 Madison Ave., New York, N. Y.)—Construction permit for a new standard broadcast station to be operated on 850 kc., power of 10 KW, directional antenna and unlimited hours of operation.

860 Kilocycles
NEW—Charles A. Henderson, George J. Volger and Thelma Marie Volger, d/b as Muscatine Broadcasting Co., Ltd., Muscatine, Iowa (P. O. 902 Iowa Ave.)—Construction permit for a new standard broadcast station to be operated on 860 kc., power of 250 watts, and daytime hours of operation.

NEW—Northern Virginia Broadcasters, Inc., Arlington, Va. —Construction permit for a new standard broadcast station to be operated on 860 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 860 to 780 kc.

900 Kilocycles
WAYN—Wayne M. Nelson, Rockingham, N. C.—Modification of construction permit (B3-P-1452, which authorized a new standard broadcast station) for approval of antenna and approval of transmitter location.

WKAX—Courier Broadcasting Service, Inc., Birmingham, Ala.—Modification of construction permit (B3-P-1481), which authorized a new standard broadcast station) for changes in antenna and to change proposed type of transmitter.

930 Kilocycles
NEW—Michigan Broadcasting Co., Battle Creek, Mich. (P. O. 424 Post Bldg.)—Construction permit for a new standard broadcast station to be operated on 930 kc., power of 1 KW, directional antenna and unlimited hours of operation.

970 Kilocycles
NEW—Worth Broadcasting Co., Fort Worth, Texas—Construction permit for a new standard broadcast station to be operated on 970 kc., change power from 5 KW to 1 KW and change type of transmitter.

1050 Kilocycles
NEW—Mayfield Broadcasting Co., Inc., Mayfield, Ky.—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 250 watts and daytime hours of operation. Amended to make changes in vertical antenna and change proposed transmitter and studio locations.

1100 Kilocycles
WTAM—National Broadcasting Co., Inc., Cleveland, Ohio—Construction permit to install FM antenna on top of vertical antenna.

1130 Kilocycles
NEW—Universal Broadcasting Co., Inc., Indianapolis, Ind.—Construction permit for a new standard broadcast station to be operated on 1130 kc., power of 10 KW, directional antenna and unlimited hours of operation. Amended re changes in directional antenna.

1150 Kilocycles
WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Construction permit to move presently licensed main transmitter and install compact 5 KW amplifier to be operated as an auxiliary transmitter with power of 5 KW, employing directional antenna for day and night.

1170 Kilocycles
NEW—Joseph G. Mathews, E. Judkins Mathews, and John C. Mathews, d/b as Southern Broadcasting Co., Montgomery, Ala. (P. O. 28 South Court St.)—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 10 KW, directional antenna and unlimited hours of operation.

1230 Kilocycles
NEW—Parkersburg Broadcasting Co., Parkersburg, W. Va. (P. O. 1506 P.O. 20th St.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Call letters "WCOM" requested.

NEW—Steel City Broadcasting Co. of Bethlehem, Pa., Inc., Allentown, Penna.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Amended re directors and stockholders.

NEW—Lock Haven Broadcasting Corp., Lock Haven, Penna. (P. O. 134 E. Water St.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

WJOY—Vermont Broadcast Corporation, Burlington, Vt.—Modification of construction permit (B1-P-4183, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna and approval of transmitter and studio locations.

KELO—Sioux Falls Broadcast Association, Inc., Sioux Falls, S. Dak.—Voluntary assignment of license to Midcontinent Broadcasting Co.

1240 Kilocycles
KAVE—Carlsbad Broadcasting Corp., Carlsbad, N. Mex.—Construction permit to install new transmitter.

1290 Kilocycles
NEW—Texoma Broadcasting Co., Wichita Falls, Texas—Construction permit for a new standard broadcast station to be operated on 1290 kc., power of 1 KW, and (Continued on next page)
daytime hours of operation. Amended to change frequency from 970 to 1200 kc., power and hours of operation from 1 KW daytime, to 1 KW unlimited time, install directional antenna for night use, change transmitter location and studio location.

### 1340 Kilocycles

**WTEL—Foulkrod Radio Engineering Co., Philadelphia, Penna.—Modification of license to change hours of operation from 8:30-11 P.M. to unlimited time, except when WCM operates. (Facilities to be relinquished by WHAT.)**

**KRA—Darrell E. Yates, Lufkin, Texas—Construction permit to install new vertical antenna with FM antenna mounted on top and make changes in ground system.**

### CORRECTION

The following is a correction issued by the Commission on an item which appeared in Reports on April 29, p. 345:

**NEW—Glasz G. Merrill and Andrew H. Kovlan, a partnership, d/b as Mountain State Broadcasting Co., Clarksburg, West Virginia—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.**

### 1400 Kilocycles

**KENO—Maxwell Kelch and Laura Belle Kelch, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—Construction permit to install new vertical antenna.**

**KTMG—McAlester Broadcasting Co., a co-partnership composed of C. E. Wilson and P. D. Jackson, McAlester, Okla.—Authority to determine operating power by direct measurement of antenna power.**

**NEW—WCBE, Inc., Eau Claire, Wisc.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. Amended to change name of applicant from WCBE, Inc. to WBIZ, Inc.**

**NEW—Elberton Broadcasting Co., Elberton, Ga.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.**

**KTEM—Bell Broadcasting Co., Temple, Texas—Construction permit to install new transmitter and new vertical antenna with FM antenna mounted on top and make changes in ground system.**

### 1450 Kilocycles

**NEW—South Plains Broadcasting Co., Lubbock, Texas (P. O. 207 Citizens National Bank Bldg.)—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and unlimited hours of operation.**

**NEW—Dr. J. Kelley Robinson, J. S. Robinson and Hugh I. Webb d/b as Southeastern Broadcasting Co., Clanton, Ala. (P. O. 703½ Second Ave.)—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and unlimited hours of operation.**

**NEW—Cherokee Broadcasting Corp., Morristown, Tenn. (P. O. Hamilton National Bank Bldg.)—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and unlimited hours of operation.**

**NEW—Radio Asheville, Inc., Asheville, N. C.—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1450 to 1490 kc., and change power from 250 to 100 watts.**

**NEW—Dickinson Publishing Co., Dickinson, N. Dak.—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1230 to 1150 kc., and make changes in vertical antenna.**

### 1490 Kilocycles

**WFKY—Frankfort Broadcasting Co., Frankfort, Ky.—License to cover construction permit (B2-F-1475, as modified) which authorized a new standard broadcast station.**

**WFKY—Frankfort Broadcasting Co., Frankfort, Ky.—Authority to determine operating power by direct measurement of antenna power.**

**WHIB—Selma Broadcasting Co., Inc., Selma, Ala.—Construction permit to increase power from 100 to 250 watts and install new transmitter.**

### 1560 Kilocycles

**WTOD—Unity Corp., Inc., Toledo, Ohio—Modification of construction permit (B2-F-1141), which authorized a new standard broadcast station for approval of antenna and approval of transmitter location.**

NEW—Kenneth Broadcasting Corp., Kennett, Mo.—Construction permit for a new standard broadcast station to be operated on 570 kc., power of 1 KW, and daytime hours of operation.

NEW—Edward J. Jansen, Jessica L. Longston, C. V. Zaser and Benjamin Allen and Co., Inc., 10 South Wabash Ave., Chicago, and engaged in the wholesale distribution of jewelry, giftware and related products, are charged in a complaint issued by the Commission with unfair competition against the following firms. The respondents will be given an opportunity to show cause why Cease and Desist Orders should not be issued against them.

Benjamin Allen and Co., Inc., and Benjamin C. Allen and John G. Leiner, as officials of the corporation, located at 10 South Wabash Ave., Chicago, and engaged in the wholesale distribution of jewelry, giftware and related products, are charged in a complaint issued by the Commission with misrepresentation. (4547)
Beau Peep Products—Frank M. Conklin, trading as Beau Peep Products, 5642 Lake Park, Chicago, selling and distributing a product designed for the cleaning of babies’ white shoes, is charged in a complaint issued by the Commission with misrepresentation. (5435)

Draper Corporation, Hopedale, Mass., is charged in a complaint issued by the Commission with price discrimination and with negotiating exclusive-dealing contracts in connection with its sales of equipment and replacement and repair parts for natural and synthetic fiber automatic looms. The complaint alleges that these practices are violative of the Robinson-Patman Act and Section 3 of the Clayton Act, respectively, and that such violations also constitute unfair methods of competition within the meaning and intent of the Federal Trade Commission Act. (5436)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Fred B. Collier and Dianne I. Collier, Royal Oak, Mich., stipulated with the Commission that in connection with the sale of a medicinal preparation known variously as Pro-Ridasil and as Sulfia Drug Compound, they will stop disseminating any advertisements which stress the merits of the drug sulfanilamide unless their product contains sulfanilamide in sufficient quantity to produce the therapeutic results attributed to that drug. (03302)

Morris Timbes Advertising—C. B. Dozier, trading as W. D. Taylor Co., Bessemer, Ala., and Morris Timbes, doing business as Morris Timbes Advertising, Mobile, Ala., have stipulated with the Commission to cease and desist from using certain representations concerning two medicinal preparations. (03303)

CEASE AND DESIST ORDERS

The Commission issued the following Cease and Desist Orders last week:

Burgess Seed and Plant Co.—The Commission has issued an order prohibiting Burgess Seed and Plant Co., Galesburg, Mich., from disseminating false advertisements concerning a species of soy beans which it has sold as a “domestic coffee berry.” (5400)

Huddersfield Worsted Mills Corp., 257 Fourth Ave., New York, selling and distributing textile fabrics for making slacks and other wearing apparel for men, has been ordered by the Commission to cease and desist from disseminating any advertisements which represent that a medicinal preparation they sell is an anti-gray hair vitamin and will restore the original natural color to gray hair, or any color resembling the original natural color. (5281)

Lilee Products Co.—Lee Goldstine and Lillian Goldstine, trading as Lilee Products Co., and as Hygea Vitamin Co., 2017 South Michigan Ave., Chicago, have been ordered by the Commission to cease and desist from disseminating advertisements which represent that a medicinal preparation they sell is an anti-gray hair vitamin and will restore the original natural color to gray hair, or any color resembling the original natural color. (5281)

The preparation was first known as Lilee Brand Calcium Pantothenate Tablets, the name later being changed to Hygea Brand Calcium Pantothenate Products. The order also is directed against Paul Grant, trading as Paul Grant Advertising Agency, 520 North Michigan Ave., Chicago, who prepared and aided in the dissemination of the advertisements found by the Commission to be false and misleading.

The order was issued after the Commission had considered the record in the case, including testimony offered in support of and in opposition to the allegations of the complaint and the report of the trial examiner. All of the Commissioners participated in the decision.

Rex Products Corporation—The Commission has issued an order prohibiting Rex Products Corporation, New Rochelle, N. Y., from using the term “cloisonne,” either alone or with other words, in advertising toilet compacts which are not genuine cloisonne products. (4905)

RADIO MUST BE FREE—TRUMAN

DIRECTORS MEET IN CAPITAL; VISIT TRUMAN; ENDORSE MILLER STAND ON FCC REPORT

President Truman Thursday (9) received at the White House the NAB Board of Directors and told them "There must be complete freedom of radio."

During the meeting NAB President Justin Miller recalled that Mr. Truman had written a letter last summer to Sol Taishoff, editor of Broadcasting Magazine, in which he stated "Radio . . . must be maintained as free as the press."

Mr. Truman replied, "Let me reemphasize my belief that there must be complete freedom of radio."

Their meeting Thursday with the President climaxed a four-day session of the NAB Directors. The final board session was held prior to the White House visit as a joint meeting with the special Industry-Wide Committee, which met recently with James C. Petrillo, President of the AFM. The meetings began Monday (6).

In this, its first meeting since issuance of the FCC report on "Public Service Responsibility of Broadcast Licensees," the Board of Directors endorsed the statements and activities of NAB President Justin Miller in connection with the FCC document.

Judge Miller has taken a firm stand in opposition to the policy of program control announced by the Commission. In a statement immediately following issuance of the report the NAB President said these "encroachments . . . strike at the very heart of our system of broadcasting and constitute bold steps toward government domination which may eventually deprive us of fundamental rights."

MBS New Member

Among 102 new active and associate members accepted by the Board of Directors was the Mutual Broadcasting System as an active member. Of the 102 new members, 53 will be active and 49 associate members. Total membership now consists of 745 active members and 209 associate members.

The Broadcast Measurement Bureau was encouraged, without industry commitment, to carry on further study and research to develop techniques which would be required to conduct a second measurement of station audiences after completion of the current project.

The Board pledged assistance to the Federal Communications commission in procuring personnel necessary to prepare engineering coverage maps incident to the current clear channel hearings. From three to five engineers will be obtained, according to the needs of the FCC.

The Board heard a report on the fourteen district meetings which have been held so far. It was reported that of the 764 stations operating in the 14 districts, 576 of which are NAB members, 467 NAB stations were represented. In addition, 47 nonmember stations had representatives present. The registered attendance totaled 1,037 from stations plus 141 from associate membership and 363 from the press and other nonmember organizations. Total registered attendance was 1,540.

The Board took cognizance of the development of state broadcasters' organizations, and offered to lend guidance and assistance to these associations upon request.

Authorization was given for the establishment of a committee to develop a formula for appropriately recognizing those persons who have rendered distinguished service to the NAB.

The Board discussed changes in the structure of NAB districts to afford greater convenience to some members. This matter was referred to the By-laws Committee.

Also referred to the By-laws Committee was a proposed new procedure under which Directors-at-Large would be nominated and elected by mail referendum. Current practice calls for election of Directors-at-Large at the annual membership convention.

Convention Plans

In preparation for the membership convention in Chicago next October, the network program heads were asked to serve as an official committee to plan the program and entertainment for the banquet to be held in connection with the convention.

It was decided that only those persons in the broadcast industry who are connected with active or associate members of NAB would be registered at the convention. Persons connected with organizations eligible for membership but not associated with NAB will not be eligible to register.

The Board agreed that stations should cooperate wholeheartedly at the local level with the Veterans' Housing Authority.

Program Department Set

Plans for the establishment of an NAB Program Department were reaffirmed by the Board. Budget provisions were made for operation of the new department during the current year. The department will be organized with a full staff at the earliest possible time.

A plan to consolidate certain standing committees and Board sub-committees to promote efficiency and economy was accepted by the Board. The present Program Directors Committee will be reconstituted as a Program Executive Committee, and will replace the existing Agricultural Directors Committee, the Radio News Committee, Music Use Committee, and the Standards of Practice Committee, but will include representation from all these groups. The Research and Office Forms and Practices Committees will be consolidated.

The next meeting of the Board of Directors will take place August 7, 8, and 9 in Estes Park, Colorado, at the Stanley Hotel.

(Continued on next page)
The Board referred to the NAB Public Relations Department responsibility for cooperation with the State Department in selecting men and women with radio experience to serve abroad as Public Affairs Officers at embassies and consulates. This project of the State Department calls for the employment of experienced personnel from the motion picture industry and the newspaper world in addition to radio experts.

It was decided to send an observer to the World Congress on Air-Age Education to be held in New York City, August 21 through August 28.

Directors Present

All members of the Board of Directors were present with the exception of Hugh B. Terry, KLZ, Denver, District 14, whose planned trip to Washington by air was prevented by bad weather, and James D. Shouse, WIV, Cincinnati, District 7, whose attendance was prevented by illness. Those present were as follows:

- Paul W. Morency, WTIC, Hartford, District 1; Kolin Hager, WGY, Schenectady, District 2; George D. Coleman, WGBI, Scranton, Penna., District 3; Campbell Arnoux, WTOP, Norfolk, Va., District 4; F. W. Barton, WQAM, Miami, Fla., District 5; Hoyt B. Wooten, WREC, Memphis, Tenn., District 6; John E. Fetzer, WKZ0, Kalamazoo, Mich., District 8; Leslie G. Johnson, WHBF, Rock Island, Ill., District 9; John J. Gillin, Jr., WOW, Omaha, Nebr., District 10; E. L. Hayek, KATE, Albert Lea, Minn., District 11; William B. Way, KVOO, Tulsa, Okla., District 12; Martin B. Campbell, WFAA, Dallas, Tex., District 13; William B. Smullin, KIEM, Eureka, Cal., District 15; William B. Ryan, KFJ, Los Angeles, Cal., District 16; Harry R. Spence, KXRO, Aberdeen, Wash., District 17.

Directors-at-Large attending were J. Leonard Reinsch, WSB, Atlanta, Ga., District 5 and J. Harold Ryan, WWVA, Wheeling, W. Va., District 4, of the Large Stations; T. A. M. Craven, WOL, Washington, D. C., District 4 and G. Richard Shafto, WIS, Columbus, S. Car., District 4 of the Medium Stations; Matthew H. Bonebrake, KOCY, Oklahoma City, Okla., District 12 and Clair R. McCollough, WQAM, Miami, Fla., District 5; Frank Mullen, NBC; J. Harold Ryan, WSPD, G. Richard Shafto, WIS; Calvin J. Smith; KFAC; Theodore C. Streibert, WOR; Robert Swezy, MBS; Frank White, CBS; and Mark Woods, ABC.

Hager Resigns

Kolin Hager, Second District Director for the past four years, announced to the Board that he is leaving WGY on May 15th to become Executive Vice President of the SESAC, Inc. He, therefore, resigned as a director, and the Board expressed regret at his leaving. Michael R. Hanna, WHCU, Houston, N. Y., was appointed interim director to fill this vacancy. Mr. Hanna had previously been elected Second District Director, to take office in October, at the Second District meeting in New York March 26th. At that time Mr. Hager requested that he not be considered for re-election as a director.

RESEARCH DEPARTMENT

The Special Industry-Wide Committee met in Washington Thursday (9) and reviewed the discussions which have taken place to date with the American Federation of Musicians and considered the formation and activities of an advisory committee which will represent the radio industry in future talks with the musicians' union.

The committee briefly discussed the position of the industry with respect to the Lea Bill and NAB President Justin Miller advised that affected stations discuss their problems with the United States District Attorney in their local districts.

Leonard L. Asch, President and General Manager of FM station WBMA, Schenectady, appeared before the committee to explain the situation existing with respect to his operation of an AM station affiliated with a network but not associated with an AM station.

The committee recommended continuation of meetings with the AFM at the earliest mutually convenient date.

Committee members present were: F. W. Barton, WQAM; T. A. M. Craven, WOL; Walter J. Dumn, WTMJ; John Morgan Davis, Philadelphia, Pa.; John Elmer, WCBB; John E. Fetzer, WKZ0; E. E. Hill, WTAG; Harry R. LePoideven, WJZN; Clair R. McCollough, WGBI; Paul W. Morency, WTIC; Frank Mullen, NBC; J. Harold Ryan, WSPD; G. Richard Shafto, WIS; Calvin J. Smith; KFAC; Theodore C. Streibert, WOR; Robert Swezy, MBS; Frank White, CBS; and Mark Woods, ABC.

INDUSTRY-WIDE GROUP EXAMINES MUSIC SITUATION

The Special Industry-Wide Committee met in Washington Thursday (9) and reviewed the discussions which have taken place to date with the American Federation of Musicians and considered the formation and activities of an advisory committee which will represent the radio industry in future talks with the musicians' union.

The committee briefly discussed the position of the industry with respect to the Lea Bill and NAB President Justin Miller advised that affected stations discuss their problems with the United States District Attorney in their local districts.

Leonard L. Asch, President and General Manager of FM station WBMA, Schenectady, appeared before the committee to explain the situation existing with respect to his operation of an AM station affiliated with a network but not associated with an AM station.

The committee recommended continuation of meetings with the AFM at the earliest mutually convenient date.

Committee members present were: F. W. Barton, WQAM; T. A. M. Craven, WOL; Walter J. Dumn, WTMJ; John Morgan Davis, Philadelphia, Pa.; John Elmer, WCBB; John E. Fetzer, WKZ0; E. E. Hill, WTAG; Harry R. LePoideven, WJZN; Clair R. McCollough, WGBI; Paul W. Morency, WTIC; Frank Mullen, NBC; J. Harold Ryan, WSPD; G. Richard Shafto, WIS; Calvin J. Smith; KFAC; Theodore C. Streibert, WOR; Robert Swezy, MBS; Frank White, CBS; and Mark Woods, ABC.

NAB RESEARCH COMMITTEE MEETS

NAB's Research Committee, under the chairmanship of J. C. Tully, WJAC, met in Washington on Thursday (9) and discussed the NORC study, audience measurement, tabulation of radio set ownership and an improved market data handbook.

A report was made to the committee on the status of the NORC study. In the discussion which followed, it was pointed out that the writers of the book in which the NORC study is to be published are relating the findings of the study to previous surveys. It was felt that such a tie-in would increase the value of the present study.

Although the committee decided to table the question of an evaluation of audience rating methods temporarily, the committee asserted that this action in no way discharged its obligation to produce assistance to NAB membership, and that the committee would continue its examination of audience rating methods. It decided to postpone any announcement on present audience rating methods.

The committee decided that no attempt would be made at this time to prepare new figures on radio set ownership. BMB plants to release such figures as of January 1, 1946, in the near future, which the committee voted to adopt as its official estimates of radio set ownership.

(Continued on page 331)
The importance of publishing a new Market Data Handbook was emphasized by Roger Clipp, WFIL. Kenneth H. Baker, NAB's research director, will investigate the possibilities of preparing a comprehensive study on market data with the view of publishing a new handbook under NAB auspices.

Members of the committee in attendance included:

- J. C. Tully, Chairman; Hugh M. Beville, NBC; Roger W. Clipp, WFIL; Charles E. Couche, KALE; Dietrick Dirks, KTRI; Elmo Wilson, CBS; Frank Stanton, Board Liaison Committee. Guests at the meetings were Barry Rumple, NBC; Hugh Feltis, BMB, and Helen Schaefer, NAB. Kenneth H. Baker, NAB Director of Research is committee secretary.

**Programming**

**BOARD APPROVES IN PRINCIPLE OVERALL AWARDS PLAN**

The NAB Board of Directors, in session last week, approved in principle a plan for overall radio awards to provide new incentives for advancement and improvement of the art of radio broadcasting.

The proposed plan calls for a wide membership basis divided into ten branches: management, artists, musicians, writers, directors and producers, news editors and commentators, advertising agencies, sponsors, public relations personnel, engineers and the public through radio listener councils to be established in every community where there is one or more radio transmitters.

The plan contemplates that awards are to be made on the national and local level and that the diversity of membership contemplated by the plan would prevent control or domination by any single interest.

The NAB invited the comments, suggestions, and cooperation of other interested groups in evolving the awards system.

**FM Department**

**FM GROUPS DISCUSS CONVENTION PLANS**

In a policy meeting in Washington on Thursday (9), the Board of Directors of FMBI discussed the broad problems facing its organization and recommended that more detailed action be taken on the agenda of the forthcoming meeting in Chicago in October.

The following members of the board attended the meeting over which Walter J. Damm, President of FMBI presided:

The NAB-FM Executive Committee met on Friday (10) with the discussion centered primarily around convention program plans. It was decided to suggest to the convention program committee that a full session be devoted to FM broadcasting.

It was determined that a panel discussion would be provided at the convention to explore thoroughly and advise upon FCC policy, engineering requirements, equipment (both transmitter and receiver) promotion of FM stations, sources of program material and overall problems of management.

**TRANSCRIPTIONS CAN STILL BE SHIPPED**

Current shipping restrictions do not affect the transportation of radio transcriptions by Railway Express, Robert T. Bartley, NAB Director of Government Relations, has been reliably informed.

It is understood that the American Association of Railroads, agency made responsible by the Office of Defense Transportation for enforcement of shipping restrictions, has advised the Railway Express Agency that radio transcriptions are to be technically classified as "film" and not to be withheld from shipment.

The Post Office Department order does not provide for exemption of radio transcriptions from the limitations on parcel post shipments, but these restrictions do not apply to packages weighing less than ten pounds. Therefore, packages of radio transcriptions weighing less than ten pounds can be shipped via parcel post without other limitations.

Stations which encounter local situations at variance with the above information are invited to advise NAB in order that the matter may be clarified.

Members of the FM Executive Committee attending the meeting were:

- Walter Damm, chairman, John Shepard 3rd, Gordon Gray, Wayne Coy, Les Johnson, Paul Morency and Lewis Herzog, FMBI Secretary-Treasurer. C. E. Arney and Robert T. Bartley were present from NAB, and Cecil Mastin attended the meeting as a guest.

**Legal Department**

**REVENUE CHIEF REPORTS ON EXCESS PROFITS TAX RELIEF**

Joseph Noonan, Commissioner of Internal Revenue, appeared before the George Committee (Joint Committee on Internal Revenue Taxation) last Tuesday (7) to report the results of his investigation of the administration of Section 722 of the Internal Revenue Act, relating to relief from the excess profits tax law.

In response to certain criticisms of the Act's administration made in hearings before the committee by several witnesses, including NAB General Counsel, Don Petty, Mr. Noonan in his testimony announced among other things (1) the elimination of a hiatus which prevented corporations organized prior to December 31, 1939 but which did not commence business until after that date from obtaining relief under Section 722, and (2) the establishment of a new board in Washington to handle all Section 722 claims.

The new board, to consist of 15 members, will include outside experts in addition to personnel from the Bureau of Internal Revenue. It is expected that the board chairman will not be an Internal Revenue Bureau man. This board will review all questions of interpretation of Section 722. In his testimony before the George Committee Mr. Petty pointed out the unfairness of the law which withheld relief from corporations formed before the end of 1939 but which commenced business operations later. In his supplementary statement to the committee, Mr. Noonan said:

"Attention was called to the hiatus which may result from the opinion of the Tax Court in the Eveready Loan (Continued on next page)
Company case (2 T.C. 1035), which holds that a corporation may be "in existence" even though it has never engaged in business. If such a construction is applicable in section 722 cases, such a corporation would presumably be ineligible for relief under section 722(c) because it is entitled to use the excess profits credit based on income, and likewise would be ineligible under section 722(b)(4) because it did not commence business prior to the end of the base period. Thus a "hiatus" would exist in the application of section 722, contrary to what would certainly appear to be the intent of Congress. Accordingly, we propose to implement this intent by considering these cases as falling within the purview of section 722(c)."

Mr. Petty also stated to the George Committee that radio broadcasting companies changing frequency, power or service should be given consideration under the provision of Section 722 which provides for relief when there is a change in the character of business. In announcing formation of the new board, the Commissioner of Internal Revenue stated:

"The Bureau believes that a fundamental change in the administrative machinery for handling section 722 cases is desirable. The nature of section 722 and administrative experience to date indicate that greater specialization of Bureau personnel is required, not only in the field offices but also in Washington. Accordingly, we now propose to establish in Washington a section 722 Board (name to be determined), directly responsible to the Commissioner. The Board will be composed of 15 members, one of whom will be designated as chairman. It will consist primarily of persons with broad experience in accounting, tax law, or economics and will be appointed from existing Bureau personnel as well as from other sources. It will function under the direction and supervision of an executive committee appointed by the Commissioner from the Board membership. This committee will be primarily responsible for matters of interpretation, policy, and procedure."

From all indications this Board will be more realistic in its approach than has been the practice in the past. Mr. Noonan indicated that previous claims not finally determined will be reconsidered by the new Board.

A copy of the Commissioner's statement dated April 1, 1946, with pertinent information from the legal department will be forwarded to NAB members in the near future for use in connection with 722 claims.

LEGAL TREND AWAY FROM COURTROOM BROADCASTING

The practice of broadcasting court trials in criminal cases has been widely discussed in recent years. There has been from time to time considerable concern among lawyers, judges and litigants as to the desirability of this practice. Broadcasters have been particularly concerned because of their possible liability under the libel and slander laws for statements made during the court room proceedings.

That the trend of legal thinking is opposed to such broadcasts is shown by two recent developments. First, the Bar Association of the District of Columbia approved a resolution in the Spring of 1945 urging the discontinuance of broadcasts of trials in the traffic court. Second, pursuant to its statutory authority, 54 Stat. 688, 18 USCA 687, the Supreme Court of the United States has issued rules of criminal procedure for the district courts of the United States, effective March 21, 1946. Rule 53 thereof provides as follows:

"The taking of photographs in the court room during the progress of judicial proceedings or radio broadcasting of judicial proceedings from the court room shall not be permitted by the court."

While this rule of the Supreme Court is not in any way binding on the State courts, it will probably influence their practice, since there is a tendency, accelerated somewhat since the adoption of new rules of federal procedure a few years ago, for state courts to follow federal courts in such matters.

REA JOINS LEGAL STAFF

W. Bryce Rea, Jr., recently released from service with the Navy, joined NAB's legal staff on Thursday (9).

During his period of active duty with the Navy, Mr. Rea was skipper of a minesweeper. He was released from duty as an ensign.

Prior to his service with the armed forces, Mr. Rea was a member of the legal staff of the National Association of Manufacturers.

With NAB he will assist Don Petty, General Counsel.

FCC

FCC WAIVES HOUR REQUIREMENT DURING EMERGENCY

In line with the national drive to conserve power during the present coal emergency, the FCC waived its requirement on minimum hours of operation by radio stations on Thursday (9).

According to a statement by the FCC, this action will permit radio stations to cooperate in the conservation efforts which have been instituted to preserve the dwindling power supply.

The Commission stated that areas served by two or more stations might be able to provide listeners with continuous service during the coal emergency by broadcasting alternately.

FCC ANNOUNCES NEW HAM FREQUENCIES

The Commission announced Thursday (9) the adoption of Order No. 130-G, which authorizes amateur station operation on new and additional frequencies effective 11 a.m. Eastern Standard Time, May 9, 1946.

Under the terms of this order amateur stations within the continental limits of the United States, Territory of Alaska, Puerto Rico, and the Virgin Islands are authorized frequencies above 1215 Mc. The Commission also authorized the use of pulse and AO emissions and authorized frequencies above 1215 Mc.

General

CPA DENIES CONSTRUCTION REQUEST

The Civilian Production Administration has denied the appeal made by NAB for limited relaxation of the CPA order restricting construction as it applies to the building of new broadcasting stations.

(Continued on next page)
In a letter to NAB dated Monday (6), Hugh Porter, deputy director of CPA's Bureau of Construction said that "it is felt that the construction of radio stations can only be classified as commercial and, therefore, limited to the $1,000 ceiling described" in the CPA order.

SAN FRANCISCO EXAMINER FEATURES FCC STORY

In front page position the San Francisco Examiner last Sunday, May 5th, carried an International News Service dispatch from Washington by INS staff correspondent David Sentner concerning the FCC program reports. It is reprinted with permission as follows:

"Free Speech Threatened by FCC Radio Rule"

"Bill of Rights Ignored in Warning to Stations"

By DAVID SENTNER
Staff Correspondent Int'l News Service

"WASHINGTON, May 4.—The Federal Communications Commission brazenly announces its plans to control freedom of speech on the airways."

"The New Deal's number one bureaucratic agency has played 'possum since a House committee last year detailed its totalitarian, Gestapo-like methods of intimidating the radio industry, aided by a Communist-tinged personnel."

"Brushed Off"

"Then on March 7, the FCC brushed off the Bill of Rights and the memory of the minutemen of Lexington and Concord with a report harmlessly entitled 'Public Service Responsibility of Broadcast Licensees.'"

"Striped of its verbiage, the report made it clear that the American people will be told only what the Government—or the FCC—wants it to be told over the radio."

"In the event that the contents of radio programs do not meet the approval of the FCC—stations face failure to have their licenses renewed."

"Daring Threat"

"Reflecting a realization of its daring threat to constitutional liberties, the report was issued anonymously by the FCC."

"However, it was learned that a member of the British Broadcasting Corporation (the radio is government controlled in Britain and permits no advertising on its programs), aided in the preparation of the document."

Fear to Reply

"Individual owners of radio stations, in fear of FCC reprisals when license renewal time approaches, are stunned by the commission's announcement of program censorship."

"They also fear that the commission, under its licensing power, will see that radio broadcasters will in the future afford more time for New Deal propaganda and the vociferous messages of Communists and PAC elements."

"Justin Miller, president of the National Association of Broadcasters, assailed the FCC report as indicating 'a reversion to that type of government control and regulation from which our forefathers struggled to escape.'"

ALBANY PAPER CARRIED EDITORIAL ON FREE RADIO

The Albany (N. Y.) Times Union published a front page editorial in its issue of Sunday, May 5th, entitled "Freedom of Speech Over the Radio." The following is a verbatim reprint:

"The radio is one of the world's newest mediums of expression and opinion, of information and instruction, and has swiftly come to be one of the most important mediums."

"Probably the first amendment to the Constitution, which is the source of the freedom of speech and publication which the American people enjoy, was expected to be broad enough to cover all mediums of public expression, and it was surely intended by its framers to do so."

"Of course the framers of the Constitution did not include the radio specifically among the mediums of expression which were to be kept free in the interest of unhampered public information, having no knowledge of the device and no means of anticipating its discovery."

"But they were well aware that the American people in the future would be resourceful and inventive, and would unquestionably evolve and perfect new and improved methods of publication and communication."

"It was their clear intent, therefore, and their obvious purpose that when they decreed that there was NEVER to be ANY abridgment of the freedom of SPEECH or of the PRESS, they included such an instrument as the radio."

"However, since the radio achieved its present uni-

(Continued on next page)
versal use and importance, neither the industries operating it nor the government policies pertaining to it have adhered to the INTENT AND PURPOSES of the framers of the Constitution.

"The attitude, or rather the PLIGHT, of the radio industries in this situation is one of virtual helplessness under an inquisitive system of federal licensing which largely deprives them of the right to function according to the standards of free enterprise.

"The government licensing of radio, originally intended to provide for orderly allotment of broadcasting wave-lengths in the obvious interest of both the industries and the public, has gone far beyond that sound and necessary objective.

"It has come to be an arbitrary and arrogant instrument of government bureaucracy, creating the absolute and sometimes capricious and malicious power by which the radio industries are not only allowed to DO business but by which they can be put OUT of business.

"The federal licensing power over radio has become the POWER OF LIFE AND DEATH.

"The radio broadcaster is licensed according to the current whim or caprice of the political administration in power, and his license may be REVOKED by the same authority at any time and for any reason.

"The spectre of revocation or non-renewal of the federal license haunts the broadcaster, and inevitably influences and DICTATES the manner in which he conducts his business—since he is ever mindful of the investments he has in the business, and of the disaster that would fall upon those investments if he should be deprived of or denied a federal license.

"The American people DO NOT HAVE A FREE RADIO TODAY because it is federally controlled and RULED in its every move and policy.

"Obviously it has become necessary for the constitutional guaranty of free speech to specifically SAY with respect to radio what the framers of the Constitution plainly INTENDED IT TO MEAN in all matters and measures of free speech and free publication.

"Since the government and the radio industries have not seen fit to honor the INTENT AND PURPOSES of the Constitution, the Congress should clarify and if necessary AMEND the Constitution to INCLUDE THE RADIO AMONG THE FREE MEDIUMS OF EXPRESSION AND OPINION AND PUBLICATION UTILIZED AND ENJOYED BY THE AMERICAN PEOPLE AS AN INVOLUBLE RIGHT."

NEBRASKA BROADCASTERS MEET IN KEARNEY

At the annual meeting of the Nebraska Broadcasters Association in Kearney, Neb., Friday (10), Duane Watts, manager KHAS, Hastings, was re-elected president of the association. Harry Peck, manager of KFOR, Lincoln, was elected vice-president; and Arthur Thomas, secretary-treasurer.

The directors of the association are Harry Burke, general manager, KFAC, Omaha-Lincoln; Les Hilliard, manager KGKY, Scottsbluff, and John J. Gillin, Jr., president WOW, Omaha, who is the NAB director.

The president's first appointments were three broadcasters to form a committee on group selling. The new committee members are Lloyd Thomas, licensee KGFW, Kearney; Harry Burke, KFAB, Omaha; Bill Martin, KMMJ, Grand Island.

The 1947 meeting of the Nebraska association will be held in May at Grand Island, where KMMJ will be host.

The NBA celebrated its 12th anniversary Saturday (11) by holding a NAB-Nebraska Broadcasters Association news clinic in Kearney.

FLORIDA BROADCASTERS MEET

The annual meeting of the Florida Association of Broadcasters was held May 1st in Pensacola, Fla. In an unprecedented action, the members voted to waive the annual election and return the President, Officers and Board of Directors to office for another year.

Those returned to office were as follows: James M. LeGate, WIOD, President; Glenn Marshall, WFOY, First Vice President; Bill McBride, WDBO, Second Vice President; Fred Mizer, WQAM, Secretary-Treasurer; Directors: Jack Hopkins, WJAX; Teresa Myers, WTAL; and S. O. Ward, WFLK.

Fred Borton of WQAM, on behalf of the Directors and members, presented President LeGate with a plaque in honor of his services to the association.

NAB President Justin Miller attended the FAB meeting and expressed interest in the growth of state associations. He felt that strong state associations would make a strong and more unified NAB. (See story on NAB Directors meeting.)

The next meeting of the FAB will be held next fall, and all Florida Congressmen will be invited to attend and be the association's guests at a special dinner.

President LeGate was instructed to meet with the Presidents of the Georgia and Alabama Broadcasters to work out details of greater cooperation between the three state organizations.

Attendance at the FAB Meeting included 40 representatives of 24 member stations.

Broadcast Advertising

Large retailers are showing appreciation of radio's power and prestige in messages to the manufacturers.

An example of how one prominent retailer courts the designers and manufacturers for additional allotments of precious merchandise is found in a full page advertisement by Harvey's, "Nashville's Largest Store" in the May 7th edition of Women's Wear Daily. The contents of the ad is as follows:

"What are the air waves saying about YOU in the Tennessee Valley?

"What! They aren't saying anything about you at all? That's as bad as going to church in a new hat and having no one notice it. Or going to a baby show and having them pick somebody else's kid. And what a pity, when so many famous brands of merchandise do get talked about over the radio in the Tennessee Valley these days. They are the pampered 'Harvey Network' of famous names. In Nashville, Tennessee, they get the lion's share of newspaper advertising. They get the best display windows. They are featured over the HARVEY signature in national fashion magazines. And, through two powerful 50,000-watt radio stations covering nine states, daily, almost hourly, they keep the air waves alive with their praise to the accompaniment of a now famous jingle song: 'Harvey's Has It!'

"Right now you may not feel keenly the lack of this continual, all-out publicity for your quality product. But some day you may question the wisdom of confining your merchandise to the ultra-conservative type of store, hobbled by tradition, which does not believe in radio advertising. Next time you distribute your allotments, consider whether you might not be wise now to corner for yourself an outlet like Harvey's—a store whose progressive spirit and actual growth in the Tennessee Valley parallels your own rise to eminence in America. When are YOU going on the air in the Tennessee Valley?"
SYNDICATED TRANSCRIBED FIFTEEN-MINUTE SHOW OFFERED FOR 2.50

In recent months small market stations have shown a decided interest in syndicated programs at reasonable costs (REPORTS, pp. 140, 172, 230). Managers feel that an open-end transcription is a vehicle to fill that fifteen minute sustaining period between two popular network shows. An audience-holding syndicated feature for a single sponsor is considered better programming than a period of recordings filled with spot announcements.

While some of the smaller stations are quite adept at creating popular local productions, which in some instances have ratings that surpass network and syndicated programs, this is not true of all local productions at every station.

Progressive and experienced management today is thinking in terms of good programming regardless of whether it is commercial or sustaining. The definition of a balanced program structure takes on a different meaning at each station, according to J. Allen Brown, head of NAB Small Market Stations Division.

Some stations rely heavily on network co-ops (a subject to be taken up in future REPORTS), syndicated programs, local programs and news separately as features for the sales department to concentrate on. A station may have eight or ten daily network co-op shows, perhaps a syndicated program, several wire-service news and a few local productions sold to local sponsors, yet another station’s commercial department may have put emphasis on local creations, with a sizable number of syndicated shows, some news and a couple of co-op features. All are ingredients for balanced programming, high listener ratings, and attracting local sponsors.

Stations that have used or are interested in programming the syndicated feature will welcome the information furnished by Aaron S. Bloom, Treasurer, Kasper-Gordon, Inc. transcription producers. He points out that his firm, after a year of study, offered a group of four tested programs at $2.50 per episode. The offer was made for the start of the 1942 season. It was found that stations were not sufficiently interested in the offer and consequently it was withdrawn.

The transcription company executive states that his firm has pioneered in promoting department store use of radio and now has a large list of retailers using his features. He says, ‘Now we find ourselves ‘going along for the ride’—meeting this challenge to make available recorded syndicated shows at lower rates than ever before. And once again we are meeting that challenge, making certain of our successful transcribed programs available at lower rates than ever before.

“If you want good transcribed shows at low cost, we can give them to you—if you will cooperate! This offer is limited to stations in cities of under 50,000 population!”

THE 11:00 P. M. SPONSOR?

Stations which enjoy a degree of success in selling the period from 11:00 until 12:00 midnight are invited to send in their accounts to NAB Small Market Stations Division. During the recent second district meeting in New York City, several station managers revealed that they found it very easy to sell the 11:00 P.M. newscast. They seemed to be particularly interested in commercial program ideas at this late period.

Metropolitan stations seem to have little difficulty in selling this late period but it has not always been easy in the small cities. Stations which may have developed exceptionally good commercial program ideas are urged to report them so they may be passed along to other stations across the nation.

Public Interest Programming

AD COUNCIL NETWORK CAMPAIGNS—MAY 20-26

The following four public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of May 20-26, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Housing—“Boom & Bust?”

America’s critical housing shortage constitutes one of the most potentially explosive inflationary situations of the recovery period. A bold and vigorous program has been developed to whip that shortage. But even under that program the urgent demand for homes will far exceed the number that can be built for months to come. And in addition to the urgent demand by returning veterans and others, there are millions of Americans who would like to buy or remodel if they could. Under these conditions the threat of inflation in housing and building materials is more menacing than in any other section of the economy. Within limits people in urgent need of shelter are tempted to pay almost any price for it. It would be presumptuous for anyone to urge a man not to buy or build when he has the money and his family is without a place to live. However it is in the interest of the Nation as well as the home-seeker that he be told of the dangers involved in buying or building at inflated prices. During the period when the demand for housing is abnormally high and production is low, there are two alternatives open to us—to start a

(Continued on next page)
“boom-bust” cycle by frantically bidding up the prices of the limited housing supply, or to put the brakes on housing inflation by postponing buying or building if we do not urgently need a new house and by securing expert advice if we do build or buy. Explain that during the period when the shortage is most acute there is serious danger of a housing inflation that would affect our whole economy. Suggest that families not urgently in need of a home consider waiting another year to buy, which would also help us to save. If such families are convinced of the urgency need a new house and by securing expert advice and planning for the time when more homes can be built and better values may be available. Strongly urge everyone who finds it necessary to buy or build today to secure expert advice and sound appraisals before doing so. (Fact Sheet No. 7-B)

Building Our New Army

Congress has authorized a peace-time American Army larger and better trained than ever before in history. This Army, vitally necessary for reasons which will be presently explained, is now being recruited by voluntary enlistment. But the Army’s present recruiting drive for over one million men by July first 1946 may fail unless public attitudes can be changed and changed quickly. The Army itself is conducting a large-scale direct recruiting drive using paid advertising in various media, but it urgently asks help in a concurrent back-up campaign, for which its own resources are inadequate to buy for the new Regular Army and its personnel in the public mind, and particularly in the minds of potential recruits, their families and their friends. Very bluntly, the objective of this campaign is to change the old attitude of Americans toward their Army. By explaining the purpose and the character of the new Regular Army being formed since victory in World War II, and by paying tribute to the young men now joining it to guard world peace, your program can help the Army’s recruiting drive achieve the goal it seeks. The new American Army of today is a compact, carefully chosen group of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the future maintenance of that peace for which thousands of other young Americans have already died. Point out that they are guardians of peace—Congress has authorized our new large and expertly trained Army in order to enforce the peace and fulfill our obligations as a member of the United Nations Organization. Point out that the new Regular Army soldier is a skilled technician—he works with advanced techniques and equipment in at least one of many specialized fields, and his competence equals and often exceeds the skills developed in the best private industry and trades. Illustrate the kind of work they do as guardians of peace and architects of our country’s safety. (Fact Sheet No. 2-A)

Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation over vast areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone, city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief and Rehabilitation Administration considered 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 3,360 calories per day. Unless foreign governments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide the situation over until the harvest, famine, plague and death will desolate half the world. The “have” countries including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. Our share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June. Urge everyone to SAVE AND SHARE—to make the maximum amount of needed food available for the relief of starving millions by—Reducing their consumption of all wheat and rice products and fats and oils—Eating more of the plentiful foods—Eliminating all food waste and turning in all used fats—Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20-A)

United States Savings Bonds

As a result of the United States Treasury’s decision to extend its wartime bonds and stamp program into the peace-time era, individuals can now continue to purchase bonds paying the same rate of interest as those sold during the war. These securities, now known as U. S. Savings Bonds and Savings Stamps, will include the wartime F and G bonds as well as the popular Series E Bonds which return four dollars for every three invested, when the bonds mature. The success and convenience of the Payroll Savings Plan during the war years has resulted in its continued maintenance by business and industry throughout the nation. The high rate of interest of U. S. Savings Bonds, 1946 amount investment values and their ready availability offer the individual investor the ideal way of saving for the future. Radio can perform a valuable service to its listeners by informing them of (1) the continued sale of U. S. Savings Bonds and Stamps; (2) their availability through continuation of the Payroll Savings Plan and other regular purchase facilities and (3) their many advantages as an investment. (Fact Sheet No. 11)

AESOP’S FABLE AIDS VICTORY GARDEN DRIVE

The story of “The Ant and the Grasshopper” was brought up to date and used to good advantage in a campaign to promote victory gardening in Muncie, Indiana. A Muncie committee, including Don Burton, owner-manager of Station WLBC, is merchandising the campaign by taking full advantage of the selling power of radio, as well as other local media. The promotion started with a four day teaser campaign. Every station break over WLBC in that period included the phrase “are you a grasshopper or an ant.” Street corner in town, and the daily papers carried four column by four ads.

On the fifth day, WLBC produced a fifteen minute dramatized show at 9 P.M. Based on the fable, the program pointed out that “then the grasshopper knew it is best to prepare for the days of necessity.” The afternoon paper broke with a full page ad on the same day, telling the story, and the morning paper followed up with the ad the following day. WLBC is continuing the spot campaign with sixteen daily announcements, four on station breaks, seven with longer copy promoting victory gardens, while five more daily announcements, four on station breaks, seven with longer copy promoting victory gardens, while five more give local telephone numbers which clear requests for garden space.

If community out the campaign, local theatres are running trailers, a banner has been strung across the street in downtown Muncie, and a free film depicting the advantages of victory gardening will be shown on the courthouse lawn on Saturday nights.

Mr. Burton in speaking of the promotion said that it “is an example of the kind of a job the local station can do. We are proud of our part in this project.”
The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, May 13. They are subject to change.

**Monday, May 13**

NEW—WFBM, Inc., Indianapolis, Ind.—For FM facilities.

NEW—Evansville on the Air, Inc., Indianapolis, Ind.—For FM facilities.

NEW—Indianapolis Broadcasters, Inc., Indianapolis, Ind.—For FM facilities.

NEW—Universal Broadcasting Co., Indianapolis, Ind.—For FM facilities.

NEW—Scripps-Howard Radio, Inc., Indianapolis, Ind.—For FM facilities.

The following broadcast hearings are scheduled to be held in Room No. 216, Federal Building, Indianapolis, Indiana:

**Monday, May 13**

To Be Held in Room No. 216, Federal Building, Indianapolis, Indiana

NEW—The Wm. H. Block Co., Indianapolis, Ind.—For FM facilities.

NEW—Evansville on the Air, Inc., Indianapolis, Ind.—For FM facilities.

NEW—WFBM, Inc., Indianapolis, Ind.—For FM facilities.

NEW—Scripps-Howard Radio, Inc., Indianapolis, Ind.—For FM facilities.

NEW—Indiana Broadcasting Corp., Indianapolis, Ind.—For FM facilities.

NEW—West Central Broadcasting Co., Peoria, Ill.—C. P. 1230 kc., 250 watts, unlimited.

NEW—Central Broadcasting Co., Wilkes-Barre, Pa.—C. P. 1240 kc., 250 watts, unlimited.

NEW—Key Broadcasters, Inc., Wilkes-Barre, Pa.—C. P. 1240 kc., 250 watts, unlimited.

NEW—George E. Miller, et al. d/b as Baron Broadcasting Co., Wilkes-Barre, Pa.—For License to operate station on a regular basis. 1240 kc., 250 watts, unlimited.

Further Hearing

NEW—Wakash Valley Broadcasting Corp., Terre Haute, Ind.—C. P. 1350 kc., 5 KW, unlimited DA-night and day.

NEW—West Central Broadcasting Co., Peoria, Ill.—C. P. 1350 kc., 1 KW, unlimited DA-night and day.

**Federal Communications Commission Docket**

**HEARINGS**

**Commission Actions**

**CORRECTION**

The Commission has issued a correction on an item which appeared in Reports on May 6, p. 353, referring to KWHN. This item should have shown night power as 500 watts instead of 1 KW.

**MISCELLANEOUS ACTIONS**

**WHBC**—The Ohio Broadcasting Co., Canton, Ohio—Granted license to cover CP which authorized installation of a new transmitter (Gates B3-E). (B1-L-1946)

**WBTB**—Cumberland Broadcasting Co., Cumberland, Md.—Granted license to cover CP which authorized changes in transmitting equipment. (B1-L-1929)

**KBST**—The Big Spring Herald Broadcasting Co., Big Spring, Texas—Granted license to cover CP which authorized increase in power to 250 watts, and installation of new transmitter. (B2-L-1945)

**WIRA**—Indian River Broadcasting Co., Fort Pierce, Fla.—Grantd modification of CP which authorized a new station, for change in type of transmitter and change in transmitter and studio locations to County Road, Ft. Pierce. (B3-MP-1877)

**KPDR**—Central La. Broadcasting Corp., Alexandria, La.—Granted modification of CP which authorized a new station, for approval of antenna, and of transmitter and studio locations at West Side of North 4th St., just north of City Limits, Alexandria, and 1710 Jackson St., Alexandria, respectively. Permittee is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission’s Rules; conditions. (B4-MP-1882)

**KSLR**—Dorance D. Roderick, Silver City, N. Mex.—Granted modification of CP which authorized a new station, for approval of transmitter and studio locations at Cactus Ave. & 17th St., Silver City, and approval of antenna. Permittee hereunder is granted a waiver of Secs. 3.55(b) and 3.60 of the Commission’s Rules; conditions. (B5-MP-1885)

**WXH**—Harvey Radio Labs., Inc., Cambridge, Mass.—Granted license to cover CP for a new developmental broadcasting station; power: 250 watts; frequency that may be assigned by the Commission's Chief Engineer from time to time. This license is granted upon an experimental basis only; conditions. (B1-LEX-41)

(Continued on next page)
KSUI—The State Univ. of Iowa, Iowa City, Iowa—Granted modification of CP which authorized a new non-commercial educational broadcast station, for extension of time for completion date to 1-16-47. (B1-PED-51)

Eastern Carolina Broadcasting Co., Area of Goldsboro, N. C.—Granted CP for new relay broadcast station to be used with applicant's standard station WGBR; frequencies 1622, 2638, 2150 and 2730 kc., 100 watts. (B2-PHY-312)

WKXL—Charles M. Dale, Concord, N. H.—Granted modification of CP which authorized a new standard broadcast station, for approval of antenna and approval of transmitter and studio locations at So. Side of Rumbling St.; West of So. Fruit St., Concord, N. H., respectively. (B1-MI-1851)

WKAX—Courier Broadcasting Service, Inc., Birmingham, Ala.—Granted modification of CP which authorized a new station, for changes in antenna and to change proposed-type of transmitter (Gates Radio BC-14). (B3-MP-1885)

W3XEP—Radio Corp. of America, Camden, N. J.—Granted petition for consent to voluntary assignment of license of station W3XEP from Monroe B. England, (Assignor) and Harmco, Inc. (Assignee), Sacramento, Cal.—Adopted a Memorandum Opinions designating for consolidated hearing the application of Monroe B. England, (Assignor) and Western Mass. Broadcasting Co. (Assignee) and Leon Podolsky (Assignor), Pittsfield, Mass.—Adopted a Memorandum Opinion designating for consolidated hearing the application of Monroe B. England, (Assignor) and Western Mass. Broadcasting Co. (Assignee) (B1-AL-514 and B1-API-3; Docket 5556), for consent to voluntary assignment of license of AM station WRBK (1210 kc., 250 watts, unlimited time) and of a conditional grant of frequency 1622, 2638, 2150 and 2730 kc., 100 watts, unlimited time) of a new non-commercial educational station to be used with applicant's standard station WRBK in that city, and competing applications filed by Leon Podolsky to purchase station WRBK and conditional grant for FM station, from Monroe B. England.

KROY—Royal Miller, et al., d/b as Royal Miller Radio Co., Inc., Marion Miller, L. H. Penney and Gladys W. Penny, d/b as Gibson Broadcasting Co. (Assignee), to purchase station KROY from Monroe B. England, d/b as Gibson Broadcasting Co. (Assignee), Sacramento, Cal.—Adopted a Memorandum Opinion granting application (B5-AL-508) for consent to voluntary assignment of license of station KROY (1210 kc., 250 watts, unlimited time) from Royal Miller, Marion Miller, L. H. Penny and Gladys W. Penny, d/b as Royal Miller Radio, to Harmco, Inc., and denied competing application of Luther E. Gibson, d/b as Gibson Broadcasting Co. (Assignee), to purchase station KROY from the present licensee. (Combined Jett voting for hearing on both proposals.)

**ACTIONS ON MOTIONS**

Fred O. Grimwood, Bloomington, Ind.—Granted petition for continuation of hearing on application for CP now scheduled for May 7, and continued same to June 6. (Docket 6755)

Scrivner—Howard Radio, Inc., Cleveland, Ohio—Granted petition for leave to amend its application for a new FM station, so as to supply supplemental engineering information, etc., and the amendment was accepted. (Docket 7044)

Telair Company, Cleveland, Ohio—Granted petition for leave to amend its application for a new FM station to supply additional information concerning the officers, directors and stockholders of applicant corporation, and the amendment was accepted. (Docket 7045)

Cleveland Broadcasting, Inc., Cleveland, Ohio—Granted motion for leave to amend its application for a new FM station so as to specify a new transmitter site; change the antenna design, etc., and the amendment was accepted. (Docket 7046)

Elyria-Lorain Broadcasting Co., Elyria, Ohio—Granted petition for leave to amend application for a new FM station, so as to supply supplemental engineering information to answerers to par. 20, 2930, and the amendment was accepted. (Docket 7047)

Summit Radio Corp., Akron, Ohio—Granted motion for leave to amend its application for a new FM station so as to supply additional information concerning the officers, directors and stockholders of applicant corporation, etc., and the amendment was accepted. (Docket 7048)

National Broadcasting Co., Inc., Cleveland, Ohio—Granted motion for leave to amend its application for a new FM station, so as to specify a definite channel; furnish supplemental engineering data, etc., and the amendment was accepted. (Docket 7039)

United Broadcasting Co., Cleveland, Ohio—Granted motion for leave to amend its application for a new FM station, so as to supply complete engineering data as requested by the Commission, and the amendment was accepted. (Docket 7040)

UAU-CIO, Cleveland, Ohio—Granted petition for leave to amend its application for a new FM station so as to change the legal entity of the applicant from an association to a non-profit corporation, etc., and the amendment was accepted. (Docket 7042)

WJW, Inc., Cleveland, Ohio—Granted petition for leave to amend its application for a new FM station so as to show changes in the officers and directors of applicant corporation, etc., and the amendment was accepted. (Docket 7040)

Telair Co., Cleveland, Ohio—Granted motion for leave to amend its application so as to supply complete engineering data as requested by the Commission, and the amendment was accepted. (Docket 7045)

WDEL—WDEL, Inc., Wilmington, Del.—Granted petition for leave to intervene in the hearing on application of Northeastern Ohio Broadcasting Corp., for a new station at Lima, Ohio; denied motion to strike the petition to intervene filed by Northwestern Ohio Broadcasting Corp.

Charleston Broadcasting Co., Charleston, S. C.—Granted petition to dismiss without prejudice its application for a new FM station. (B1-PH-46); (Docket 7227)

KTHS—Radio Broadcasting, Inc., West Memphis, Ark.—Granted motion to waive Commission's Rules and accept movant's written appearance in re its application for CP. (Docket 7086)

W. J. Marshall, Cleveland, Ohio—Granted motion for waiver of Commission's Rules and accepted movant's written appearance in re his application for CP. (Docket 7471)

Puerto Rico Communications Authority, San Juan, P. R.—Granted petition for leave to amend application for CP so as to specify frequency 1310 instead of 1490 kc., etc. The amendment was accepted and application removed from the hearing docket.

Seaman and Collins, El Paso, Texas—Granted petition insofar as it requests leave to amend its application for CP so as to supply supplemental engineering data, etc. The amendment was accepted and application removed from the hearing docket.

WJW, Inc., Cleveland, Ohio—Granted petition to dismiss without prejudice its application for a new Television station. (Docket 7208; B2-PCT-146)

KWKK—International Broadcasting Corp., Shreveport, La.—Granted petition for leave to intervene in the hearing on application of WNW and reject the present service of KWKH, and for waiver of Commission's Rules Sec. 1335(a). The Crusader Corp., Dayton, Ohio—Granted petition to dismiss without prejudice its application for a new FM station. (Docket 7202; Docket 7235)

Consolidated Broadcasting Corp., Ltd., Los Angeles, Cal.—Granted petition to dismiss without prejudice its application for a new television station. (B5-PCT-70; Docket 7258)

(Continued on next page)
Central Broadcasting Corp., New York City—Granted petition to dismiss without prejudice its application for a new television station. (B1-PCT-132; Docket 7252).

Fox West Coast Theatres Corp., Los Angeles, Calif.—Granted motion for leave to amend its application for CP (Docket 7465).

KAW Broadcasting, Inc., Topeka, Kansas.—Granted petition for waiver of Commission's Rules and acceptance of petitioner's written appearance in re its application in (Docket 7456).

Independent Broadcasting Co., Des Moines, Iowa.—Granted petition for leave to amend its application for CP (Docket 7631), so as to specify power of 5 KW instead of 10 KW; specify use of DA day and night instead of nighttime only, etc., and the amendment was accepted.

Radio Projects, Inc., Newark, N. J.—Granted motion for leave to amend its application for new FM station (Docket 7222), so as to show the addition of Samuel I. Newhouse as a director of the corporation; substitution of Mr. Newhouse as President of the Corp. instead of Mitzie E. Newhouse, and the amendment was accepted.

Northwestern Ohio Broadcasting Co., Lima, Ohio—Granted motion to take depositions in re its application for a new station. (Docket 7557).

Deep South Broadcasting Corp., New Orleans, La.— Granted petition for leave to intervene in the hearing on application of KYW. (Docket 7325).

Skyland Broadcasting Corp., Dayton, Ohio—Granted motion to amend its application for a new FM station, so as to show the addition of ten new stockholders to the corporation; supply additional engineering information, etc., and the amendment was accepted. (Docket 7465).

Central Broadcasting Corp., Flint, Mich.—Granted motion for leave to amend its application for a new station (Docket 7531), so as to specify power of 500 watts instead of 1 KW nighttime; and the amendment was accepted.

Fort Worth Broadcasting Co., Fort Worth, Texas—Granted petition requesting leave to amend its application for CP (Docket 7593), so as to substitute John K. Crane for Mrs. Allis Skinner as an officer, director and stockholder of applicant corporation, etc., and the amendment was accepted.

Suburban Broadcasters, Dearborn, Mich.—Granted request for leave to take depositions in re its application for CP (Docket 7385), scheduled for hearing on June 19 in consolidation with application of Henry E. Fett, Dearborn, Mich.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted motion for leave to intervene in the hearing on application of WEAU, (Docket 7216).

Winterhaven Broadcasting Co., Winterhaven, Fla.—Granted motion for leave to take depositions in re hearing on its application for CP. (Docket 7311).

Central III. Radio Corp., Peoria, Ill.—Granted motion for leave to amend its application for an FM station (Docket 7458), so as to add to the application corporation minutes relative to a plan for increases in capitalization and adoption of program policies, and the amendment was accepted.

Hughes Productions, Div. of Hughes Tool Co., Los Angeles, Calif.— Granted motion for leave to amend its application for new television station (Docket 6550), so as to supply complete engineering information, including a request for Channel #4; specify exact transmitter site and DA system; revise information supplied as to programming and proposed service; change name of applicant to Hughes Tool Co., and make minor changes in corporate structure. Amendment was accepted.

John W. Davis, Portland, Ore.—Granted petition for leave to amend and remove application for a new station from hearing docket (Docket 7575); accepted amendment so as to specify the frequency 890 kc., with power of 250 watts, daytime only, instead of 1490 kc., with 250 watts power, unlimited, and removed application from hearing docket.

John W. Fitzgibbon, Roy Jarman and Temple V. Elmsen, Young City, Utah—The Commission, on its own motion, order application for CP (Docket 7531), be removed from the hearing docket. This application was set for hearing in a consolidated proceeding with application of John W. Davis above.

Liberty Broadcasting Co., Inc., Clearwater, Fla.—Granted petition for waiver of Sec. 1.384 of Commission's rules, and accepted written appearance of petitioner. (Docket 7592).

John C. Spearman, Washington, D. C.— Granted motion requesting proceeding scheduled for hearing June 10, requesting the Commission to change the location of the hearing now scheduled for Austin, and San Antonio, and ordered the hearing be transferred to Washington to be held on the same date as now scheduled.

WKBY—Central Broadcasting Corp., Richmond, Ind.— Granted petition for leave to intervene in the hearing on application of Fred O. Grimwood, Bloomington, Ind. (Docket 6753), and Sec. 1.384(d) of the Commission's Rules was waived.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Upon consideration of petition requesting leave to amend its application for CP so as to specify the frequency 910 kc., with 1 KW unlimited time, instead of 920 kc., with 1 KW, unlimited time, the Commission ordered the application (B5-P-3552, Docket 6566) dismissed without prejudice, subject to the right of later reinstatement under the provisions of the Commission's Public Notice of January 3, 1946.

Allen T. Simmons, Akron, Ohio—Granted motion for leave to amend application for FM station (Docket 7047), so as to incorporate into the application a modified engineering report as requested by the Commission: the amendment was accepted, and the Commission further ordered on its own motion, that the record in this consolidated matter (Dockets 7038, 7039, 7040, 7012, 7013, 7014, 7045, 7016, 7048 and 7522), be opened to allow admission therein of the above mentioned amendment only.

WMAS, Inc., Springfield, Mass.—Granted motion in part for continuance of consolidated hearing in Dockets 7363 and 7394, and continued said hearing from June 10 to June 29.
AM APPLICATIONS ACCEPTED FOR FILING

550 Kilocycles
KGY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Authority to determine operating power by direct measurement of antenna power.

690 Kilocycles
KGKB—Jas. G. Ulmer, Tyler, Texas—Construction permit to change frequency from 1490 to 690 kc., increase power from 250 watts to 1 KW night, 5 KW day, install new transmitter and directional antenna for day and night use and change transmitter location.

780 Kilocycles
NEW—North Carolina Central Broadcasters, Inc., Dunn, N. C.—Construction permit for a new standard broadcast station to be operated on 280 kc., power of 1 KW and daytime hours of operation.

790 Kilocycles
KVOS—KVOS, Inc., Bellingham, Wash.—Modification of construction permit (155-P-3625, which authorized increase in power, installation of new transmitter and directional antenna for day and night use, and change in transmitter location) for changes in directional antenna for day and night use and change transmitter location.

900 Kilocycles
NEW—Radio Kentucky Inc., Louisville, Ky. (P. 0, 565 Upland Road)—Construction permit for a new standard broadcast station to be operated on 900 kc., power of 1 KW and daytime hours of operation. Call letters WOOK requested.

940 Kilocycles
NEW—Midwest Broadcasting Co., Mt. Vernon, Ill.—Construction permit for a new standard broadcast station to be operated on 940 kc., power of 500 watts and daytime hours of operation. Amended to increase power from 500 watts to 1 KW.

980 Kilocycles
KMB—Midland Broadcasting Co., Kansas City, Mo.—Construction permit to mount FM antenna on top of East Tower of directional antenna system.

1000 Kilocycles
KTOP—KTOP, Inc., Oklahoma City, Okla.—Construction permit to change frequency from 1490 to 1000 kc., increase power from 250 watts to 1 KW night, 5 KW day, install new transmitter and directional antenna for night use, and change transmitter location.

1110 Kilocycles
NEW—W. Walter Tison, Tampa, Fla.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1490 to 1110 kc., change power and hours of operation from 250 watts unlimited to 1 KW daytime and change type of transmitter.

1200 Kilocycles
NEW—John Dawes Ames, Robert Francis Hurleigh and Nellie Paul Neilson, a partnership, d/b/a as Lake Shore Broadcasting Co., Evanston, Ill. (P. O, State Bank & Trust Co., 1503 Orrington St.)—Construction permit for a new standard broadcast station to be operated on 1200 kc., power of 5 KW and daytime hours of operation.

1230 Kilocycles
KNO—Valradio, Inc., El Centro, Calif.—Transfer of control of licensee corporation from Airfair Radio Corporation to Paul A. Jenkins, Kenneth H. Thornton, Edith J. Jenkins, Imperial Valley Publishing Co., Belle S. Hovey and Harry H. Hovey (1165 shares capital stock—77 1/2%—transfer also to include additional 335 shares capital stock—22 1/2%).

1280 Kilocycles
NEW—John H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Xaman, Robert E. Levy, Ross M. Sams and Davis Studding, Waco, Texas—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles
NEW—Joseph M. Viau, Woonsocket, R. I.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation. Amended to change proposed transmitter location.

NEW—WBBR—Watchtower Bible and Tract Society, Inc., Brooklyn, N. Y.—Construction permit to change power from 1 KW to 5 KW, install new transmitter and directional antenna for day and night. (1330 kc.)

NEW—David M. Segal & Henry N. Fones, d/b as Texarkana Broadcasting Co., Texarkana, Texas.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—Four States Broadcasters, Inc., Joplin, Mo.—Construction permit for a new standard broadcast station to be operated on 1310 kc., power of 5 KW day and 5 KW day, directional antenna and unlimited hours of operation.

NEW—Frederick Kennedy, d/b as Charleston Broadcasters, Charleston, S. C.—Construction permit to change power from 5 KW day and night to 5 KW night, 10 KW day, install new transmitter and change transmitter location.

NEW—Leon Wyszatycki, d/b as Huntington Broadcasting Co., Huntington Park, Calif.—Construction permit for a new standard broadcast station to be operated on (Continued on next page)
1540 kc., power of 5 KW and daytime hours of operation.

NEW—Peninsula Newspapers, Inc., Palo Alto, Calif.—Construction permit for a new standard broadcast station to be operated on 530 kc., power of 250 watts and daytime hours of operation.

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Construction permit to change frequency from 620 to 740 kc., power from 5 to 10 KW and install directional antenna for day and night.

NEW—Mansfield Broadcasting Co., 903½ N. Main St., Mansfield, Ohio—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation.

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine—Consent to transfer of control from Lester E. Hughes, Mrs. Lester E. Hughes, C. F. Grant, Mrs. C. F. Grant and Ernest A. Trite to Harold D. Gildden and Harry E. Uphrey. (1450 kc.)

NEW—Radio-Television of Baltimore, Inc., Baltimore, Md. —Construction permit for a new standard broadcast station to be operated on 1010 kc., power of 1 KW and daytime hours of operation.

NEW—The Vidalia Broadcasting Co., (M. F. Brice, W. O. Davis, R. E. Ledford and R. W. Sockwell in partnership), Near Vidalia, Ga.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation.

NEW—John C. McCormack, Allen D. Morris, George D. Wray, Sr. and Prentiss E. Furlow, a partnership d/b as Southwestern Broadcasting & Television Co., Albuquerque, N. Mex.—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

NEW—Rainier Broadcasting Co., Inc., Seattle, Wash.—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 50 KW, directional antenna and unlimited hours of operation.

CORRECTION

The Commission has issued a correction on an item which appeared in Reports on May 6, p. 301, referring to an application tendered for filing by Nathan J. Cooper. Make the location Morganton, North Carolina, instead of Morgantown.

Federal Trade Commission
Docket

COMPLAINTS

No Complaints or Cease and Desist Orders were issued during the past week by the Commission.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Plasta Model Co.—The Commission has approved a stipulation in which Harvey J. Krause, trading as Plasta Model Co., a distributor of model or miniature airplanes and boats at Flagstaff, Ariz., agrees to cease and desist from the use of the term "Plasta," or other word connoting or simulating the word "plastic," in his trade name or as part of the designation for his products; and from the use of the word "plastic," or other term of like meaning, as descriptive of his products, or in any manner which connotes that they are made of plastic as such term is understood by the industry and the purchasing public generally. (4153)

The Meat Products Co. and The Carpenter Advertising Co., both of Cleveland, Ohio, entered into a stipulation with the Commission to discontinue certain misrepresentations concerning a dry dog food known variously as Bresko, Bresko Dog Food, Bresko Granular Ration and Bresko Meatbone Crisp. The Carpenter Advertising Agency prepared and participated in the dissemination of advertisements for the product sold by The Meat Products Co. (63304)
CENSUS BUREAU REPORTS U. S. HAS NEARLY 34 MILLION HOMES WITH RADIOS

The number of dwelling units in the United States equipped with radios has increased by approximately five million since 1940. This figure is based upon information released last Thursday (16) by the Bureau of the Census which shows that nearly thirty-four million U. S. dwelling units were radio-equipped as of November, 1945.

There were nearly twenty-nine million radio homes in April 1940, according to statistics released previously by the Census Bureau. This represents an increase of more than 17 percent since 1940.

The latest figures show that last fall, before post-war radio production had gotten well underway, ninety percent of all dwelling units were furnished with at least one radio. This compares with 83 percent in 1940.

These facts and other facts concerning the national housing situation were obtained by the Bureau of the Census from a survey of about 20,000 households in 68 key areas, in conjunction with the November, 1945, Monthly Report on the Labor Force.

The bureau reports that there were 37.6 million occupied dwelling units last November. In April of 1940 the number totaled 34.9 million.

Electric power for lighting was found in 33.4 million or 89 percent of all occupied units. In 1940 less than 80 percent had electricity available.

The median household size declined from 3.3 persons in 1940 to 3.1 last November. (Ed. Note: This median can not be used to obtain total number of persons living in radio equipped homes.)

This five million increase in the number of radio homes occurred during a five year period which included all the war years. During most of these five years it was not possible to buy new radios.

Major theme of the census announcement was that the number of resident home owners has increased by nearly one-third since 1940.

COMMISSIONER WALKER RENOMINATED TO FCC

Commissioner Paul A. Walker, originally appointed to the FCC in 1934, was renominated by President Truman last Monday (13) for a seven year term. The nomination is now in the Senate Interstate Commerce Committee.

In point of service Mr. Walker is senior member of the FCC. He is a Democrat.

The commissioner was connected with the Oklahoma State Corporation Commission for fifteen years, serving as its chairman from 1931 until he joined the FCC.

A graduate of the Universities of Chicago and Oklahoma, Mr. Walker's background also includes two years of service as Referee with the Oklahoma Supreme Court, three years as Principal of the Shawnee, Oklahoma, High School and three years as faculty member at Oklahoma University.

LARGER BUILDING PROBABLE FOR NAB OFFICES

Progress was made last week toward obtaining more commodious quarters in Washington for NAB offices. The District of Columbia Board of Zoning Adjustment approved the proposed purchase and use by NAB of a building at 1771 N Street, N. W., in the same block as the present association offices. Zoning approval was necessary since this area is normally restricted to residential occupancy.

Present NAB Washington offices at 1760 N Street are not sufficiently large to accommodate the expanding staff. The Board of Directors at its recent meeting in Washington reaffirmed approval for purchase by the organization of new housing facilities.

It is expected that both the 1760 N Street and the 1730 Eye Street offices will be vacated and all Washington personnel housed at 1771 N Street if the new building is definitely acquired. Available office space would be approxi-

(Continued on page 385)
The Toronto (Canada) Globe and Mail in its issue of May 9th carried an editorial outlining the essentiality of a free radio to a democratic nation. Entitled "Threat to Liberty," it reads as follows:

"Our political system depends to an overwhelming extent on the uncontrolled distribution of information—facts, ideas, opinions, discussion—to the people in order that they may form their own judgments as to how their servants, those they elect, are fulfilling their functions; whether they are carrying out their duties well or badly.

"When a Government owns a radio system, and so controls the means of getting information to the nation, the temptation to misuse that instrument is ever present. This is true of the National Broadcasting Corporation, as it was true of the Wartime Information Board and other similar propaganda agencies.

"While Provincial Premiers have complained of the CBC and its abuses, now some are trying to set up a counter-radio system of their own. Saskatchewan's CCF Government wants permission from the Broadcasting Corporation to own and conduct radio stations. Manitoba already owns two radio stations. Mr. Duplessis of Quebec has had a measure passed which would set up a 'Radio Quebec.'

"Mr. Howe on Friday in the House of Commons announced that radio is the sole responsibility of the Dominion Government. Mr. Duplessis interprets that statement as meaning that his Government cannot have a radio system of its own or cannot set up a radio station. It would be better for the nation if no radio stations were owned by any Government, for the perils to our liberty are apparent when Governments own channels of information with the ever-ready opportunity of misusing them.

"It would be considered unthinkable to any democrat for the Government to own the press, or newspapers in particular. Then the press would not dare to fulfil its proper and necessary function of judging and criticizing the actions of Government. Yet some public men close their eyes to the danger of the Government owning radio stations. It should be obvious to them that the principle of freedom of the air is no different and no less important than that of freedom of the press.

"The trend toward Government ownership of the means of communications has already gone too far. Any extension of it into Provincial ownership of radio stations only adds to the present dangers."

RADIO MUST KEEP ITSELF FREE

A few weeks after issuance by the FCC of its program report, the Miami Herald editorialized as follows:

"The Federal Communications Commission has told holders of radio broadcasting licenses that it has the right to exercise through its licensing power a large measure of control over the program policies and program content of the stations.

"That amounts to censorship. It is an encroachment upon the rights of free speech.

"At the risk of losing your license and of being thrown out of business, it says, you do only those things which you are sure will please the Commission.

"Radio's conduct in the brief quarter century of its existence has been such as to make that stand by the Commission untenable. If, in fact, radio did not merit criticism from that viewpoint, then the Commission's position goes beyond the apparent purpose of the Congressional Act which set it up. From any viewpoint, the clear purpose of the Constitution to prevent restraint upon freedom of expression is out of harmony with this decree.

"It is especially significant in that it absorbs to a bureau power and influence that was never intended and which has not been delegated.

"Radio owes it to itself and to our free institutions to have the policy retracted; to keep itself free of the evils that go with conduct under duress."

MAY 20, 1946 — 384
mately double that provided by the present NAB building.

The building is currently being rented by the Canadian government for use as an annex to its embassy. Only a small embassy staff remains, however, and the Canadians have offered to cooperate in early evacuation when NAB's contract of purchase is finalized.

NAB's negotiations are being carried on with the United States Trust Company, New York, executors for the estate of William P. Eno, deceased.

District Meetings

FIRST DISTRICT ENDORSES NAB STAND ON FCC REPORT

With Director Paul W. Morency presiding, First NAB District Station Representatives met at Boston on Monday and Tuesday (13-14), and voted approval of NAB action, led by President Justin Miller, in regard to the FCC Report "Public Service Responsibility of Broadcast Licensees."

Broad interest in problems confronting the industry was shown by the wide attendance, with 41 of the 48 NAB member stations having representation at the meeting. In all, 85 station representatives, 40 guests from affiliated industries and executives from three non-member stations were present for the discussions, making a total registration of 125.

The Sales Managers Clinic, held on Monday morning, with E. E. Hill, WTAG, presiding in place of Herbert L. Krueger, who was originally scheduled as chairman, heard NAB's Frank E. Pellegrin discuss the work of the Broadcast Advertising Department.

First conference on the agenda for the afternoon was a discussion of the work of BMB. The speakers included Robert Elder, Assistant to the President, Lever Bros., Hugh M. Feltis, President of BMB, and Leonard T. Bush, Vice-President, Compton Advertising, Inc., representing the AAAA.

The second meeting on the afternoon's agenda, with David Carpenter, WKNE, presiding, covered the problems of small market stations. Mr. Pellegrin addressed the group.

The music problem was taken up in the closing meeting of the day. Industry leaders who took part in the discussion included Merritt Tompkins, vice-president and general manager, BMI; Bert Squire, SESAC; Alex Sherwood, Standard; Addison Amor, NBC Recording; Ed Kasper, Kasper-Gordon; John Langlois, Langworth; and C. E. Arney, Secretary-Treasurer, NAB.

On Tuesday morning, NAB President Miller addressed the meeting, speaking on future plans of the association. Speaking on future plans of the association.

The afternoon meetings started with the Program Managers Clinic, George Steffy, WNAC, presiding. Speakers included President Miller and Paul Morency. In discussing the general problems of program management, it was suggested that a manual be prepared by NAB in which the responsibilities and duties of a program manager would be delineated.

The program clinic was followed by an engineering session at which Richard Blackburn, WTHT, presided and reported.

President Miller led the next subject on the agenda, a general discussion of the music situation.

A suggestion to look into the rule regarding identification of transcriptions was acted on. The membership requested the creation of an NAB committee to examine the rule and work for its revision to the end that objections to such announcements be minimized.

The meeting moved toward adjournment with a report of the Resolutions Committee, read by John Shepard.

Resolutions

The broadcasters of the First District assembled at Boston, Massachusetts, May 13 and 14, passed the following resolutions:

Resolved, that the National Association of Broadcasters prepare a series of programs that will tell the true story of our system of broadcasting and its accomplishments; that the networks provide time for the broadcasting of these programs, and that transcriptions of the programs be prepared for distribution to the stations not carrying network programs.

Whereas, the Honorable Justin Miller has completed his first six months as President of the National Association of Broadcasters, and

Whereas he has won the confidence and admiration of broadcasters by his thorough grasp of broadcasters' problems and his aggressive approach to them, now therefore,

Be It Resolved, That the members of the First NAB District pledge to him their loyal support in his constructive leadership in the industry's constant endeavor to operate most effectively in the public interest.

Whereas, BMB has made excellent progress in its plans, and will be prepared to release its first study in 1946,

Therefore, Be It Resolved, that the First District of NAB heartily commend BMB for its work to date and urge all radio stations in the First District to become members.

Whereas, BMI was created by the Broadcasters, and is performing an invaluable service to Broadcasters, and

Whereas, the need for an aggressive BMI still exists,

Therefore, Be It Resolved that the Broadcasters of the First District of NAB hereby pledge to BMI their increased interest and support.

Resolved, that the broadcasters of the First District request the National Association of Broadcasters to use its best influence to procure legislation preventing labor organizations from initiating strikes in cases where the demands of such organizations for changes in working conditions are not clearly and fully set forth.

Legislation should also provide that no labor organization may refuse to permit its members to work until and unless it has bargained in good faith.

Resolved, that the broadcasters of the First NAB District wholeheartedly appreciate the accomplishments of the Rate Card Committee, whose work will so materially aid the industry in promoting the sale of radio time.

Whereas broadcasters of the First District have completed the largest and most constructive and interesting meeting in recent years,

Therefore Be It Resolved that sincere thanks for this meeting be extended to Kingsley Horton and members of his staff for their untiring efforts in making all necessary arrangements, and to the District Director, Paul Morency, for his untiring efforts both at this meeting and in behalf of the broadcasting industry as a member of the Board of Directors of the National Association of Broadcasters.

(Continued on next page)
Bay area activities, and Charles P. Scott, KTKC, Visalia, speaking on Valley Group activities.

Webley Edwards, KHON, Honolulu, spoke on "Radio Coming of Age in Hawaii." He told of the plans, presently under discussion, of five stations in Honolulu and three stations in adjoining islands forming an association to discuss and handle industry problems in the islands. Mr. Edwards also related some of his experiences in the Pacific as a war correspondent and the difficulties encountered early in the war in obtaining an even break for radio coverage as compared with wire services. He concluded his talk with a strong recommendation for a constant fight by radio interest to secure equal recognition with the wire services, man for man, in covering news events and special news conferences.

C. L. McCarthy, KQW, keynoted an open discussion on the subject of the Northern California and Southern California associations coordinating on state matters.

Bob Coleson, NAB western field representative, explained the functions of the recently established Western office.

Lincoln Deller, KXOA, explained the Joske Clinic and the Uniform Rate Card discussion.

A "Blue Book" panel consisting of Glen Shaw, KLX, Wilt Gurzenendorfer, KROW, Joe Carroll, KMYC, Gene Kelly, KCRB, and Blue Wright, KGO, discussed the FCC booklet. The members strongly endorsed President Justin Miller's statement issued immediately after the report was released and the subsequent steps taken to meet the situation.

The second day's meeting was devoted to discussion of the effects of the Lea Bill, with Bill Smullin giving a report of the results to date of the discussions held recently by radio industry and AFM groups. Open discussion was held on labor matters that confront the industry.

Glen Dolberg, BMI, gave a comprehensive review of the music situation since the birth of BMI in 1940 and a prediction of the "trend" within the coming years ahead.

A portion of the morning meeting was devoted to a discussion of NAB's support of an overall radio awards project, Art Westlund, KRE, presiding.

The second day's meeting closed with the broadcasters of the 15th District extending their sincere thanks to radio station KOH and Bob Stoddard for the splendid arrangements which were made to accommodate the meeting.

Registration

Art Westlund, KRE; Keith Collins, KJM; Leo Ricketts, KFBB; Lincoln Deller, KXOA; Joe Carroll, KMYC; Wilt Gurzenendorfer, KROW; Merv McCabe, KFRC; Ralph Fitkin, KHON; Blue Wright, KGO; Ray Rhodes (Raymer); Bob Stoddard, KOH; Gene Kelly, KCRB; Webley Edwards, KHON; Mrs. Ruth Finley, KSRO; Bob Street (Bedine); C. L. McCarthy, KQW; Jerry Akers, KSAN; Glen Dolberg, BMI; Sheldon Anderson, KKO; Dave Williamson (Homer Griffith); Cliff Engle (C. P. MacGregor); Ralph Brunton, KQW; Bob Coleson, NAB; Glen Shaw, KLX; John Elwood, KPO; David Sandberg (Lewis Avery); Ed Hadley, KSRO; George Ross, KDON; Pete Emery, KKO; E. Peterson, McClatchy Broadcasting Co.; Bill Smullin, KIEM; and Charles P. Scott, KTKC.

FINAL DISTRICT MEETING BACKS MILLER

Concluding the series of NAB district meetings which began in January, the Third District met in Philadelphia on Thursday and Friday (16-17), and made unanimous the industry's formal approval of President Miller's policies and actions since he became head of NAB last October.

With 111 registrants present for the sessions, NAB members pledged continued support to Mr. Miller in his actions regarding the FCC report.

(Continued on next page)
The Third District acted as host to representatives of the Federation of Commercial Broadcasting Stations in Australia, Mr. Alfred C. Paddison, president, and his associate Mr. James McCauley. Mr. Paddison, speaking at the luncheon meeting on Friday, appealed for resistance on the part of broadcasters against efforts to put governments of the world into international short wave broadcasting. Mr. Paddison also explained to those present the types of service offered to Australian listeners by commercial stations and the separate operation of government owned stations.

Representing NAB at the meeting in addition to President Miller were C. E. Arney, Jr., secretary-treasurer, and Frank E. Pellegrin, director of Broadcast Advertising.

Complete story with resignation and text of resolutions will be carried in next week's REPORTS.

**Legal Department**

**FCC Applies AVCO Transfer Rule**

Although the FCC's proposed transfer rule, which was discussed in the AVCO case, has not been finally enacted and its legality has been questioned, the Commission has followed it in two recent cases. (See current NAB REPORTS, pp. 200 and 311).

In case of an application for consent to transfer a license the proposed rule would require the consideration of all competing bids in order to determine whether the prospective licensee is the best qualified to operate in the public interest.

In the first case there was an application for the voluntary transfer of Station WBRK, Pittsfield, Mass., to the Western Massachusetts Broadcasting Company, a corporation controlled by the owners of Pittsfield's only daily newspaper. Public notice of the contemplated transfer having been issued, Leon Padolsky, a radio engineer of Pittsfield filed a competing bid for WBRK on the same terms. The Commission considered both requests together and found that both applicants were legally, technically and financially qualified for a license. Consequently, it ordered a consolidated hearing to determine "which application, if granted, would better serve the public interest."

In the second case there was an application for the voluntary assignment of Station KROY in Sacramento, California to Harmco, Inc., the licensee of KARM, Sacramento. After public notice Luther Gibson, a newspaper publisher of Vallejo, California, and the licensee of Station KHUB, Watsonville, California, filed a competing bid. After finding that both applicants were legally, technically and financially qualified, the Commission granted the application of Harmco on the ground that such grant "would result in a greater diversification of the ownership of the media for the dissemination of information and entertainment."

The procedure followed in these cases was first discussed by the Commission in the AVCO Case, decided August 2, 1945, Docket No. 6767, and was published December 13, 1945 as Proposed Rule Section 1.388. (11 Fed. Reg. 890). At a hearing on April 17, 1946, NAB, by its General Counsel, Don Petty, filed a brief and argued orally in opposition. There has been no further action by the Commission except the decisions discussed.

**Television**

**Commission Announces Nine TV Grants**

The granting of nine applications for television stations was announced Friday (17) by the FCC. The grantees are:

As a result of these grants there are now 15 cities in the United States where television stations are either in operation or have been authorized. In addition to the nine cities listed above, there are outstanding authorizations for three stations in New York City, one station in Philadelphia, four stations in Washington, one station in Schenectady, three stations in Chicago and two in Detroit.

Seventy-nine applications remain on file, the Commission having dismissed Thursday (16) the application of J. E. Rodman, Fresno, California at his request. Of these 41 have been set for hearing as follows:

<table>
<thead>
<tr>
<th>City</th>
<th>No. of Applicants</th>
<th>No. of Channels</th>
</tr>
</thead>
<tbody>
<tr>
<td>New York</td>
<td>8</td>
<td>4</td>
</tr>
<tr>
<td>Los Angeles</td>
<td>8</td>
<td>7</td>
</tr>
<tr>
<td>Philadelphia</td>
<td>6</td>
<td>3</td>
</tr>
<tr>
<td>San Francisco</td>
<td>7</td>
<td>6</td>
</tr>
<tr>
<td>*Pittsburgh</td>
<td>2</td>
<td>4</td>
</tr>
<tr>
<td>*Cleveland</td>
<td>4</td>
<td>4</td>
</tr>
<tr>
<td>*Baltimore</td>
<td>2</td>
<td>5</td>
</tr>
<tr>
<td>Lancaster</td>
<td>2</td>

</tr>
<tr>
<td>Toledo</td>
<td>2</td>
<td>1</td>
</tr>
<tr>
<td><strong>41</strong></td>
<td><strong>34</strong></td>
<td></td>
</tr>
</tbody>
</table>

As a result of withdrawals which occurred after the applications were designated for hearing and which have previously been announced, three of the above cities indicated by an asterisk now have a sufficient number of channels for all applicants and hearings may not be necessary.

If the hearings are cancelled in these four cities there would remain 33 applications in 6 cities which would have to go to a hearing because in each of the six cities the number of applications now on file exceeds the number of available frequencies. The hearing in one of these cities (Los Angeles) begins today (20) and hearings for New York City, Philadelphia and San Francisco have been scheduled for June 3, June 17 and July 15, 1946, respectively.

This would leave a total of 46 applications which might be possible to grant without a hearing.

If all of the 46 pending applications are completed so as to propose satisfactory engineering plans and if the Commission finds all applicants qualified, it would on the basis of applications now on file be possible to make grants without hearing in the following cities:

Albuquerque, Ames (Iowa), Boston, Bridgeport, Buffalo, Chicago, Cincinnati, Cleveland, Columbus, Dallas, Dayton, Indianapolis, Jacksonvile, Johnstown (Pa.), Kansas City, Louisville, Nashville, New Orleans, Omaha, Pittsburgh, Riverside (Calif.), Rochester (N. Y.), St. Louis, Scranton, Seattle, Stockton (Calif.), Wilkes-Barre (Pa.).

This means that on the basis of pending applications there are plans to put television stations in a total of **48**

(Continued on next page)
The Department of Broadcast Advertising’s beer study, “HERE’S HOW,” has become a demand item since its release early this month. Due to mailing list changes, personnel changes at various stations, etc., some managers write that their copy has not been received.

Sales managers who have failed to receive a copy of the booklet are urged to bring this matter to the attention of personnel changes at various stations, etc., some managers write that their copy has not been received.

Typical of the comment that has been received, are the following excerpts from a few of the letters received to date:

“...This is one of the most informative pieces of literature we have ever received. Will you kindly send us an additional six copies of ‘HERE’S HOW’.”
Guy E. Yeldell, National Sales Manager, Radio Station KSD, St. Louis, Mo.

“...Thanks for sending the copy of your folder. ‘HERE’S HOW’, I found it quite interesting and am sure that your member stations can use it to good advantage. I was particularly interested in your section on ‘Do’s and Don’t’s’. I wish that more of the media would stress some of these points of good and bad public policy for their advertisements ...”
Eldon G. Burton, President & General Manager, Advertising Federation of America, New York, N. Y.

“...You are to be highly complimented on the excellence and worth of this splendid brochure. This office would appreciate receiving 20 copies of ‘HERE’S HOW’.”
Thomas R. Rooney, Sales Promotion Manager, Radio Station WBMM, Chicago, Ill.

“...‘HERE’S HOW’ has just been received and read with great interest. In order that we may make full use of the valuable information contained in it as well as its vast promotional value, we should like to have 12 additional copies for distribution.”
Frank E. Koehler, Manager, Radio Station WSLS, Roanoke, Va.

Available data and information relative to group selling is being secured by the NAB Small Market Stations Division. A number of regional networks, consisting basically of small stations, is showing definite progress in attracting national and regional advertisers. In pursuing further its plan to be of special service to the many small stations across the nation, this NAB division is encouraging its members to develop the group selling plan. Where a number of small stations are grouped together, handled by one main office, the Small Markets Division points out that it is considerably easier for national time buyers to place business with small outlets. One method for operating a group of small outlets is that used by the Iowa Tall Corn Network.

At the request of NAB, George W. Weber, manager of the Network, has furnished the following information on how a group selling plan works in his state. Mr. Weber states:

“The Iowa Tall Corn Network was formed for the purpose of combining selling on the part of all of the eight radio stations. The network is controlled by an executive committee made up of the managers of the eight stations, who delegate responsibility to the network manager ...”

“It was quickly recognized that the most efficient selling could be conducted if all national and area business were handled under the same arrangement. Therefore, the eight radio stations turned over their responsibility of selling dates their contracts with national representatives, and entered into a contract with the Tall Corn Network management to handle national and area business for the network, and for the individual radio stations. The network manager in turn was privileged to enter into a contract with a representative agreed upon by the stations to represent him under the terms of his contract in areas to be agreed upon. Such an agreement has been entered into with Donald S. Cooke, Incorporated, to represent the network and the individual radio stations in the area east of the Mississippi River. The area west of the Mississippi River is handled by the Tall Corn Network manager from his Des Moines offices. The plan is working out in a splendid way.”

The Iowa Executive continues:

“Headquarters are maintained in Des Moines for the (Continued on next page)
LOW COST TRANSCRIBED SHOWS PLEASES WFOR

C. J. Wright, general manager WFOR, Hattiesburg, Mississippi, has written to NAB Small Market Stations Division the following:

“We read with a great deal of interest in the May 13th NAB REPORTS the article on syndicated transcribed programs for small stations.

“For several years I have attempted to drive home to the transcribed program producers the fact that small stations are unable to compete with regional and other stations in larger cities in the matter of high-cost programs.

“We are quite sure that, at the prices offered by Kasper-Gordon, Inc., the small market stations will be able to sell shows, and we believe that it is up to these stations to take advantage of such offers. As a matter of fact, if sufficient stations do avail themselves of this service, it is naturally going to encourage other producers to reduce their prices to the point where the small market stations will be able to use their shows also.

“Please accept our sincere appreciation for your untiring efforts in behalf of the little fellows.”

NEWSPAPER OF THE AIR

Election Ordered at KWKH

In another case involving Station KWKH, Shreveport, Louisiana, the NLRB on May 8 issued a decision ordering an election for or against Local 194 of the IBEW among the five announcer-control operators. The studio engineer, the program director, and all supervisory employees were excluded.

Employee-Employer Relations

NLRB ORDERS BARGAINING ELECTIONS

The National Labor Relations Board has ordered separate collective bargaining elections to be held within 30 days among the staff announcers and technicians of Radio Station KTHT, Houston, Texas. According to the NLRB order, dated April 30, announcers will vote whether or not they want to be represented by AFRA, and the technicians will vote for or against representation by Local 716 of the IBEW.

In the bargaining unit of announcers the board included the program director on the ground that he frequently appears before the microphone and is not a supervisory employee as claimed by AFRA; also included were the special events and sports announcer who performs two daily 15-minute shows and relieves staff announcers. Excluded from the unit were the traffic manager, who spends 15 minutes daily announcing vital statistics but was found to perform primarily, clerical duties, a commentator who was held not to be an employee of the station, the station manager and all other supervisory employees.

By agreement of the station and the IBEW, the bargaining unit for technicians was defined to include all technicians, including the assistant engineer, the maintenance engineer, transmitter operators, remote broadcast operator, and control board operators, but excluding the chief engineer and all other supervisory employees.

In both instances the board used its customary definition of the term "supervisory employee," which is that the term includes all employees "with authority to hire, promote, discharge, discipline, or otherwise effect changes in the status of employees, or effectively recommend such action."

News Clinics

NEBRASKA BROADCASTERS DISCUSS LOCAL NEWS COVERAGE

One of the best testimonials on the value of local news to come out of the NAB-Nebraska Broadcasters Radio News Clinic, in Kearney, May 11, was provided by L. L. Hilliard, owner-manager, KGKY, Scottsbluff.

Mr. Hilliard's experience was documented for clinic presentation at the request of John Alexander, general clinic chairman and manager KODY, North Platte, where a last minute emergency arose which prevented his attendance.

Had Mr. Hilliard been present the state would have scored a perfect attendance record.

Because of its special interest and value to stations in all parts of the country, most of the Hilliard story is presented below:

Local News

"The value of a strictly local news program to a small market radio station is brought into sharp focus in the..."
history of local news at KGKY in Scottsbluff. Inaugurated in 1938, local news soon became the program to which Valley residents listened. After eight years it is still the most popular in spite of the fact that KGKY has the twenty-four hour UP Leased Wire Service and most of the popular programs from the Columbia network. Nor, is it popular because of the talent and unusual ability gathered, wrote, and delivered it. At least five different persons have gathered and written the material. Many more have done the reading. Local people like to hear local news.

"From the advertisers' standpoint local news is a natural. Back in 1938 selling radio wasn't as easy as today and local news in competition with national news didn't have much sales appeal. At KGKY local news was sold to two sponsors; they alternated evenings. Those same two sponsors are still sponsoring our local news. Rates have been raised twice and each sponsor has a standing order for the balance of the program should the other drop out. New spot advertisers always want their spot placed right after or just before local news.

"Material used is the regular run-of-the-mill courthouse, police court, hospital, Chamber of Commerce, county agent, City Council, items and the like. Seldom is a story of any importance missed. No social or church news is used unless of unusual importance.

"The style is the short, matter-of-fact radio type, without editorial comments.

"Arrangement has developed into a more or less set pattern, opening with the weather report which is followed by the most important story of the day. The final story is one with a human interest angle if available.

"The importance of having all the news first is stressed at all times. Should a story be missed, that story always gets front page prominence in the local daily the next morning. Libel and slander are watched very carefully. In only one instance was trouble encountered. A retraction did the job. Incidentally, a signed statement was gotten from the party.

"Drunkenness and drunken drivers are never withheld, in fact very few items have ever been withheld. Everything goes! That's what makes a newscast.

"In conclusion, local news is the best program on this station. We give it the most attention, but it pays dividends beyond the dollars it brings in. Every small market station should exploit this type program.

Other special subjects of interest to broadcasters were presented by:

Soren Munkhoff, news manager
WOW—Omaha
"Radio News Writing and Re-writing"
William Ray, manager, news and special events
WMAQ—NBC—Chicago
"Mechanical Devices for Augmenting News Coverage and Presentation"
Virgil Sharpe, news editor
KOIL—Omaha
"Balance Between News Stories Today as Compared with the War Years"
Earl Williams, station manager
KFAB—Lincoln
"Farm News for Radio"

Other speakers were Paul Bogen, William Hice and George Round, of the University of Nebraska, and the Rev. R. C. Williams, Creighton University. Arthur Stringer, secretary, NAB Radio News Committee, participated in the discussions.

University of Nebraska Committee

Mr. Alexander appointed Bill Wiseman, WOW, and Art Thomas, WJAG, Norfolk, a committee of two, to work with the University of Nebraska Journalism Department.

MAY 20, 1946 — 390

Lloyd Thomas Is Host

Local arrangements were handled by owner Lloyd Thomas, of KGFW, and his brother, Station Manager E. Anson Thomas. An automobile tour was included in their plans.

Registration

The following attended the Radio News Clinic and the NAB Annual Meeting, May 10 and 11: Art Thomas, WJAG, Norfolk; Lloyd C. Thomas, E. Anson Thomas, Arch Zabel, Bob Parkins, Peg Biber, Norma Applegate, KGFW, Kearney; Harry Burke, KFAB, Omaha; C. Earl Williams, KFAB, Lincoln; Duane L. Watts, KHAS, Hastings; Harry B. Peck, Fred Hess, Jr., KFOR, Lincoln; John Alexander, Ed Launer, Deane Flett, KODY, North Platte; Gordon Gray, KOIL-KFOR, Omaha; Bill Martin, Wick Heath, Rex L. Latham, George C. Kister, KMMJ, Grand Island; Bill Wiseman, Soren Munkhoff, Lyle DeMoss, WOW, Omaha; Bill Ross, Lumir Urban, KORN, Fremont; B. C. Corrigan, KOWH, Omaha; Dick Welna, KBN, Omaha; Virgil V. Sharp, KOIL, Omaha; William Ray, NBC, Chicago; George Round, Paul Bogen, William H. Hice, Romulo R. Soldevilla, William C. Line, University of Nebraska, Lincoln; Rev. R. C. Williams, S. J., Creighton University, Omaha; Gaylord P. Godwin, United Press, Omaha; Arthur Stringer, NAB, Washington, D. C.

VALUE LOCAL NEWS HIGH WISCONSIN STATION MEN AGREE

Agreeing that local news rates the highest listener attention of all local origination programs, 38 representatives of Wisconsin radio stations, meeting in Madison, Wis., May 14, determined to expand local coverage of news events in their areas and expand, wherever possible, their local news staffs by hiring qualified radio newsmen.

The meeting was a news clinic, sponsored by the 20 Wisconsin stations who are members of the league of Wisconsin radio stations, with WIBA in Madison acting as the host station. Ken Schmitt, WIBA general manager and secretary-treasurer of the league, presided.

The sessions in the day-long meeting were open to discussions by radio station managers and newsmen of the problems confronting the local station in its news coverage and solutions found by the stations. Speakers included Prof. Burton L. Hotaling, University of Wisconsin department of journalism; Prof. Einer O. Hammer, Wisconsin department of agriculture; Bill Ray, director of news and special events for WMAQ-NBC; and Arthur Stringer, secretary of the NAB radio news committee.

Wisconsin's Lt. Governor Oscar Rennebohm was introduced at the clinic by Ben Laird, president, Green Bay Broadcasting Company.

The practical problems of Sunday wire news weaknesses, unavailability of qualified newsmen, the handicaps of release dates based on newspaper deadlines vied for attention with less tangible problems such as what is good taste and what does the farmer want in news that differs from the urban dwellers' desires.

Value of Local News

A poll of the station representatives indicated that local news has in the past played a varying part in the news diet offered the Wisconsin radio stations.

There were some, mostly the smaller stations and the newer ones, which had made little effort to gather any but the most routine police and emergency news locally.

Others, such as WIBA in Madison, had a long history of featuring local news dating back to the earliest days of

(Continued on next page)
radio. These stations reported that they were hitting for a balance of about half local news, half wire news on most of their major newscasts.

Still others, and some of these were small stations such as WDAU in Wausau and WIGM in Medford, featured complete newscasts made up of community news.

WIGM’s “Community News” show, in a city of between 2,000 and 3,000 population, won the particular attention of the group. The 250 watt station puts out a 15-minute news program each day, featuring only that news gathered by News Editor Homer Porter and his staff of four string correspondents, “all women with a nose for news,” Porter pointed out.

The news reflects the same interest a small community has in its weekly newspaper—births, deaths, socials, personals—and headline stories too, occasionally, involving accidents and other spot developments in the community.

News Editor Porter told the group he works five hours a day preparing the 15-minute show, and spends the rest of the day writing commercials and announcing. Station owner George Meyer started the program more than two years ago as station-sponsored, but for more than a year it has been fully sponsored; one sponsor for each of the six nights it is on the air.

The developing interest in local news in Wisconsin was demonstrated by WKBH, La Crosse, which only this year hired its first full-time news editor, and now is setting up a complete net of string correspondents. WKBH Production Manager Ray Plamadore reported that the station now uses local news on all its seven sponsored daily station-originated newscasts.

A Sunday commentary, given by WKBH News Editor Paul Ziener, handles background for the understanding of local and other news events.

Plamadore told the group of his success with “news memos,” a written excerpt from radio news scripts, sent to the local people mentioned prominently in the news.

The group passed two resolutions aimed at improving radio news coverage by divorcing it from the restrictions built up by the press.

**Request Immediate Release of News**

After discussing the custom built up over many years of releasing government news some time after the actual news is handed out in order to permit newspapers to meet rigid deadlines, the group agreed to send the following resolution to news sources and agencies:

> “Representatives of the Wisconsin League of Radio Stations, meeting in Madison, Wis., May 14, unanimously resolved to exert all possible influence on news sources and agencies to abandon as far as practicable, the setting of release dates on news releases. It is the opinion of this group that all news should be available for broadcasting the moment it is secured by reporters.”

**Ask Better Sunday Wire Service**

In another action, after hearing representatives of UP and PA state frankly that Sunday wire news coverage is admittedly sketchy, the group unanimously voted to petition the wire services as follows:

> “Representatives of the Wisconsin League of Radio Stations, meeting in Madison, Wis., May 14, decided unanimously to petition your agency for an investigation of the possibility of your providing complete Sunday news service. We feel that news does not wait for Monday to happen, and urge you to make every effort to provide the 20 Wisconsin radio stations included in this organization with complete Sunday coverage including regional news splits which would provide Sunday regional coverage while the news is breaking.”

Charles E. Ahrens, division radio news manager for the United Press in Chicago, told the group that every effort will be made to improve Sunday coverage. He pointed out, also, that UP is hiring more newsmen as correspondents.

Russ G. Winnie, manager of WTMJ, Milwaukee, commented at the close of the radio news clinic:

> “It was a darn good meeting and I got a lot out of it.”

Plans for this clinic were laid Feb. 27 at the Milwaukee meeting of the league, which was attended by NAB District Director Les C. Johnson, general manager, WHBF, Rock Island, Ill.

**Attendance**

The following attended the radio news clinic:

Roy Vogelman, WHA, Madison; Harold Newcomb, WRJN, Racine; Allan Curnutt, WOSH, Oshkosh; W. E. Walker, WSAU, Wausau and WMAP, Marinette; Ben F. Hovel and Keith D. Jacobs, WSAU, Wausau; K. F. Schmitt, Frank Bignell, Robert Taylor, Larry Clark, H. A. Johnson, Peg Bolger, Marvel Ings, WIBA, Madison; Charles E. Ahrens, UP, Chicago; G. P. Richards, WHBL, Sheboygan; Edmund Steeves, UP, Minneapolis; Pay Hoy, UP, Milwaukee; Robert R. Savage, WTAQ, Green Bay; Robert C. Nelson and Ben A. Laird, Green Bay Broadcasting Co. (CP); Homer Porter, WIGM, Medford; Bettina Klaus, WMAP, Marinette; Emery W. Martin and Lynn N. Fairbanks, KFIZ, Fond du Lac; Woods O. Dreyfus and Jack Raymond, WISN, Milwaukee; R. G. Winnie and Jack E. Krueger, WTMJ, Milwaukee; Prof. Burton Hotaling, University of Wisconsin, Madison; Eimer O. Hammer, WBLB, Stevens Point; William Ray, WMAQ-NBC, Chicago; J. L. Gallagher, WHBV, Appleton; R. E. Plamondon, Paul Ziener and John Sullivan, WKBH, La Crosse; and Wally Stone, PA, Minneapolis.

**General**

**KIWANIS INTERNATIONAL SALUTES RADIO**

The second annual observance of Kiwanis Radio Week, which ended Saturday, was marked by wide recognition of the service performed by radio broadcasting in the United States and Canada.

Hamilton Holt, president of Kiwanis International, said that the week was established “to pay tribute to the radio industry for its invaluable service.”

> “The ether waves,” said Mr. Holt, “in emergencies, and disasters, have carried warning messages and rescue instructions. Speaking of his convictions in regard to American enterprise, he maintained that “as long as no government agency or propagandist group is permitted to control the air waves, radio will continue to serve as a free channel of public information.”

President Miller in an article in the Kiwanis Magazine (May) wrote: “As Kiwanis International observes Kiwanis Radio Week, I hope you will turn your attention not only toward past and future accomplishments, but to the necessity of building a firm foundation in freedom for this newest and fastest growing of informational media. We of radio are grateful for this tribute you are paying to our industry, and re dedicate ourselves to continued improvements in our public interest performances.”

NAB executives speaking at Kiwanis meetings included A. D. Willard, Jr., executive vice president; Don Petty, general counsel, and Robert T. Bartley, director of government relations.

Mr. Willard, guest of Kiwanis in Cleveland, Thursday ‘(16), spoke on the subject Advertising, Guardian of Freedom. The Cleveland organization is headed by Harry Camp, Commercial Manager, WGR.

(Continued on next page)
Mr. Petty addressed a meeting in Roanoke, Va., Tuesday (14), at which the local club members entertained four other Kiwanis clubs from the area. Ray Jordan, president of the Roanoke club and manager of WDBJ, introduced Mr. Petty, who explained the significance of the FCC report and traced the growth of federal regulation of radio.

In his talk, Mr. Petty mentioned that it was accepted fact that the United States has the “best radio” because this country has the greatest freedom.

Mr. Bartley made two talks to Kiwanis groups in Louisiana at the Bossier-Caddo Club on Wednesday (15) and in Shreveport on Thursday (16). Mr. Bartley stressed the importance of maintaining freedom of radio.

PAT-ON-THE-BACK DEPARTMENT

Robert T. Mason, president of WMRN, Marion, Ohio, and member of the NAB Small Market Stations Committee, recently expressed his approval of the association’s operation in a letter to Executive Vice President A. D. Willard, Jr. Mr. Mason wrote:

“I have just returned from another NAB meeting and am counting up the cost in time and money compared with the benefits and values received.

“It is always amazing to me to check over the direct and indirect helps which accrue from direct contact with NAB staff members and from the confidential discussion of mutual problems by broadcasters.

“I have made the statement and will make it again that I sincerely feel we receive one hundred dollars in return for every dollar of dues.

“Sometimes that may seem quite exaggerated, but we have been able to trace direct business as well as improvement in forms, programming, controls, and the other facets of broadcasting through the invaluable assistance of NAB.

“My wish is that every broadcaster could participate in committee activities.”

DEBATE FCC REPORT AT FORUM

In a forum sponsored by the Independent Citizens’ Committee of the Arts, Sciences and Professions in New York on Monday (13), A. D. Willard, Jr., executive vice president of NAB presented the radio broadcasting industry's views regarding the FCC’s program report.

Defending the publication was Commissioner Clifford J. Durr. With Norman Corwin acting as moderator of the discussions, other speakers included William B. Lewis, vice president and director of radio, Kenyon & Eckhardt; Thomas Carskadon, American Civil Liberties Union, and Dick Redmond, program director, WHP, Harrisburg, Pa.

HOUSE COMMITTEE HEARS REQUEST FOR LAW REQUIRING SALE OF TIME FOR RELIGIOUS BROADCASTS

The House Committee on Un-American Activities last Tuesday (14) heard complaints against the policy of stations which refuse to sell time for religion broadcasts.

Although reporters were not admitted to the committee session, the Rev. Harvey H. Springer, pastor of the First Baptist Church of Englewood, Colo., stated later that the three ministers who appeared were seeking legislation which would assure their right to purchase time.

After the meeting, Chairman Wood (D-Ga.) said the committee would take no immediate action because so few members were present but it might make a statement later.

SPONSOR DETERMINATION RESPONSIBILITY EXPLAINED

The FCC on Friday (17) made public a letter written at the direction of the Commission by T. J. Slowie, Secretary, to the Albuquerque Broadcasting Company, Albuquerque, N. M., dated May 16. The letter outlines the responsibility of station licenses in determining the true identity of persons paying for commercial broadcast time. The Commission wrote:

“This will reply to your letter . . . requesting interpretations of Sections 317 and 315 of the Communications Act of 1934 . . .

“You ask to be advised as to (1) the nature of the burden of investigation that is imposed upon it (a licensee) by Section 317 with respect to determining the true identity of the person or persons directly or indirectly supplying funds for the payment of charges for the use of such broadcast time, and (2) whether a violation of the ‘equal opportunity’ provisions of Section 315 is committed if the licensee imposes different requirements of proof of source-of-funds upon competing candidates.

“As you recognize, Section 317 of the Act makes mandatory an announcement of the identity of a sponsor in all cases where a broadcast station receives — or will receive consideration. This requirement has been implemented by Section 3.409 of the Commission’s Rules, a copy of which is enclosed for your convenience.

“The observance of these provisions is considered to be the duty and responsibility of each station licensee, and it is incumbent upon it to take all reasonable measures in this connection. As to what may be reasonable depends, of course, upon the circumstances in each case. For example, if a speaker desires to purchase time at a cost apparently disproportionate to his personal ability to pay, a licensee should make an investigation of the source of the funds to be used for payment. This is particularly true in a case where the speaker has previously appeared on similar broadcasts sponsored by others, and announces the fact that he is resuming his broadcasts.

“The fact that in particular cases a station may be required to make a different type of investigation to determine the facts relating to identity of sponsorship, is not considered to violate the ‘equal opportunity’ provision of Section 315 of the Act.

“The Commission appreciates the fact that a broadcast station may experience some problems in fulfilling its responsibility under Section 317 of the Act. However, the possibility or the occurrence of such difficulties does not justify a station licensee in adopting a general rule that it will not make time available for the discussion of controversial subjects or for broadcasts by duly qualified candidates for public office. Nor would the fact that an independent investigation is necessary in a particular case, automatically relieve a station from its responsibility to make its facilities available to the person in question. Such refusal is inconsistent with the concept of public interest established by the Communications Act as the criterion of radio regulation.

“The Commission’s reasoning in the WHKC case (Docket No. 6631) is applicable in this situation. The Commission stated in that case that ‘Competent management should be able to meet such problems in the public interest and with fairness to all concerned. The fact that it places an arduous task on management should not be made a reason for evading the issue by a strict rule against the sale of time for any programs of the type mentioned.’”

CP’S GRANTED FOR RADIO TELEPHONE STATIONS

The FCC on Tuesday (14) granted construction permits to the Mountain States Telephone and Telegraph Company (Continued on next page)
and to the Southwestern Bell Telephone Company for Experimental Class 2 radio stations to be used for radio telephone service.

The mountain states organization, authorized to handle commercial traffic by the permit, plans to determine the practicability of the use of radio in the proposed rural telephone service. The Southwestern company's CP is reported to be the first grant for common carrier mobile telephone service.

The proposed mountain states system is to operate in a sparsely populated part of Colorado, where wire lines are not available. A central office fixed station will be located at Cheyenne Wells, Colo., and four subscriber fixed stations within 20 miles of the central office. A sixth station will be operated as a portable transmitter.

Frequencies have been assigned on a temporary basis and include: 44.50 Me, 60 watts at central fixed station; 48.30 and 48.50 Me, 10 watts, at subscriber stations, unlimited time.

The licenses for operation of the mobile service, cover permits for a land station, and for 10 of 150 authorized mobile units to be used in developing a common carrier type of Urban General Mobile Service in the St. Louis, Mo., area.

PUBLIC INTEREST PROGRAMMING

RED CROSS DRIVE SPURRED BY RADIO

The radio industry has been credited with a record-breaking contribution to American Red Cross drives by Basil O'Connor, Chairman of the organization, who said that coverage by radio in 1946 "is the greatest listener appeal ever made by the industry for any non-government agency."

NAB cooperated with the Red Cross in mailing to stations dramatized and spot transcriptions. Almost 1,000 stations participated in the campaign in scheduling transcribed programs and spot announcements, and more than 846 national network programs featured Red Cross during the month of March, the campaign's high point. 125 stations throughout the nation broadcast daily in Spanish, Polish, Italian and Jewish Red Cross fund drive appeals.

According to the Red Cross, over 3½ billion listener impressions were provided by the radio broadcasting industry in the 1946 campaign.

CHIQUITA BANANA PLUGS FAMINE EMERGENCY

United Fruit Company's "Chiquita Banana" transcribed spot series is currently being devoted to appeals for food conservation. Special lyrics concerned exclusively with the famine emergency have been written for the tune which has become famous for its musical exhortations that bananas should ripen outside the refrigerator.

The same voice, that of Elsa Miranda, is used for the public interest series, which has been placed widely on a commercial basis by the account agency, BBDO.

The agency offers copies of the transcription to any stations which might be interested in using the musical transcriptions on a sustaining basis or for outside civic meetings. Requests should be addressed to BBDO, 383 Madison Avenue, New York 17.

KLZ DOES PUBLIC INTEREST PROMOTION

"Foreign Reporter" is title of latest mailing piece distributed to over 2,000 civic leaders and others by KLZ, Denver.

Promoting station's public interest activities "Foreign Reporter" deals with weekly broadcast over the station by Dr. Stuart Cuthbertson, director of Foreign Relations at the University of Colorado.

Program, now rounding out that a full year on KLZ, is presentation of the university in cooperation with the Foreign Policy Association of New York and the Rocky Mountain Radio Council.

AD COUNCIL NETWORK CAMPAIGNS

The following three public interest campaigns have been given top priority on Network Radio Allocation Plans during the week of May 27th-June 2nd, by The Advertising Council and the Media Programming Division of the OWMR. A brief resume of each Fact Sheet is given below:

Fighting Inflation

A critical point has been reached in the battle against rising prices. Basically, the present inflationary danger is a continuation of the war situation and arises out of it. Current demand for goods, backed up by high national income and 150 billions in war-time savings, is the greatest in history—while the supply of goods, though constantly increasing, has not yet succeeded in catching up. Within a year or less, production in most fields should begin to come in balance with demand. Then the main danger of runaway inflation will be at an end. But until that point is reached, there is the possibility that if prices get out of hand they may rise faster than during the war itself. Remember that that is what happened after World War I and that the 1920-21 depression, while not the longest, was the sharpest in the nation's history. Our behavior now will decide whether we shall enter into a period of vast production and prosperity, or be caught in a post-war boom and depression as in 1920-21. Every American can help keep prices under control until increased supplies of goods appear in the shops by: (a) Spending prudently—carefully examining purchases to make sure we buy only what we need of goods that are still scarce. (b) Saving—for what we really want through savings bonds, insurance, and other savings. (c) Observing all existing price and rent regulations—refusing to pay Black Market prices. (Fact Sheet No. S-A)

Famine Emergency

Famine is raging in Europe and Asia. War has left chaos in its wake; in addition, a burning spreading drought of world-wide dimensions has wrecked previous estimates of food requirements and has brought already famished peoples to the very brink of death. Between now and July 1st, 500,000,000 children, women and men—and in this order—face starvation. A critical food situation in war-torn areas was anticipated many months ago, but conditions have now reached a state of crisis. In many areas the grain crop was only 50% of what had been anticipated. North Africa, which has exported grain to Europe since the days of Rome, has had the worst crop failure in 85 years. In much of Europe alone, city dwellers will get less than 1,500 calories a day in the months ahead. Many will get less than 1,000 calories a day; some less than 600 unless we help. United Nations Relief & Rehabilitation Administration considers 2,000 to 2,500 calories daily a minimum for safety. The present American consumption per person is estimated at 2,560 calories per day. Unless foreign govern-ments and UNRRA can buy minimum amounts of wheat, fats, and oils in the world market immediately to tide them over until the next harvest, famine, plague and death will desolate half the world. The "have" countries (Continued on next page)
including the United States, are the only ones that can halt death by starvation this Spring. Even certain “importing” countries are already helping to the limit of their ability. Estimated world wheat needs for the first half of 1946 amount to twenty million tons. Of this total, the United States and other exporting countries, through regulations already in effect, will make available eleven million tons. Our share of the remaining deficit of nine million tons can be made up only if Americans voluntarily reduce their consumption of wheat products drastically during the months of April, May and June. Urge everyone to SAVE AND SHARE—To make the maximum amount of needed food available for the relief of starving millions by—Reducing their consumption of all wheat and rice products and fats and oils—Eating more of the plentiful foods—Eliminating all food waste and turning in all used fats—Producing and preserving all food possible through home gardening and canning. (Fact Sheet No. 20-A)

Safety on the Highways

Slaughter on our highways is skyrocketing. Right now smash-ups have reached an all-time high of more than one a minute . . . all day . . . every day of the year. Last year traffic accidents killed 28,500, injured 921,500 more, according to the National Safety Council. That is more than a million traffic casualties a year. The cost in dollars was . . . $1,450,000,000 . . . almost 1½ billion dollars. In the four months after gas rationing ended, traffic deaths jumped 37%. Unless something is done about it, accidents will multiply alarmingly in coming months. Your station can help “put the brakes” on America’s rising traffic death toll. Make each listener realize he is a potential accident victim. Point out as specifically as time will allow the little, thoughtless chances he may be taking today . . . this week . . . jaywalking . . . trying to beat the light . . . speeding . . . driving when he has had a few drinks . . . neglecting repairs on his car . . . ignoring signals at crossings. Your aim is to make each listener decide right then and there never again to take even a “little” chance with injury or death. (Fact Sheet No. 15)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission during the week beginning Monday, May 20. They are subject to change.

Monday, May 20

Broadcast

To Be Held in Room 506, U. S. Coast Guard Building, 42 Broadway, New York City, New York

Monday, May 20

Television Broadcast

To Be Held in Room 324, Federal Building, Los Angeles, California

NEW—Hughes Productions, Division of Hughes Tool Co., 7000 Romaine St., Los Angeles, Calif.—For television facilities.

KSEF—Earle C. Anthony, Inc., 141 N. Vermont Ave., Los Angeles, Calif.—For television facilities.

KTSR—Don Lee Broadcasting System, 3800 Mount Lee Drive, Hollywood, Calif.—For television facilities.

NEW—National Broadcasting Co., Inc., Sunset Blvd. and Vine St., Los Angeles, Calif.—For television facilities.

NEW—American Broadcasting Co., Inc., Los Angeles, Calif.—For television facilities.

NEW—The Times-Mirror Co., Los Angeles, Calif.—For television facilities.

NEW—Television Productions, Inc., 5451 Marathon St., Hollywood, Calif.—For television facilities.

NEW—Dorothy S. Thackrey, Los Angeles, Calif.—For television facilities.

Monday, May 20

Broadcast

NEW—Frank R. Gibson, Lake Charles, La.—C. P. 1580 kc., 1 KW, unlimited, DA-night.

NEW—Roy Hofheintz and W. N. Hooper, a partnership d/b as Louisiana Broadcasting Co., New Orleans, La.—C. P. 1580 kc., 5 KW, unlimited, DA-night and day.

Tuesday, May 21

Oral Argument

Before the Commission En Banc

In the matter of rules relating to Section 214 of the Communications Act of 1934, as amended; Discontinuance, Reduction and Impairment.

Wednesday, May 22

Broadcast

KGA—Louis Wasmer, Spokane, Wash.—Renewal of License. 1510 kc., 10 KW, unlimited, DA-night.

Wednesday, May 22

Broadcast

NEW—Orlando Daily Newspapers, Inc., Orlando, Fla.—C. P. 990 kc., 5 KW, unlimited.

NEW—Frederick Wesley Mizer, Orlando, Fla.—C. P. 990 kc., 1 KW night, 1 KW day, unlimited, directional antenna.

Thursday, May 23

Broadcast

To Be Held at Lexington, Kentucky

NEW—The Central Kentucky Broadcasting Co., Lexington, Ky.—C. P. 1310 kc., 250 watts, unlimited.

Thursday, May 23

Broadcast

To Be Held in Court Room, County Court House at Newberry, South Carolina

Thursday, May 23

Broadcast

NEW—Lake Broadcasting Co., Inc., 6th and Broadway, Gary, Ind.—C. P. 1560 kc., 500 watts night, 1 KW day, unlicensed. (Continued on next page)
AM APPLICATIONS GRANTED

NEW—Carroll-Grayson Broadcasting Corp., Galax, Va.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time; site to be determined. (B2-P-4521)

NEW—John P. Rabb, Lenoir, N. C.—Granted construction permit for a new station to operate on 1340 kc., 250 watts, unlimited time; site to be determined. (B3-P-4585)

NEW—The Corbin Times-Tribune, Inc., Corbin, Ky.—Granted construction permit for a new station to operate on 1400 kc., 250 watts, unlimited time; site to be determined. (B2-P-4560)

NEW—Thomas Maxie Self, et al., d/b as The Progressive Broadcasting Co., Paragould, Ark.—Granted construction permit for a new station to operate on 1490 kc., 250 watts, unlimited time; site to be determined. (B3-P-4673)

NEW—Evanston Broadcasting Co., Evanston, Ill.—Granted construction permit for a new station to operate on 1590 kc., 1 KW, daytime only; site to be determined. (B1-P-4600)

NEW—H. M. Suthard and P. M. Mullins, d/b as Mayfield Broadcasting Co., Mayfield, Ky.—Granted CP for a new station to operate on 1320 kc., 1 KW, daytime. (B2-P-4509)

FM CONDITIONAL GRANTS

10.8 KW aural power; antenna height: 772 ft. (B1-PCT-153)

NEW—Raytheon Mfg. Co., Waltham, Mass.—Granted CP for new commercial television station; Channel No. 2, 64-60 mc.; visual power: 166.68 KW; aural power: 30.70 KW; antenna height: 373 ft. (B1-PCT-102)

NEW—The Outlet Co., Providence, R. I.—Granted CP for new commercial television station; Channel No. 11, 198-201 mc.; visual and aural power: 50 KW; antenna height 420 ft. (B1-PCT-87; Docket 7363)

NEW—The A. S. Abell Co., Baltimore, Md.—Granted CP for new commercial television station; Channel No. 2, 64-60 mc.; visual and aural power: 17.1 KW; antenna height 397.4 ft. (B1-PCT-167)

NEW—National Broadcasting Co., Inc., Cleveland, Ohio—Granted CP for new commercial television station; Channel No. 4, 66-72 mc.; visual power 19 KW; aural power 19.5 KW; antenna 568 ft. (B2-PCT-25; Docket 7294)

NEW—Harens & Martin, Inc., Richmond, Va.—Granted CP for new commercial television station; Channel No. 3, 60-66 mc.; visual power: 12.16 KW; aural power 6.4 KW; antenna height 465.0 ft. (B2-PCT-20)

NEW—KSTP, Inc., St. Paul, Minn.—Granted CP for new commercial television station; Channel No. 5, 76-82 mc.; visual power 33.68 KW; aural power 6.48 KW; antenna 547.1 ft. (B4-PCT-130)

NEW—Intermountain Broadcasting Corp., Salt Lake City, Utah—Granted CP for new commercial television station; Channel No. 2, 54-60 mc.; visual power 13.2 KW; aural power 7 KW; antenna 542.4 ft. (B5-PCT-144)

NEW—Oregonian Publishing Co., Portland, Ore.—Granted CP for new commercial television station; Channel No. 4, 78-84 mc.; visual power 10.0 KW; aural power 11.2 KW; antenna 984 ft. (B5-PCT-129)

FM FINAL CP'S GRANTED

The following stations which have received Engineering Approval, were granted regular construction permits:

WKBH, Inc., LaCrosse, Wis.—CP for Rural station; 92.1 mc. (Channel #221); 40.2 KW; antenna 661 ft.

Green Bay Newspaper Co., Green Bay, Wis.—CP for Metropolitan station; 101.1 mc. (Channel #206); 105 KW; antenna 429 ft.

Louis G. Baltimore, Wilkes-Barre, Pa.—CP for Metropolitan station; 105.7 mc. (Channel #279); 2.2 KW; antenna 1154 ft.

Reno Newspapers, Inc., Reno, Nev.—CP; 100.5 mc. (No. 268); 3.7 KW; antenna 574 ft.

Radio Sales Corp., Seattle, Wash.—CP for Rural station; 93.5 mc. (Channel 228); 14.7 KW; antenna 993 ft.

Fla. Broadcasting Corp., Jacksonville, Fla.—CP for Metropolitan station; 95.5 mc. (Channel 249); 20 KW; antenna 300 ft.

Isle of Dreams Broadcasting Co., Miami, Fla.—CP for Metropolitan station; 97.5 mc. (Channel 248); 34.0 KW; antenna 346 ft.

Textile Broadcasting Co., Greenville, S. C.—CP for Rural station; 93.3 mc. (Channel 227); 46.6 KW; 1175 ft. antenna.

ENGINEERING APPROVAL OF FM CONDITIONAL GRANTS

Following is a list of applications for which approval of base engineering plans were granted by the Commission.

(Note: Power given is effective radiated power; antenna height given is height above average terrain):

Intermountain Broadcasting Corp., Salt Lake City, Utah— Metropolitan; 98.5 mc. (No. 255); 12.2 KW; — 14 ft. antenna.

Rock Island Broadcasting Co., Rock Island, Ill.—Metropolitan; 100.7 mc. (No. 264); 29 KW; antenna 389 ft.

Piedmont Broadcasting Corp., Salisbury, N. C.—Metropolitan; 99.9 mc. (No. 260); 23.2 KW; antenna 274 ft.

Sunbury Broadcasting Corp., Sunbury, Pa.—Metropolitan; 99.3 mc. (No. 257); 3.4 KW; 871 ft. antenna.

A. Frank Katzenthine, Miami Beach, Fla.—Rural; 96.7 mc. (No. 244); 306 KW; antenna 730 ft.

Northside Broadcasting Corp., Louisville, Ky.—Metropolitan; 95.5 mc. (No. 263); 29.8 KW; antenna 955 ft.

WDOD Broadcasting Corp., Chattanooga, Tenn.—Rural; 95.3 mc. (No. 237); 37 KW; antenna 1321 ft.

WRK, Inc., Williamsport, Pa.—Metropolitan; 92.5 mc. (No. 225); 3.2 KW; antenna 1288 ft.

Mark E. Wilson, Chattanooga, Tenn.—Rural; 95.7 mc. (No. 239); 10.1 KW; antenna 1361 ft.

DESIGNATED FOR HEARING

The Central Conn. Broadcasting Co., New Britain, Conn.— Designated for hearing application for a new station to operate on 910 kc., 5 KW, unlimited time; Docket 749 (B1-PCT-146)

Dan B. Shields, d/b as Utah Valley Broadcasting Co., Provo, Utah; Lester R. Taylor, tr/a Mid-Utah Broadcasting Co., Provo, Utah—Designated for hearing in a consolidated proceeding the application of Utah Valley Broadcasting Co. (B5-P-4993) and application of Mid-Utah Broadcasting Co. (B5-P-1744), both seeking to operate on frequency 1450 with 250 watts, unlimited time.

Kelly Bell, Nacogdoches, Texas; Wilbur Courtland Fout, Nacogdoches, Texas—Designated for hearing in a consolidated proceeding the applications of Kelly Bell (B3-P-4718) and Wilbur Courtland Fout (B3-P-4779), for new stations to operate on 1230 kc., 250 watts, unlimited time.

Panhandle Broadcasting Corp., Amarillo, Texas; Texas Telecasting Corp., Amarillo, Texas—Designated for hearing in a consolidated proceeding the applications of Panhandle Broadcasting Corp. (B3-P-4755) and Texas Telecasting Corp. (B3-P-4775) for new stations to operate on frequency 1250 kc., 250 watts, unlimited time.

Robin Weaver, tr/a Grenada Broadcasting Co., Granada, Miss.; Birney Imes, Jr., Grenada, Miss.—Designated for hearing in a consolidated proceeding the applications of Grenada Broadcasting Co. (B3-P-4708) and Birney Imes, Jr., for new stations to operate on 1400 kc., with 250 watts, unlimited time (B3-P-4773).

Mary A. Petru, et al., d/b as Port Arthur Broadcasting Co., a partnership, Port Arthur, Texas: Harry Francis Burke, et al., d/b as Lake Shore Broadcasting Co., Port Arthur, Texas—Designated for hearing in a consolidated proceeding the applications of Port Arthur Broadcasting Co. (B3-P-1670) and Lake Shore Broadcasting Co. (B3-P-4777), for new stations to operate on 1310 kc., 250 watts, unlimited time.

South Plains Broadcasting Co., Lubbock, Texas; Julius R. Mooney, d/b as Hub Broadcasting Co., Lubbock, Texas—Designated for hearing in a consolidated proceeding the applications of South Plains Broadcasting Co. (B3-P-4742) and Hub Broadcasting Co. (B3-P-4772), both requesting the same facilities—1450 kc., 250 watts, unlimited time.

Universal Broadcasting Co., Hazard, Ky.—Designated for hearing application of Universal Broadcasting Co. (B2-P-4778) for a new station to operate on 1310 kc., 250 watts, unlimited time, in the consolidated proceeding with applications of The Hazard Broadcasting System and Bullard Metcomp and Goodlette, which request the same facilities at Hazard and have heretofore been designated for hearing in a consolidated proceeding, and ordered that the Hills of Particulars heretofore issued in these proceedings be amended to include application of Universal Broadcasting Co.

Forest City Broadcasting Co., Cleveland, Ohio; Western Reserve Broadcasting Co., Cleveland, Ohio—Designated for hearing application of Forest City Broadcasting Co. (B2-P-4776) and Western Reserve Broadcasting Co.

(Continued on next page)
Co. (B2-P-4760) for new stations to operate on 1490 kc., 250 watts, unlimited time, in a consolidated proceeding together with applications of Chester E. Daly, Samuel R. Sargus, and Cuyahoga and Clayhollow, all requesting the same facilities and heretofore designated for hearing in a consolidated proceeding, and ordered that the Bills of Particulars heretofore issued in these applications be amended to include these other corporations.

I & E Broadcasting Co., Dayton, Ohio; Paul F. Braden, Middletown, Ohio—Designated applications (B2-PCT-166) requesting Channel No. 13, 210-216 mc, visual power 16 KW, aural power 17 KW, antenna 225 ft., for consolidated hearing with application of The Toledo Blade Co. (B2-PCT-173), requesting Channel No. 13, 210-216 mc; visual power 16.4 KW, aural: 15.6 KW, Nathan Schwartz, Chicago, Ill.—Designated application (B4-PH-945) for hearing in a consolidated proceeding with applications of Agr. Broadcasting Co., et al. (Dockets 725-735), for new FM stations in Chicago; and amended order heretofore issued to include this application. (B4-PH-943)

III. Valley Broadcasting Co., Peoria, III.—Designated application (B4-PH-938) for hearing in a consolidated proceeding with applications of Peoria Broadcasting Co., et al. (Docket 7102-7106 and 7108) for new FM stations in Peoria, and amended order heretofore issued in the consolidated proceedings to include the application of III. Valley Broadcasting Co.

Unity Corp., Inc., Mansfield, Ohio; Richland, Inc., Mansfield, Ohio; Mansfield Journal Co., Mansfield, Ohio—Ordered that these applications (B2-PH-560; B2-PH-567 and B2-PH-728), be designated for hearing in a consolidated proceeding.

MISCELLANEOUS ACTIONS

WADC—Allen T. Simmons, Akron, Ohio— Adopted an order granting motion for reconsideration of the Commission's orders of Feb. 1, 1946, granting a conditional authorization to the WGR Broadcasting Co. (WGR), to use frequency 1220 kc., with 50 KW power, unlimited time, and set aside and vacated that conditional authorization granted WGR. (B2-P-3942)

Coast Ventuera Co., Ventura, Cal.— Granted petition for leave to amend its application (B5-P-3725; Docket 6383) for construction permit, so as to show the transfer of all the stock held by David H. Cannon to other stockholders in the corporation; show Mr. Cannon's complete withdrawal from the corporation, and make other changes, and ordered a further hearing on this application to be held in Washington.

Fort Orange Broadcasting Co., Inc., Albany, N. Y.— Granted petition for continuance of consolidated hearing now scheduled for May 13, and continued same to October 14, 1946, in re its application and that of Albany Broadcasting Co., Inc., and Van Curler Broadcasting Corp. (Dockets 6947, 6946, 7173)

KFMB—Jack Gross Broadcasting Co., San Diego, Cal.— Ordered that the application of KFMB for a construction permit to change frequency from 1450 to 1440 kc., and increase power from 500 watts to 1 KW, daytime only, be dismissed without prejudice to the filing of a petition for rehearing after the conclusion in the proceeding in Docket No. 67-1. (B5-P-4415)

WAPO, WAEA, W4XCT, etc.—Joda Patterson, Ramon G. Patterson, and Louis Patterson Pursley, d/b as WAPO Broadcasting Service (Assignor), Ramon G. Patterson, et al., Executor, and Louise Patterson Pursley, Executrix of the Estate of Joda Patterson, deceased, d/b as WAPO Broadcasting Service (Assignee), Chattanooga, Tenn.— Granted consent to involuntary assignment of license of standard station WAPO, and associate relay station WAEA, developmental station WAAT and FM conditional grant, from Joda Patterson, et al., to Ramon G. Patterson, Louise Patterson Pursley, Ramon G. Patterson, Executor, and Louise Patterson Pursley, Executrix of the estate of Joda Patterson, deceased, d/b as WAPO Broadcasting Service. No monetary consideration. (B3-AL-524, B3-ALRY-34, B3-ALRY-35, B3-ALRY-33, B3-ALRY-34)

WASC—Lehigh Valley Broadcasting Co., Allentown, Pa.— Granted construction permit to increase power from 500 watts to 5 KW, install a new transmitter and DA for nighttime use, subject to approval of proposed antenna. (B2-P-4147)

Missionary Society of St. Paul the Apostle, New York City— Adopted an order denying requests for issuance of sub-poeuna deuces tuecam for William T. Oliver, without prejudice however, to the right of the Missionary Society of St. Paul the Apostle to renew its request in compliance with Sec. 1.172 of the Commission's Rules. Also denied request insofar as it relates to issuance of sub-poeuna deuces tuecam for Morris Zinneman for the production of an "itemized statement" covering all investments made from January 1, 1935, to December 31, 1945, by Arde Bulova and his associates in various radio stations.

KSWO—Okla. Quality Broadcasting Co., Lawnton, Okla.— Granted CP to change frequency from 1150 to 1380 kc., increase power from 250 watts to 1 KW, increase hours of operation from daytime to unlimited, install new transmitter and DA for nighttime use, and change transmitter location. (B3-P-4272)

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.— Granted CP to increase power from 500 watts to 1 KW night, and install DA for nighttime use, operating on 1410 kc., 1 KW day, unlimited time. (B3-P-4356)

WSAZ—WASZ, Inc., Huntington, W. Va.— Granted CP for increase in power from 1 KW day and night, DA at night to 5 KW day, 1 KW night, DA-N, install a new transmitter, operating on 950 kc. (Comm. Durr voted for hearing).

KNEI—New Iberia Broadcasting Co., New Iberia, La.— Granted request to change call letters of new station from KNEI to KANE.

Gardner Broadcasting Co., Gardner, Mass.— Adopted an order denying petition requesting that its application for a new station to operate on 1230 kc., 250 watts, unlimited time (B1-P-4770), be designated for hearing in a consolidated proceeding with applications of Mitchell G. Meyers, et al.

WAKR—Summit Radio Corp., Akron, Ohio— Denied petition requesting that its application (Docket 7214), for a CP to modify its grant, be reconsidered and granted without hearing.

Syracuse Broadcasting Corp., Syracuse, N. Y.— Adopted an order granting petition for severance of its application (B3-P-4414; Docket 6912) from the application of WERE, and granted application for a new station to operate on 1260 kc., 5 KW, unlimited time, DA-N, subject to approval of proposed antenna by the CAA.

(Continued on next page)
WEAU—Central Broadcasting Co., Eau Claire, Wis.—Denied petition for review by a forum of the Commission of the ruling of the Presiding Officer of the Motions Docket on April 30 granting petition of KTOK, Inc., to intervene in hearing on May 1 on application of applicant, and affirmed the action of said Presiding Officer.

Mitchell G. Meyers, a partnership, Waterbury, Conn.—Granted petition for reconsideration, severance and grant of application for a new station, and adopted an order granting CP for a new station to operate on 1240 kc., 250 watts, unlimited time, subject to the applicant’s filing with the Commission within 60 days from date of this action, application for modification of permit specifying a transmitter site and antenna system meeting the Commission’s standards of good engineering practice. (B1-P-4963; Docket 6855)

New England Broadcasting Co., Worcester, Mass.—Granted petition for severance from consolidated proceeding and grant of application for a new station, and adopted an order granting CP to operate on 1240 kc., 250 watts, unlimited time, subject to applicant’s filing with the Commission within 60 days from date of this action, application for modification of permit specifying a transmitter site and antenna system meeting the Commission’s standards of good engineering practice.

MAY 20, 1946 — 398

Darrold Alexander Cannan, tr/ as Wichtex Broadcasting Co., 7216) for a CP to increase power of station WEAU (B1-P-4190; Docket 7061)

C. A. Kaufman and John F. Clarkson, d/b as Newberry Broadcasting Co., Newbury, S. C.—Adopted an order granting petition to remove from hearing docket and grant application for a new station, and granted CP to operate on 1240 kc., 250 watts, unlimited time. (B5-P-4427; Docket 7061)

KANS—The KANS Broadcasting Co. (Assignor), Kansas Broadcasting, Inc. (Assignee), Wichita, Kans.—Granted consent to voluntary assignment of license (Comm. Durr voting for hearing) of station KANS from the KANS Broadcasting Co. to Kansas Broadcasting, Inc., for a consideration of $400,000 (plus or minus) composed of $50,000 on deposit in escrow to be applied as liquidated damages if proposed assignee does not execute the terms of the agreement, plus $350,000 to be paid within 20 days after Commission approval. (B4-AL-514)

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Granted CP to increase power from 1 to 5 KW, DA, unlimited time on present assignment 1330 kc. (Comm. Durr voting for hearing).

KQH—Louis Wasmer, Inc., Spokane, Wash.; KGA—Louis Wasmer, Spokane, Wash.—Adopted an order cancelling hearing on applications for renewals of licenses (Dockets 6012 and 6013), removed applications from hearing and granted KQH renewal for period ending May 1, 1949, and KGA for the period ending May 1, 1948. (B5-R-76 and B5-R-74)

Norwich Broadcasting Co., a partnership, composed of H. Ross Perkins and J. Eric Williams, Norwich, Conn.—Granted petition for leave to amend application for a new station to specify 1100 kc. instead of 1240 kc., 250 watts, unlimited time, severance from consolidated proceeding and grant; and the Commission adopted an order granting application as amended, for a new station to operate on 1100 kc., 250 watts, unlimited time, subject to the applicant’s filing with the Commission, within 60 days from date of action, application for modification of CP specifying a transmitter site and antenna system meeting the Commission’s standards of good engineering practice, and provided further that applicant install frequency and modulation monitors of approved type when such become available, and further that the transmitter be constructed and operated in accordance with the Commission’s standards of good engineering practice concerning standard broadcast stations. (B1-P-2970; Docket 6588)

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Denied petition to remove its application (B4-P-4312; Docket 7216) for a CP to increase power of station WEAU to 5 KW day and night without change in antenna system, from the hearing docket, reconsider and grant same.
